

Largest Silver Producer in the U.S. and Canada

BMO 35th GLOBAL METALS, MINING & CRITICAL MINERALS CONFERENCE

FEBRUARY 2026

RESPONSIBLE. SAFE. INNOVATIVE.

Cautionary Statements

Cautionary Statement Regarding Forward-Looking Statements, Including 2026 Outlook

This presentation contains "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, which are intended to be covered by the safe harbor created by such sections and other applicable laws, including Canadian securities laws. Words such as "may", "will", "should", "expects", "intends", "projects", "believes", "estimates", "targets", "anticipates" and similar expressions are used to identify these forward-looking statements. Such forward-looking statements may include, without limitation: (i) the pending Casa Berardi sale is expected to position Hecla as North America's premier silver company; (ii) Casa Berardi transaction is expected to close in the first quarter of 2026; (iii) 2026 projected cashflow is expected to reach almost \$850 million at metal prices of \$100/oz silver and \$5,500/oz gold; (iv) at Lucky Friday, (a) the surface cooling project is tracking for completion in 2026 and is designed to increase cooling capacity over the mine's reserve mine-life of approximately fifteen years and (b) the mine is positioned to have the best decade in its 80-year history; (v) at Keno Hill, (a) at Keno Hill, the planned throughput rate of 440 tons per day is expected to drive production to generate robust positive free cash flow, supporting an accelerated capital payback profile and (b) there is a potential new Birmingham ore shoot and there is potential for a 50M oz resource; (vi) Optimization at near mine could extend mine life and targeting 1-2 years' additional worth of resources for conversion to reserves and acceleration of Nevada exploration; (vii) Medium term silver production potential of ~20 Moz, including contributions from a Keno Hill ramp up and a potential Midas restart development decision by 2029-30 with district-scale and hub and spoke operations potential, plus longer-term upside from Keno Hill expansion, Aurora/Hollister, and Libby; (viii) Ongoing annual exploration spend of approximately \$55M; (ix) Assertions that the silver market will remain in deficit and that industrial demand will remain strong/accelerate; (x) Commencement of significant drilling at Aurora in 2026; (xi) Company-wide and mine-specific estimated silver and gold production for 2026; (xii) Metals prices and foreign exchange rate assumptions; (xiii) Company's projected exploration spend will be 4-5% of expected revenues; (xiv) Company-wide and mine-specific estimated spending on capital, exploration and predevelopment for 2026.

The material factors or assumptions used to develop such forward-looking statements or forward-looking information include that the Company's plans for development and production will proceed as expected and will not require revision as a result of risks or uncertainties, whether known, unknown or unanticipated, to which the Company's operations are subject. Estimates or expectations of future events or results are based upon certain assumptions, which may prove to be incorrect, which could cause actual results to differ from forward-looking statements. Such assumptions, include, but are not limited to: (i) there being no significant change to current geotechnical, metallurgical, hydrological and other physical conditions; (ii) permitting, development, operations and expansion of the Company's projects being consistent with current expectations and mine plans; (iii) political/regulatory developments in any jurisdiction in which the Company operates being consistent with its current expectations; (iv) the exchange rate for the USD/CAD being approximately consistent with current levels; (v) certain price assumptions for gold, silver, lead and zinc; (vi) prices for key supplies being approximately consistent with current levels; (vii) the accuracy of our current mineral reserve and mineral resource estimates; (viii) there being no significant changes to the availability of employees, vendors and equipment; (ix) the Company's plans for development and production will proceed as expected and will not require revision as a result of risks or uncertainties, whether known, unknown or unanticipated; (x) counterparties performing their obligations under hedging instruments and put option contracts; (xi) sufficient workforce is available and trained to perform assigned tasks; (xii) weather patterns and rain/snowfall within normal seasonal ranges so as not to impact operations; (xiii) relations with interested parties, including First Nations and Native Americans, remain productive; (xiv) maintaining availability of water rights; (xv) factors do not arise that reduce available cash balances; and (xvi) there being no material increases in our current requirements to post or maintain reclamation and performance bonds or collateral related thereto. In addition, material risks that could cause actual results to differ from forward-looking statements include but are not limited to: (i) gold, silver and other metals price volatility; (ii) operating risks; (iii) currency fluctuations; (iv) increased production costs and variances in ore grade or recovery rates from those assumed in mining plans; (v) community relations; and (vi) litigation, political, regulatory, labor and environmental risks. For a more detailed discussion of such risks and other factors, see the Company's Form 10-K filed on February 17, 2026, for a more detailed discussion of factors that may impact expected future results. The Company undertakes no obligation and has no intention of updating forward-looking statements other than as may be required by law.

Qualified Person (QP)

Kurt D. Allen, MSc., CPG, VP-Exploration of Hecla Mining Company and Paul W. Jensen, MSc., CPG, Chief Geologist of Hecla Limited, serve as a Qualified Persons under S-K 1300 and NI 43-101 for Hecla's mineral projects. Mr. Allen supervised the preparation of the scientific and technical information concerning exploration activities while Mr. Jensen supervised the preparation of mineral resources for this presentation. Technical Report Summaries for the Company's Greens Creek, Lucky Friday, Casa Berardi and Keno Hill properties are filed as exhibits 96.1 - 96.4, respectively, to the Company's Annual Report on Form 10-K for the year ended December 31, 2025 and are available at www.sec.gov. Information regarding data verification, surveys and investigations, quality assurance program and quality control measures and a summary of analytical or testing procedures for (i) the Greens Creek Mine are contained in its Technical Report Summary and in its NI 43-101 technical report titled "Technical Report for the Greens Creek Mine" effective date December 31, 2018, (ii) the Lucky Friday Mine are contained in its Technical Report Summary and in its NI 43-101 technical report titled "Technical Report for the Lucky Friday Mine Shoshone County, Idaho, USA" effective date April 2, 2014, (iii) Casa Berardi are contained in its Technical Report Summary and in its NI 43-101 technical report titled "Technical Report on the Casa Berardi Mine, Northwestern Quebec, Canada" effective date December 31, 2023, (iv) Keno Hill is contained in its Technical Report Summary titled "S-K 1300 Technical Report Summary on the Keno Hill Mine, Yukon, Canada" and in its NI 43-101 technical report titled "Technical Report on the Keno Hill Mine, Yukon, Canada" effective date December 31, 2023, and (v) the San Sebastian Mine, Mexico, are contained in a NI 43-101 technical report prepared for Hecla titled "Technical Report for the San Sebastian Ag-Au Property, Durango, Mexico" effective date September 8, 2015. Also included in each Technical Report Summary and technical report listed above is a description of the key assumptions, parameters and methods used to estimate mineral reserves and resources and a general discussion of the extent to which the estimates may be affected by any known environmental, permitting, legal, title, taxation, socio-political, marketing, or other relevant factors. Information regarding data verification, surveys and investigations, quality assurance program and quality control measures and a summary of sample, analytical or testing procedures are contained in NI 43-101 technical reports prepared for Klondex Mines Ltd. for (i) the Fire Creek Mine (technical report dated March 31, 2018), (ii) the Hollister Mine (technical report dated May 31, 2017, amended August 9, 2017), and (iii) the Midas Mine (technical report dated August 31, 2014, amended April 2, 2015). Information regarding data verification, surveys and investigations, quality assurance program and quality control measures and a summary of sample, analytical or testing procedures are contained in a NI 43-101 technical reports prepared for ATAC Resources Ltd. for (i) the Osiris Project (technical report dated July 28, 2022) and (ii) the Tiger Project (technical report dated February 27, 2020). Copies of these technical reports are available under the SEDAR profiles of Klondex Mines Unlimited Liability Company and ATAC Resources Ltd., respectively, at www.sedar.com (the Fire Creek technical report is also available under Hecla's profile on SEDAR). Mr. Jensen reviewed and verified information regarding drill sampling, data verification of all digitally collected data, drill surveys and specific gravity determinations relating to all the mines. The review encompassed quality assurance programs and quality control measures including analytical or testing practice, chain-of-custody procedures, sample storage procedures and included independent sample collection and analysis. This review found the information and procedures meet industry standards and are adequate for Mineral Resource and Mineral Reserve estimation and mine planning purposes.

Cautionary Note Regarding Non-GAAP measures

Cash cost and AISC per ounce of silver and gold, after by-product credits, EBITDA, adjusted EBITDA, All-in Sustaining Costs, after by-product credits, realized silver margin, and free cash flow represent non-U.S. Generally Accepted Accounting Principles (GAAP) measurements. A reconciliation of these non-GAAP measures to the most comparable GAAP measurements can be found in the Appendix.

