Genco Shipping & Trading Limited

Fearnley Securities Non-Deal Investor Presentation

NYSE:GNK

June 2021

Forward Looking Statements

"Safe Harbor" Statement Under the Private Securities Litigation Reform Act of 1995

This presentation contains forward-looking statements made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements use words such as “anticipate,” “budget,” “estimate,” “expect,” “project,” “intend,” “plan,” “believe,” and other words and terms of similar meaning in connection with a discussion of potential future events, circumstances or future operating or financial performance. These forward-looking statements are based on our management’s current expectations and observations. Included among the factors that, in our view, could cause actual results to differ materially from the forward looking statements contained in this report are the following: (i) declines or sustained weakness in demand in the drybulk shipping industry; (ii) continuation of weakness or declines in drybulk shipping rates; (iii) changes in the supply of or demand for drybulk products, generally or in particular regions; (iv) changes in the supply of drybulk carriers including newbuilding of vessels or lower than anticipated scrapping of older vessels; (v) changes in rules and regulations applicable to the cargo industry, including, without limitation, legislation adopted by international organizations or by individual countries and actions taken by regulatory authorities; (vi) increases in costs and expenses including but not limited to: crew wages, insurance, provisions, lube oil, bunkers, repairs, maintenance, general and administrative expenses, and management fee expenses; (vii) whether our insurance arrangements are adequate; (viii) changes in general domestic and international political conditions; (ix) acts of war, terrorism, or piracy; (x) changes in the condition of the Company’s vessels or applicable maintenance or regulatory standards (which may affect, among other things, our anticipated drydocking or maintenance and repair costs) and unanticipated drydock expenditures; (xi) the Company’s acquisition or disposition of vessels; (xii) the amount of offhire time needed to complete maintenance, repairs, and installation of equipment to comply with applicable regulations on vessels and the timing and amount of any reimbursement by our insurance carriers for insurance claims, including offhire days; (xiii) the completion of definitive documentation with respect to charters; (xiv) charterers’ compliance with the terms of their charters in the current market environment; (xv) the extent to which our operating results continue to be affected by weakness in market conditions and freight and charter rates; (xvi) our ability to maintain contracts that are critical to our operation, to obtain and maintain acceptable terms with our vendors, customers and service providers and to retain key executives, managers and employees; (xvii) completion of documentation for vessel transactions and the performance of the terms thereof by buyers or sellers of vessels and us; (xviii) the relative cost and availability of low sulfur and high sulfur fuel, worldwide compliance with sulfur emissions regulations that took effect on January 1, 2020 and our ability to realize the economic benefits or recover the cost of the scrubbers we have installed.; (xix) our financial results for the year ending December 31, 2021 and other factors relating to determination of the tax treatment of dividends we have declared; (xx) the financial results we achieve for each quarter that apply to the formula under our new dividend policy, including without limitation the actual amounts earned by our vessels and the amounts of various expenses we incur, as a significant decrease in such earnings or a significant increase in such expenses may affect our ability to carry out our new value strategy; (xxi) the exercise of the discretion of our Board regarding the declaration of dividends, including without limitation the amount that our Board determines to set aside for reserves under our dividend policy; (xxii) our ability to refinance and amend the terms of our credit facilities as contemplated in connection with our new dividend policy; (xxiii) the duration and impact of the COVID-19 novel coronavirus epidemic, which may negatively affect general global and regional economic conditions; our ability to charter our vessels at all and the rates at which are able to do so; our ability to call on or depart from ports on a timely basis or at all; our ability to crew, maintain, and repair our vessels, including without limitation the impact diversion of our vessels to perform crew rotations may have on our revenues, expenses, and ability to consummate vessel sales, expense and disruption to our operations that may arise from the inability to rotate crews on schedule, and delay and added expense we may incur in rotating crews in the current environment; our ability to staff and maintain our headquarters and administrative operations; sources of cash and liquidity; our ability to sell vessels in the secondary market, including without limitation the compliance of purchasers and us with the terms of vessel sale contracts, and the prices at which vessels are sold; and other factors relevant to our business described from time to time in our filings with the Securities and Exchange Commission; and (xxiv) other factors listed from time to time in our filings with the Securities and Exchange Commission, including, without limitation, our Annual Report on Form 10-K for the year ended December 31, 2020 and subsequent reports on Form 8-K and Form 10-Q. Our ability to pay dividends in any period will depend upon various factors, including the limitations under any credit agreements to which we may be a party, applicable provisions of Marshall Islands law and the final determination by the Board of Directors each quarter after its review of our financial performance. The timing and amount of dividends, if any, could also be affected by factors affecting cash flows, results of operations, required capital expenditures, or reserves. As a result, the amount of dividends actually paid may vary. We do not undertake any obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

.

Presenters

John C. Wobensmith
Chief Executive Officer

- Over 25 years of experience in the shipping industry
- Significant experience in managing all aspects of a drybulk shipping company including commercial, technical and finance
- Holds CFA designation

Apostolos Zafolias
Chief Financial Officer

- 15 years of experience in the shipping industry
- Significant experience in M&A, S&P, commercial bank financing and capital market transactions
- Holds CFA designation

Peter Allen
Senior Vice President, Strategy & Finance

- 13 years of experience in the shipping industry
- Also serves as the Company's drybulk market analyst
- Holds CFA designation

Executive Summary

Genco Shipping & Trading: Who We Are…

- Genco is the **largest U.S. based** drybulk shipowner
- We are headquartered in **New York** with global offices in **Singapore** and **Copenhagen**
- Our fleet pro forma for vessel sales consists of **42 modern, high quality** drybulk vessels*
- Our large and scalable fleet consists of both **major** and **minor** bulk vessels
- Focused on the **global transportation of commodities** providing a full-service logistics solution to our customers
- We **transport raw materials** such as iron ore, grain, bauxite, cement, nickel ore across world-wide shipping routes
- **NYSE listed** under ticker symbol **GNK**

Note: Pro forma fleet is based upon agreed upon vessel sales (Genco Lorraine). Also includes the agreed upon purchase of the Genco Enterprise and two resale Ultramaxes.

Genco transported 30 mdwt of drybulk commodities in 2020

We employ a diversified asset base consisting of the larger Capesize vessels and medium sized Ultramax / Supramax vessels enabling us to carry a wide range of cargoes worldwide providing a full-service logistics solution to customers through our in-house commercial operating platform

42 *vessels* — **Genco's owned fleet post agreed vessel sales and purchases**

4.5 *mdwt* — **Of cargo carrying capacity**

~400 — **Fixtures booked by our in-house commercial team across 3 global offices**

~20 — **New customers that we conducted business with in 2020**

Commodities carried

Iron ore: 48%

Grains: 15%

Coal: 14%

Cement: 4%

Potash/Fertilizer: 4%

Steel/Pig Iron: 3%

Alumina/Bauxite: 2%

Limestone: 2%

Miscellaneous: 8%

Genco's differentiated approach

Strong financial position

- Pro forma cash position of approximately $161 million, as of May 31, 2021 (net LTV of 25%)
- Strongest balance sheet among the peer group together with a simplified and flexible debt structure
- Paid a total of $0.805 per share in dividends over the past 7Q's[1]

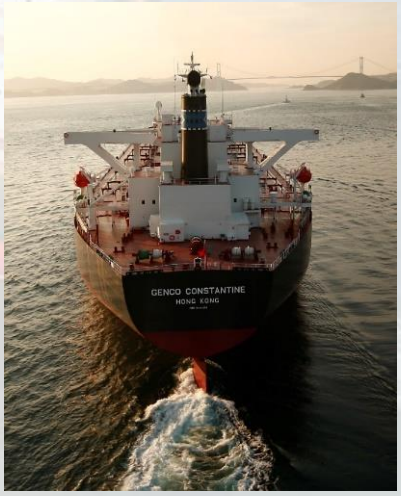

Comprehensive value strategy centered around…

- Low leverage with a target of zero net debt
- Compelling dividend yield
- Growth through accretive vessel acquisitions

