DENNY'S CORPORATION

INVESTOR PRESENTATION

AUGUST THROUGH SEPTEMBER 2023

FORWARD-LOOKING STATEMENTS AND NON-GAAP FINANCIAL MEASURES

The Company urges caution in considering its current trends and any outlook on earnings disclosed either in this presentation or in its press releases. In addition, certain matters discussed in either this presentation or related press releases may constitute forward-looking statements. These forward-looking statements, which reflect management's best judgment based on factors currently known, are intended to speak only as of the date such statements are made and involve risks, uncertainties, and other factors that may cause the actual performance of Denny's Corporation, its subsidiaries, and underlying restaurants to be materially different from the performance indicated or implied by such statements. Words such as "expect", "anticipate", "believe", "intend", "plan", "hope", "will", and variations of such words and similar expressions are intended to identify such forward-looking statements. Except as may be required by law, the Company expressly disclaims any obligation to update these forward-looking statements to reflect events or circumstances after the date this presentation was published or to reflect the occurrence of unanticipated events. Factors that could cause actual performance to differ materially from the performance indicated by these forward-looking statements include, among others: economic, public health and political conditions that impact consumer confidence and spending; commodity and labor inflation; the ability to effectively staff restaurants; the Company's ability to maintain adequate levels of liquidity for its cash needs, including debt obligations, payment of dividends, planned share repurchases and capital expenditures as well as the ability of its customers, suppliers, franchisees and lenders to access sources of liquidity to provide for their own cash needs; competitive pressures from within the restaurant industry; the Company's ability to integrate and derive the expected benefits from its acquisition of Keke's Breakfast Cafe; the level of success of the Company's operating initiatives and advertising and promotional efforts; adverse publicity; health concerns arising from food-related pandemics, outbreaks of flu viruses or other diseases; changes in business strategy or development plans; terms and availability of capital; regional weather conditions; overall changes in the general economy (including with regard to energy costs), particularly at the retail level; political environment and geopolitical events (including acts of war and terrorism); and other factors from time to time set forth in the Company's SEC reports and other filings, including but not limited to the discussion in Management's Discussion and Analysis and the risks identified in Item 1A. Risk Factors contained in the Company's Annual Report on Form 10-K for the year ended December 28, 2022 (and in the Company's subsequent Quarterly Reports on Form 10-Q and Current Reports on Form 8-K).

The presentation includes references to the Company's non-GAAP financials measures. All such measures are designated by an asterisk (*). The Company believes that, in addition to U.S. generally accepted accounting principles (GAAP) measures, certain non-GAAP financial measures are appropriate indicators to assist in the evaluation of operating performance and liquidity on a period-to-period basis. The Company uses Adjusted EBITDA, Adjusted Free Cash Flow, Adjusted Net Income and Adjusted Net Income Per Share internally as performance measures for planning purposes, including the preparation of annual operating budgets, and for compensation purposes, including incentive compensation for certain employees. Adjusted EBITDA is also used in the calculation of financial covenant ratios in accordance with the Company's credit facility. Adjusted Free Cash Flow is also used as a non-GAAP liquidity measure by Management to assess the Company's ability to generate cash and plan for future operating and capital actions. Management believes that the presentation of Adjusted EBITDA, Adjusted Net Income, Adjusted Net Income Per Share and Adjusted Free Cash Flow provide useful information to investors and analysts about the Company's operating results, financial condition or cash flows. However, each of these non-GAAP financial measures should be considered as a supplement to, not a substitute for, operating income, net income, net income per share, net cash provided by (used in) operating activities, or other financial performance and liquidity measures prepared in accordance with U.S. generally accepted accounting principles. See Appendix for non-GAAP reconciliations to the following GAAP measures:

$ Millions *(except per share amounts)*	2018	2019	2020	2021	2022	YTD Jun 2023

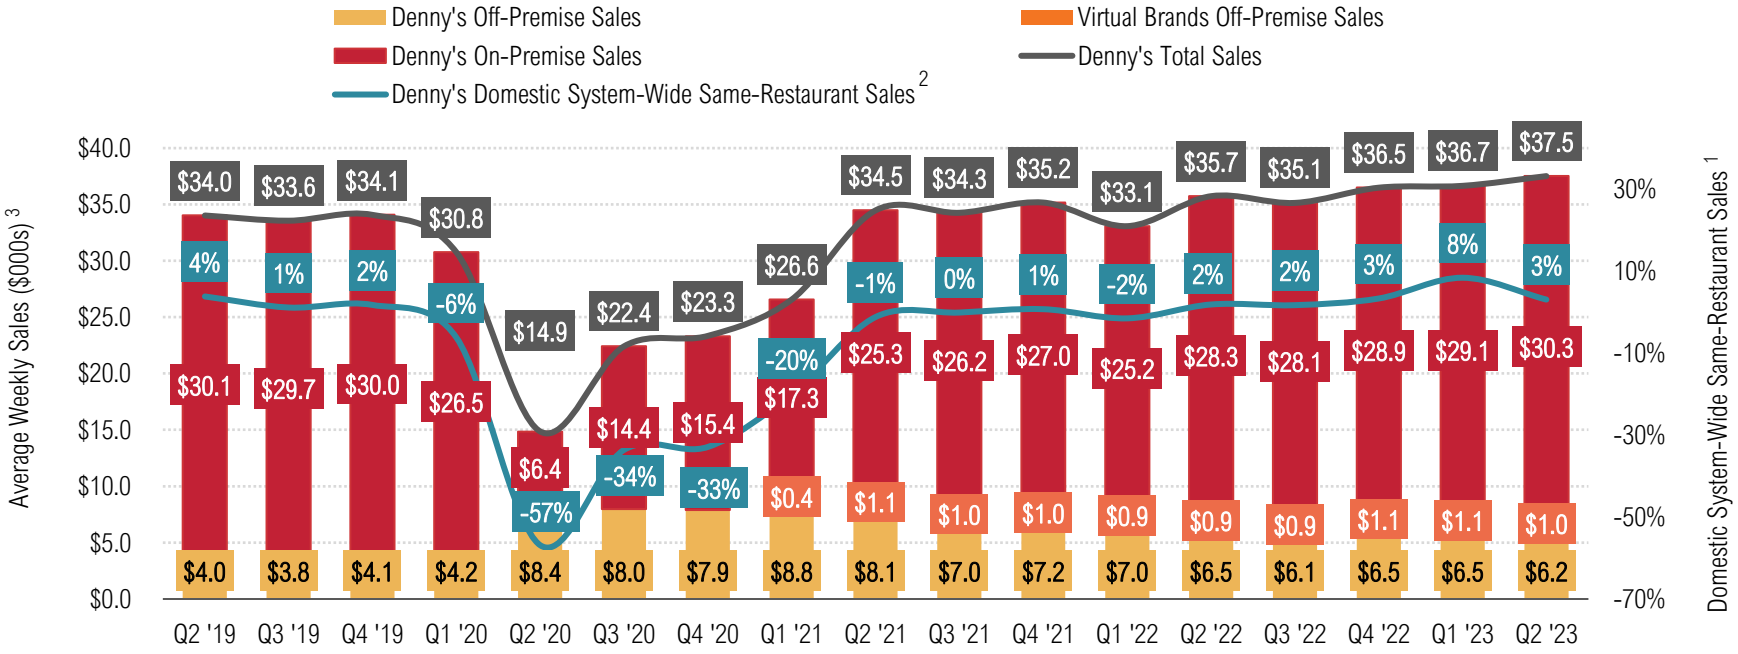
[1] Same-restaurant sales include sales at company restaurants and non-consolidated franchised and licensed restaurants that were open during the comparable periods noted. Total operating revenue is limited to company restaurant sales and royalties, advertising revenue, initial and other fees and occupancy revenue from non-consolidated franchised and licensed restaurants. Accordingly, domestic franchise same-restaurant sales and domestic system-wide same-restaurant sales should be considered as a supplement to, not a substitute for, the Company's results as reported under GAAP.

* See Appendix for reconciliation of Net Income (Loss) and Net Cash Provided by Operating Activities to Non-GAAP Financial Measures, as well as the reconciliation of Operating Income (Loss) to Non-GAAP Financial Measures.

DENNY’S INC.

DENNY'S DOMESTIC AVERAGE WEEKLY SALES[3] & SAME-RESTAURANT SALES[1]

Denny's Q2 '23 Domestic Average Weekly Sales Outperformed Q2 '22 by 4.9%



[1] Same-restaurant sales include sales at company restaurants and non-consolidated franchised and licensed restaurants that were open during the comparable periods noted. Total operating revenue is limited to company restaurant sales and royalties, advertising revenue, initial and other fees and occupancy revenue from non-consolidated franchised and licensed restaurants. Accordingly, domestic franchise same-restaurant sales and domestic system-wide same-restaurant sales should be considered as a supplement to, not a substitute for, the Company's results as reported under GAAP.