North America's Premier Silver Producer

Silver Legacy

- Oldest precious metals mining company on the NYSE with 135 years of history

Best Jurisdictions

- All operations located in the U.S. and Canada

Silver Focused

- Peer leading silver exposure in revenue and resources

Reserve Dominance

- Average reserve life double of peer group

Project Momentum

- Surfacing value through investment in robust project pipeline

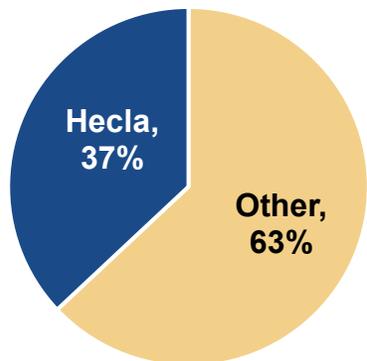

Cost Excellence

- Lowest cost producer among peer group

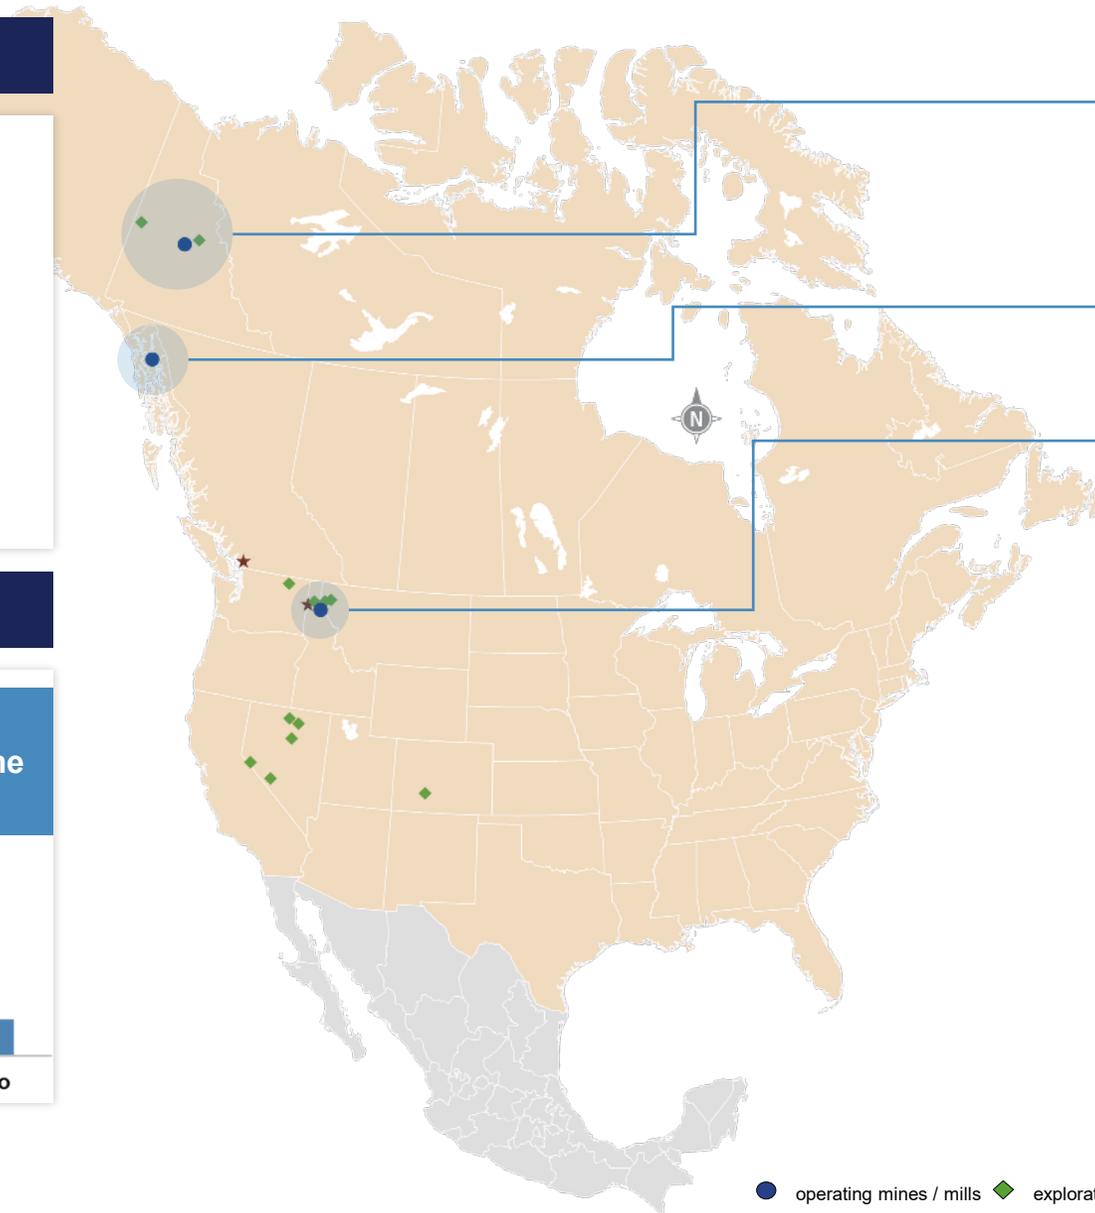

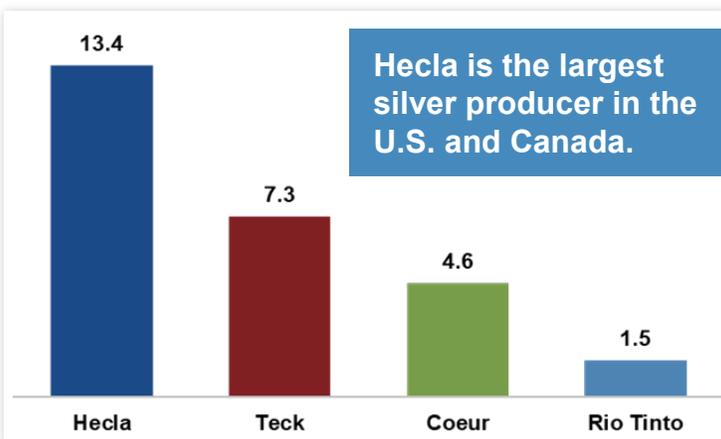

Our Asset Portfolio: Low Risk Jurisdictions

2024 U.S. Silver Production

2024 U.S. Silver Production (Moz)

Yukon

- Connaught, Dawson, Yukon
- Rackla, Mayo, Yukon
- Keno Hill, Mayo, Yukon

Alaska

- Greens Creek, Admiralty Island, Alaska

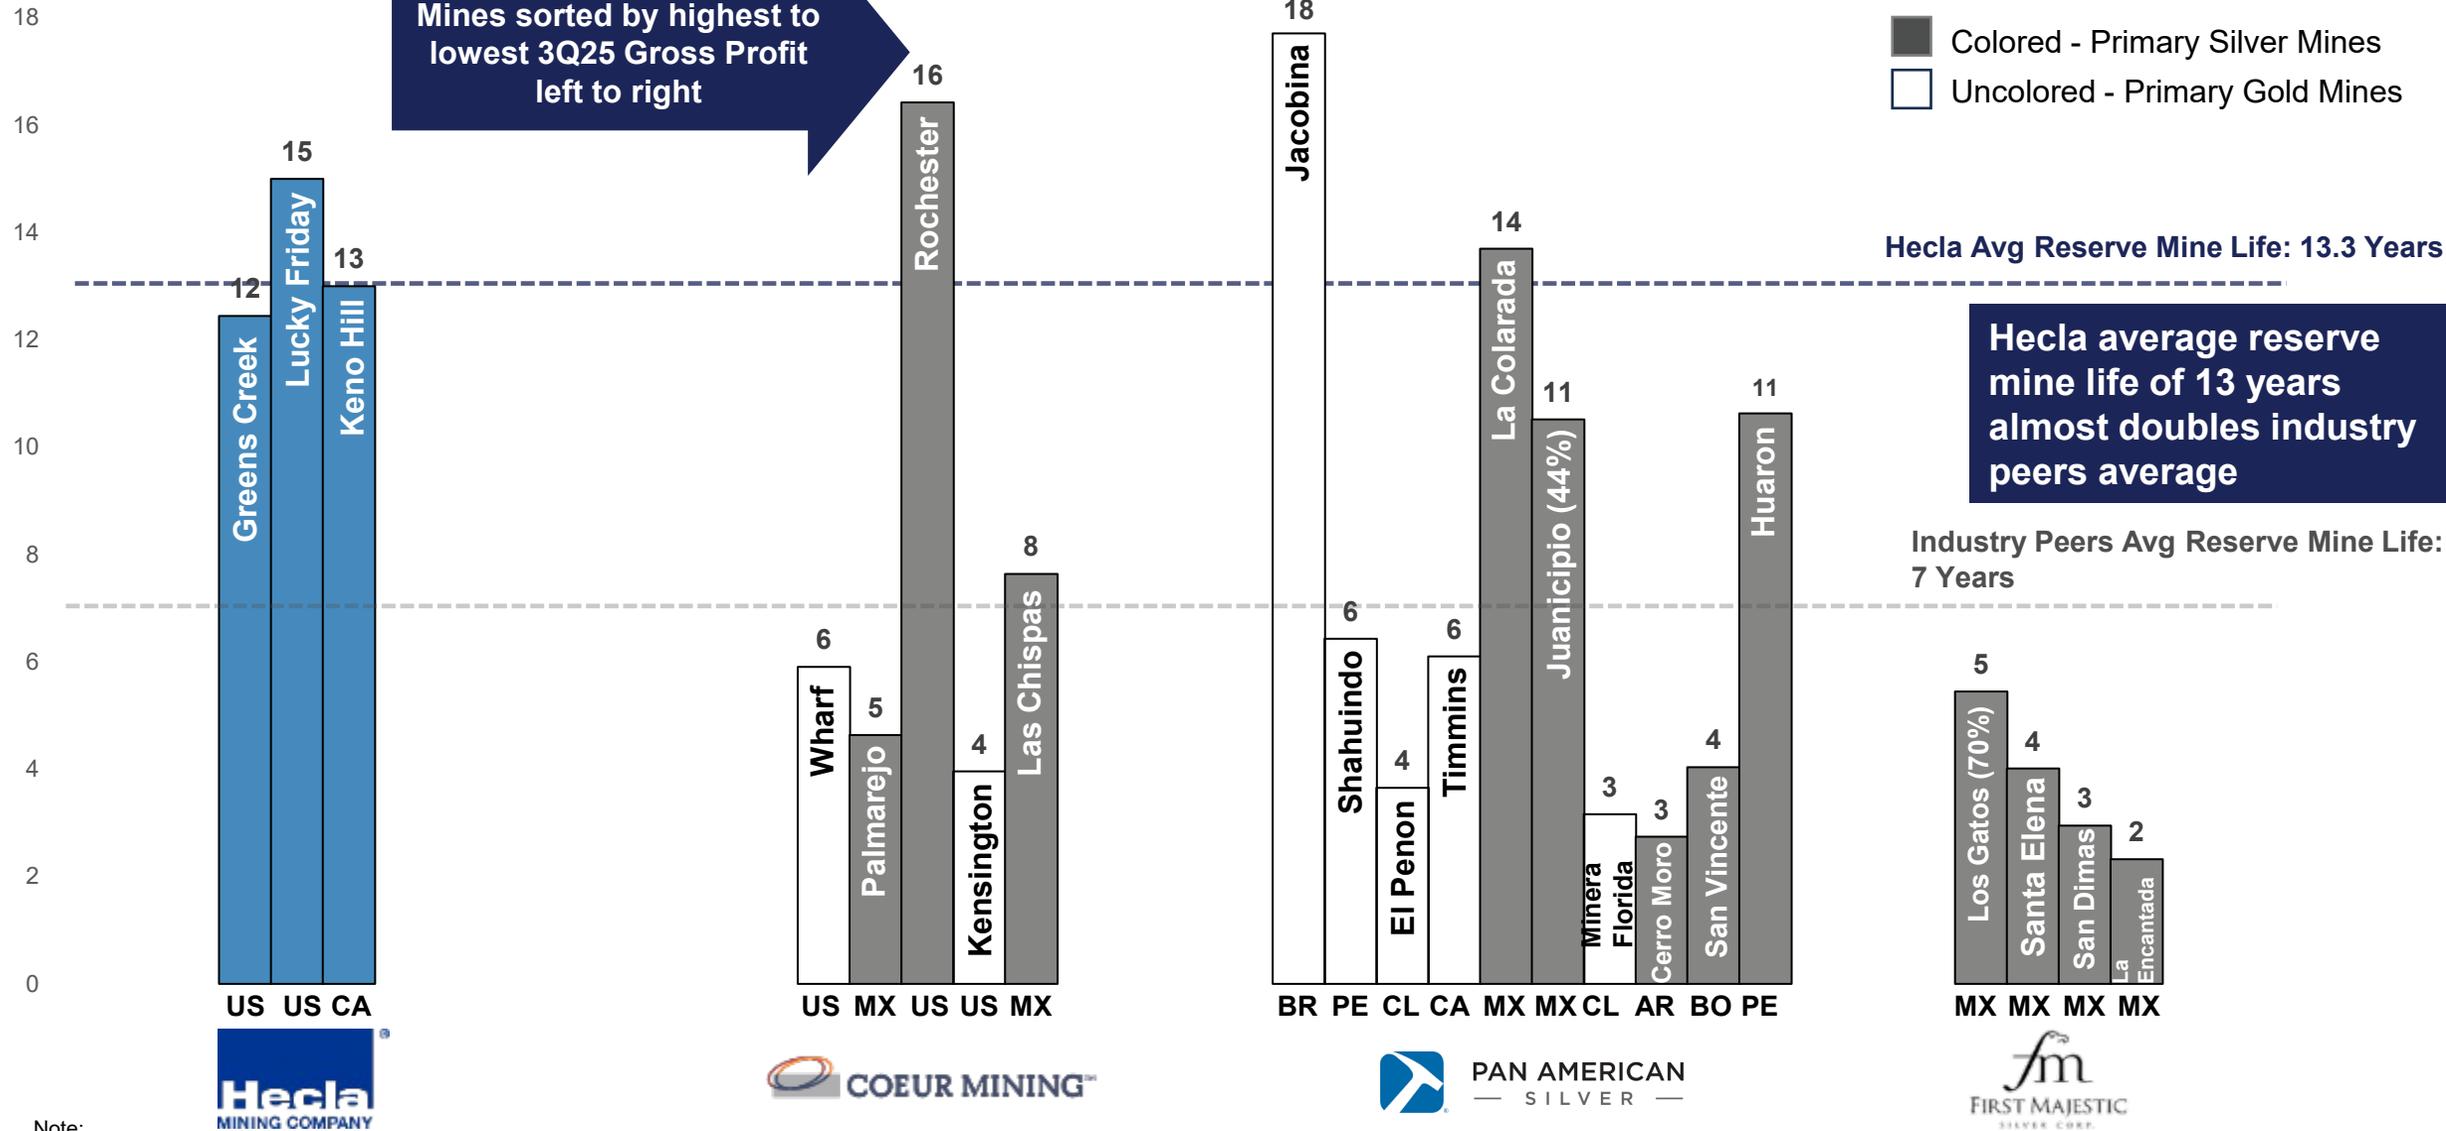

Idaho

- Silver Valley / Star, Wallace, Idaho
- Lucky Friday, Mullan, Idaho

Other Exploration Projects

- Republic, Republic, Washington
- Rock Creek, Noxon, Montana
- Libby Exploration Project, Libby, Montana
- San Juan Silver, Creede, Colorado
- Hollister, Elko County, Nevada
- Midas, Elko County, Nevada
- Fire Creek, Lander County, Nevada
- Aurora, Mineral County, Nevada
- Monte Cristo, Esmeralda County, Nevada

Why Invest in Hecla? Industry Leading Reserve Mine Life

Note:

1. Reserve mine life is calculated by dividing reserves tons by nameplate throughput capacity; mines sorted by Q3 2025 gross profit, with highest gross profit assets on left and declining gross profit to right
2. Country Acronyms: US – United States of America, CA – Canada, MX – Mexico, BR – Brazil, PE – Peru, CL – Chile, AR – Argentina, BO – Bolivia
3. HL reserves life updated for YE 2025, peers using YE 2024 reserves life