Focus on long-term, sustainable operations

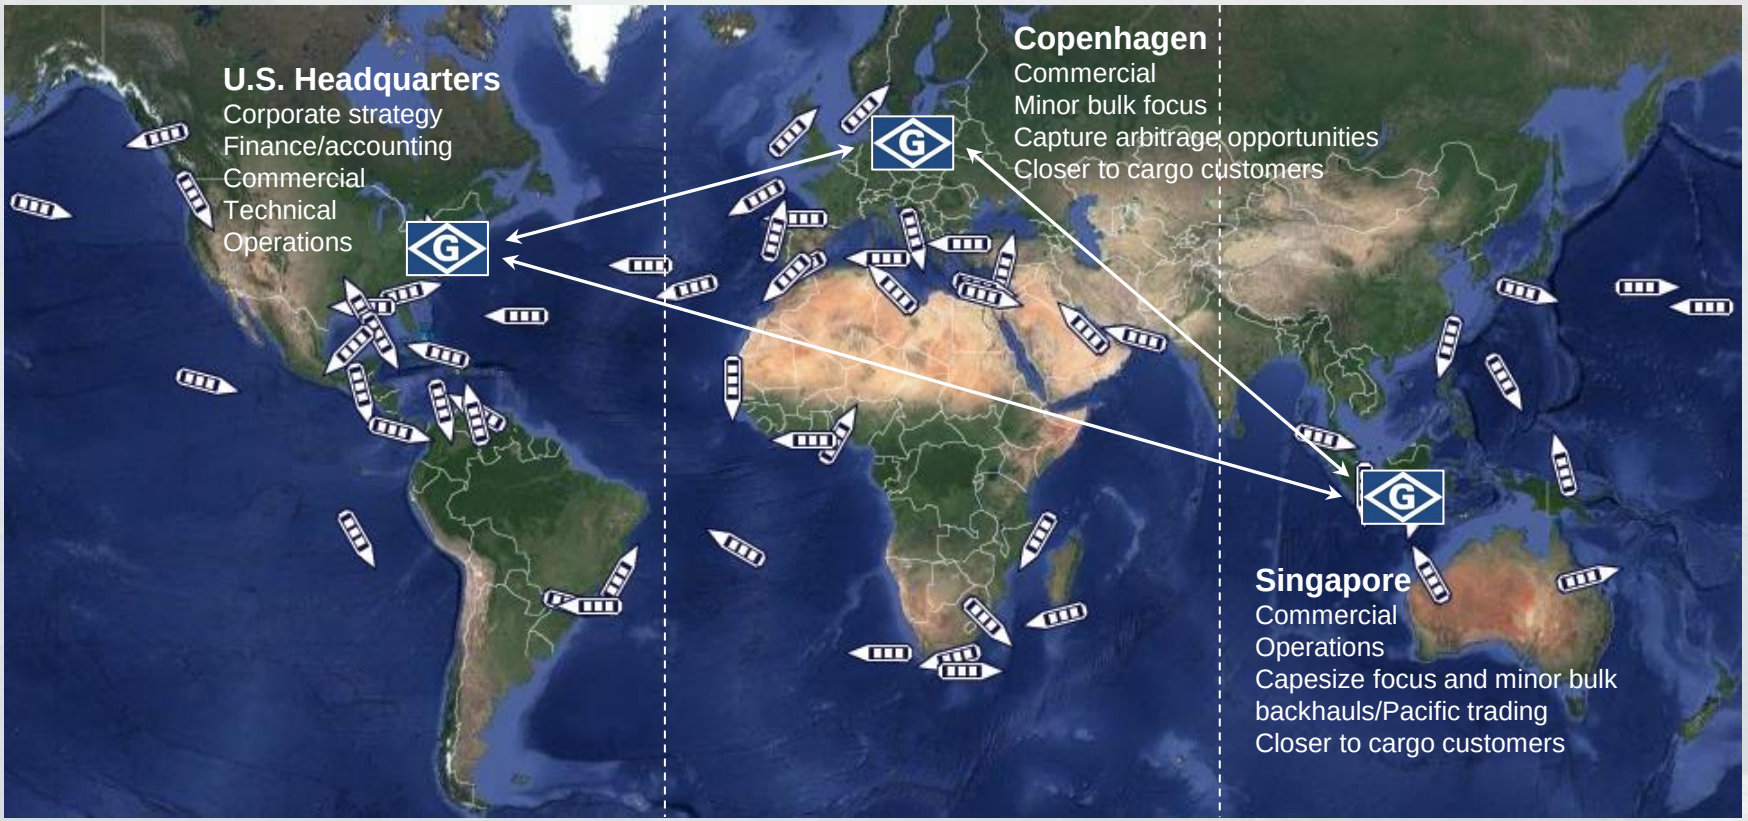

- High corporate governance standards: transparent US filer with no related party transactions
- Purchase modern, fuel efficient assets while divesting older, less fuel efficient tonnage to reduce our carbon footprint
- Evaluating the feasibility of ammonia as an alternative marine fuel as part of the objective to decarbonize the global shipping industry alongside 22 other companies within the maritime supply chain including commodity producers, shipbuilders, shipowners, class societies and power utilities
- Employ a diverse global team with a strong culture of safety

1) As previously announced, our dividend policy is reviewed by our Board of Directors on a quarterly basis.

Genco's global footprint – active, real-time commercial management

Genco has vessels trading all over the world – our global presence enables us to capture market trends to enhance revenue generation

Time difference to US:	+6 hours	+12/13 hours

GNK stock performance metrics

Since Dec 2020, the liquidity and daily traded volume in our stock has increased significantly together with the free float following large shareholder sales*

Category	December 10, 2020	June 14, 2021
Large shareholders' % ownership*	58%	14%
30-day avg share volume traded	0.2m	1.0m
# of private equity firms with board representation*	3	1
Market cap	$330m	$759m
Share price	$7.89	$18.11

Increased free float and liquidity in the GNK stock is beneficial to the execution of our comprehensive value strategy

*Represents ownership of large shareholders with representation on Genco's board of directors. Prior to December 2020, Genco had three such shareholders. On December 15, 2020, the sole director affiliated with Strategic Value Partners, LLC ("SVP") resigned from our board, and investment funds affiliated with SVP reported sales reducing their ownership to approximately 1.3 million Genco shares, or approximately 3%. Furthermore, in March 2021, the director affiliated with Apollo Global Management, LLC ("Apollo") announced his intention not to stand for re-election to the board, and investment funds affiliated with Apollo reported sales reducing their ownership to approximately 0.4m shares, or approximately 1%. Additionally, based on filings with the SEC through June 14, 2021, investment funds affiliated with Centerbridge Partners, L.P. ("Centerbridge") reported sales that reduced their ownership of our stock to approximately 5.9 million shares, or approximately 14% of our stock. As a result, following our Annual Meeting of Shareholders in May 2021, we have one remaining large shareholder with board representation.

Comprehensive value strategy

Our new corporate strategy…

…is a holistic three-pronged approach including returning cash to shareholders, further de-levering of the balance sheet and growth of the fleet

Dividends	De-levering	Growth
Cash flow generation	Scheduled debt repayments	Use shares as a currency to grow
Reduced cash flow breakeven rate	Debt prepayments utilizing cash on the balance sheet + reserve	Utilize reserve + revolver
		Opportunistically sell older ships + redeploy proceeds

Strategy ideally integrates with our barbell approach to fleet composition in which our minor bulk fleet provides stable cash flows to cover debt service, while our Capesize vessels provide meaningful upside and operating leverage

Genco's quarterly dividend framework / calculation

Targeting a quarterly dividend based on cash flow after debt service less a reserve

Genco's quarterly dividend to be paid based on the following formula:
Operating cash flow
Less: Debt repayments
Less: Capital expenditures for drydocking
Less: Reserve
Cash flow distributable as dividends

Quarterly reserve is targeted to be based on quarterly debt repayments and interest expense

Reserve optionality: uses include debt prepayments, vessel acquisitions, general corporate purposes

- **Genco to provide guidance** each quarter for the data above based on management estimates in our quarterly breakeven rates and TCE guidance
- **For the purpose of the dividend calculation, operating cash flow is defined as:** voyage revenue less voyage expenses, charter hire expenses, vessel opex, G&A other than non-cash restricted stock expenses, technical mgmt fees, interest expense other than non-cash deferred financing costs
- Determinations of whether to pay a dividend, the amount of any dividend, and the amount of reserves used in any dividend calculation will remain in our board of directors' discretion

Our roadmap to year-end and implementation…

May 31, 2021 pro forma

$161m **Cash balance** *post advance of $21.5m for 3 Ultras agreed to be acquired and the prepayment of our scrubber facility*

$381m **Debt outstanding**

$220m **Net debt**

25% **Net LTV**

Debt paid down

- $48.2m of debt repaid in Q1 2021, including our revolving credit facility
- Prepaid and retired our scrubber facility of $20.0m in June 2021

Growth

- Have agreed to acquire 3 Ultramaxes in April and May 2021, marking our 5th and 6th Ultramax acquisitions since December 2020

Credit facility refinancing

- Negotiating a global refinancing to improve terms and reduce our cash flow breakeven rate

Year-end targets

20% **Targeting a maximum net loan-to-value of ~20% by year-end** *(currently on pace to be ahead of target)*

$75m **Cash balance following paydown of debt**

Notes: debt balance presented gross of unamortized debt issuance costs. Cash and debt are presented pro forma for the prepayment of our scrubber credit facility. Net debt is equal to debt minus cash. Cash balance includes restricted cash. Net loan-to-value figures presented above are based on VesselsValue.com estimates from June 2021 and assume the sale of the Genco Lorraine and the purchase of the Genco Enterprise and are shown for illustrative purposes. Actual results will vary.

Illustrative cash flow sensitivity *($ in m, except TCE and per share data)*

2022 illustrative analysis based on cash flow sensitivity

Fleet-wide net TCE - 2022	**$ 15,000**	**$ 17,500**	**$ 20,000**
Net revenue	$ 227	$ 265	$ 303
Vessel operating expenses	(77)	(77)	(77)
G&A (ex-non cash restricted stock)	(20)	(20)	(20)
Technical management fees	(5)	(5)	(5)
Interest exp. (ex-deferred financing costs)	(7)	(7)	(7)
Operating cash flow	$ 118	$ 156	$ 193
Debt amortization	(15)	(15)	(15)
Drydocking / BWTS capex	(11)	(11)	(11)
Cash flow after debt repayments / drydocking capex	$ 91	$ 129	$ 167
Cash flow distributable as dividends (after reserve)	**$ 69**	**$ 107**	**$ 145**
Illustrative dividend per share	**$ 1.65**	**$ 2.55**	**$ 3.45**
Implied share price based on annualized dividend yields of…			
7%	**$ 23.52**	**$ 36.43**	**$ 49.33**
8%	**$ 20.58**	**$ 31.87**	**$ 43.17**
9%	**$ 18.30**	**$ 28.33**	**$ 38.37**
10%	**$ 16.47**	**$ 25.50**	**$ 34.53**

