Denny's Development Department Awards Trane “2008 Vendor Of The Year”

Vendor exceeded expectations and provided significant value to Denny’s Brand

Spartanburg, SC – June 1, 2009 – Denny’s Development Department has recognized Trane as their “2008 Vendor of the Year.” Denny’s has been a Trane National Account customer since 2006.

The award, announced during Denny’s sixth annual luncheon, recognized Trane for exceeding expectations and providing significant value to the Denny’s brand.

“Trane has excelled in meeting our heating, ventilating and air-conditioning system needs for new and existing restaurants. Their support of our brand has been top notch,” says Steve Dunn, Denny’s vice president of development. “In 2008, Trane provided great customer service throughout the country.”

Since 2006, Trane has helped 186 Denny’s locations optimize their restaurant environments for efficiency and comfort with new or upgraded heating, ventilation and air conditioning systems. The national presence of Trane enables them to provide the high responsiveness and quick turnaround that a 24/7 operation like Denny’s requires.

“Systems reliability and energy efficiency are crucial in a high-volume, round-the-clock restaurant environment,” said Doug Wadas, national account manager, Trane. “We’re honored to be recognized by Denny’s for our work and excited to be part of the behind-the-scenes team facilitating the customer service for which they are known.”

About Denny’s
