

DENNY'S CORPORATION

INVESTOR PRESENTATION

APRIL THROUGH JULY 2024

FORWARD-LOOKING STATEMENTS AND NON-GAAP FINANCIAL MEASURES

The Company urges caution in considering its current trends and any outlook on earnings disclosed either in this presentation or in its press releases. In addition, certain matters discussed in either this presentation or related press releases may constitute forward-looking statements. These forward-looking statements, which reflect management's best judgment based on factors currently known, are intended to speak only as of the date such statements are made and involve risks, uncertainties, and other factors that may cause the actual performance of Denny's Corporation, its subsidiaries, and underlying restaurants to be materially different from the performance indicated or implied by such statements. Words such as "expect", "anticipate", "believe", "intend", "plan", "hope", "will", and variations of such words and similar expressions are intended to identify such forward-looking statements. Except as may be required by law, the Company expressly disclaims any obligation to update these forward-looking statements to reflect events or circumstances after the date this presentation was published or to reflect the occurrence of unanticipated events. Factors that could cause actual performance to differ materially from the performance indicated by these forward-looking statements include, among others: economic, public health and political conditions that impact consumer confidence and spending; commodity and labor inflation; the ability to effectively staff restaurants and support personnel; the Company's ability to maintain adequate levels of liquidity for its cash needs, including debt obligations, payment of dividends, planned share repurchases and capital expenditures as well as the ability of its customers, suppliers, franchisees and lenders to access sources of liquidity to provide for their own cash needs; competitive pressures from within the restaurant industry; the Company's ability to integrate and derive the expected benefits from its acquisition of Keke's Breakfast Cafe; the level of success of the Company's operating initiatives and advertising and promotional efforts; adverse publicity; health concerns arising from food-related pandemics, outbreaks of flu viruses or other diseases; changes in business strategy or development plans; terms and availability of capital; regional weather conditions; overall changes in the general economy (including with regard to energy costs), particularly at the retail level; political environment and geopolitical events (including acts of war and terrorism); and other factors from time to time set forth in the Company's SEC reports and other filings, including but not limited to the discussion in Management's Discussion and Analysis and the risks identified in Item 1A. Risk Factors contained in the Company's Annual Report on Form 10-K for the year ended December 27, 2023 (and in the Company's subsequent Quarterly Reports on Form 10-Q and Current Reports on Form 8-K).

The presentation includes references to the Company's non-GAAP financials measures. All such measures are designated by an asterisk (*). The Company believes that, in addition to GAAP measures, certain non-GAAP financial measures are useful information to investors and analysts to assist in the evaluation of operating performance on a period-to-period basis. However, non-GAAP measures should be considered as a supplement to, not a substitute for, operating income, net income, and net income per share, or other financial performance measures prepared in accordance with GAAP. The Company uses adjusted EBITDA, adjusted net income and adjusted net income per share internally as performance measures for planning purposes, including the preparation of annual operating budgets, and for compensation purposes, including incentive compensation for certain employees. These non-GAAP measures are adjusted for certain items the Company does not consider in the evaluation of its ongoing core operating performance. These adjustments are either non-recurring in nature or vary from period to period without correlation to the Company's ongoing core operating performance. See Appendix for non-GAAP reconciliations to the following GAAP measures:

$ Millions *(except per share amounts)*	2018	2019	2020	2021	2022	2023	YTD Mar 2024

