INVESTOR PRESENTATION

March 2016

FORWARD LOOKING STATEMENTS AND NON-GAAP FINANCIAL MEASURES

Denny's Corporation urges caution in considering its current trends and any outlook on earnings disclosed in this presentation. In addition, certain matters discussed may constitute forward-looking statements. These forward-looking statements, which reflect the Company's best judgment based on factors currently known, are intended to speak only as of the date such statements are made and involve risks, uncertainties, and other factors that may cause the actual performance of Denny's Corporation, its subsidiaries and underlying restaurants to be materially different from the performance indicated or implied by such statements. Words such as "expects", "anticipates", "believes", "intends", "plans", "hopes", and variations of such words and similar expressions are intended to identify such forward-looking statements. Except as may be required by law, the Company expressly disclaims any obligation to update these forward-looking statements to reflect events or circumstances after the date of this presentation or to reflect the occurrence of unanticipated events. Factors that could cause actual performance to differ materially from the performance indicated by these forward-looking statements include, among others: the competitive pressures from within the restaurant industry; the level of success of the Company's operating initiatives, advertising and promotional efforts; adverse publicity; health concerns arising from food-related pandemics, outbreaks of flu viruses, such as avian flu, or other diseases; changes in business strategy or development plans; terms and availability of capital; regional weather conditions; overall changes in the general economy, particularly at the retail level; political environment (including acts of war and terrorism); and other factors from time to time set forth in the Company's SEC reports, including but not limited to the discussion in Management's Discussion and Analysis and the risks identified in Item 1A. Risk Factors contained in the Company's Annual Report on Form 10-K for the year ended December 30, 2015 (and in the Company's subsequent quarterly reports on Form 10-Q).

The presentation includes references to the Company's non-GAAP financials measures. The Company believes that, in addition to other financial measures, Adjusted Income Before Taxes, Adjusted EBITDA, Free Cash Flow, Adjusted Net Income and Adjusted Net Income Per Share are appropriate indicators to assist in the evaluation of its operating performance on a period-to-period basis. The Company also uses Adjusted Income Before Taxes, Adjusted EBITDA and Free Cash Flow internally as performance measures for planning purposes, including the preparation of annual operating budgets, and for compensation purposes, including bonuses for certain employees. Adjusted EBITDA is also used to evaluate its ability to service debt because the excluded charges do not have an impact on its prospective debt servicing capability and these adjustments are contemplated in its credit facility for the computation of its debt covenant ratios. Free Cash Flow, defined as Adjusted EBITDA less cash portion of interest expense net of interest income, capital expenditures, and cash taxes, is used to evaluate operating effectiveness and decisions regarding the allocation of resources. However, Adjusted Income Before Taxes, Adjusted EBITDA, Free Cash Flow, Adjusted Net Income and Adjusted Net Income Per Share should be considered as a supplement to, not a substitute for, operating income, net income or other financial performance measures prepared in accordance with U.S. generally accepted accounting principles. See Appendix for non-GAAP reconciliations.

DENNY'S INVESTMENT HIGHLIGHTS

Consistently Growing Same-Store Sales	• System-wide same-store sales growth in 18 of last 19 quarters • Highest annual same-store sales growth in over a decade

1. Includes 53 operating weeks.
2. In the fourth quarter of 2011, we recorded an $89 million net deferred tax benefit from the release of a substantial portion of the valuation allowance on certain deferred tax assets. This release was primarily based on our improved historical and projected pre-tax income.
3. Tax adjustments for full year 2013, 2014 and 2015 use full year effective tax rate of 31.9%, 32.9% and 33.0%, respectively. Tax adjustments for full year 2011 and 2012 are calculated using the Company's full year 2012 effective tax rate of 36.4%.
4. Adjusted provision for income taxes based on effective income tax rate of 36.4% for full year ended Dec. 27, 2012 and excludes impact of net deferred tax benefit.