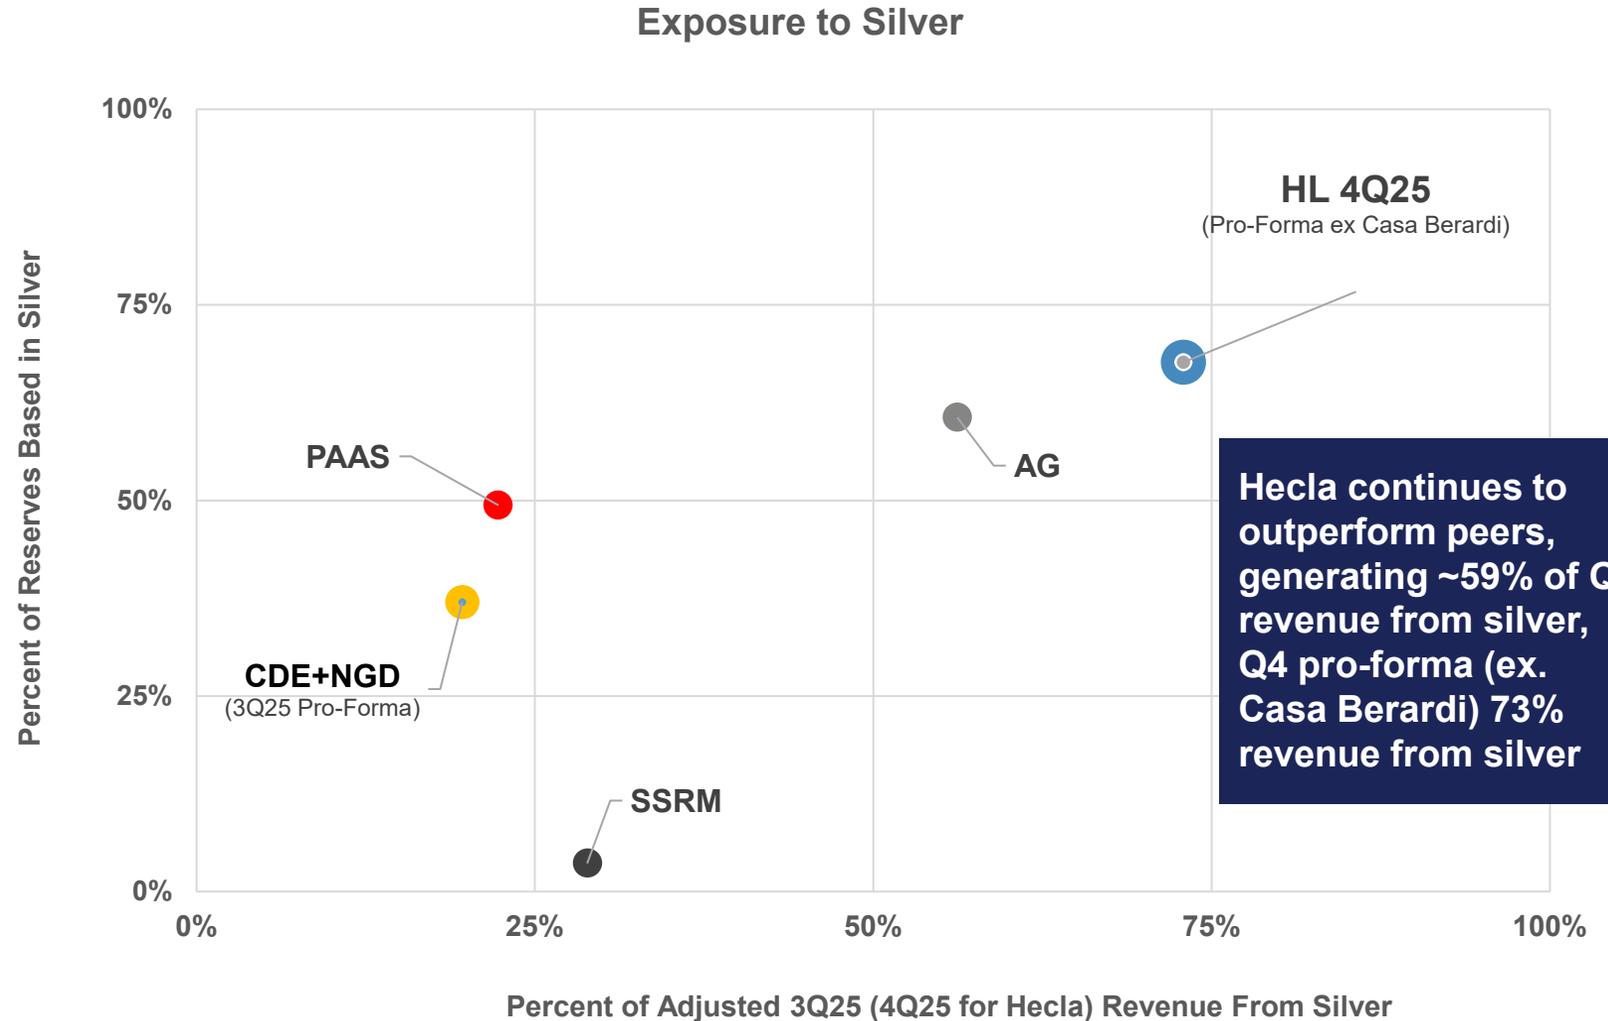

Why Invest in Hecla? Peer Leading Silver Exposure

Substantial silver revenue exposure

- Hecla (“HL”) derived ~59% of Q4 2025 revenue from silver, and nearly 73% of Q4 revenues excluding Casa Berardi.

Asset portfolio heavily focused on silver

- HL revenues, reserve and resource base heavily focused on silver.

Notes:

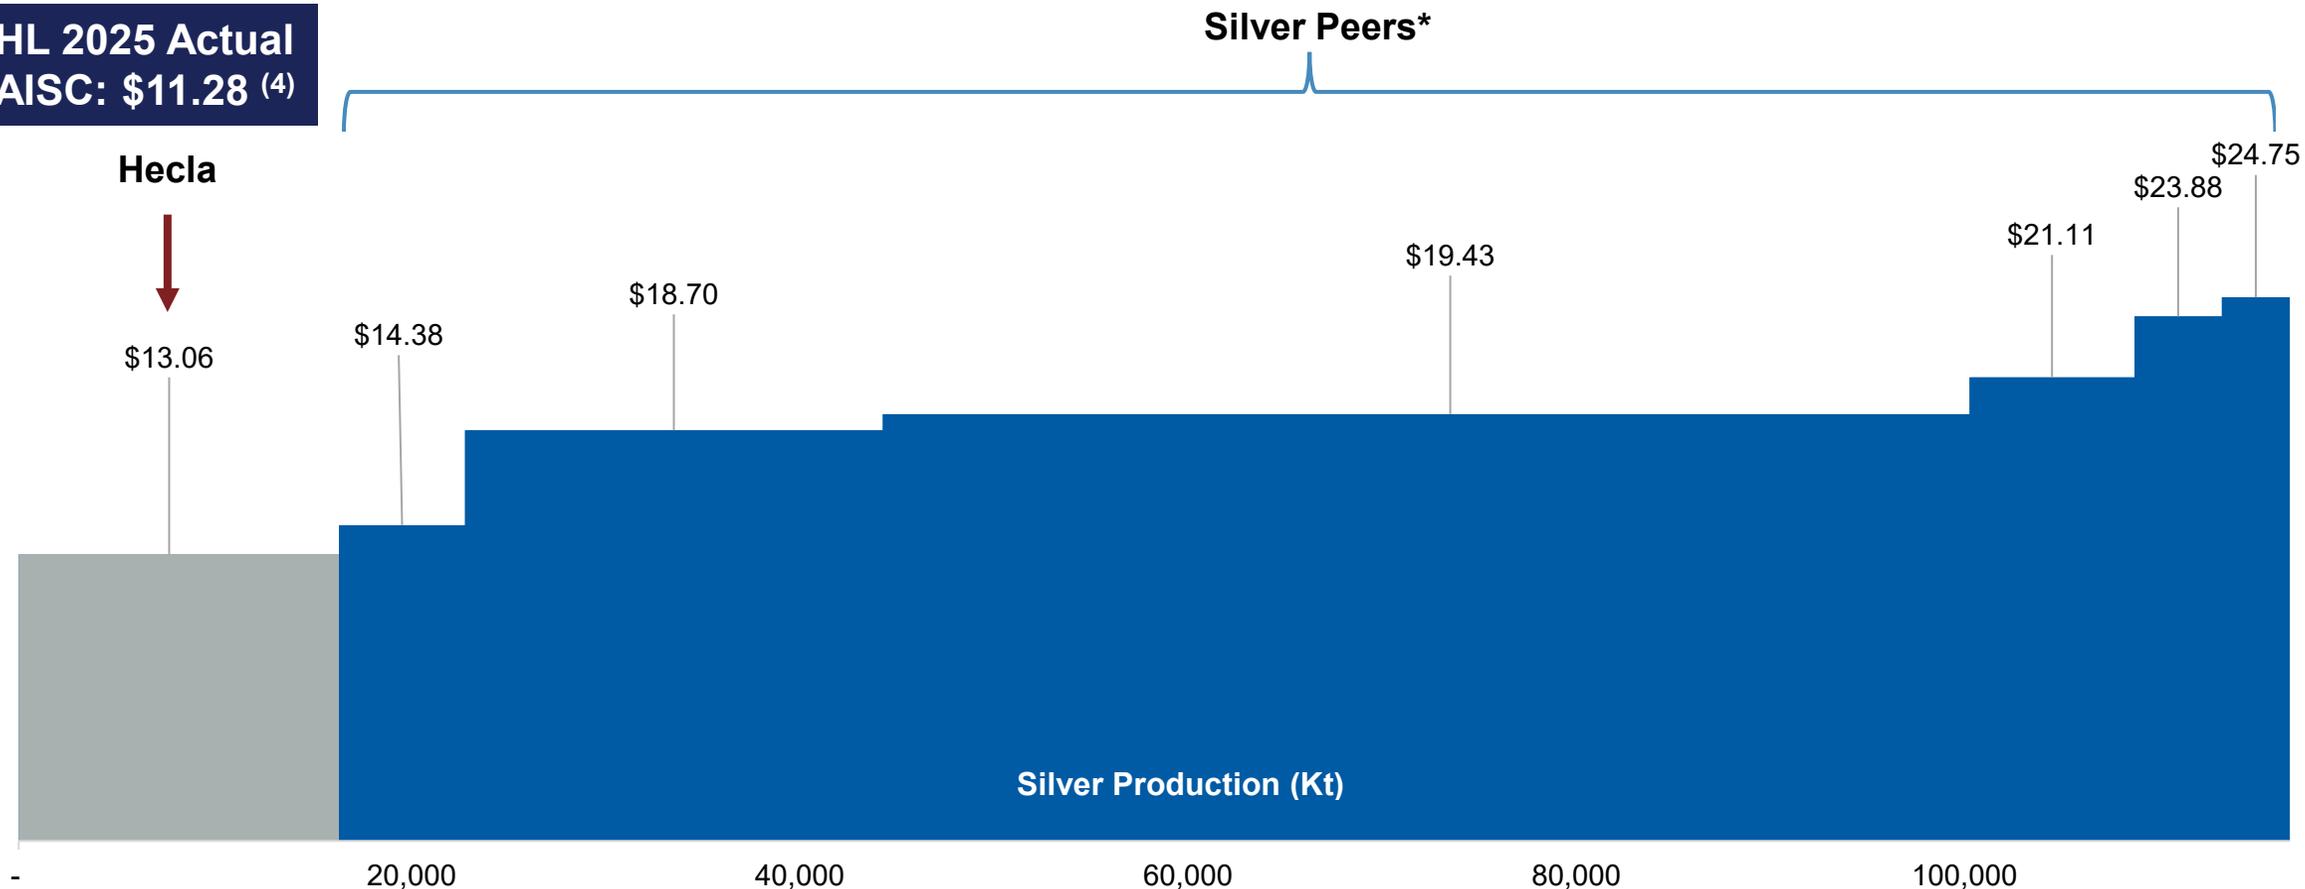

- Reserves as of year end 2024 (2025 for Hecla) adjusted to be inclusive/exclusive of attributable reserves from assets acquired/divested (or to be acquired/divested) by AG (GATO), CDE (SIL and NGD), PAAS (MAG), and HL (Casa Berardi)
- Silver equivalent reserves calculated using February 13, 2026 close prices for all metals, Silver: \$77.41/oz, Gold: \$5,042/oz, Lead: \$0.90/lb, Zinc: \$1.53/lb, Copper: \$5.84/lb

