Forward-Looking Statements

Safe Harbor Statement

Any statements contained in this presentation that are not historical facts are "forward-looking statements." These statements are based on the current expectations of the management of the Company, only speak as of the date on which they are made and are subject to uncertainty and changes in circumstances.

The Company undertakes no obligation to update or revise forward-looking statements, whether as a result of new information, future events, or otherwise. As a general matter, forward-looking statements are those focused upon anticipated events or trends, expectations and beliefs relating to matters that are not historical in nature. The words "could," "should," "feel," "anticipate," "aim," "preliminary," "expect," "believe," "estimate," "intend," "intent," "plan," "will," "foresee," "project," "forecast," or the negative thereof or variations thereon, and similar expressions identify forward-looking statements. By their nature, forward-looking statements are not guarantees of future performance or results and involve risks and uncertainties because they relate to events and depend on circumstances that will occur in the future.

There are a number of factors that could cause actual results and developments to differ materially from those expressed or implied by such forward-looking statements. For a list of factors that could cause actual results to differ materially from those discussed or implied, please see the Company's periodic filings with the SEC, particularly those disclosed in "Risk Factors" in the Company's Annual Reports on Form 10-K. Any "forward-looking statements" in this presentation are intended to qualify for the safe harbor from liability under the Private Securities Litigation Reform Act of 1995.

Non-GAAP Measures

Adjusted net income, adjusted diluted net income per share ("Adjusted DEPS"), EBITDA, adjusted EBITDA, and free cash flows are financial measures that are not in accordance with U.S. Generally Accepted Accounting Principles ("GAAP"). For a reconciliation to the comparable GAAP numbers please see "Appendix – GAAP to Non-GAAP Reconciliation." Manitowoc believes these non-GAAP financial measures provide important supplemental information to both management and investors regarding financial and business trends used in assessing its results of operations. Manitowoc believes excluding specified items provides a more meaningful comparison to the corresponding reporting periods and internal budgets and forecasts, assists investors in performing analysis that is consistent with financial models developed by investors and research analysts, provides management with a more relevant measure of operating performance, and is more useful in assessing management performance.