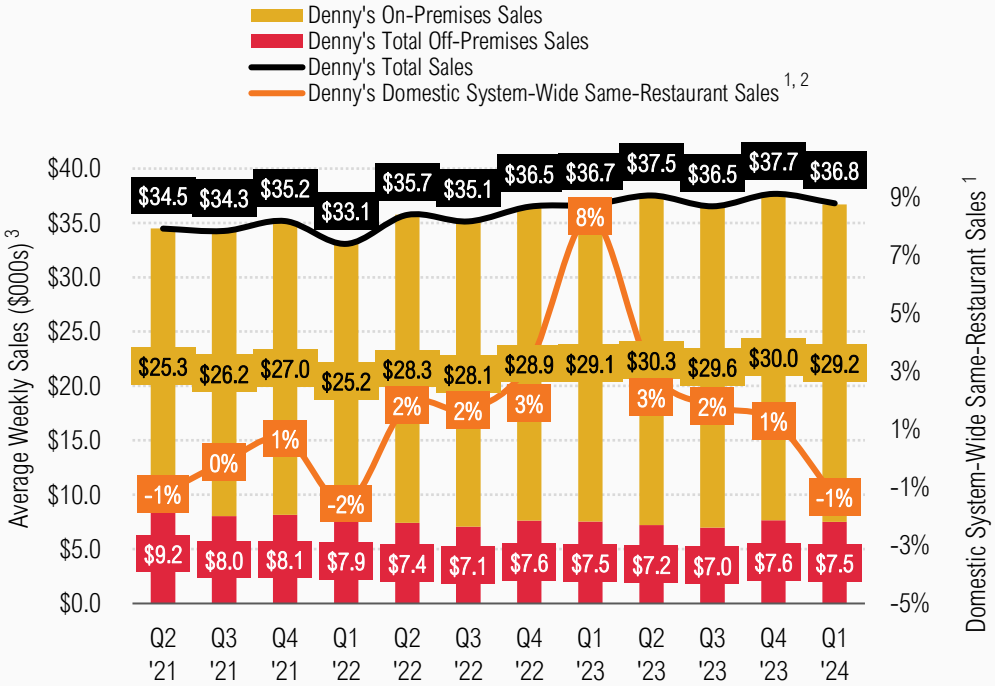
1 Same-restaurant sales include sales at company restaurants and non-consolidated franchised and licensed restaurants that were open during the comparable periods noted. Total operating revenue is limited to company restaurant sales and royalties, advertising revenue, initial and other fees and occupancy revenue from non-consolidated franchised and licensed restaurants. Accordingly, domestic franchise same-restaurant sales and domestic system-wide same-restaurant sales should be considered as a supplement to, not a substitute for, the Company's results as reported under GAAP.

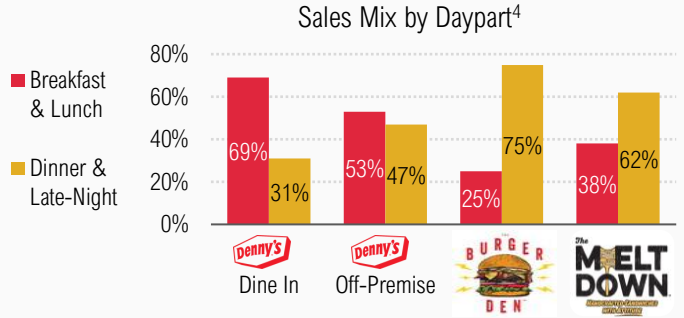
* See Appendix for reconciliation of Net Income (Loss) and Net Cash Provided by Operating Activities to Non-GAAP Financial Measures, as well as the reconciliation of Operating Income (Loss) to Non-GAAP Financial Measures.

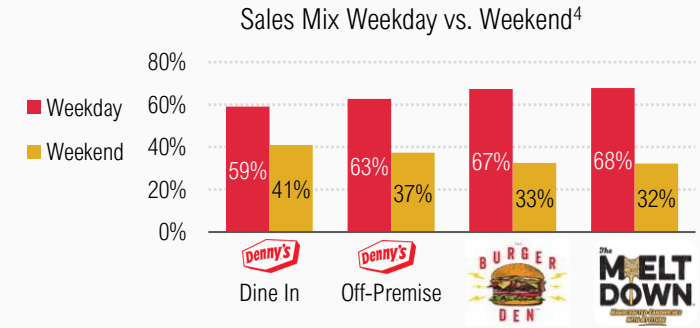
DENNY'S

DENNY'S DOMESTIC SALES

Denny's Q1 2024 Domestic Average Weekly Sales of Approximately $36,800.







1 Same-restaurant sales include sales at company restaurants and non-consolidated franchised and licensed restaurants that were open during the comparable periods noted. Total operating revenue is limited to company restaurant sales and royalties, advertising revenue, initial and other fees and occupancy revenue from non-consolidated franchised and licensed restaurants. Accordingly, domestic franchise same-restaurant sales and domestic system-wide same-restaurant sales should be considered as a supplement to, not a substitute for, the Company's results as reported under GAAP.

2 2021 and 2022 Denny's domestic system-wide same-restaurant sales[1] are versus 2019.

3 Domestic average weekly sales reflect sales for company and franchised restaurants on Denny's proprietary point of sale (POS) system.