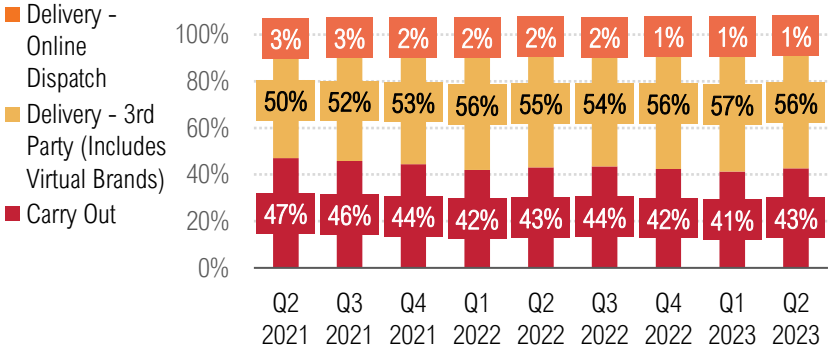
[2] 2021 and 2022 Denny's domestic system-wide same-restaurant sales [1] are versus 2019.

[3] Domestic average weekly sales reflect sales for company and franchised restaurants on Denny's proprietary point of sale (POS) system.

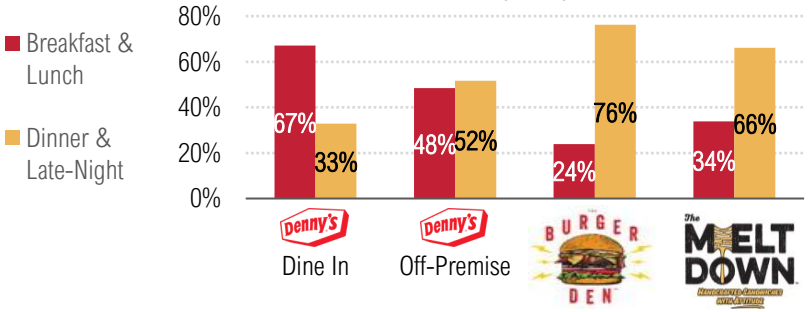
DENNY'S OFF-PREMISE SALES

Off-Premise Sales Over-Index At the Dinner & Late-Night Dayparts, Which Are More Popular With Younger Generations and More Diverse Guests.

Domestic Off-Premise Sales By Channel



Sales Mix by Daypart[1]



The Burger Den is currently active in over 1,190 domestic locations.

The Meltdown is currently active in over 990 domestic locations.

Sales Mix Weekday vs. Weekend[1]

