

New Orleans Investment Conference

October 25-27, 2012

Hecla MINING COMPANY

Cautionary Statements

Cautionary Statements

Statements made which are not historical facts, such as anticipated payments, litigation outcome, production, sales of assets, exploration results and plans, prospects and opportunities including reserves, resources, and mineralization, costs, and prices or sales performance are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Words such as “may”, “will”, “should”, “expects”, “intends”, “projects”, “believes”, “estimates”, “targets”, “anticipates” and similar expressions are used to identify these forward-looking statements. Forward-looking statements involve a number of risks and uncertainties that could cause actual results to differ materially from those projected, anticipated, expected or implied. These risks and uncertainties include, but are not limited to, metals price volatility, volatility of metals production and costs, environmental and litigation risks, operating risks, project development risks, political and regulatory risks, labor issues, ability to raise financing and exploration risks and results. Refer to the company's Form 10-K and 10-Q reports for a more detailed discussion of factors that may impact expected future results. The company undertakes no obligation and has no intention of updating forward-looking statements other than as may be required by law.

Cautionary Statements to Investors on Reserves and Resources

The United States Securities and Exchange Commission permits mining companies, in their filings with the SEC, to disclose only those mineral deposits that a company can economically and legally extract or produce. We use certain terms on this release, such as “resource,” “other resources,” and “mineralized materials” that the SEC guidelines strictly prohibit us from including in our filings with the SEC. U.S. investors are urged to consider closely the disclosure in our Form 10-K and Form 10-Q. You can review and obtain copies of these filings from the SEC's website at www.sec.gov.

Cautionary Note Regarding Non-GAAP measures

Total cash cost per ounce of silver and earnings before adjustments represent non-U.S. Generally Accepted Accounting Principles (GAAP) measurements. A reconciliation of total cash cost to cost of sales and other direct production costs and depreciation, depletion and amortization (GAAP) can be found in the Appendix.

New Innovation has Changed Demand

- February 1900
- Long-running popular series of simple and inexpensive cameras
- Introduced the concept of the “snapshot”
- Transformed the demand of silver
- Today new innovation has changed demand again

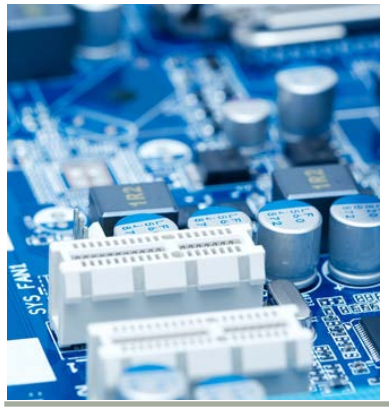

Silver - The Metal of This Age

- Has the highest electrical conductivity of all the metals
  - 80% more conductive than aluminum
  - 50% more conductive than gold, 6% more conductive than copper
  - Critically important in the miniaturization of circuits as electronic items become increasingly compact and users expect more power or utility
- Has superior thermal conductivity
  - Transfers heat efficiently; doesn't overheat
- Highest reflectivity (94%) in visible light of the metals
  - Gold 72%, Aluminum 92%

Source – The Silver Institute 2011

Silver Demand

Uses of Silver

Medicine: silver is added to bandages and wound-dressings, catheters and other medical instruments and is a key part of technology behind X-rays

Electronics: almost all electronics are configured with silver; its excellent conductivity makes it a natural choice

Automobiles: every electrical action in a modern car is activated with silver coated contacts; over 36 mm ounces of silver are used annually

Solar Panels: 90% of crystalline silicon photovoltaic cells use silver paste; over 100 mm ounces of silver are estimated for use by solar energy in 2015

Batteries: silver oxide batteries are replacing lithium ion batteries due to environmental and safety concerns