4 Data for the Fiscal First Quarter 2024.

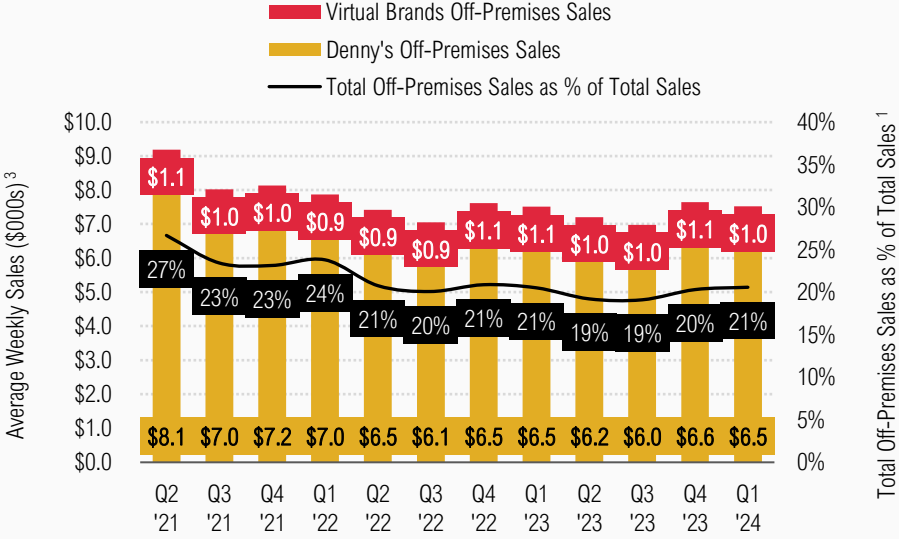
DENNY'S VALUE AND OFF-PREMISES SALES

Q1 2024 value messaging featured our Original Grand Slam starting at $5.99, while continuing to feature our signature Super Slam starting at $7.99.

Total value sales mix for Q1 2024 was 19%, up from 17% in Q4 2023.

The Burger Den and The Meltdown are currently active in over 1,200 and 1,100 domestic locations, respectively.

Banda Burrito was active in nearly 100 domestic locations during Q1 2024 with expansion to an additional 200+ domestic locations expected by the end of Q2 2024.



DENNY'S FOOTPRINT

Total of 1,385 Restaurants in the U.S. with Strongest Presence in California, Texas, Florida, and Arizona[1].

International Presence of 168 Restaurants in 14 Countries and U.S. Territories[1].

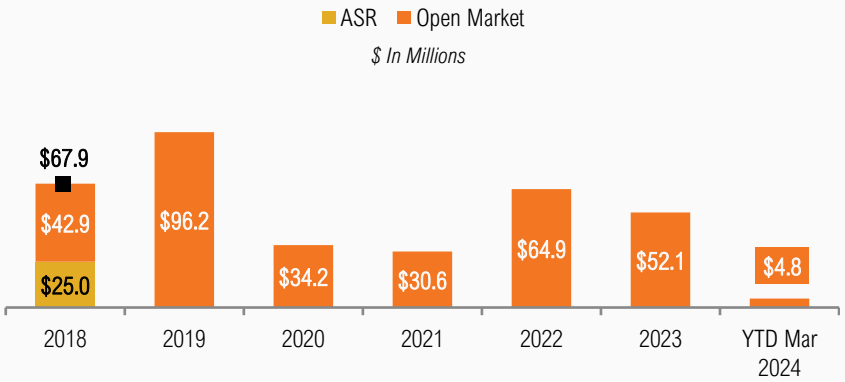
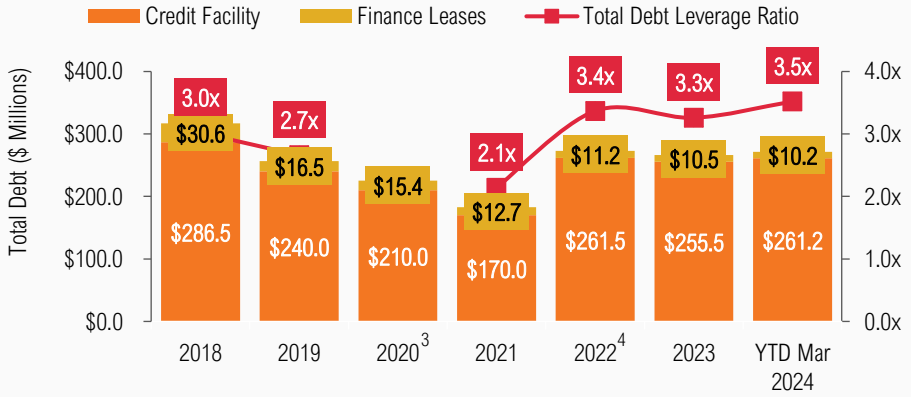
DENNY'S CORPORATION

