Rapid7 Managed Detection and Response Helps Enterprises Rapidly Identify and Mitigate the Impact of Threats

6/5/2024

BOSTON, June 05, 2024 (GLOBE NEWSWIRE) -- **Rapid7, Inc.** (NASDAQ: RPD) today announced its collaboration with Comcast Business in support of the recently announced Comcast Business Managed Detection and Response (MDR) solution. The solution leverages Rapid7's security analytics platform and expertise to help small, medium, and large enterprise customers better manage an ever-evolving and challenging cyber threat landscape.

Managed Detection and Response is a cybersecurity service that combines technology and human expertise to perform cyber threat hunting, monitoring, and incident response. One of the primary benefits of MDR is its ability to assist with rapidly identifying threats, detecting incidents, responding to and eliminating advanced threats early in the attack chain to keep organizations secure from endpoint to cloud without the need for additional staffing.

"The combination of a world-class 24/7 Security Operations Center and Rapid7's advanced SecOps technology platform and expertise will deliver superior threat detection and prevention to enterprises of all sizes," said Jeremiah Dewey, Senior Vice President, Managed Services & Product Delivery, Rapid7. "With this technology platform, we plan to expand our partner ecosystem."

The **Rapid7 MDR platform** includes Next-Generation Antivirus (NGAV) and Ransomware Prevention, which stops malware and ransomware attacks at the earliest stages of the attack chain, minimizing impact to an alert, before it becomes an incident.