TCE rates in context…

$20,653
Q2 2021 TCE estimate for 74% of the quarter as of May 5, 2021

$29,383
Current Baltic Capesize Index

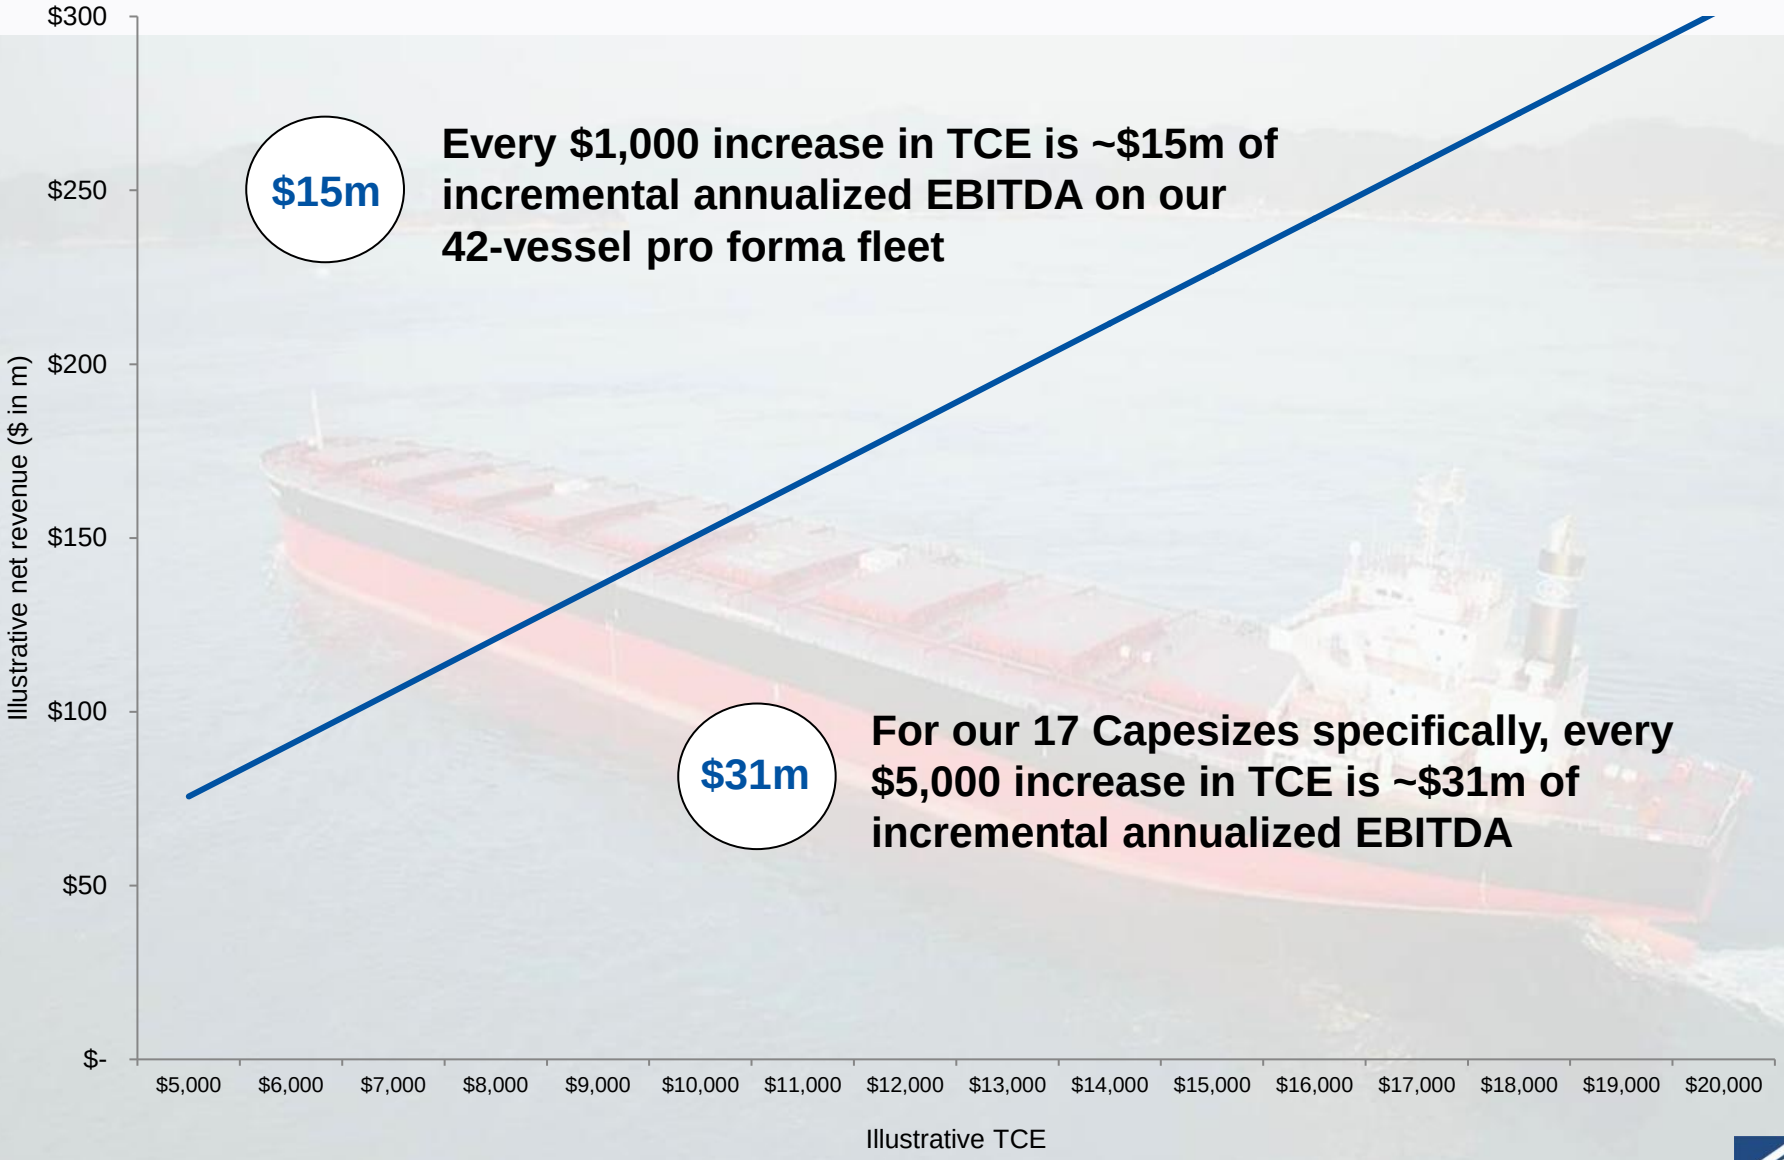

$28,866
Current Baltic Supramax Index

$24,836
Fleet weighted 1 year time charter rate per Clarksons + Capesize scrubber premium

- Plan to continue to reduce our debt balance, with a long-term goal of zero debt

Note: The amounts set forth in the table above, including without limitation amounts calculated for cash flow distributable as dividends, illustrative dividend per share, and implied share price based on annualized dividend yields, are for illustrative purposes only, and actual amounts will vary. Our ability to pay dividends in any period will depend upon various factors, including the limitations under any credit agreements to which we may be a party, applicable provisions of Marshall Islands law and the final determination by our Board of Directors each quarter after its review of our financial performance. Please see p.2 and the appendix of this presentation for additional details. Operating cash flow and TCE are non-GAAP financial measures. For a reconciliation of operating cash flow to net income, the most comparable financial measure presented in accordance with GAAP, please see the appendix of this presentation. TCE rates are assumed for analytical purposes and encompass a number of underlying assumed variables. Non-cash restricted stock expense and deferring financing costs also depend on a number of variables that are unknown at this time. Accordingly, we are unable to provide, without unreasonable efforts, a reconciliation of TCE, G&A (ex-non cash restricted stock), and interest expense (ex-deferred financing costs) to the most comparable financial measure presented in accordance with GAAP. Baltic Capesize Index, Baltic Supramax Index and 1 year time charter rates are presented gross of commissions which is typically 5%. An assumed scrubber premium is added to Clarksons 1 year time charter rate. Rates are presented for illustrative purposes.

Significant fleet-wide operating leverage

$15m

Every $1,000 increase in TCE is ~$15m of incremental annualized EBITDA on our 42-vessel pro forma fleet

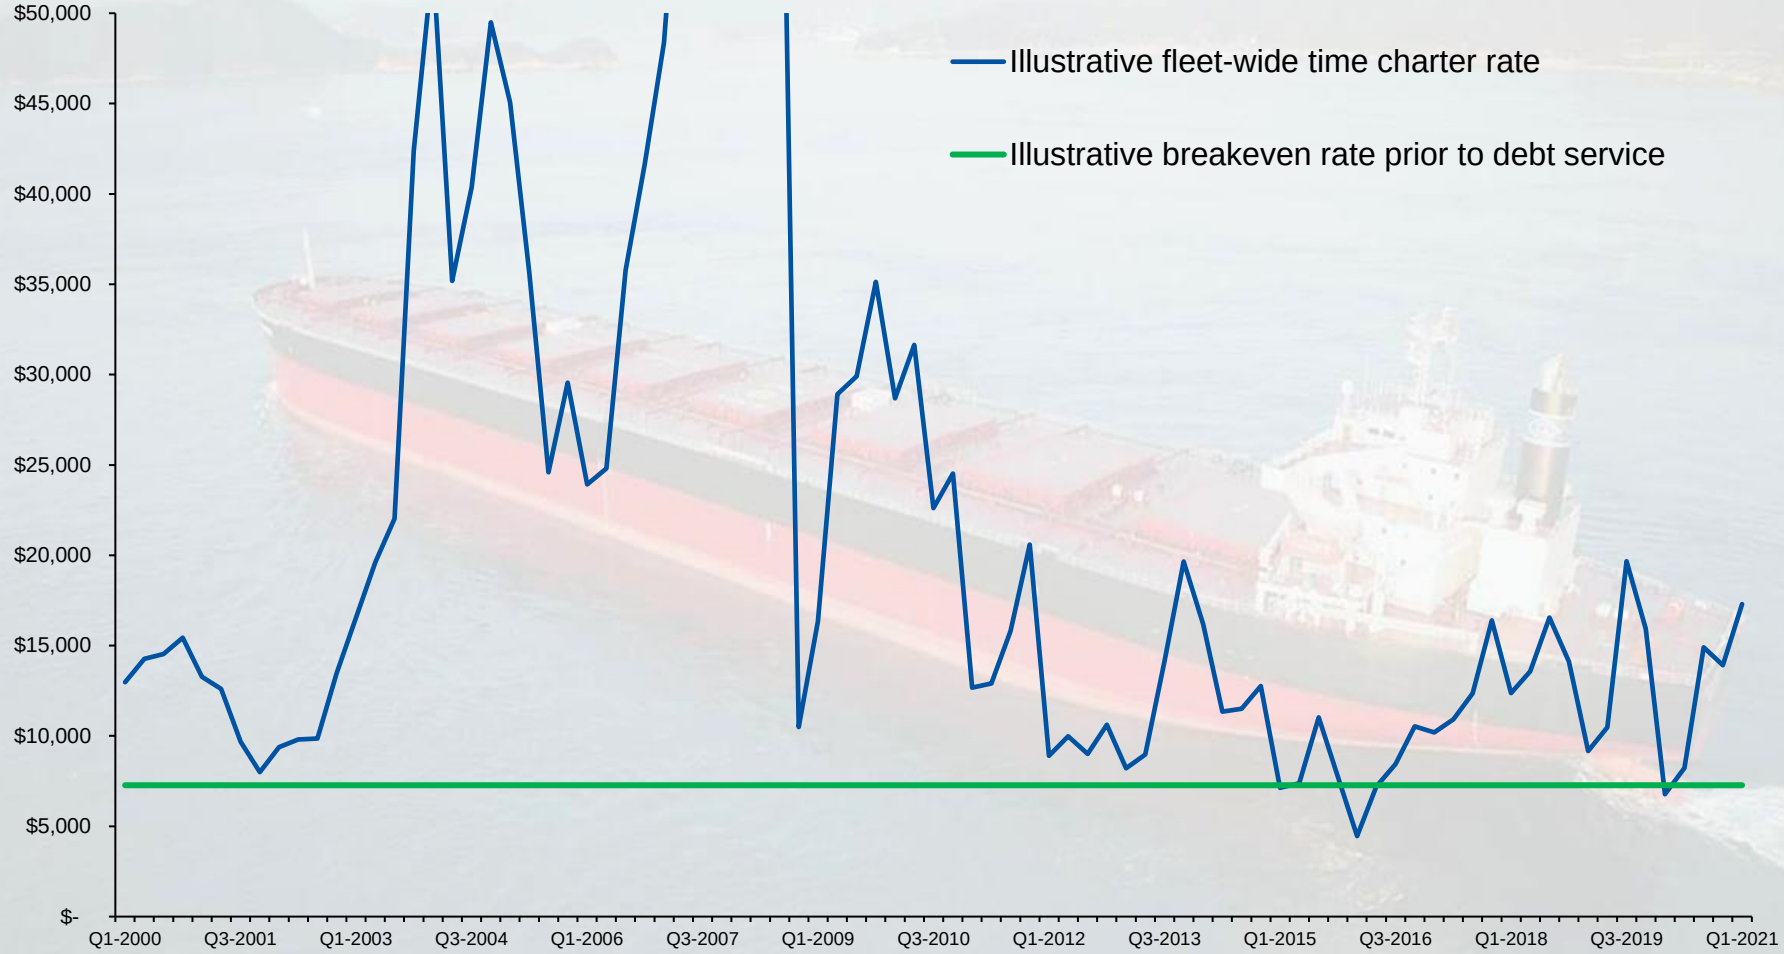

$31m

For our 17 Capesizes specifically, every $5,000 increase in TCE is ~$31m of incremental annualized EBITDA