SOLID BALANCE SHEET WITH FLEXIBILITY

Disciplined Focus on Debt Leverage with Financial Flexibility to Make Brand Investments & Return Capital to Shareholders

- During Q1 2024, allocated approximately $4.8 million to share repurchases[1].
- Allocated **over $700 million** towards share repurchases since program began in late 2010[2].
- Repurchased approximately 68 million shares at an average of $10.39 per share resulting in a 48% net reduction in share count[2].
- Approximately $97 million remaining under existing repurchase authorization[1].





1 Data through Fiscal March ended March 27, 2024. Includes 1% excise tax on the value of corporate share repurchases (net of issuance).
2 Data from November 2010 through Fiscal March ended March 27, 2024.
3 Total debt leverage ratio was waived starting in Q2 '20 through Q1 '21.
4 Increased borrowings under the credit facility in 2022 were primarily due to the Keke's acquisition.

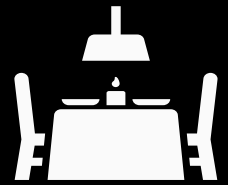
OUR CRAVE STRATEGIES

Create Leading Edge Solutions With Technology & Innovation

Robust New Restaurant Growth as the Franchisor of Choice

Assemble Best In Class People and Teams Through Culture, Tools & Systems

Validate & Optimize the Business Model to Maximize Restaurant Margins



Elevate Profitable Traffic Through the Guest Experience & Uniquely Craveable Food

3 Tax adjustments for full year 2018, 2019, 2020, 2021, 2022, 2023 and year-to-date 2024 reflect an effective tax rate of 16.4%, 25.7%, 25.6%, 25.0%, 24.9%, 25.0% and 24.6%, respectively.

RECONCILIATION OF OPERATING INCOME TO NON-GAAP FINANCIAL MEASURES

The Company believes that, in addition to GAAP measures, certain other non-GAAP financial measures are useful information to investors and analysts to assist in the evaluation of restaurant-level operating efficiency and performance of ongoing restaurant-level operations. However, non-GAAP measures should be considered as a supplement to, not a substitute for, operating income, net income, and net income per share, or other financial performance measures prepared in accordance with GAAP. The Company uses restaurant-level operating margin, company restaurant operating margin and franchise operating margin internally as performance measures for planning purposes, including the preparation of annual operating budgets, and for compensation purposes, including incentive compensation for certain employees. Restaurant-level operating margin is the total of company restaurant operating margin and franchise operating margin and excludes: (i) general and administrative expenses, which include primarily non-restaurant-level costs associated with support of company and franchised restaurants and other activities at their corporate office; (ii) depreciation and amortization expense, substantially all of which is related to company restaurant-level assets, because such expenses represent historical sunk costs which do not reflect current cash outlays for the restaurants; (iii) special items, included within operating (gains), losses and other charges, net, to provide investors with a clearer perspective of its ongoing operating performance and a more relevant comparison to prior period results. Company restaurant operating margin is defined as company restaurant sales less costs of company restaurant sales (which include product costs, company restaurant level payroll and benefits, occupancy costs, and other operating costs including utilities, repairs and maintenance, marketing and other expenses) and presents it as a percent of company restaurant sales. Adjusted company operating restaurant margin is defined as company restaurant operating margin less certain items such as legal settlement expenses, pre-opening expenses, and other items the Company does not consider in the evaluation of its ongoing core operating performance. Franchise operating margin is defined as franchise and license revenue (which includes franchise royalties and other non-food and beverage revenue streams such as initial franchise and other fees, advertising revenue and occupancy revenue) less costs of franchise and license revenue and presents it as a percent of franchise and license revenue. Adjusted franchise operating margin is defined as franchise operating margin less certain items the Company does not consider in the evaluation of its ongoing core operating performance. Adjusted restaurant-level operating margin is the total of adjusted company restaurant operating margin and adjusted franchise operating margin and is defined as restaurant-level operating margin adjusted for certain items the Company does not consider in the evaluation of its ongoing core operating performance. These adjustments are either non-recurring in nature or vary from period to period without correlation to the Company's ongoing core operating performance. See most recent press release for a further breakdown of adjusted restaurant-level operating margin.