Low-cost Profile Silver Assets

2024 Actual AISC⁽⁴⁾: Hecla Is Strongly Positioned at the Lower End of the Silver Cost Curve

\$/oz AISC

**HL 2025 Actual
AISC: \$11.28 ⁽⁴⁾**

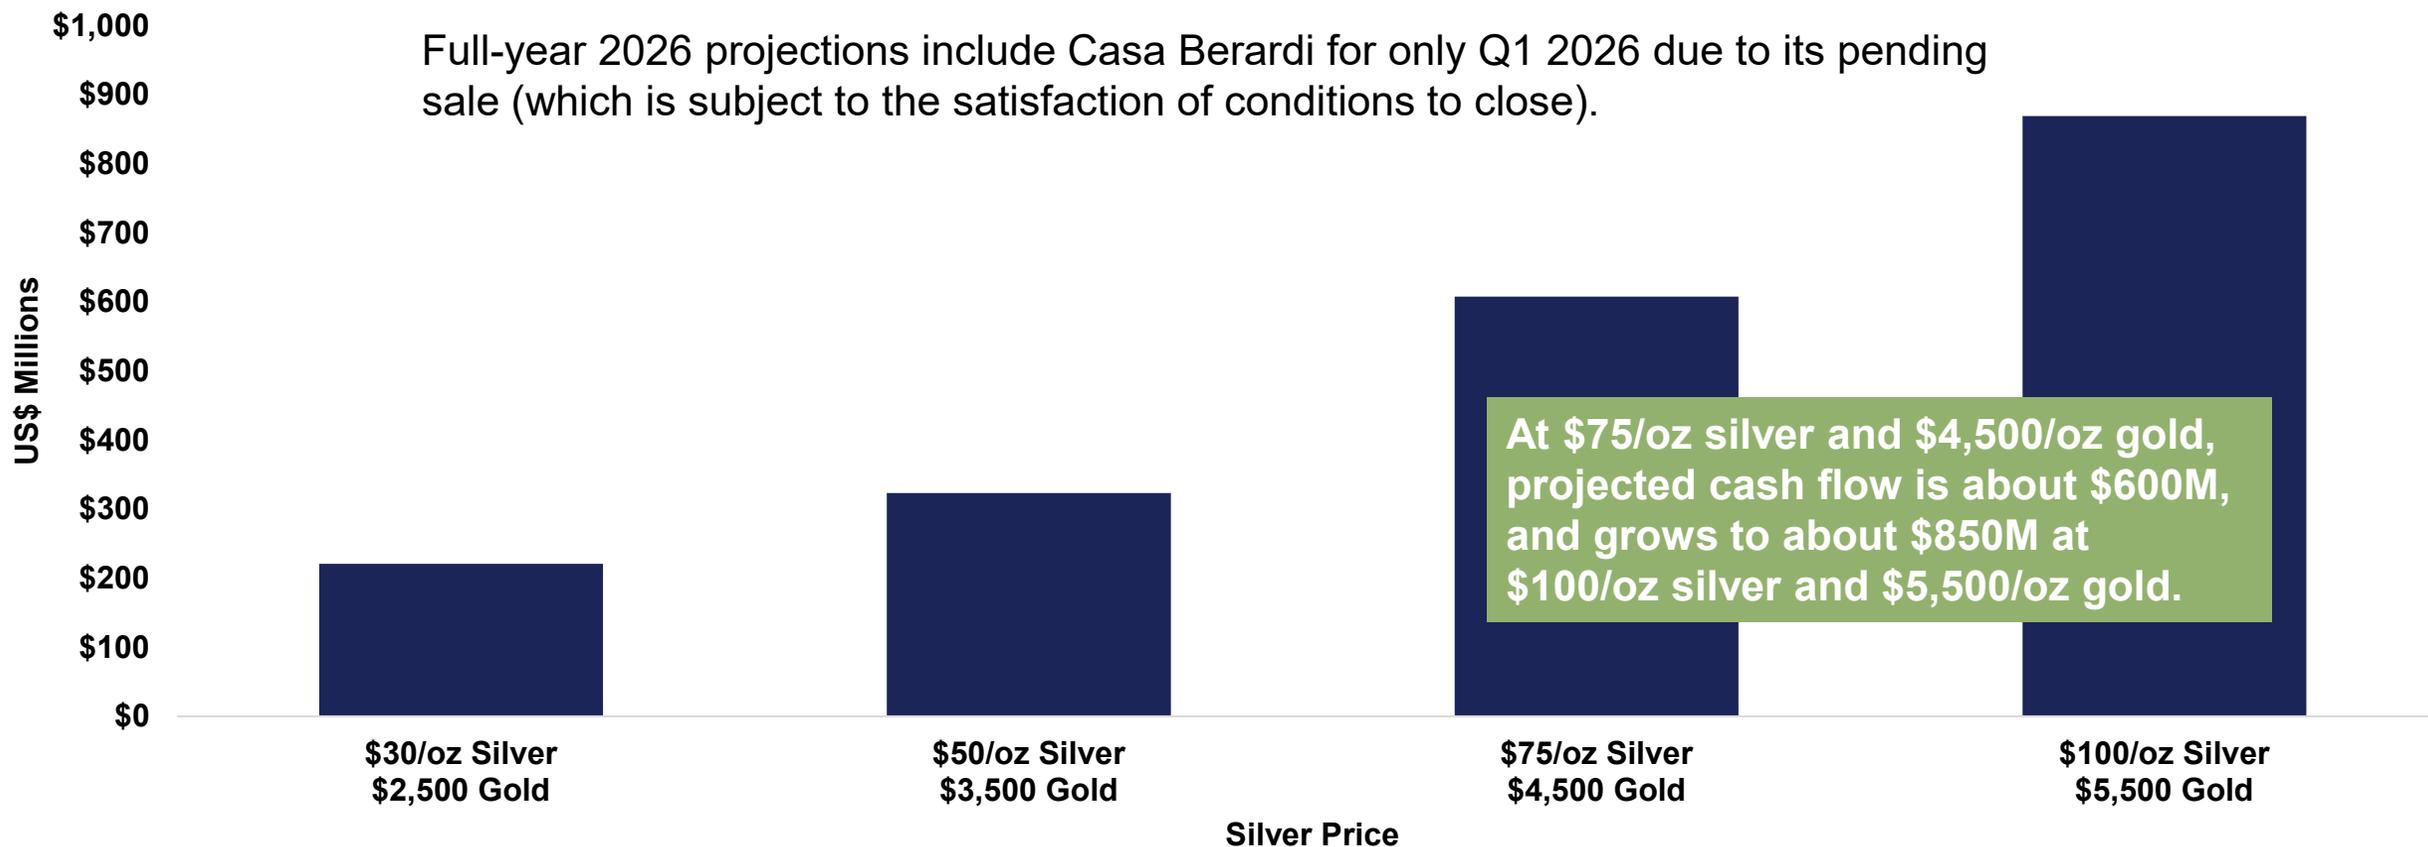

Expected Robust Free Cash Flow Generation

Projected 2026 Consolidated Free Cash Flow⁽²⁾: ~\$850M at \$100/oz Silver and \$5,500/oz Gold