Note: based on a fleet of 42 ships, for illustrative purposes only

Breakeven rate prior to debt service is covered…

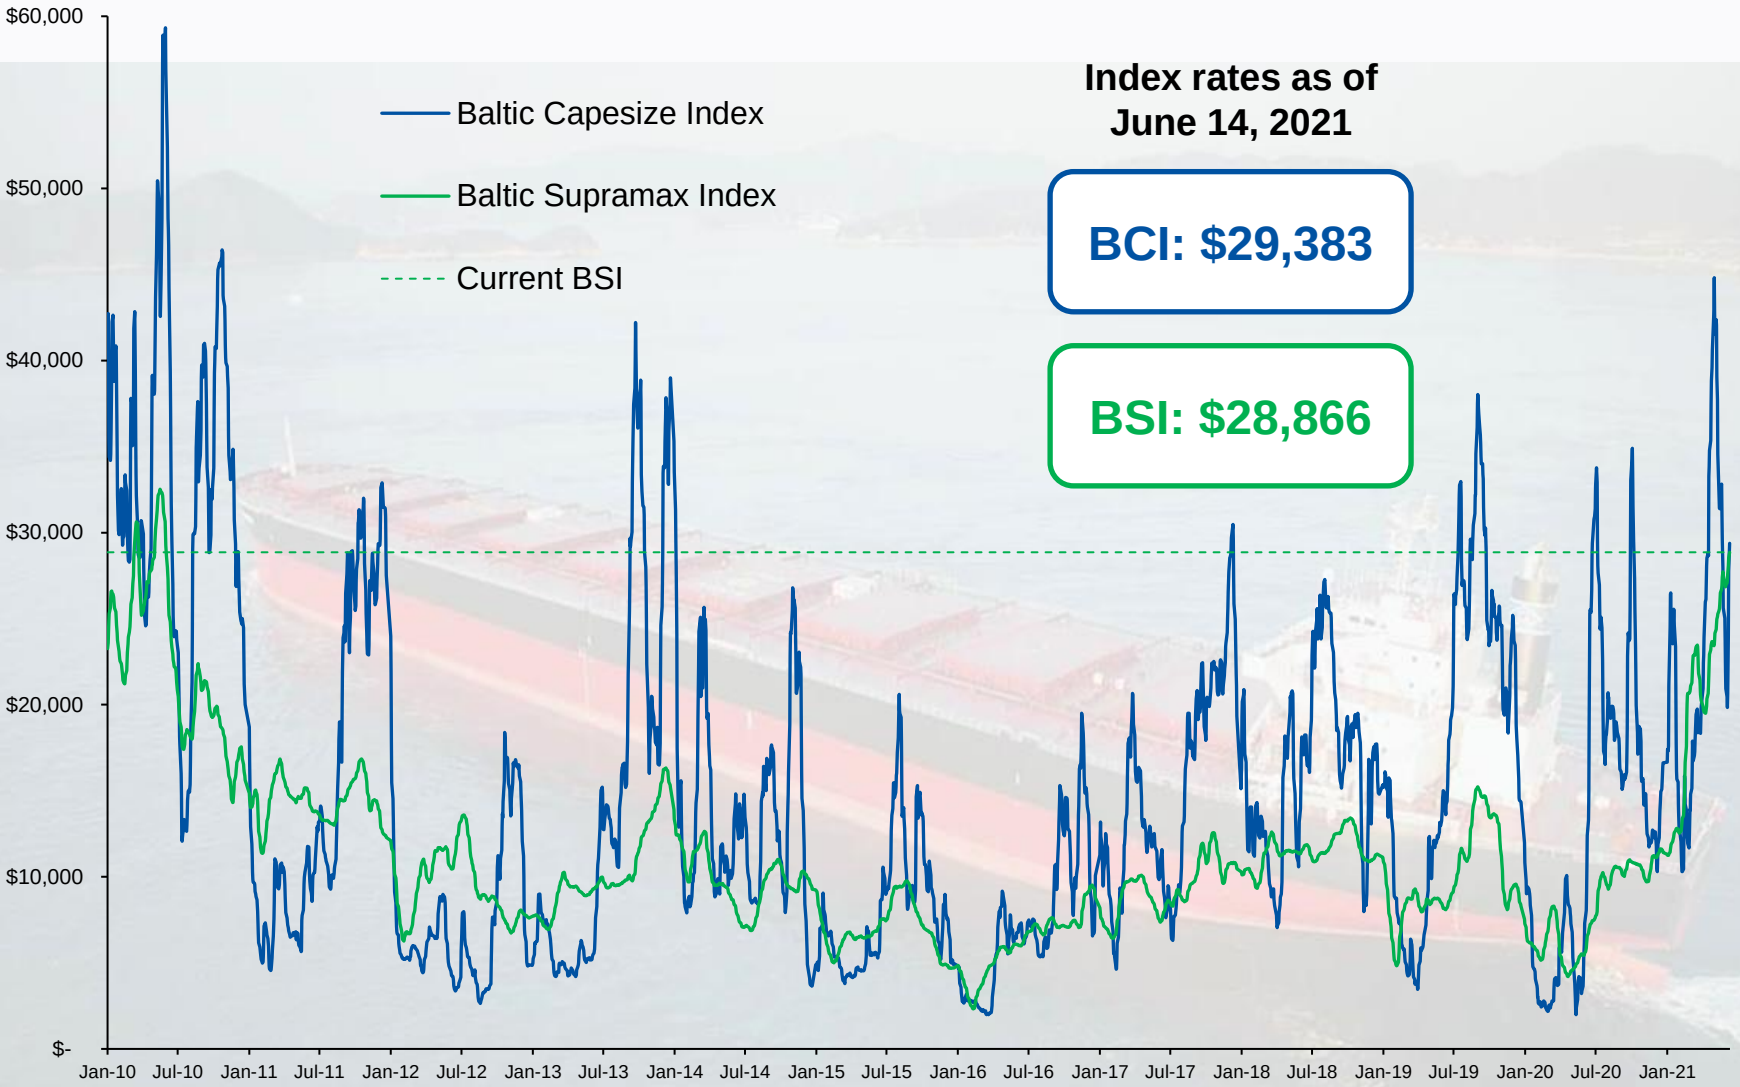

…in nearly every rate environment over the last two decades, highlighting the importance of the quarter dividend reserve to be targeted off debt and interest payments – a prudent approach to protect the balance sheet during volatile market periods

Assumptions: Illustrative fleet-wide time charter rate is based on the quarterly averages of the Baltic Capesize Index and Baltic Supramax Index since 2000 weighted based on Genco's pro forma fleet composition of 42 vessels. An assumed scrubber premium is included together with a target minor bulk outperformance figure. Illustrative breakeven rate prior to debt service is based on our 2021 expense budgets across a fleet of 42 vessels.

Market update and industry overview

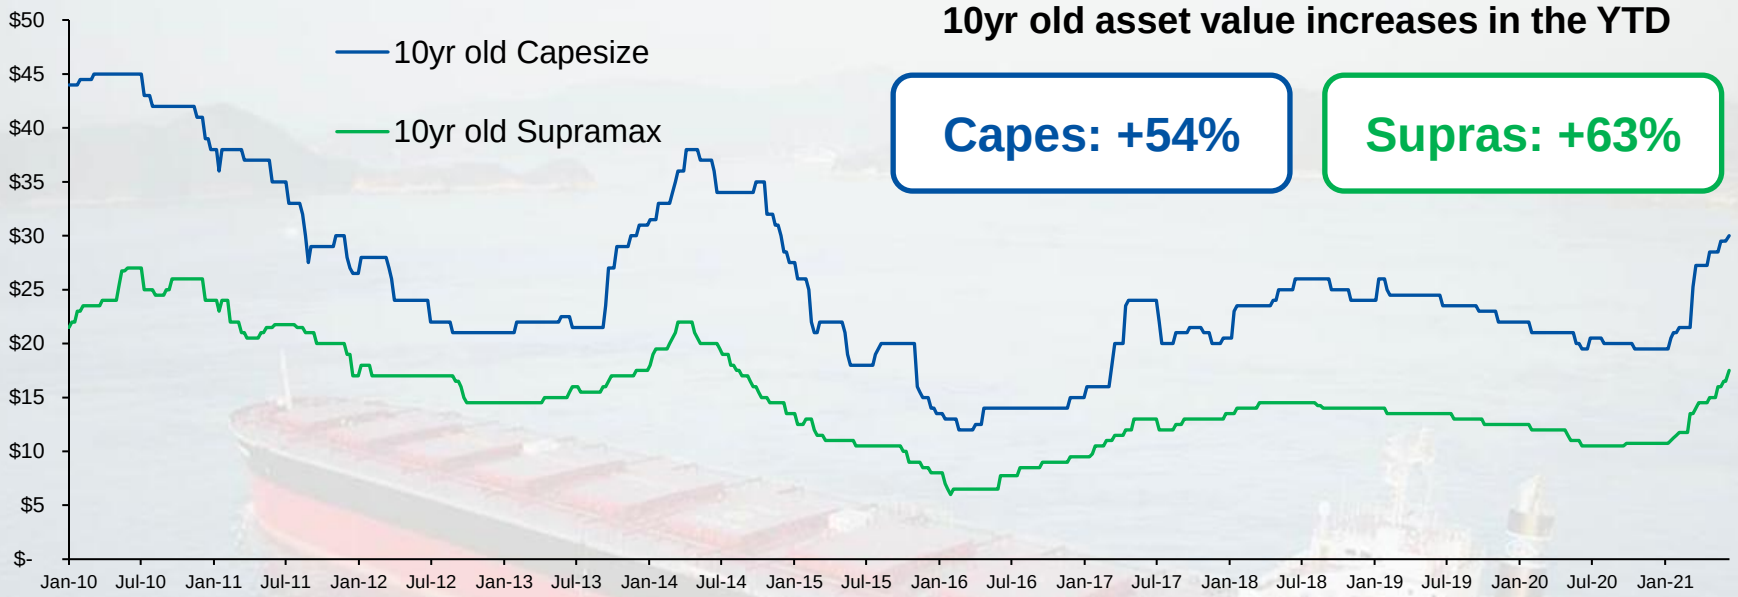

Freight rates have started 2021 off strong…

Source: Clarksons Research Services Limited 2021. BCI shown is the 4TC through 2014 then the 5TC thereafter. BSI shown is the 52 index through 2015 then the 58 index thereafter.