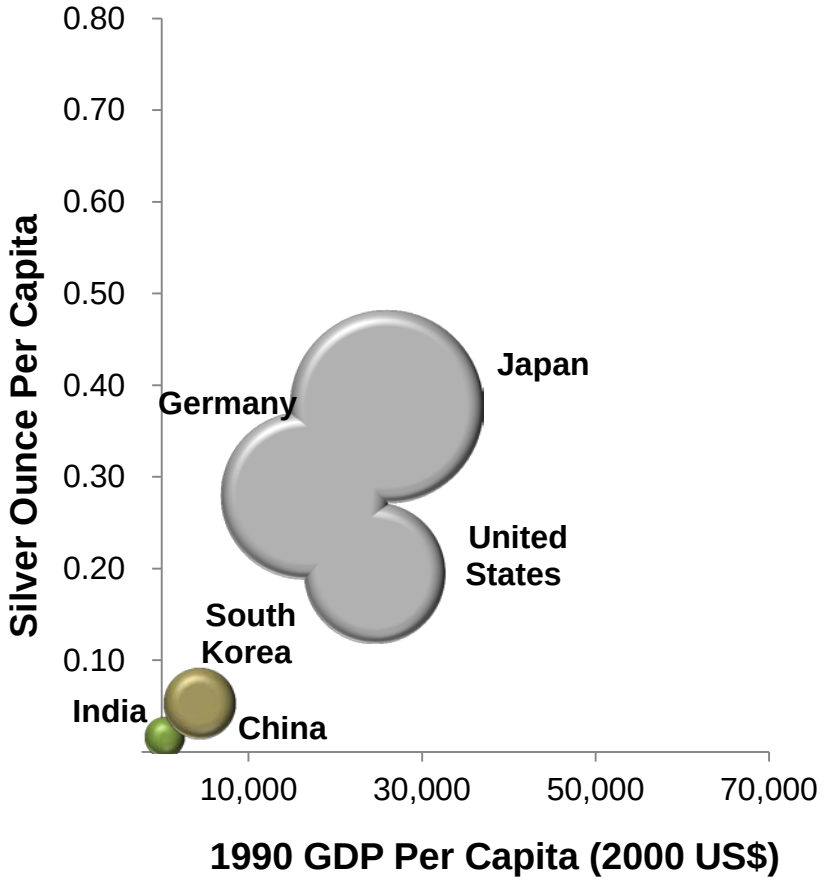

Water Filters: silver prevents bacteria and algae from building up in filters

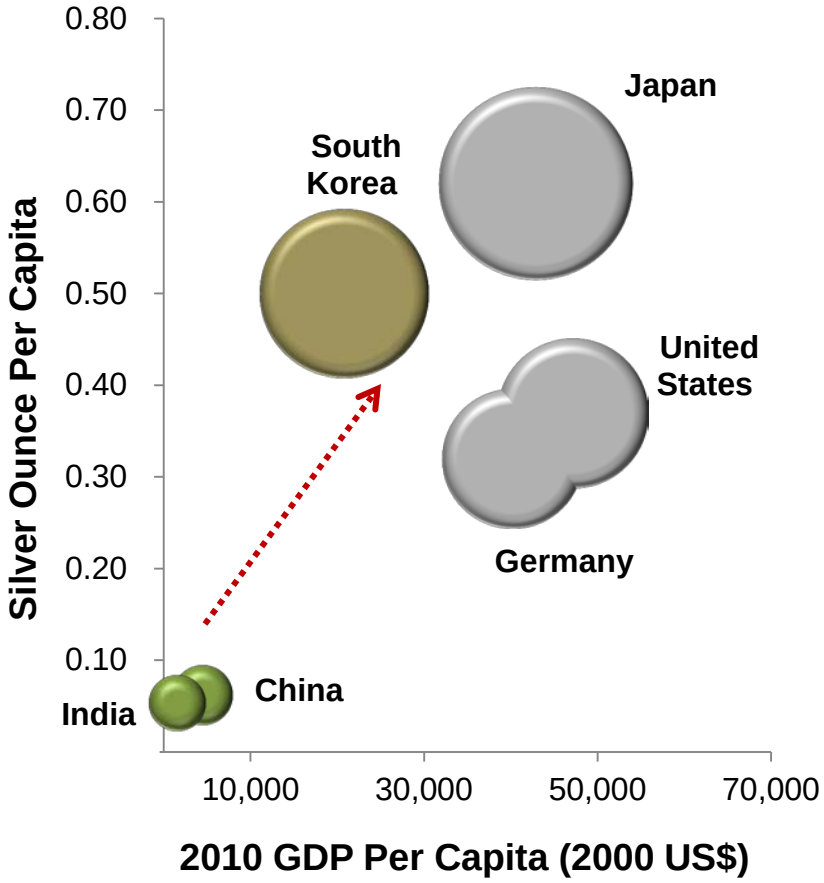

New technologies and innovations have the potential for creating new sources of silver demand such as RFID's

Operating Leverage to Strong Silver Market

NYSE:HL

Production and Cash Flow Growth

Record Exploration and Pre-Development

Low Political Risk

Low Cost Producer

Strong Balance Sheet

Largest U.S. Primary Silver Producer

#1	primary silver producer in the U.S., more than 6 million ounces expected in 2012.
50%	silver production growth planned in 2013 with re-opening of Lucky Friday mine.
$26.02	per ounce cash margin[1] (over 90%) allowing high operating leverage to silver prices.
$233	million in cash and cash equivalents, no significant debt.[2]
2.0%	Q2/2012 dividend yield.[3]
6	consecutive years replacing annual production and adding to reserves - record 2012 exploration and pre-development program.