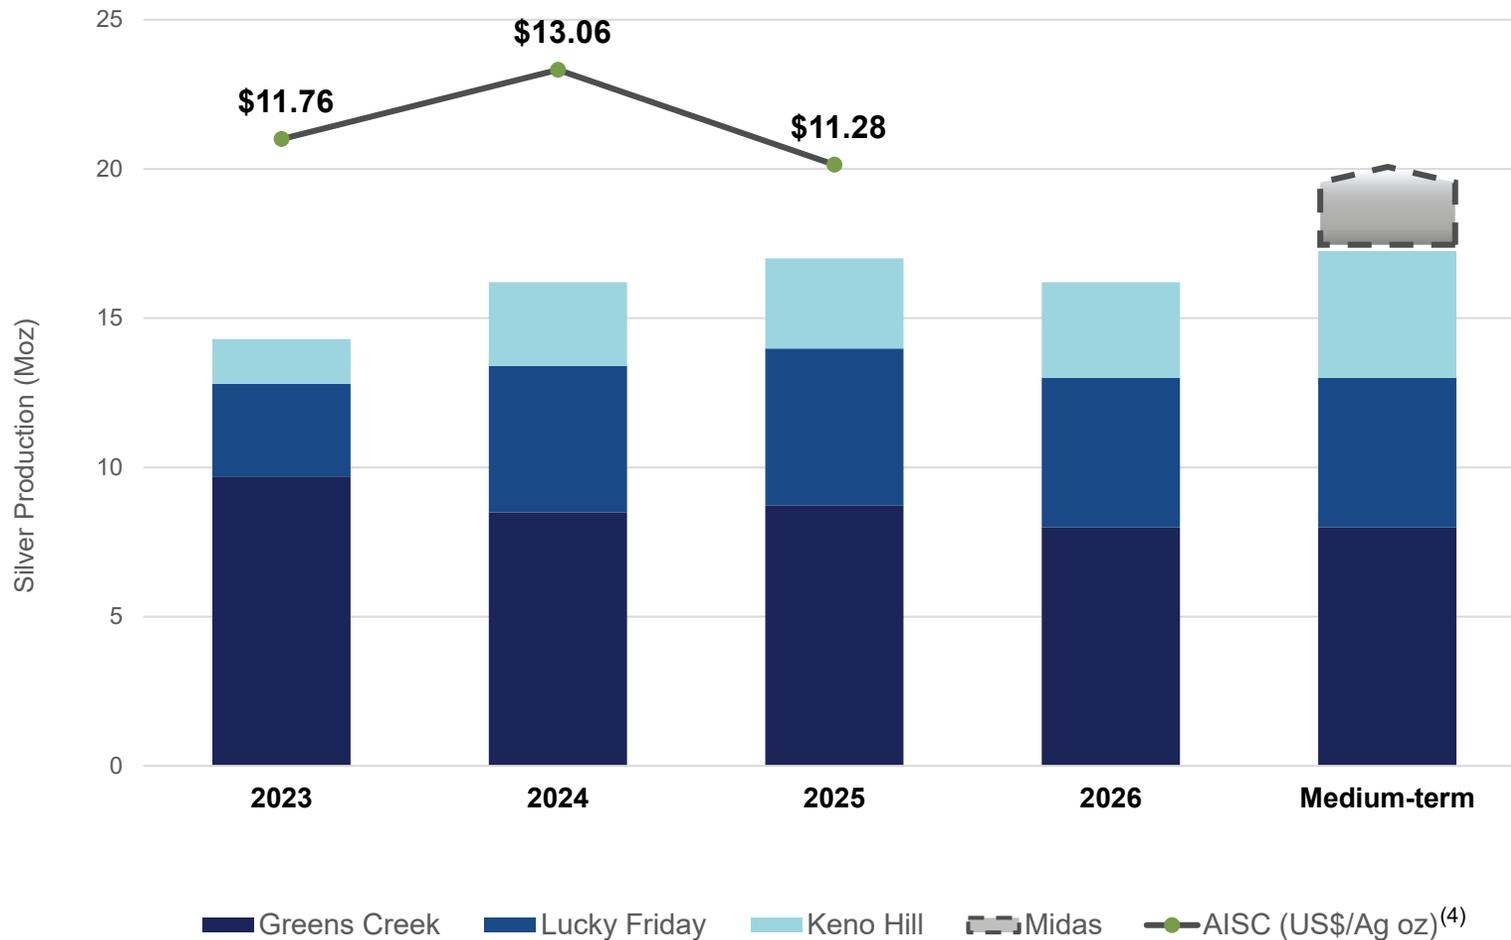

Projected 2026 Consolidated Free Cashflow Price Sensitivity to Silver and Gold

Full-year 2026 projections include Casa Berardi for only Q1 2026 due to its pending sale (which is subject to the satisfaction of conditions to close).

Medium-Term Outlook Potential: 20 Moz Silver Producer

Significant silver production growth potential over medium-term

Silver Production Growth Potential: 20 Moz

- 17 Moz in 2025
- 15.1-16.5 Moz in 2026
- Project pipeline supports potential of 20 Moz over medium term, driven by:
 - **Keno Hill ramp up**
 - **Midas restart**
- Further (long-term) upside potential from:
 - **Keno Hill expansion**
 - **Aurora and/or Hollister**
 - **Libby**

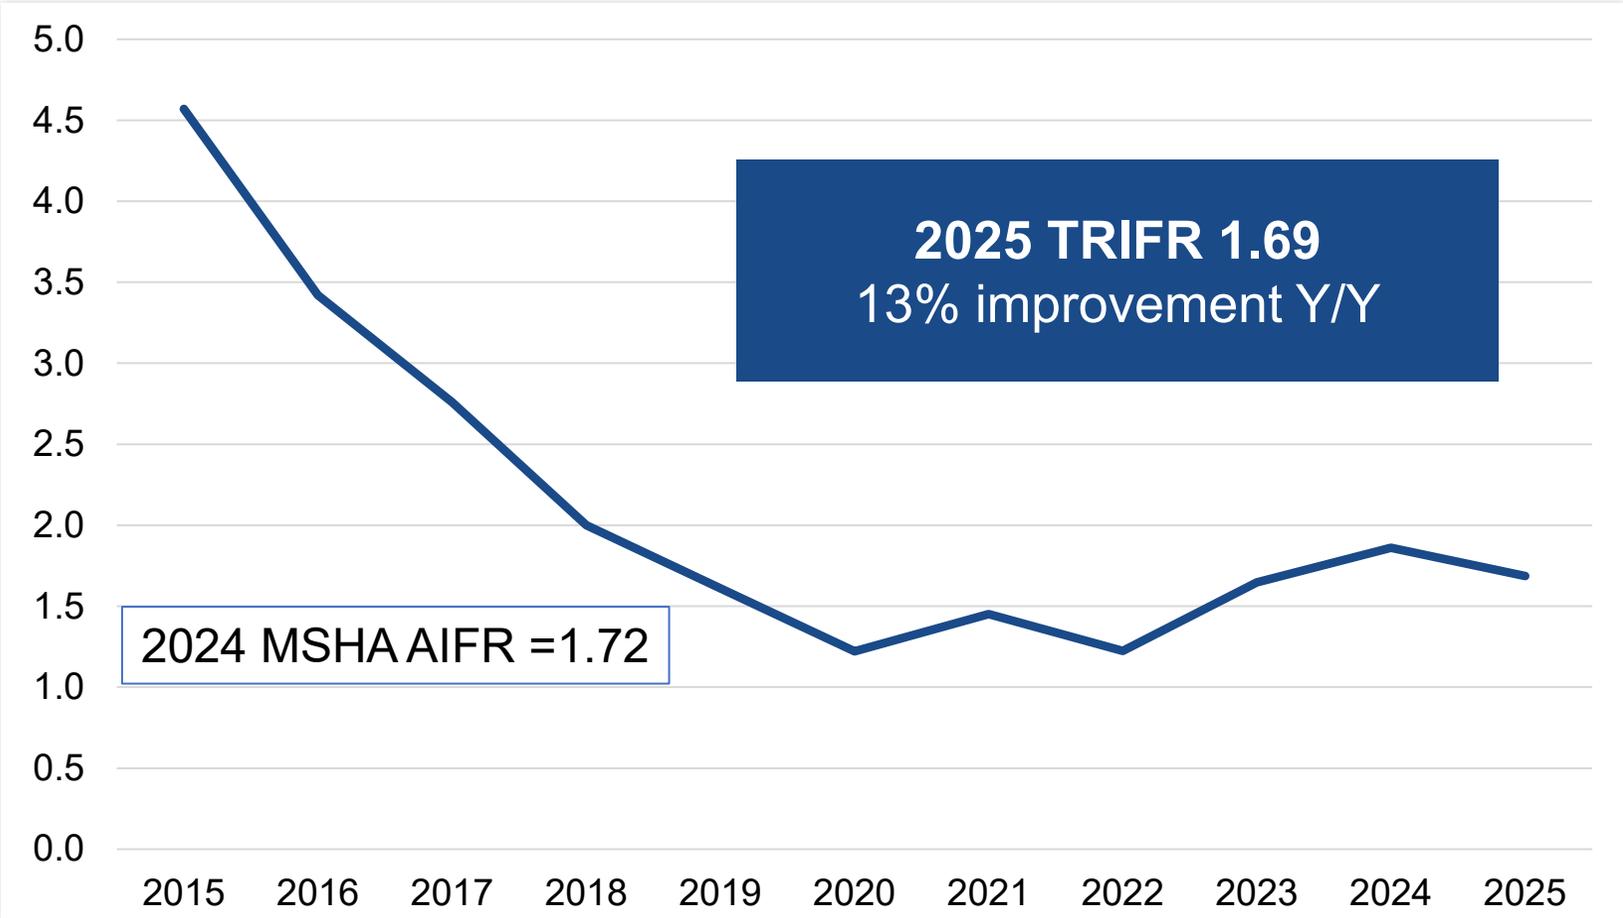

Capital Allocation: Disciplined Strategy Driving Value Creation

Safety – The Foundation to Success

Operational excellence starts here

Hecla: 10 Year Total Reportable Injury Frequency History (TRIFR)