Asset values have significantly increased in the YTD…

…but remain low relative to the current earnings environment

- Genco's fleet average age is ~10 years and has directly experienced the rise in asset values
- Strong earnings environment since June 2020
- Strong historical correlation between freight rates and asset values currently holding

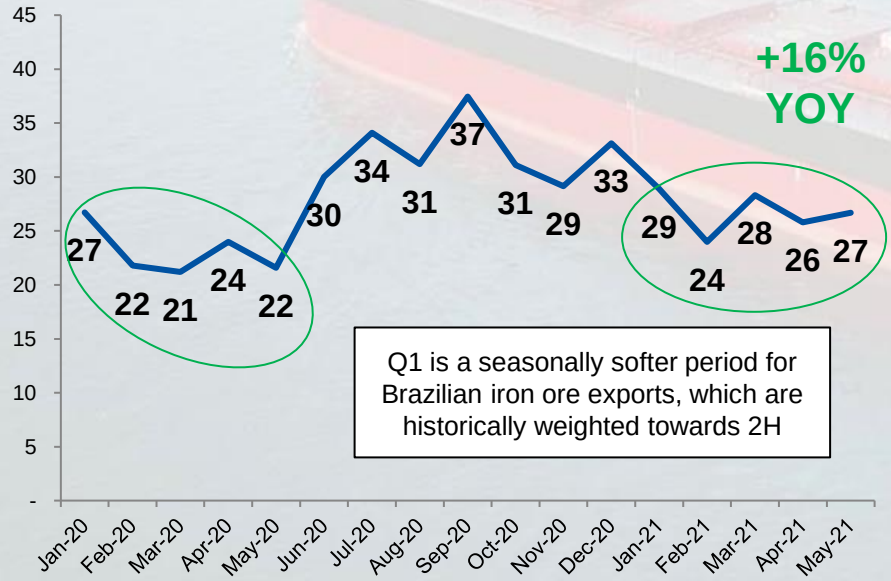

Source: Clarksons Research Services Limited 2021

Brazilian iron ore exports have recovered…

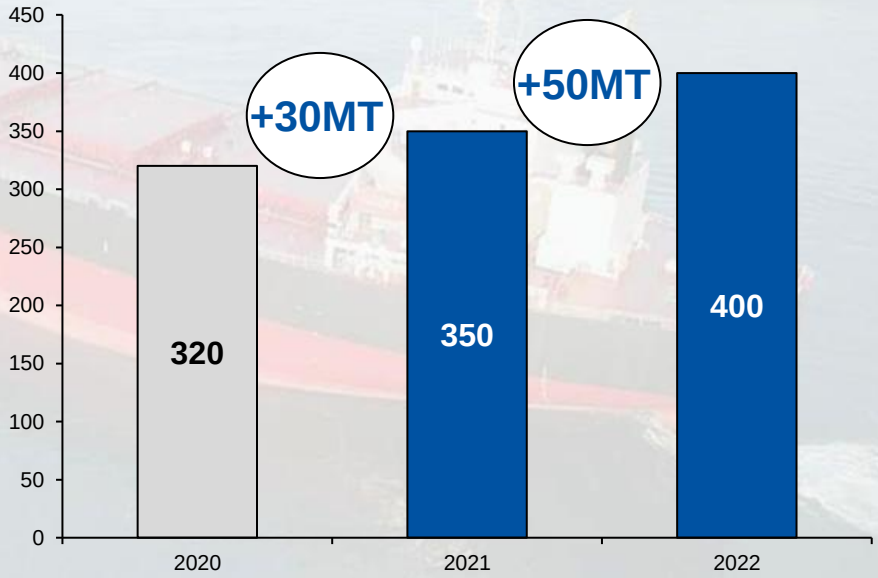

…following poor weather conditions and operational challenges that disrupted production and shipments during most of 1H 2020

- Brazilian iron ore exports have increased by 16% YOY through May
- Vale 2021 production guidance of 315-335MT
- Vale forecasts to reach a runrate of 350mtpa by the end of 2021 and 400mtpa by the end of 2022
- Key iron ore route provides high volumes together with long ton mile trading distances

Recovering IO exports from Brazil…

…with growth expected from Vale

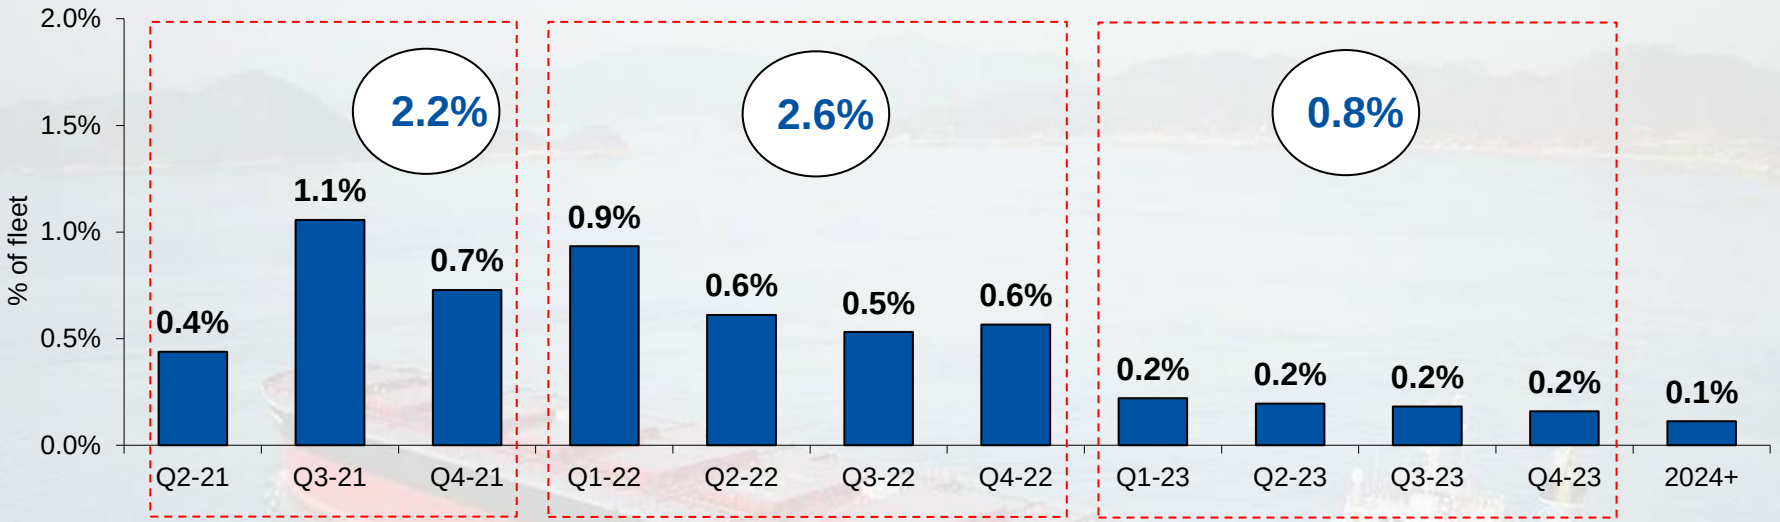

Year-end production run rates basis Vale forward guidance

Drybulk newbuilding orderbook prior to slippage / scrapping

Current drybulk newbuilding orderbook as a % of the fleet per Clarksons

(does not take into account slippage or scrapping)

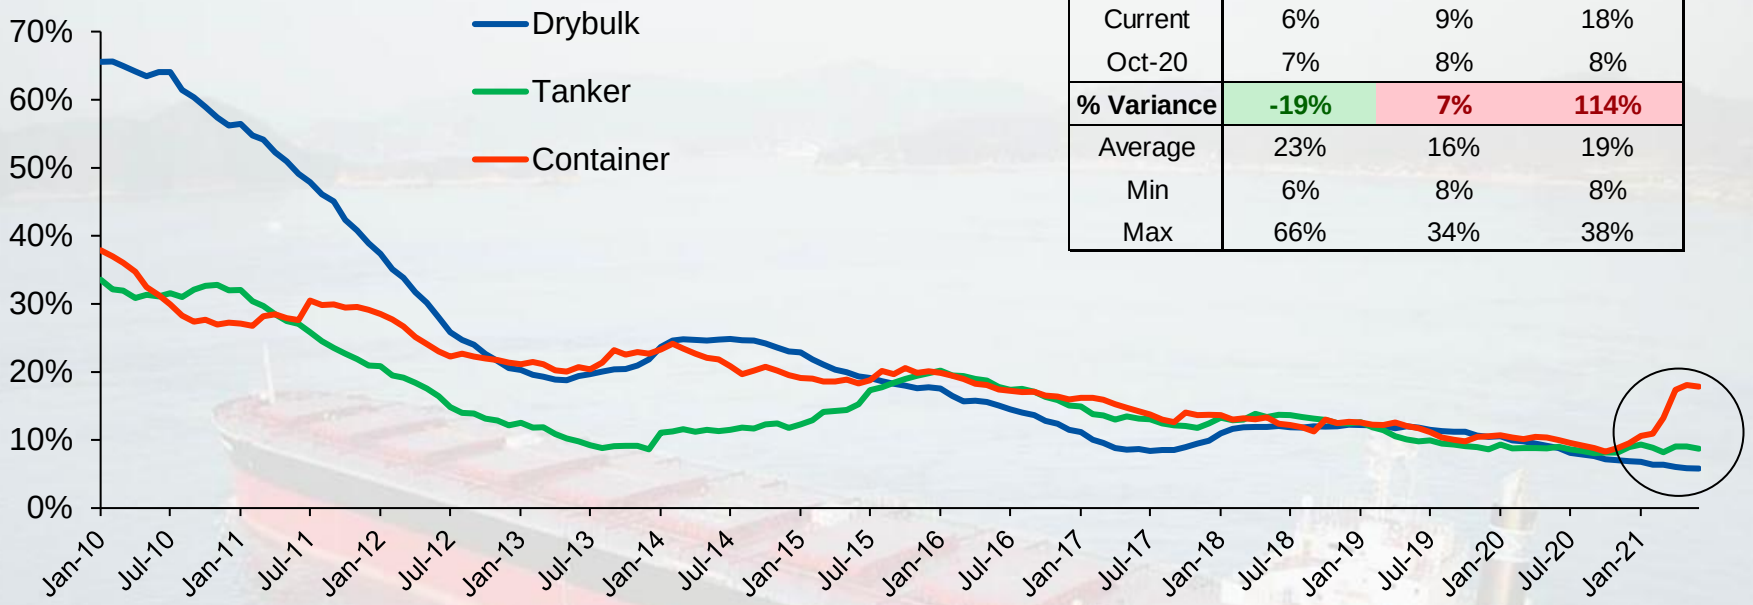

- Orderbook as a % of the total drybulk fleet is currently 6%
- 7% of the fleet that is 20 years or older and 16% of the fleet 15 years or older
- 10% of the Capesize fleet is 15 years or older compared to 6% on order
- From 2022 onwards, the orderbook is 3.5% of the fleet
- N/B ordering in 2020 was the lowest total since 2016 at just 19mdwt - since 2015, average ordering has been 30mdwt per year