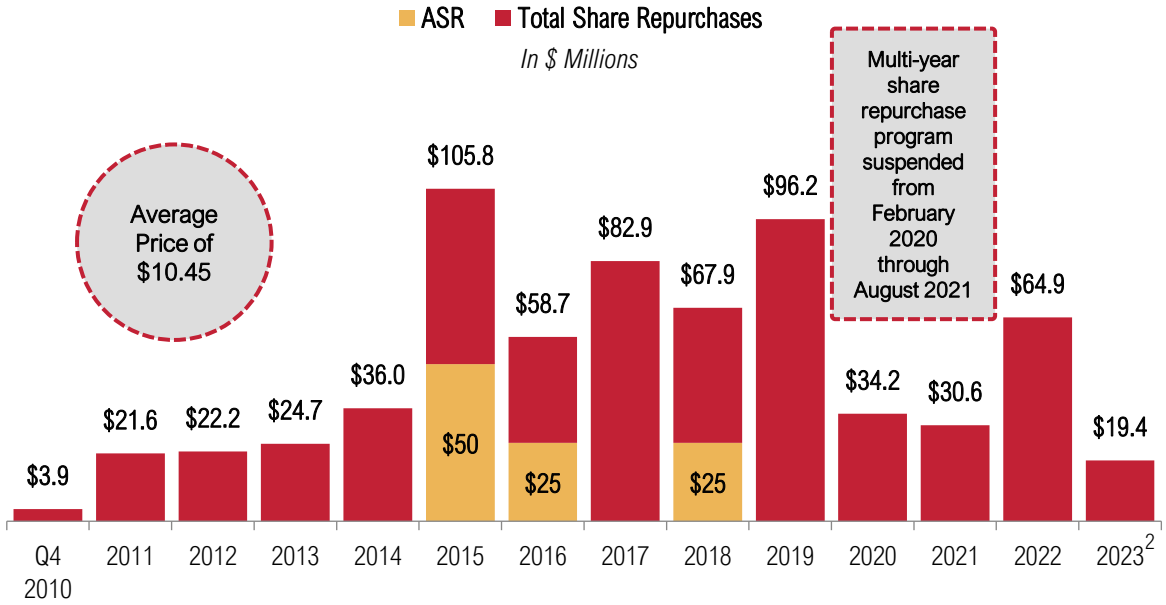
DENNY'S CORPORATION

HISTORY OF CONSISTENTLY RETURNING CAPITAL TO SHAREHOLDERS

Over $669 Million Allocated Towards Share Repurchases Since We Started Returning Capital to Shareholders in late 2010[1]

- During Q2 2023, we allocated approximately $10.4 million to share repurchases.
- Since late 2010[1], we have repurchased over 64 million shares at an average of $10.45 per share resulting in a 44% net reduction in our share count.
- Approximately $133 million remaining under existing repurchase authorization[2].

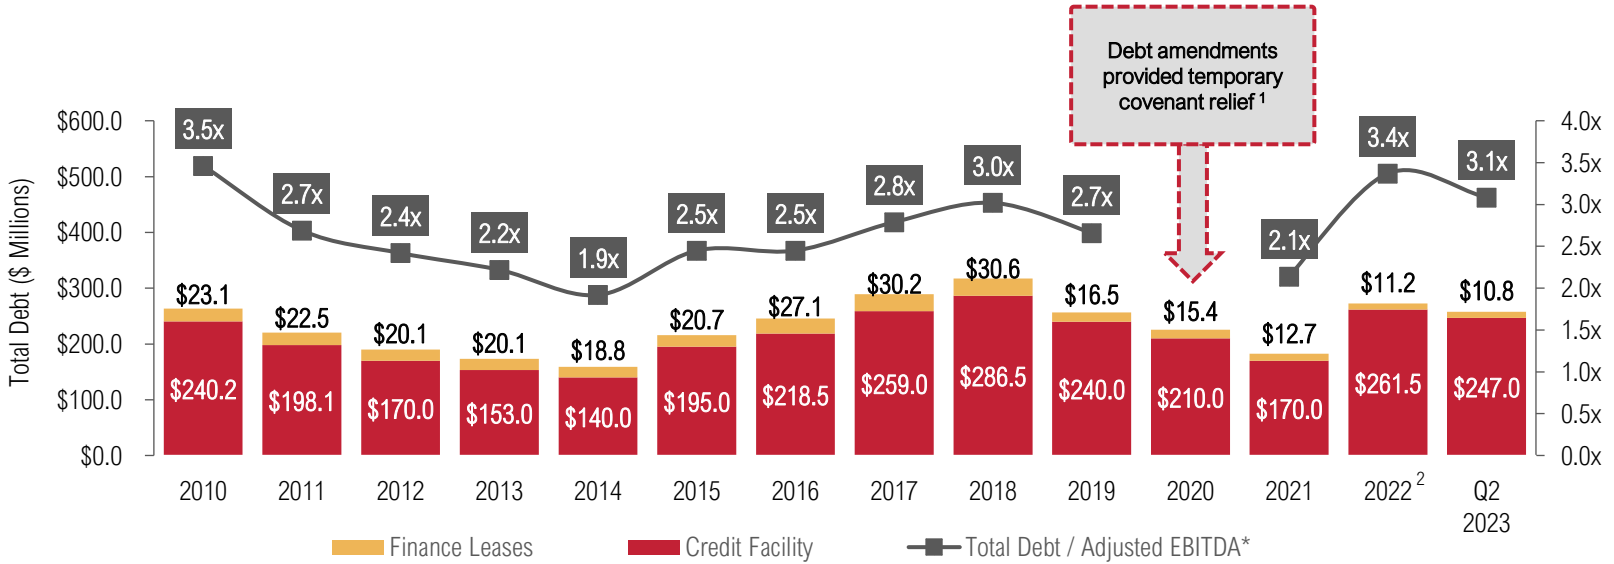


[1] Data from November 2010 through Fiscal June ended June 28, 2023.
[2] Data through Fiscal June ended June 28, 2023.