Operational Achievements & Goals

- **2024:** Re-commitment to Safety Values – Safety Day and roll-out of Safety 365: Work Safe. Home Safe.
- **2025:** Focus on specific drivers of incidents
- **2026 Goals:** Fatality Prevention Program and continued improvement of all safety systems

Strategic Value Creation through Exploration

2026 \$55 Million investment an all-time record – represents 4.5% of projected revenue

Near Mine: \$24 Million

- Extends mine life
- Provides lowest risk and highest return
- Target: Add 1-2 years' worth of resources for conversion to reserves

Nevada Growth: \$16 Million

- Midas, Aurora, and Hollister
- Potential medium-term production – Path to restart development decision by 2029-30
- Target: 0.5 to 1.5M oz gold and silver resource

Early-Stage/Generative: \$10 Million

- Silver Valley and Generative exploration
- Tier 1 deposit discovery potential
- Target: Identify the next discovery for testing in 2027

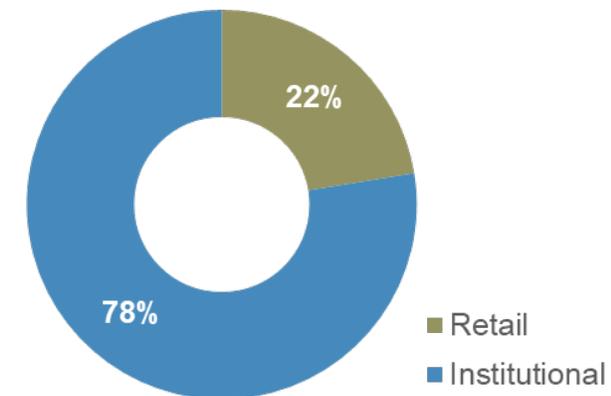

Unlocking Significant Value by Advancing Our Highest-Quality Projects

RESPONSIBLE. SAFE. INNOVATIVE.

APPENDIX

RESPONSIBLE. SAFE. INNOVATIVE.

2026 Guidance: Strong Margins Maintained

2026 Production Outlook		Silver Production (Moz)	Gold Production (Koz)
	Greens Creek	7.5 – 8.1	51.0 – 55.0
	Lucky Friday	4.7 – 5.2	N/A
	Keno Hill	2.9 – 3.2	N/A
	2026 Total	15.1 – 16.5	51.0 – 55.0
	Casa Berardi (Q1 2026)*	N/A	14.0 – 17.0

2026 Consolidated Cost Outlook		Total Cost of Sales (million)	Cash cost, after by-product credits, per silver/gold ounce ⁵	AISC, after by-product credits, per produced silver/gold ounce ⁴
	Greens Creek	\$287	(\$9.00) – (\$8.25)	\$0.00 – \$0.50
	Lucky Friday	\$184	\$10.25 - \$11.00	\$23.50 - \$26.00
	Total Silver	\$471	(\$1.50) – (\$1.25)	\$15.00 - \$16.25
	Casa Berardi (Q1 2026)*	\$49	\$2,350 - \$2,850	\$2,775 - \$3,375

2026 Capital and Exploration Outlook	(millions)	Total	Sustaining	Growth
	Capital Investments	\$204 - \$223	\$143 - \$157	\$61 - \$66
	Greens Creek	\$66 - \$71	\$66 - \$71	-
	Lucky Friday	\$68 - \$73	\$68 - \$73	-
	Keno Hill	\$61 - \$66	-	\$61 - \$66
	Corporate	\$9 - \$13	\$9 - \$13	-
	Exploration & Pre-Development Expenditures	\$55		
	2026 Casa Berardi Capital Investment (Q1 2026)*	\$12 - \$15	\$6 - \$8	\$6 - \$7
2026 Casa Berardi Exploration (Q1 2026)*	\$2.1			

End Notes

1. Net debt to adjusted EBITDA is a non-GAAP measurement, a reconciliation of adjusted EBITDA and net debt to the closest GAAP measurements of net income (loss) and debt can be found in the appendix. It is an important measure for management to measure relative indebtedness and the ability to service the debt relative to its peers. It is calculated as total debt outstanding less total cash on hand divided by adjusted EBITDA.
2. Free cash flow is a non-GAAP measure and is calculated as cash flow from operations less additions to property, plant and equipment net of finance leases. Reconciliation to GAAP is shown in the appendix.
3. Realized silver margin is a non-GAAP measure and is calculated as realized market price of silver less AISC.
4. All-in sustaining cost (“AISC”), after by-product credits, is a non-GAAP measurement, a reconciliation of which to total cost of sales, the closest GAAP measurement, can be found in the appendix. AISC, after by-product credits, includes total cost of sales and other direct production costs, expenses for reclamation and exploration, and sustaining capital costs at the mine sites. AISC, after by-product credits, for our consolidated silver properties also includes corporate costs for all general and administrative expenses, exploration and sustaining capital which support the operating properties. AISC, after by-product credits, is calculated net of depreciation, depletion, and amortization and by-product credits. Current GAAP measures used in the mining industry, such as cost of goods sold, do not capture all the expenditures incurred to discover, develop and sustain silver and gold production. Management believes that all in sustaining costs is a non-GAAP measure that provides additional information to management, investors and analysts to help in the understanding of the economics of our operations and performance compared to other producers and in the investor's visibility by better defining the total costs associated with production. Similarly, the statistic is useful in identifying acquisition and investment opportunities as it provides a common tool for measuring the financial performance of other mines with varying geologic, metallurgical and operating characteristics. In addition, the Company may use it when formulating performance goals and targets under its incentive program.
5. Cash cost, after by-product credits, per silver and gold ounce represents a non-GAAP measurement, a reconciliation of which to total cost of sales and other direct production costs and depreciation, depletion and amortization (sometimes referred to as “total cost of sales” in this presentation), can be found in the Appendix. It is an important operating statistic that management utilizes to measure each mine's operating performance. It also allows the benchmarking of performance of each mine versus those of our competitors. As a primary U.S. silver mining company, management also uses the statistic on an aggregate basis – aggregating the Greens Creek and Lucky Friday mines – to compare performance with that of other primary silver mining companies. With regard to Casa Berardi, management uses cash cost, after by-product credits, per gold ounce to compare its performance with other gold mines. Similarly, the statistic is useful in identifying acquisition and investment opportunities as it provides a common tool for measuring the financial performance of other mines with varying geologic, metallurgical and operating characteristics. In addition, the Company may use it when formulating performance goals and targets under its incentive program.
6. Silver and gold equivalent (include zinc and lead production) is calculated using the average market prices for the time period noted.
7. Total cost of sales and other direct production costs and depreciation, depletion and amortization, and excludes ramp-up and suspension costs.
8. 2026E refer to Hecla's estimates for 2026. Expectations for 2026 include silver, gold, lead and zinc production from Greens Creek, Lucky Friday, Keno Hill, and Casa Berardi converted using Au \$4,000/oz, Ag \$50.00/oz, Zn \$1.30/lb, and Pb 0.90\$/lb, for byproduct credit calculations. Numbers are rounded. Assumed exchange rate for Canadian dollar is unchanged at 1.35 CAD/USD.

Mineral Reserves – 12/31/2025⁽¹⁾ (4/4)

1. The term “reserve” means an estimate of tonnage and grade or quality of indicated and measured mineral resources that, in the opinion of the qualified person, can be the basis of an economically viable project. More specifically, it is the economically mineable part of a measured or indicated mineral resource, which includes diluting materials and allowances for losses that may occur when the material is mined or extracted. The term “proven reserves” means the economically mineable part of a measured mineral resource and can only result from conversion of a measured mineral resource. See footnotes 8 and 9 below.
2. Mineral reserves are based on \$25/oz silver, \$2100/oz gold, \$0.90/lb lead, \$1.15/lb zinc, unless otherwise stated. All Mineral Reserves are reported in-situ with estimates of mining dilution and mining loss.
3. The reserve NSR cut-off values for Greens Creek are \$275/ton for all zones; metallurgical recoveries (actual 2025): 79.3% for silver, 74% for gold, 82.6% for lead, and 88.8% for zinc.
4. The reserve NSR cut-off values for Lucky Friday are \$280/ton for all veins; metallurgical recoveries (actual 2025): 94.5% for silver, 94.3% for lead, and 85.1% for zinc.
5. The average reserve cut-off grades at Casa Berardi are 0.11 oz/ton gold (3.8 g/tonne) underground and 0.03 oz/ton gold (0.97 g/tonne) for open pit. Metallurgical recovery (actual 2025): 87% for gold; US\$/CAN\$ exchange rate: 1:1.35
6. The reserve NSR cut-off value at Keno Hill is \$336/ton (CAN\$500/tonne), Metallurgical recovery (actual 2025): 96.2% for silver, 94% for lead, 81% for zinc; US\$/CAN\$ exchange rate: 1:1.35
7. The term “probable reserves” means the economically mineable part of an indicated and, in some cases, a measured mineral resource. See footnotes 9 and 10 below.

Totals may not represent the sum of parts due to rounding

⁽⁹⁾ The reserves and resources described herein include those of Hecla's subsidiary, Hecla Quebec Inc. ("HQI"), including the Casa Berardi mine. On January 26, 2026, Hecla announced it had entered into an agreement to sell HQI to Orezone Gold Corporation. If the sale closes, as expected, the reserves and resources associated with HQI, including at Casa Berardi and the Heva and Hosco exploration projects, would no longer be the property of Hecla. There is no assurance the transaction will close, and readers should refer to Hecla's SEC filings, including risk factors disclosed in its Form 10-K and any subsequent SEC filings and the risk factors therein.