Source: Clarksons Research Services Limited 2021

Global ordering trends focusing on containerships

	Drybulk	Tanker	Container
Current	6%	9%	18%
Oct-20	7%	8%	8%
% Variance	-19%	7%	114%
Average	23%	16%	19%
Min	6%	8%	8%
Max	66%	34%	38%

- Global newbuild ordering has been focused on the containership sector
  - Orderbook has increased to over 18% of the fleet from 8% in Oct 2020 – more than doubling
- Order volumes have increased significantly in the containership sector in recent months, where extremely firm market conditions have supported a surge in newbuild contracts
- Availability remains tight for newbuilding slots with new orders likely to be set for 2023 delivery

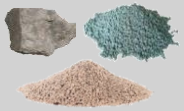

Source: Clarksons Research Services Limited 2021

2021 and 2022 drybulk outlook

Drybulk market catalysts

1. **Record low orderbook as a percentage of the fleet to limit net fleet growth**
2. **Unprecedented levels of global stimulus – global GDP forecast to rise by 6% in 2021**
3. **China's economy to continue to lead while ROW continues economic improvement**
4. **Recovery and growth of Brazilian iron ore exports**
5. **India's coal imports and steel production to continue their rebound**

Marsoft 2021 to 2022 S&D growth estimates

	Vessel*	2021	2022
Iron Ore 	Capesize	+8.5%	+4.4%
Coal 	Capesize Panamax	+3.7%	+4.1%
Grain 	Panamax Supramax Handysize	+1.3%	+1.4%
Minor Bulk 	Supramax Handysize	+6.6%	+3.7%
Total Demand		+5.8%	+3.7%
Fleet Growth		+2.6%	+0.6%

*Indicates the primary vessel type that carries the respective commodities. Supply and demand forecasts are based on Marsoft's base case from May 2021

Sources: Marsoft, Clarksons, IMF

Conclusion

Genco is attractively positioned to capture market upside

Leadership

- Experienced US-based management team
- US-filer with high corporate governance standards

Drybulk Market

- Demand and supply dynamics forecast to continue to improve in 2021 and 2022

Capital Structure

- Strong balance sheet + meaningful cash position + new value strategy

Fleet Modernization

- Expanded in Ultramax sector with 6 agreed upon acquisitions since Dec 2020

Commercial Platform

- Active management through global commercial platform and full-service logistics solution with a track record of benchmark outperformance

Genco's Fleet

- Barbell approach to fleet composition

Appendix

Assumptions to illustrative cash flow sensitivity

- **Fleet size:** Based on a fleet of 42 vessels pro forma for agreed upon vessel sale and purchase activity to date.
- **Illustrative rates used to calculate net revenue:** Net revenue is defined as voyage revenues less voyage expenses less charter hire expenses. Illustrative time charter equivalent rates are presented on a net basis and are sensitized based on estimates provided by third-party industry research firms. TCE presented is multiplied by the estimated available days of the fleet resulting in an illustrative net revenue figure.
- **Expenses:** Assumed to remain at current levels for vessels in our fleet and otherwise. Illustrative expenses are based on Genco's 2021 budget, including a daily fleet-wide vessel operating expense budget of $5,000 per vessel per day. Fleet-wide G&A and technical management fees remain similar to previous guidance.
- **Drydocking / ballast water treatment system capex:** Based on Genco's 2022 capex budget of $11.5m.
- **Quarterly debt amortization:** For Q2 to Q4 2021, this is based on our current credit facility structure and assumes the resetting of debt amortization under our $495m credit facility. For 2022, a refinancing of our debt is assumed. We intend to refinance our credit facilities. We do not know what interest and amortization terms any refinanced credit facility will have. For analytical purposes only, we have used annual debt amortization based on initial discussions with our bank group of approximately $15m. The actual terms of a refinanced facility, if we enter into one, will depend on the results of negotiations with our lenders. Actual figures will vary. In a potential refinancing, we plan to include a revolver component for growth.
- **Cash and debt balances:** Starting balances are based on March 31, 2021 figures. It is assumed that cash is paid down to $75m to repay debt outstanding at year-end 2021. Timing of this paydown will vary. Potential refinancing fees and potential working capital fluctuations are not assumed in the illustrative calculations.
- **Operating cash flow:** Defined as voyage revenue less voyage expenses, charter hire expenses, vessel operating expenses, general and administrative expenses other than non-cash restricted stock expenses, technical management fees, and interest expense other than non-cash deferred financing costs.
- **Illustrative dividend per share:** Based on 41.9m shares outstanding.
- **Reserve:** The reserve will be set on a quarterly basis in advance of the subsequent quarter at the discretion of our Board of Directors and is anticipated to be based on future quarterly debt repayments and interest expense**.**
- **Reconciliation of operating cash flow ($ in m):**

2022 illustrative analysis based on cash flow sensitivity

Fleet-wide net TCE - 2022	**$ 15,000**	**$ 17,500**	**$ 20,000**
Net revenue	$ 227	$ 265	$ 303

	Three Months Ended March 31, 2021	March 31, 2020
	(Dollars in thousands) (unaudited)	
OTHER FINANCIAL DATA:		
Net cash provided by (used in) operating activities	$ 13,494	$ (4,038)
Net cash provided by investing activities	19,950	5,577
Net cash used in financing activities	(49,098)	(14,280)
	(unaudited)	
EBITDA Reconciliation:		
Net income (loss)	$ 1,985	$ (120,350)
+ Net interest expense	4,470	6,351
+ Depreciation and amortization	13,441	17,574
EBITDA[(1)]	$ 19,896	$ (96,425)
+ Impairment of vessel assets	-	112,814
+ Loss on sale of vessels	720	486
Adjusted EBITDA	$ 20,616	$ 16,875

(1) EBITDA represents net income (loss) plus net interest expense, taxes, and depreciation and amortization. EBITDA is included because it is used by management and certain investors as a measure of operating performance. EBITDA is used by analysts in the shipping industry as a common performance measure to compare results across peers. Our management uses EBITDA as a performance measure in consolidating internal financial statements and it is presented for review at our board meetings. We believe that EBITDA is useful to investors as the shipping industry is capital intensive which often results in significant depreciation and cost of financing. EBITDA presents investors with a measure in addition to net income to evaluate our performance prior to these costs. EBITDA is not an item recognized by U.S. GAAP (i.e. non-GAAP measure) and should not be considered as an alternative to net income, operating income or any other indicator of a company's operating performance required by U.S. GAAP. EBITDA is not a measure of liquidity or cash flows as shown in our consolidated statement of cash flows. The definition of EBITDA used here may not be comparable to that used by other companies.

First Quarter Highlights

	Three Months Ended March 31, 2021 (unaudited)	Three Months Ended March 31, 2020 (unaudited)
FLEET DATA:		
Total number of vessels at end of period	41	53
Average number of vessels (1)	43.3	54.3
Total ownership days for fleet (2)	3,897	4,942
Total chartered-in days (3)	341	422
Total available days (4)	4,201	5,229
Total available days for owned fleet (5)	3,860	4,807
Total operating days for fleet (6)	4,122	5,126
Fleet utilization (7)	97.8%	97.8%
AVERAGE DAILY RESULTS:		
Time charter equivalent (8)	$ 12,197	$ 9,755
Daily vessel operating expenses per vessel (9)	4,887	4,413

(1) Average number of vessels is the number of vessels that constituted our fleet for the relevant period, as a measured by the sum of the number of days each vessel was part of our fleet during the period divided by the number of calendar days in that period.

(2) We define ownership days as the aggregate number of days in a period during which each vessel in our fleet has been owned by us. Ownership days are an indicator of the size of our fleet over a period and affect both the amount of revenues and the amount of expenses that we record during a period.

(3) We define chartered-in days as the aggregate number of days in a period during which we chartered-in third-party vessels.

(4) We define available days as the number of our ownership days and chartered-in days less the aggregate number of days that our vessels are off-hire due to familiarization upon acquisition, repairs or repairs under guarantee, vessel upgrades or special surveys. Companies in the shipping industry generally use available days to measure the number of days in a period during which vessels should be capable of generating revenues.

(5) We define available days for the owned fleet as available days less chartered-in days.

(6) We define operating days as the number of our total available days in a period less the aggregate number of days that the vessels are off-hire due to unforeseen circumstances. The shipping industry uses operating days to measure the aggregate number of days in a period during which vessels actually generate revenues.

(7) We calculate fleet utilization as the number of our operating days during a period divided by the number of ownership days plus time charter-in days less days our vessels spend in drydocking.

(8) We define TCE rates as our voyage revenues less voyage expenses and charter-hire expenses, divided by the number of the available days of our owned fleet during the period. TCE rate is a common shipping industry performance measure used primarily to compare daily earnings generated by vessels on time charters with daily earnings generated by vessels on voyage charters, because charterhire rates for vessels on voyage charters are generally not expressed in per-day amounts while charterhire rates for vessels on time charters generally are expressed in such amounts.

(9) We define daily vessel operating expenses to include crew wages and related costs, the cost of insurance, expenses relating to repairs and maintenance (excluding drydocking), the costs of spares and consumable stores, tonnage taxes and other miscellaneous expenses. Daily vessel operating expenses are calculated by dividing vessel operating expenses by ownership days for the relevant period.

Time Charter Equivalent Reconciliation[(1)]

	Three Months Ended	
	March 31, 2021	March 31, 2020
	(unaudited)	
Total Fleet		
Voyage revenues (in thousands)	$ 87,591	$ 98,336
Voyage expenses (in thousands)	35,074	48,368
Charter hire expenses (in thousands)	5,435	3,075
	47,082	46,893
Total available days for owned fleet	3,860	4,807
Total TCE rate	$ 12,197	$ 9,755

	Three Months Ended		
	June 30, 2020	September 30, 2020	December 31, 2020
	(unaudited)		
Total Fleet			
Voyage revenues (in thousands)	$ 74,206	$ 87,524	$ 95,495
Voyage expenses (in thousands)	41,695	33,487	33,435
Charter hire expenses (in thousands)	1,432	1,020	4,780
	31,079	53,017	57,280
Total available days for owned fleet	4,643	4,628	4,350
Total TCE rate	$ 6,693	$ 11,456	$ 13,167

(1) We define TCE rates as our voyage revenues less voyage expenses and charter-hire expenses, divided by the number of the available days of our owned fleet during the period. TCE rate is a common shipping industry performance measure used primarily to compare daily earnings generated by vessels on time charters with daily earnings generated by vessels on voyage charters, because charterhire rates for vessels on voyage charters are generally not expressed in per-day amounts, while charterhire rates for vessels on time charters generally are expressed in such amounts.