SOLID BALANCE SHEET WITH FLEXIBILITY

Disciplined Focus on Debt Leverage with Financial Flexibility to Make Brand Investments & Return Capital to Shareholders

Target Total Debt / Adjusted EBITDA* Leverage Ratio Range of 2.5x to 3.5x



[1] Total Debt / Adjusted EBITDA* leverage ratio was waived starting in Q2 '20 through Q1 '21.

[2] Increased borrowings under the credit facility in 2022 are primarily due to the Keke's acquisition.

* See Appendix for reconciliation of Net Income (Loss) and Net Cash Provided by Operating Activities to Non-GAAP Financial Measures, as well as the reconciliation of Operating Income (Loss) to Non-GAAP Financial Measures

STRATEGIC PRIORITES

C
- **C**reate leading edge solutions with technology & innovation

[2] Includes cash interest expense (income), net and cash payments of approximately $1.9 million, $3.3 million, $1.8 million and $0.2 million for dedesignated interest rate swap derivatives for full year 2020, 2021, 2022 and year-to-date 2023, respectively.

[3] For 2022, amount includes cash paid for capital expenditures and the acquisition of a Denny's franchise restaurant, and excludes capital paid for the acquisition of Keke's.

[4] Tax adjustments for full year 2018 use full year effective tax rates of 16.4%. Tax adjustments for the gains on sales of assets and other, net in 2019 are calculated using an effective rate of 25.7%. Tax adjustments for full year 2020, 2021, 2022 and year-to-date 2023 reflect an effective tax rate of 25.6%, 25.0%, 24.9%, and 25.8%, respectively.

RECONCILIATION OF OPERATING INCOME TO NON-GAAP FINANCIAL MEASURES

The Company believes that, in addition to GAAP measures, certain other non-GAAP financial measures are appropriate indicators to assist in the evaluation of restaurant-level operating efficiency and performance of ongoing restaurant-level operations. The Company uses Restaurant-level Operating Margin, Company Restaurant Operating Margin and Franchise Operating Margin internally as performance measures for planning purposes, including the preparation of annual operating budgets, and these three non-GAAP measures are used to evaluate operating effectiveness.

The Company defines Restaurant-level Operating Margin as operating income excluding the following three items: general and administrative expenses, depreciation and amortization, and operating (gains), losses and other charges, net. Restaurant-level Operating Margin is presented as a percent of total operating revenue. The Company excludes general and administrative expenses, which include primarily non-restaurant-level costs associated with support of company and franchised restaurants and other activities at their corporate office. The Company excludes depreciation and amortization expense, substantially all of which is related to company restaurant-level assets, because such expenses represent historical sunk costs which do not reflect current cash outlays for the restaurants. The Company excludes special items, included within operating (gains), losses and other charges, net, to provide investors with a clearer perspective of its ongoing operating performance and a more relevant comparison to prior period results.

Restaurant-level Operating Margin is the total of Company Restaurant Operating Margin and Franchise Operating Margin. The Company defines Company Restaurant Operating Margin as company restaurant sales less costs of company restaurant sales (which include product costs, company restaurant level payroll and benefits, occupancy costs, and other operating costs including utilities, repairs and maintenance, marketing and other expenses) and presents it as a percent of company restaurant sales. The Company defines Franchise Operating Margin as franchise and license revenue (which includes franchise royalties and other non-food and beverage revenue streams such as initial franchise and other fees, advertising revenue and occupancy revenue) less costs of franchise and license revenue and presents it as a percent of franchise and license revenue.

These non-GAAP financial measures provide a meaningful comparison between periods and enable investors to focus on the performance of restaurant-level operations by excluding revenues and costs unrelated to food and beverage sales in addition to corporate general and administrative expense, depreciation and amortization, and operating (gains), losses and other charges, net. However, each of these non-GAAP financial measures should be considered as a supplement to, not a substitute for, operating income, net income or other financial performance measures prepared in accordance with U.S. generally accepted accounting principles. Restaurant-level Operating Margin, Company Restaurant Operating Margin and Franchise Operating Margin do not accrue directly to the benefit of shareholders because of the aforementioned excluded items and are not indicative of the overall results for the Company.

$ Millions	2018	2019	2020[1]	2021	2022	YTD Jun 2023