1. From an average realized price of $27.05 and a cash cost per ounce of $1.03, net of by products in Q2 2012. 2. As of June 30, 2012. 3. As of stock price on July 31, 2012.

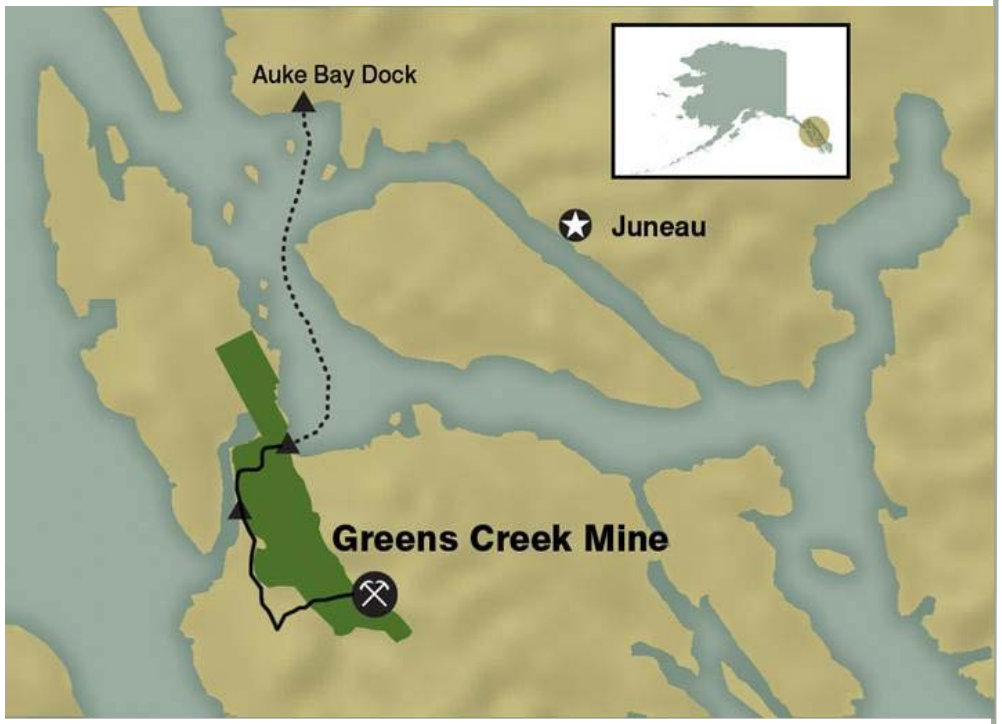

North American Focus

- Two long-lived silver mines – 148 mm ounces of high-grade silver reserves
  - **Greens Creek** mine – one of the world's lowest cost primary silver mines
    - 2012 production estimated at over 6 mm ounces
  - **Lucky Friday** mine re-opening in Q1 2013 at ≈ 3 mm oz. annual silver production, expected to increase to ≈ 5 mm ounces
  - **Organic growth at five highly-prospective properties:** planned production of over 15 mm ounces by 2017