⁽⁸⁾ The reserves and resources described herein include those of Hecla's subsidiary, Hecla Quebec Inc. ("HQI"), including the Casa Berardi mine. On January 26, 2026, Hecla announced it had entered into an agreement to sell HQI to Orezone Gold Corporation. If the sale closes, as expected, the reserves and resources associated with HQI, including at Casa Berardi and the Heva and Hosco exploration projects, would no longer be the property of Hecla. There is no assurance the transaction will close, and readers should refer to Hecla's SEC filings, including risk factors disclosed in its Form 10-K and any subsequent SEC filings and the risk factors therein.

Mineral Resources - 12/31/2025⁽⁸⁾ (5/6)

Note: All estimates are in-situ except for the proven reserves at Greens Creek which are in surface stockpiles. Mineral resources are exclusive of reserves.

8. The term "mineral resources" means a concentration or occurrence of material of economic interest in or on the Earth's crust in such form, grade or quality, and quantity that there are reasonable prospects for economic extraction. A mineral resource is a reasonable estimate of mineralization, taking into account relevant factors such as cut-off grade, likely mining dimensions, location or continuity, that, with the assumed and justifiable technical and economic conditions, is likely to, in whole or in part, become economically extractable. It is not merely an inventory of all mineralization drilled or sampled.
9. The term "measured resources" means that part of a mineral resource for which quantity and grade or quality are estimated on the basis of conclusive geological evidence and sampling. The level of geological certainty associated with a measured mineral resource is sufficient to allow a qualified person to apply modifying factors in sufficient detail to support detailed mine planning and final evaluation of the economic viability of the deposit. Because a measured mineral resource has a higher level of confidence than the level of confidence of either an indicated mineral resource or an inferred mineral resource, a measured mineral resource may be converted to a proven mineral reserve or to a probable mineral reserve.
10. The term "indicated resources" means that part of a mineral resource for which quantity and grade or quality are estimated on the basis of adequate geological evidence and sampling. The level of geological certainty associated with an indicated mineral resource is sufficient to allow a qualified person to apply modifying factors in sufficient detail to support mine planning and evaluation of the economic viability of the deposit. Because an indicated mineral resource has a lower level of confidence than the level of confidence of a measured mineral resource, an indicated mineral resource may only be converted to a probable mineral reserve.
11. The term "inferred resources" means that part of a mineral resource for which quantity and grade or quality are estimated on the basis of limited geological evidence and sampling. The level of geological uncertainty associated with an inferred mineral resource is too high to apply relevant technical and economic factors likely to influence the prospects of economic extraction in a manner useful for evaluation of economic viability. Because an inferred mineral resource has the lowest level of geological confidence of all mineral resources, which prevents the application of the modifying factors in a manner useful for evaluation of economic viability, an inferred mineral resource may not be considered when assessing the economic viability of a mining project and may not be converted to a mineral reserve.
12. Mineral resources are based on \$2,250/oz gold, \$26/oz silver, \$0.90/lb lead, \$1.20/lb zinc and \$4.00/lb copper, unless otherwise stated.
13. The resource NSR cut-off values for Greens Creek are \$275/ton for all zones; metallurgical recoveries (actual 2025): 79.3% for silver, 74% for gold, 82.6% for lead, and 88.8% for zinc.
14. The resource NSR cut-off value for Lucky Friday is \$280/ton; metallurgical recoveries (actual 2025): 94.5% for silver, 94.3% for lead, and 85.1% for zinc
15. The average resource cut-off grades at Casa Berardi are 0.10 oz/ton gold (3.6 g/tonne) for underground and 0.03 oz/ton gold (0.90g/tonne) for open pit; metallurgical recovery (actual 2025): 87% for gold; US\$/CAN\$ exchange rate: 1:1.35.
16. The resource NSR cut-off value at Keno Hill is \$336.00/ton (CAN\$500/tonne); using minimum width of 4.5 feet (1.5m); metallurgical recovery (actual 2025): 96.2% for silver, 94% for lead, 81% for zinc; US\$/CAN\$ exchange rate: 1:1.35

Mineral Resources - 12/31/2025⁽⁸⁾ (6/6)

17. Mineral resources for underground zones at San Sebastian reported at a cut-off grade of \$163.29/ton (\$180/tonne), open pit resources reported at a cut-off grade of \$74.84/ton (\$82.50/tonne); Metallurgical recoveries based on grade dependent recovery curves: recoveries at the mean resource grade average 89% for silver and 84% for gold for oxide material and 85% for silver, 83% for gold, 81% for lead, 86% for zinc, and 83% for copper for sulfide material. Resources reported at a minimum mining width of 8.2 feet (2.5m) for Middle Vein, North Vein, and East Francine, 6.5ft (1.98m) for El Toro, El Bronco, and El Tigre, and 4.9 feet (1.5 m) for Hugh Zone and Andrea.
18. Mineral resources for Fire Creek, Hollister and Midas are reported using a minimum mining width of four feet or the vein true thickness plus two feet, whichever is greater.
19. Fire Creek underground mineral resources are reported at a gold equivalent cut-off grade of 0.228 oz/ton. Metallurgical recoveries: 90% for gold and 70% for silver.
20. Hollister mineral resources, including the Hatter Graben are reported at a gold equivalent cut-off grade of 0.191 oz/ton. Metallurgical recoveries: 88% for gold and 66% for silver
21. Midas mineral resources are reported at a gold equivalent cut-off grade of 0.183 oz/ton. Metallurgical recoveries: 90% for gold and 70% for silver. Inferred resources for the Sinter Zone are reported undiluted.
22. Mineral resources at Heva and Hosco are based on a gold cut-off grade of 0.008 oz/ton (0.277 g/tonnes) for open pit and 0.102 oz/ton (3.5 g/tonne) for underground and metallurgical recoveries of 95% for gold at Heva and 81.5% and 87.7% for gold at Hosco depending on zone. Heva and Hosco resources are diluted 20% and reported using a 7% mining loss.
23. Indicated and Inferred resources at the Star property are reported using a minimum mining width of 4.3 feet and an NSR cut-off value of \$280/ton; Metallurgical recovery: 93% for silver, 93% for lead, and 87% for zinc.
24. Inferred open-pit resources for Fire Creek calculated November 30, 2017 using gold and silver recoveries of 65% and 30% for oxide material and 60% and 25% for mixed oxide-sulfide material. Indicated Resources reclassified as Inferred in 2019. Open pit resources are calculated at \$1400 gold and \$19.83 silver and cut-off grade of 0.01 Au Equivalent oz/ton and is inclusive of 10% mining dilution and 5% ore loss. Open pit mineral resources exclusive of underground mineral resources. NI43-101 Technical Report for the Fire Creek Project, Lander County, Nevada; Effective Date March 31, 2018; prepared by Practical Mining LLC, Mark Odell, P.E. for Hecla Mining Company, June 28, 2018.
25. Inferred resources reported at a minimum mining width of 6.0 feet for Bulldog and an NSR cut-off value of \$206/ton, and 5.0 feet for Equity and North Amethyst veins at an NSR cut-off value of \$206/ton; Metallurgical recoveries based on grade dependent recovery curves; metal recoveries at the mean resource grade average 89% silver, 74% lead, and 81% zinc for the Bulldog and a constant 85% gold and 85% silver for North Amethyst and Equity.
26. Inferred resource at Monte Cristo reported at a minimum mining width of 5.0 feet and a 0.094 oz/ton gold cut-off grade. Metallurgical recovery: 85% for gold and 85% silver.
27. Inferred resource at Rock Creek reported at a minimum thickness of 15 feet and an NSR cut-off value of \$35.10/ton; Metallurgical recoveries: 88% for silver and 92% for copper. Resources adjusted based on mining restrictions as defined by U.S. Forest Service, Kootenai National Forest in the June 2003 'Record of Decision, Rock Creek Project'.
28. Inferred resource at Libby reported at a minimum thickness of 15 feet and an NSR cut-off value of \$35.10/ton NSR; Metallurgical recoveries: 88% for silver and 92% copper. Resources adjusted based on mining restrictions as defined by U.S. Forest Service, Kootenai National Forest, Montana DEQ in December 2015 'Joint Final EIS, Montanore Project' and the February 2016 U.S Forest Service - Kootenai National Forest 'Record of Decision, Montanore Project'.
29. Mineral resources at the Rackla-Tiger Project are based on a gold price of \$1650/oz, metallurgical recovery of 95% for gold, and cut-off grades of 0.02 oz/ton gold for the open pit portion of the resources and 0.04 oz/ton gold for the underground portions of the resources; US\$/CAN\$ exchange rate: 1:1.3.
30. Mineral resources at the Rackla-Osiris Project are based on a gold price of \$1850/oz, metallurgical recovery of 83% for gold, and cut-off grades of 0.03 oz/ton gold for the open pit portion of the resources and 0.06 oz/ton gold for the underground portions of the resources; US\$/CAN\$ exchange rate: 1:1.3.