Genco pro forma fleet list

Major Bulk		
Vessel Name	**Year Built**	**Dwt**
Capesize		
Genco Resolute	2015	181,060
Genco Endeavour	2015	181,060
Genco Constantine	2008	180,183
Genco Augustus	2007	180,151
Genco Liberty	2016	180,032
Genco Defender	2016	180,021
Genco Tiger	2011	179,185
Baltic Lion	2012	179,185
Genco London	2007	177,833
Baltic Wolf	2010	177,752
Genco Titus	2007	177,729
Baltic Bear	2010	177,717
Genco Tiberius	2007	175,874
Genco Commodus	2009	169,098
Genco Hadrian	2008	169,025
Genco Maximus	2009	169,025
Genco Claudius	2010	169,001

Minor Bulk		
Vessel Name	**Year Built**	**Dwt**
Ultramax		
Genco Enterprise	2016	64,000
Baltic Hornet	2014	63,574
Genco Freedom	2015	63,498
Genco Vigilant	2015	63,498
Baltic Mantis	2015	63,470
Baltic Scorpion	2015	63,462
Genco Magic	2014	63,446
Baltic Wasp	2015	63,389
Genco Weatherly	2014	61,556
Genco TBN #1	2022	61,000
Genco TBN #2	2022	61,000
Genco Columbia	2016	60,294
Supramax		
Genco Hunter	2007	58,729
Genco Auvergne	2009	58,020
Genco Ardennes	2009	58,018
Genco Bourgogne	2010	58,018

Minor Bulk		
Vessel Name	**Year Built**	**Dwt**
Genco Brittany	2010	58,018
Genco Languedoc	2010	58,018
Genco Pyrenees	2010	58,018
Genco Rhone	2011	58,018
Genco Aquitaine	2009	57,981
Genco Warrior	2005	55,435
Genco Predator	2005	55,407
Genco Provence	2004	55,317
Genco Picardy	2005	55,257

17 *Capesize*

25 *Ultra/Supra*

Note: Pro forma fleet is based upon agreed upon vessel sales (Genco Lorraine). Also includes the agreed upon purchase of the Genco Enterprise and two resale Ultramaxes.

Genco's environmental indicators snapshot

Near and long-term environmental objectives are increasingly reflected in our strategic decision making process particularly through the acquisition of modern, fuel-efficient vessels

2020 data

- **872k** CO_2 emissions *(metric tons CO_2)*
- **3.22** Average Efficiency Ratio – *(g CO_2 / dwt x NM)*
- **6.05** Energy Efficiency Operational Indicator *(g CO_2 / t x NM)*
- **100%** Compliance with IMO 2020 global sulfur cap

Data presented verified by DNV GL Maritime Advisory

DNV·GL

Where we currently stand

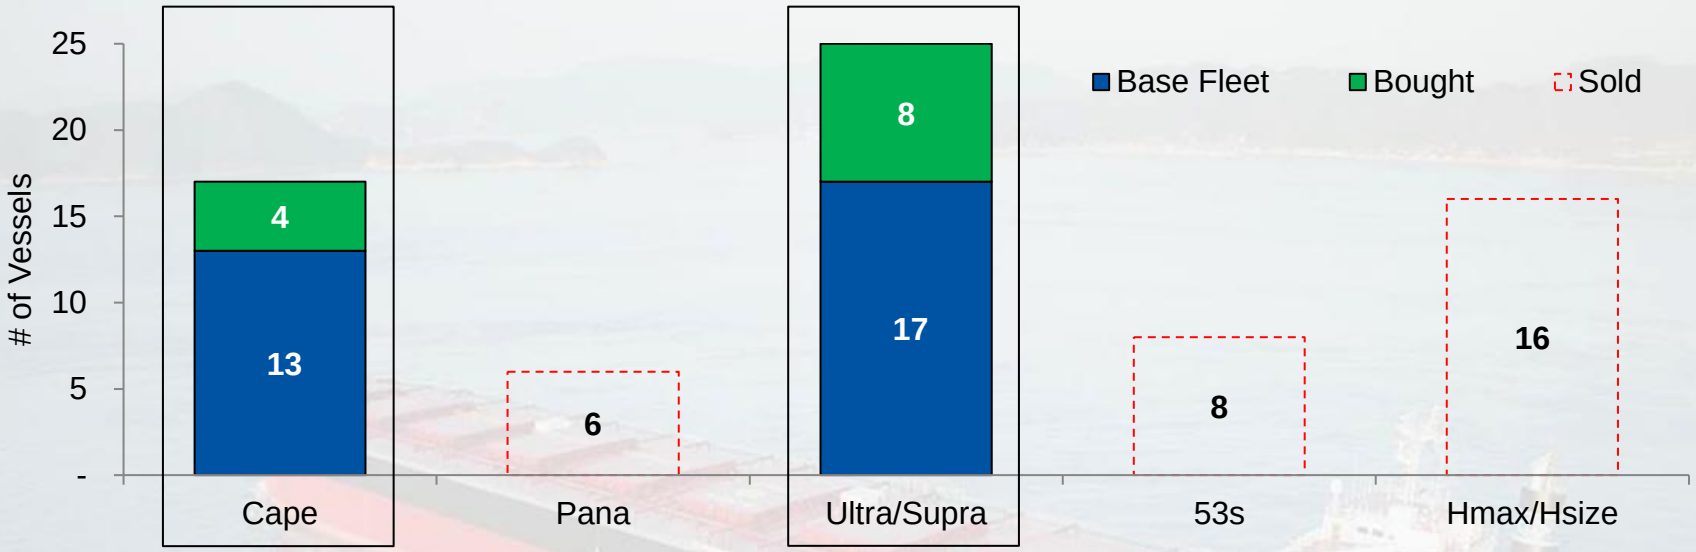

- **100%** Of our fleet has an A through E GHG rating and an average Rightship Rating of 4 stars
- **12** Modern, fuel efficient vessels agreed to be acquired since 2018
- **32** Ballast Water Treatment Systems installed fleet-wide (76% of fleet)
- **16** Mewis Ducts installed fleet-wide to reduce fuel consumption and emissions (38% of fleet)
- **12** Engine Power Limitations installed fleet-wide to reduce emissions (29% of fleet)

Note: Percentages of fleet calculations are based on the pro forma fleet of 42 vessels. Emissions data calculated from Jan 1 to Dec 31 for 2020, compared to a voyage basis previously.

Fleet renewal program: divestiture portion complete

Genco's pro forma fleet composition

(based on sale and purchase activity from 2018 to date)

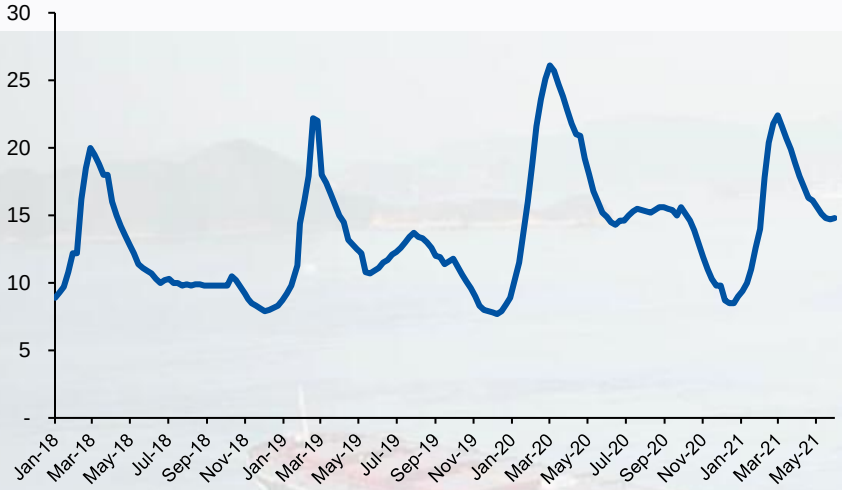

- **Fleet composition strategy:** "barbell" approach to fleet composition concentrated on the ownership of Capesize and Ultramax/Supramax vessels
- **Completed vessel swap transaction:** acquired 3 modern, eco Ultramaxes in exchange for 6 older, non-core Handysize vessels – grew in the core Ultramax sector while completing our exit of Handysizes
- **Expand in the Ultramax sector** – agreed to acquire 3 additional modern, eco Ultramaxes, including two resale vessels, in April and May 2021

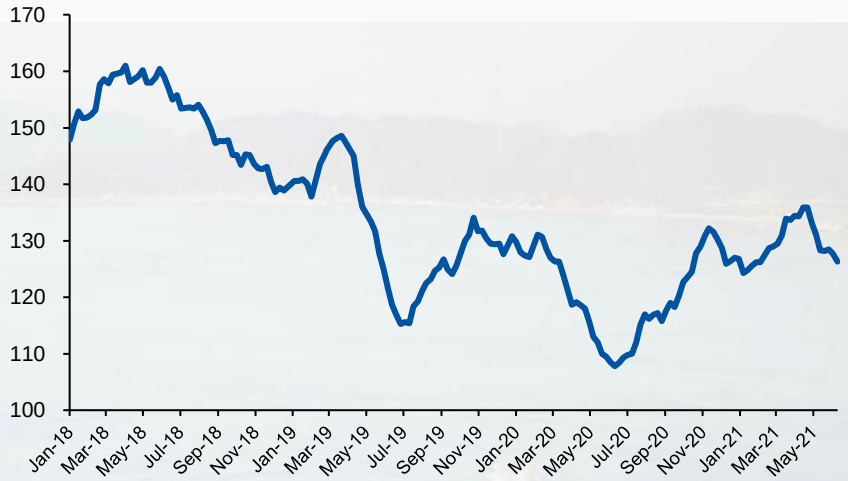

Note: Pro forma fleet is based upon agreed upon vessel sales (Genco Lorraine). Also includes the agreed upon purchase of the Genco Enterprise and two resale Ultramaxes.