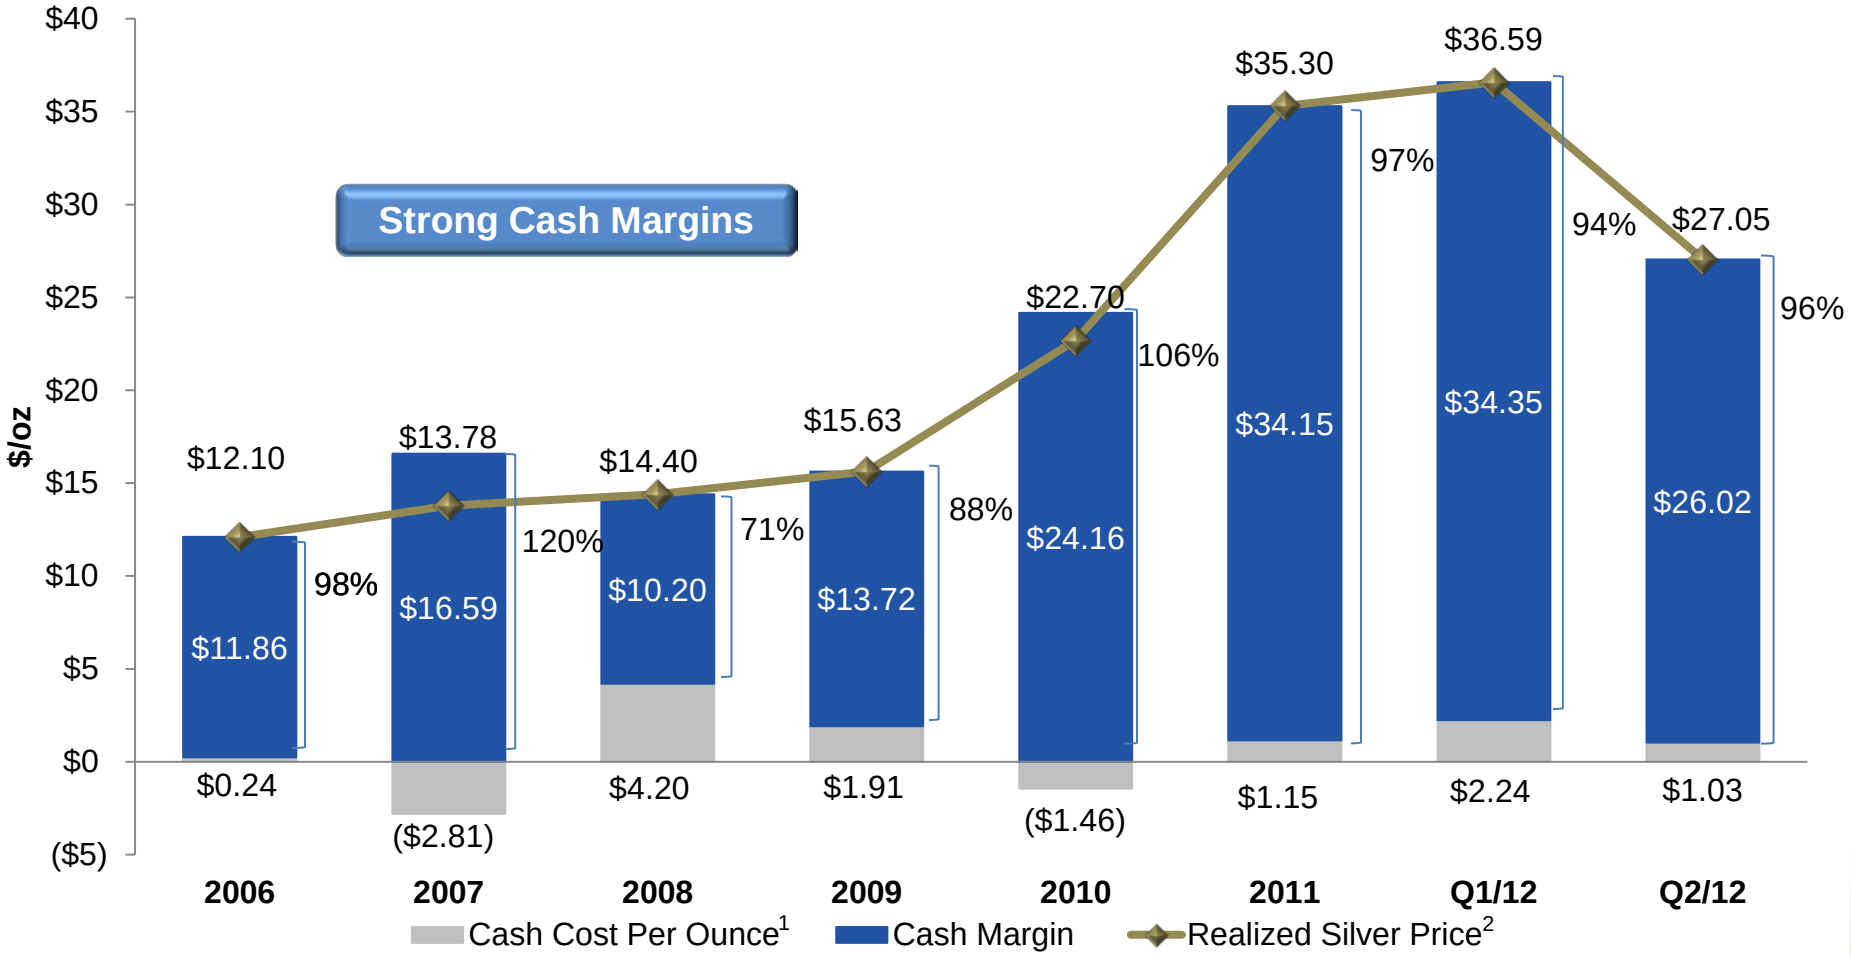

Greens Creek (Alaska) Low-Cost Production

- 100% owned – one of the world's largest and lowest cost primary silver mines
- 200 mm ounces of historical silver production
- 2012 production over 6 mm ounces
  - 1st six months cash cost $1.63/oz (non-GAAP)
- Large and under-explored 27-square-mile land position
- 98.4 mm ounces of silver reserves
- $90 mm planned CapEx in 2012

Q2 2012 - Total Cash Costs $1.03 per oz

1. Total cash cost per ounce of silver represents a non-U.S. Generally Accepted Accounting Principles (GAAP) measurement. A reconciliation of total cash costs to cost of sales and other direct production costs and depreciation, depletion and amortization (GAAP) can be found in the Appendix.
2. Realized prices are calculated by dividing gross revenues for each metal by the payable quantities of each metal included in the concentrate and doré sold during the period.

Lucky Friday (Idaho) Resuming Production

- Silver production expected to resume in Q1 2013
- Yearly production levels of ≈ 3 mm ounces expected to increase to ≈ 5 mm ounces
- Increases company-wide production by ≈ 50%
- 49.4 mm ounces silver reserves
- 118.8 mm ounces silver resources
- Resumption of #4 Shaft construction to access higher grades

Silver Shaft Schedule

Key Activities	2011	2012	2013
☑ Project Start	Dec-11		
☑ Start Crane Work Below Silver Shaft Collar		Feb-12	
☑ Start Galloway Work		Mar-12	
☑ Start Rehabilitation at 1000 Level		Apr-12	
☑ Rehabilitation Work Complete to 4900 Level		Early Aug-12	
☐ Rehabilitation Work Complete to 6100 Level		Early Dec-12	
☐ Final Utility Installation		Early Dec-12	
☐ Silver Shaft Operational		Dec-31-12	
☐ Full Production			Early 2013

