Rapid7 Recognized as a Leader in the 2025 Gartner® Magic Quadrant™ for Exposure Assessment Platforms

2025-11-12

Recognized for completeness of vision and ability to execute

BOSTON, Nov. 12, 2025 (GLOBE NEWSWIRE) -- **Rapid7, Inc.** (NASDAQ: RPD), a leader in threat detection and exposure management, today announced it has been positioned as a Leader in the 2025 Gartner® Magic Quadrant™ for Exposure Assessment Platforms (EAPs).

Rapid7's Exposure Command delivers comprehensive exposure detection & remediation capabilities and broad attack surface management coverage across on-premises and cloud-native environments. Dynamic automated discovery, unified asset classification, real world threat-validated prioritization and intuitive LLM-based remediation guidance have made Rapid7 the premier option for modern security teams.

Uniquely positioned as a leader spanning exposure management, SIEM, and MDR, Rapid7 is the only vendor to have been placed as a Leader in the **2025 IDC MarketScape for Exposure Management**, the **Frost Radar™ for Managed Detection and Response (MDR)**, the **IDC MarketScape Worldwide SIEM for SMB**, and the **IDC MarketScape Worldwide SIEM for Enterprise.**

"Exposure assessment is now central to how security teams understand and reduce risk across their attack surfaces," said Craig Adams, chief product officer at Rapid7. "We believe being named a Leader in this Magic Quadrant reflects our commitment to redefining security operations by embedding continuous, business-aligned exposure management into the core of modern defense strategies."

For Rapid7, this recognition aligns directly with the Gartner Continuous Threat Exposure Management (CTEM)

model, which calls for a continuous, outcome-focused cycle of scoping, prioritization, validation, and mobilization. Rapid7 believes that its EAP offering, Exposure Command, allows teams to operationalize CTEM, by translating technical findings into business-relevant risk and enabling cross-functional response, bridging the gap between posture and business continuity.