Inventory levels for key major bulk trades

China's steel inventories

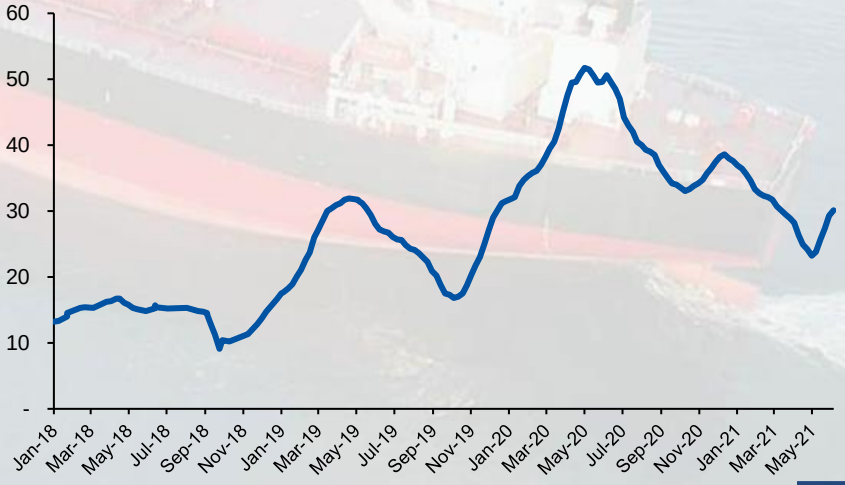

China's iron ore port inventories

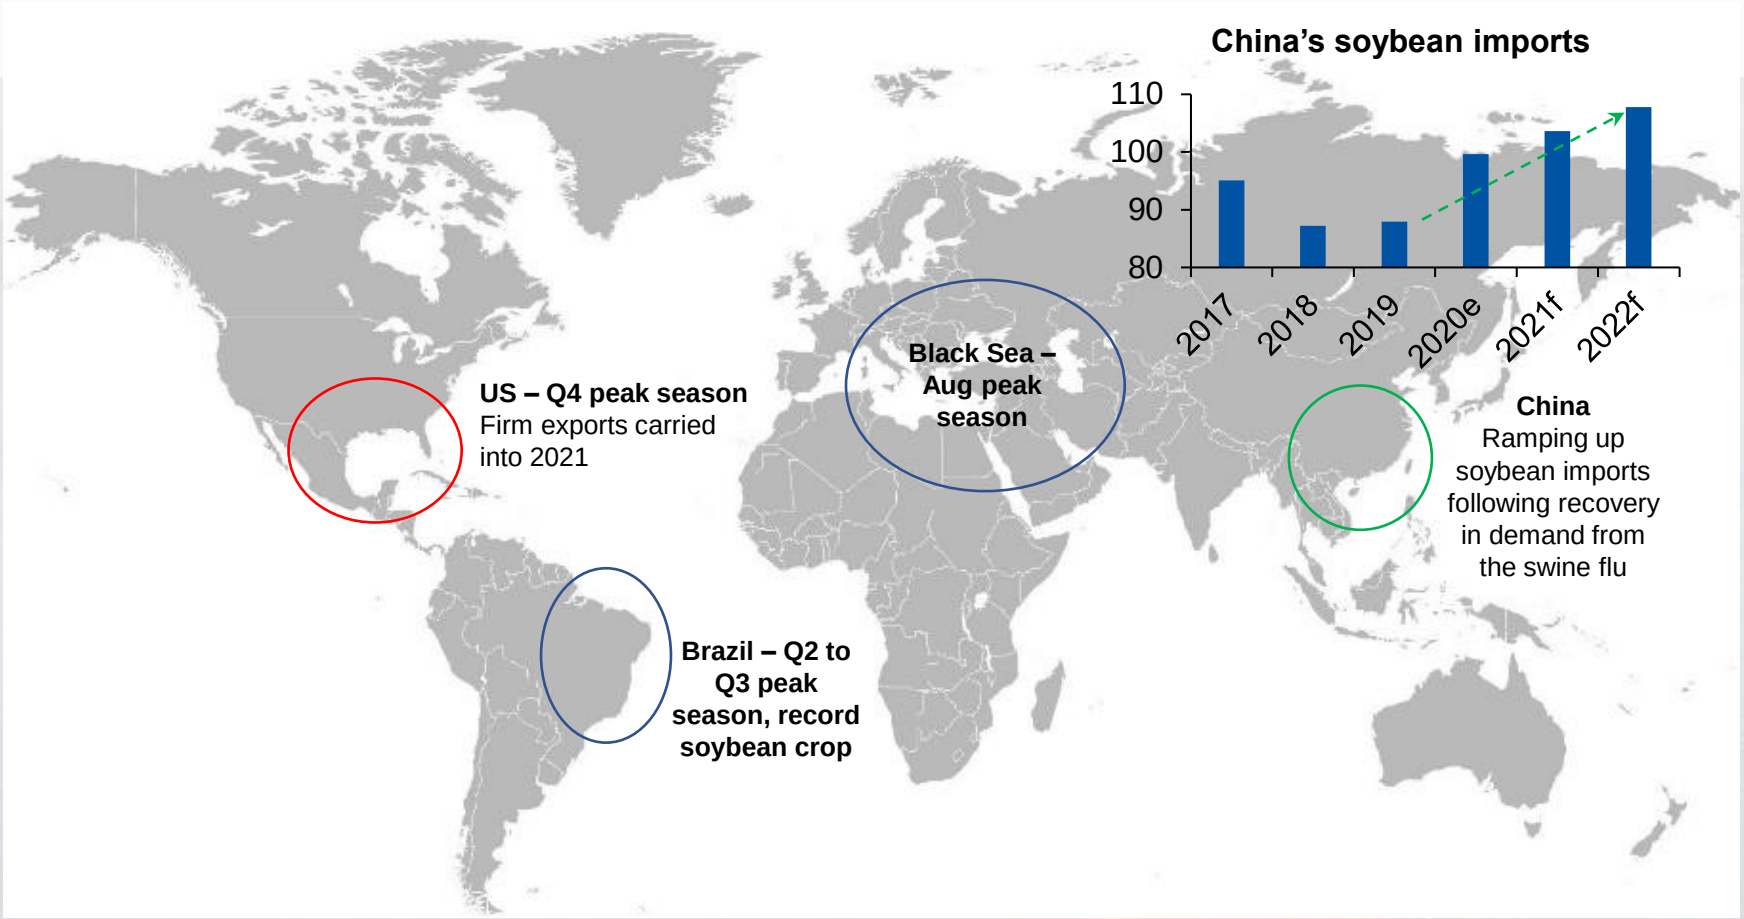

- China's steel inventories experienced seasonal restocking in Q1, but have now seen multiple weeks of drawn downs
- China's iron ore port inventories have increased off mid-2020 lows, but remain well below the multi-year highs seen in 2018
- India's coal powerplant stockpiles have continued to remain below record levels seen last year

India's coal powerplant stockpiles

Strong grain trade + improvement in other minor bulk trades

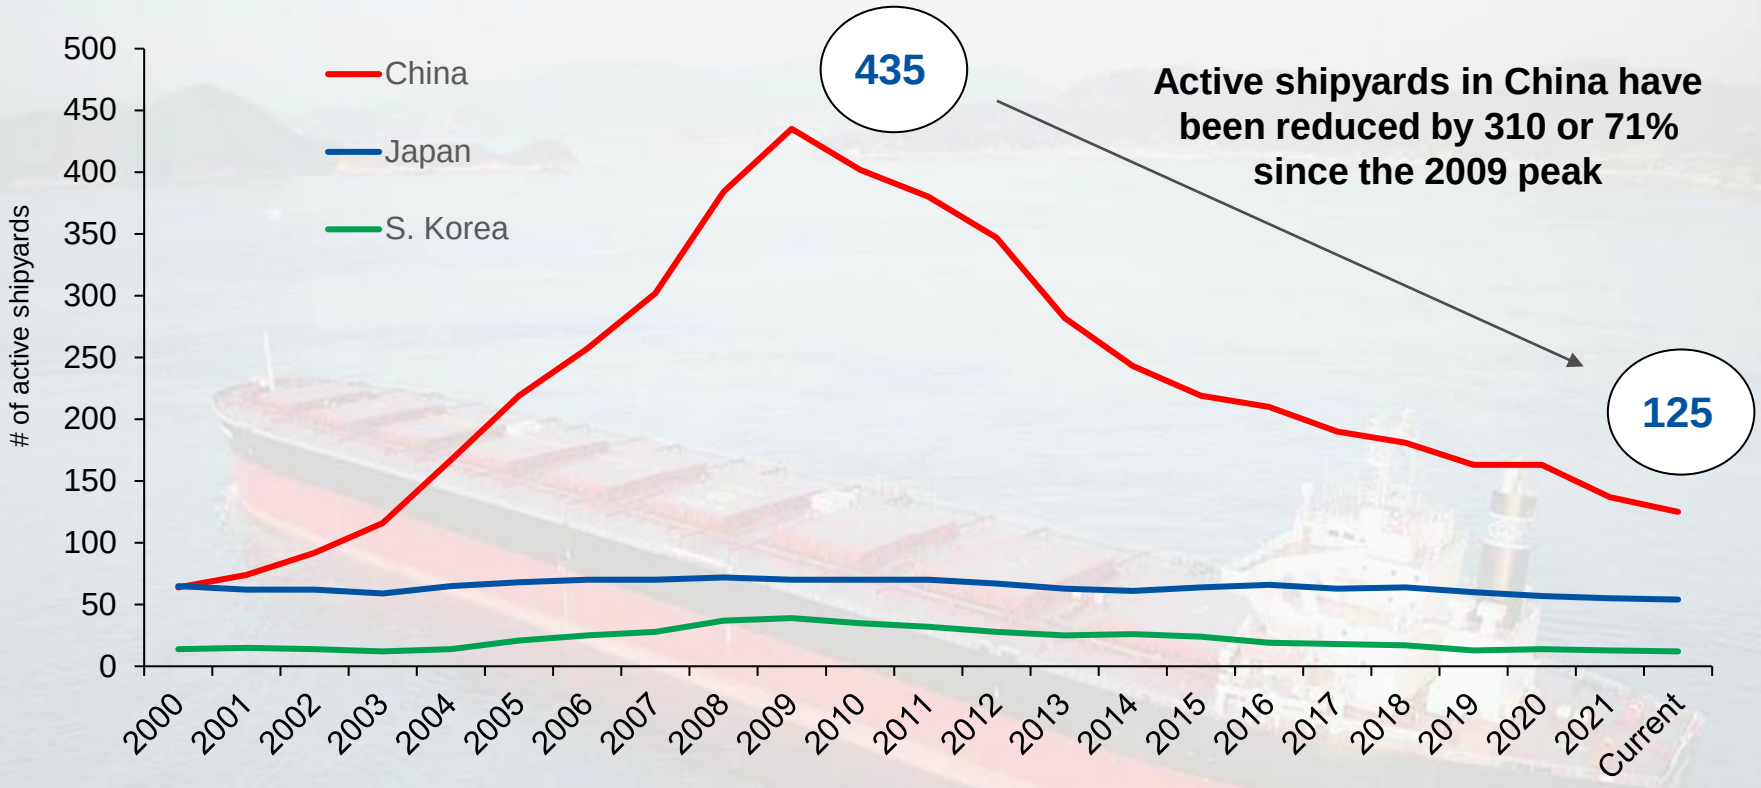

- **Minor bulk trades** are expected to further improved in 2021 given IMF's forecast of 6% global GDP growth
- **Grain trade** has been resilient as China recovers from the swine fever outbreak in 2019 + strong Brazil crop
- Large scale purchases of US agricultural products have been made by China in recent months which has resulted in a firm US export season

Active shipyards per country

of active shipyards across the three largest shipbuilding countries

- Japan's # of shipyards has declined at a much lower rate (-23%) vs China's (-71%) since the 2009 peak
- The two main builders of drybulk vessels are China and Japan as S. Korea has focused on other sectors
- In 2007, 259 shipyards received an order vs just 37 in 2020