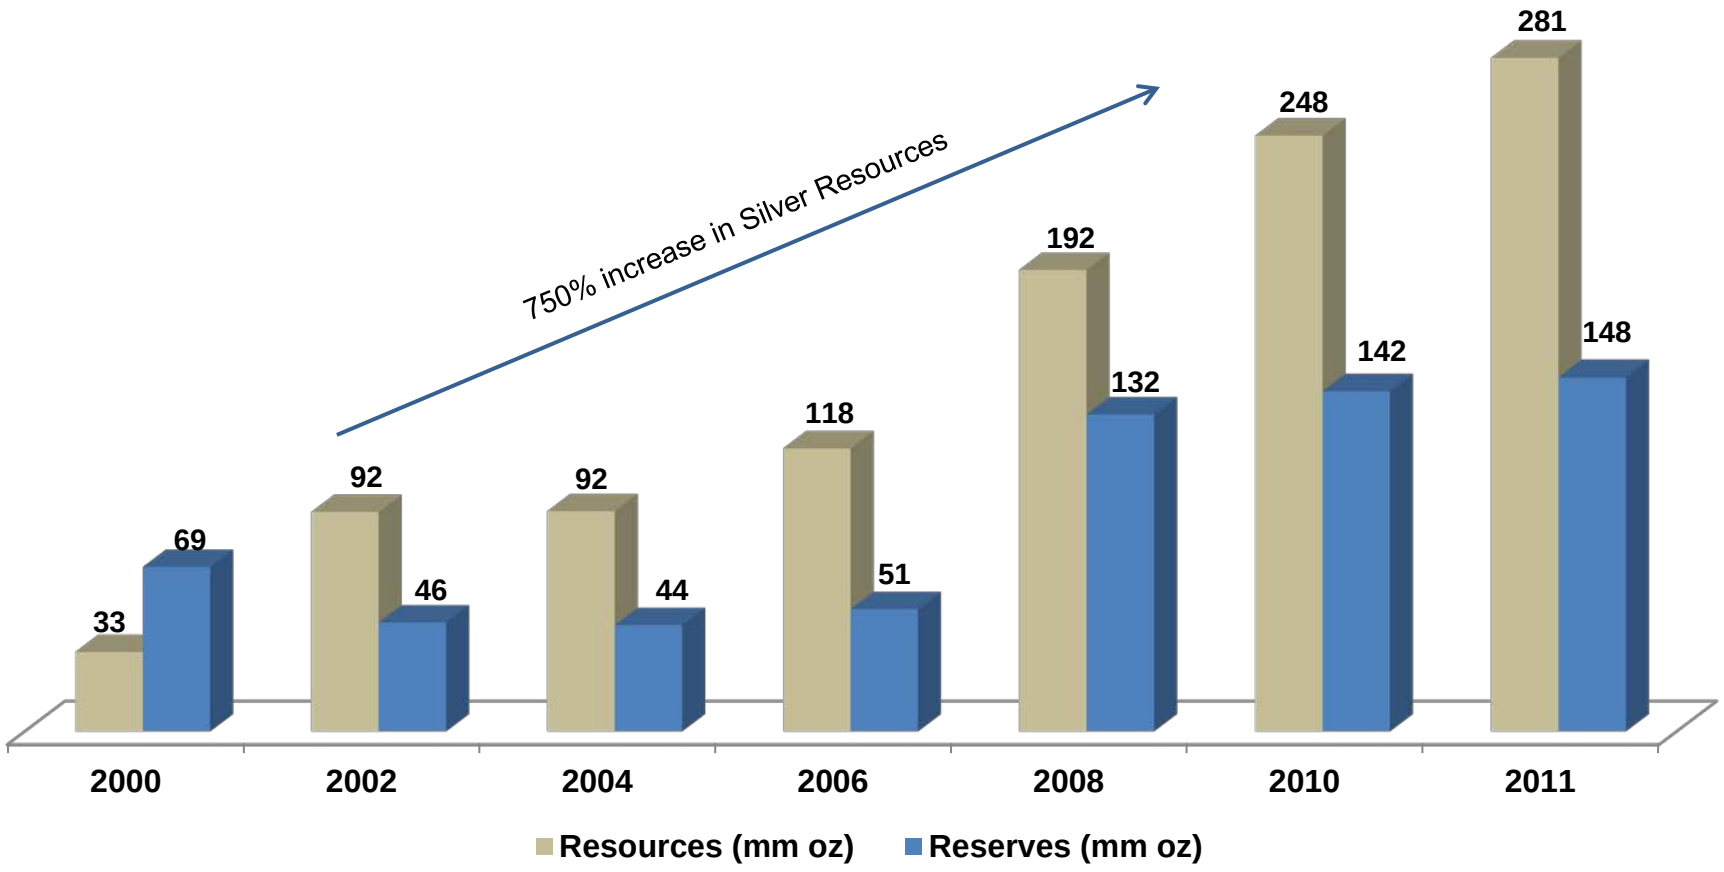

Record 2012 Exploration/Pre-Development Budget

- **Estimated $53 million of exploration and pre-development**
  - Approximately $30 million exploration
  - Approximately $23 million pre-development
- **Greens Creek**
  - ~$7 million exploration
- **Silver Valley**
  - ~$7 million exploration
  - ~$5 million of pre-development at the Star complex
- **San Juan Silver**
  - ~$12 million exploration
  - ~$16 million pre-development
- **San Sebastian**
  - ~$4 million exploration
  - ~$2 million pre-development

