*1H 2023 and 2Q 2023 Revenues are preliminary and unaudited.*

## Non-IFRS Financial Measures

Zegna's management monitors and evaluates operating and financial performance using several non-IFRS financial measures including: adjusted earnings before interest and taxes ("Adjusted EBIT"), Adjusted EBIT Margin, revenues on a constant currency basis and revenues on an organic growth basis. Zegna's management believes that these non-IFRS financial measures provide useful and relevant information regarding Zegna's financial performance and financial condition, and improve the ability of management and investors to assess and compare the financial performance and financial position of Zegna with those of other companies. They also provide comparable measures that facilitate management's ability to identify operational trends, as well as make decisions regarding future spending, resource allocations and other strategic and operational decisions. While similar measures are widely used in the industry in which Zegna operates, the financial measures that Zegna uses may not be comparable to other similarly named measures used by other companies nor are they intended to be substitutes for measures of financial performance or financial position as prepared in accordance with IFRS.

Please see the Non-IFRS Financial Measures on Page 32 and 33 for further information on Non-IFRS Measures used in this presentation.

## Forward Looking Statements

This communication, including the sections "Group Key Highlights" and "Outlook", contains forward-looking statements that are based on beliefs and assumptions and on information currently available to the Company. In some cases, you can identify forward-looking statements by the following words: "may," "will," "could," "would," "should," "expect," "intend," "plan," "anticipate," "believe," "estimate," "predict," "project," "potential," "continue," "ongoing," "target," "seek" or the negative or plural of these words, or other similar expressions that are predictions or indicate future events or prospects, although not all forward-looking statements contain these words. Any statements that refer to expectations, projections or other characterizations of future events or circumstances, including strategies or plans, are also forward-looking statements. These statements involve risks, uncertainties and other factors that may cause actual results, levels of activity, performance, or achievements to be materially different from the information expressed or implied by these forward-looking statements. Although the Company believes that it has a reasonable basis for each forward-looking statement contained in this communication, the Company cautions you that these statements are based on a combination of facts and factors currently known and projections of the future, which are inherently uncertain. In addition, risks and uncertainties are described in the Company's filings with the SEC. These filings may identify and address other important risks and uncertainties that could cause actual events and results to differ materially from those contained in the forward-looking statements. Most of these factors are outside the Company's control and are difficult to predict. In light of the significant uncertainties in these forward-looking statements, you should not regard these statements as a representation or warranty by the Company and its directors, officers or employees or any other person that the Company will achieve its objectives and plans in any specified time frame, or at all. The forward-looking statements in this communication represent the views of Zegna as of the date of this communication. Subsequent events and developments may cause that view to change. However, while Zegna may elect to update these forward-looking statements at some point in the future, the Company disclaims any obligation to update or revise publicly forward-looking statements. You should, therefore, not rely on these forward-looking statements as representing the views of the Company as of any date subsequent to the date of this communication.

## Preliminary revenues

## Thom Browne

- 4 net store openings in 1H 2023 compared to end-2022, of which 3 are DTC, all located in APAC

## TOM FORD FASHION

- Adds 121 mono-brand stores of which 51 are directly operated

1. Monobrand store count includes our DOSs (which are divided into boutiques and outlets) and our Wholesale monobrand stores (including also monobrand franchisees)

2. Stores located in the Russian market (14 Zegna stores included in Wholesale EMEA at June 30th, 2022 and 9 Tom Ford Fashion stores in Wholesale) have been zeroed out starting from Dec 31, 2022. Although some stores may still be operating as of June 30th, 2023, they have not been supplied by Zegna and Tom Ford Fashion since February 2022 and have therefore been excluded from Group store count.

- **Revenues**

- Introduction of organic growth

- **P&L Format to change as of 1H 2023**

- A Statement of Profit and Loss presenting costs by functions (Cost of Sales, SG&A, Marketing) consistent with Zegna management's view and international practice, will replace the previous P&L structure with costs presented by nature (Labour Cost, Services, D&A, ..)
- The comparative P&L (at June 30, 2022) will be also reclassified and the old P&L structure will no longer be presented
- No changes in the Balance Sheet

- **Things to remember**

- Tom Ford Segment profitability this year to be impacted by PPA from the deal (mainly in relation to inventory and order backlog)
- Cost of warrant redemption
- Put options mark to market
- Number of shares post warrants redemption

## Medium-term Financial Ambitions (announced on May 17, 2022)

- Revenues to exceed €2 billion
- Adjusted EBIT Margin to reach at least 15% of revenues
- Excluding the Tom Ford Fashion segment

## Since then

- Mid-term defined as 2025
- TOM FORD FASHION business deal announced on November 15, 2022 and completed on April 28, 2023 – excluded from the above financial ambitions
- The Group expects that the forthcoming 1H 2023 and FY 2023 results will demonstrate it is on the trajectory to comfortably meet these targets, as shown by 1H 2023 revenues