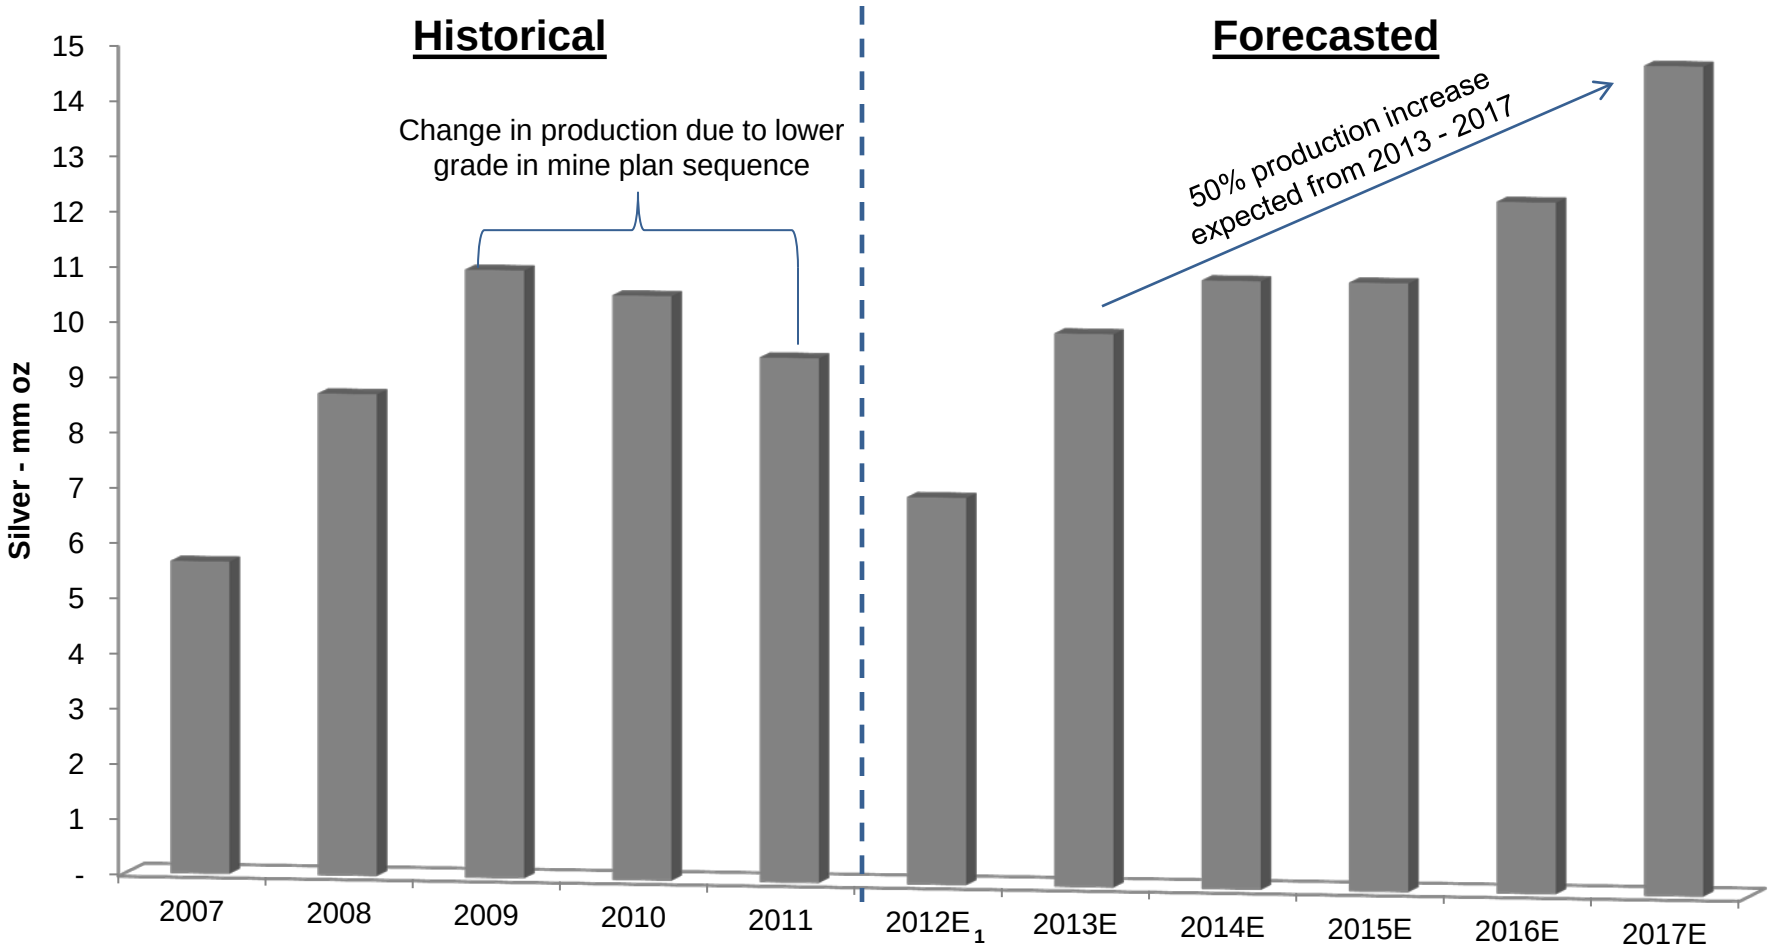

Delivering Value: Reserve and Resource Growth

115% Increase of Silver Reserves from 2000-2011

Development Driving Production Growth