***Assuming no further future escalation of the war in Ukraine, no significant macroeconomic deterioration, no further disruption linked to the COVID-19 pandemic in the Greater China Region or elsewhere, and no other unforeseen events.***

## Non-IFRS Financial Measures

Zegna's management monitors and evaluates operating and financial performance using several non-IFRS financial measures including: adjusted earnings before interest and taxes ("Adjusted EBIT"), Adjusted EBIT Margin, revenues on a constant currency basis and revenues on an organic growth basis. Zegna's management believes that these non-IFRS financial measures provide useful and relevant information regarding Zegna's financial performance and financial condition, and improve the ability of management and investors to assess and compare the financial performance and financial position of Zegna with those of other companies. They also provide comparable measures that facilitate management's ability to identify operational trends, as well as make decisions regarding future spending, resource allocations and other strategic and operational decisions. While similar measures are widely used in the industry in which Zegna operates, the financial measures that Zegna uses may not be comparable to other similarly named measures used by other companies nor are they intended to be substitutes for measures of financial performance or financial position as prepared in accordance with IFRS.

**Adjusted EBIT and Adjusted EBIT Margin.** Adjusted EBIT is defined as profit or loss before income taxes plus financial income, financial expenses, foreign exchange losses/(gains) and the result from investments accounted for using the equity method, adjusted for income and costs which are significant in nature and that management considers not reflective of underlying operating activities.

Adjusted EBIT Margin is defined as Adjusted EBIT divided by revenues of the applicable period.

Zegna's management uses Adjusted EBIT and Adjusted EBIT Margin for internal reporting to assess performance and as part of the forecasting, budgeting and decision-making processes as they provide additional transparency regarding Zegna's underlying operating performance. Zegna's management believes these non-IFRS financial measures are useful because they exclude items that management believes are not indicative of Zegna's underlying operating performance and allow management to view operating trends, perform analytical comparisons and benchmark performance between periods and among segments. Zegna's management also believes that Adjusted EBIT and Adjusted EBIT Margin are useful for investors and analysts to better understand how management assesses Zegna's underlying operating performance on a consistent basis and to compare Zegna's performance with that of other companies. Accordingly, management believes that Adjusted EBIT and Adjusted EBIT Margin provide useful information to third-party stakeholders in understanding and evaluating Zegna's operating results.

## Non-IFRS Financial Measures

**Constant Currency Revenues.** In addition to presenting our revenues on a current currency basis, we also present certain revenue information on a constant currency basis (Constant Currency), which excludes the effects of foreign currency translation from our subsidiaries with functional currencies different from the Euro.

We calculate Constant Currency revenues by applying the current period average foreign currency exchange rates to translate prior period revenues of foreign subsidiaries expressed in local functional currencies different than the Euro.

We use revenues on a Constant Currency basis to analyze how our underlying revenues have changed between periods independent of the effects of foreign currency translation.

Revenues on a Constant Currency basis are not a substitute for revenues on a current currency basis or any IFRS-related measures, however we believe that revenues excluding the impact of foreign currency translation provide additional useful information to management and to investors in analyzing and evaluating our revenues and operating performance.

**Organic growth Revenues.** In addition to presenting our revenues on a current currency basis, we also present certain revenue information on an organic growth basis (Organic Growth). Organic Growth is calculated as the change in revenues from period to period, excluding the effects of (a) foreign exchange, (b) acquisitions and disposals and (c) structural changes in license agreements where Zegna operates as a licensee.

In calculating Organic Growth, the following adjustments are made to revenues:

(a) foreign exchange: current period average foreign currency exchange rates are used to translate prior period revenues of foreign subsidiaries expressed in local functional currencies different than the Euro;

(b) acquisitions and disposals: revenues generated by entities, businesses or revenue-generating assets acquired or disposed of in the current year or prior year are excluded from both periods (acquisitions and disposals refer to share or asset deals or other changes in control of subsidiaries, associates or joint ventures);

(c) structural changes in license agreements where Zegna operates as a licensee: revenues generated from license agreements where Zegna operates as a licensee that experienced a structural change in the scope or perimeter in the current year or prior year are excluded from both periods, including changes to product categories, sales channels or geographies of the underlying license agreements.

We believe the presentation of Organic Growth is useful to better understand and analyze the underlying change in the Group's revenues from period to period on a consistent perimeter and constant currency basis.

Revenues on an Organic Growth basis are not a substitute for revenues on a current currency basis or any IFRS-related measures, however we believe that revenues excluding the effects of (a) foreign exchange, (b) acquisitions and disposals and (c) structural changes in license agreements where Zegna operates as a licensee provide additional useful information to management and to investors in analyzing and evaluating our revenues and operating performance.

- (1) y o y: used to refer to year on year growth rate. All growth rates are at actual currency
- (2) Growth rates in this presentation are year on year unless specified differently