Silver Production

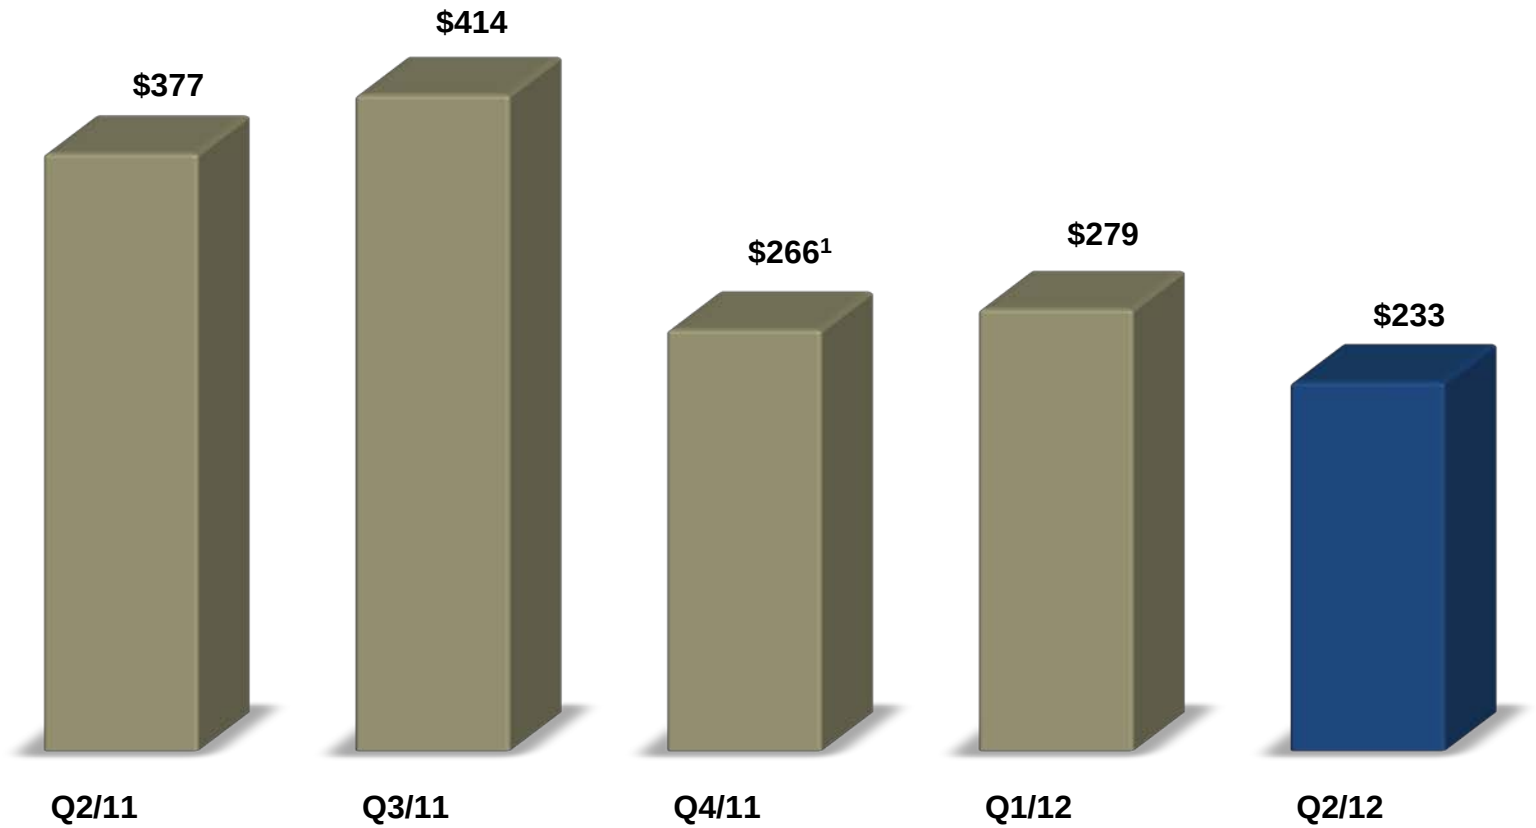

1. No production at Lucky Friday in 2012 – Silver Shaft clean-up and mine upgrades (see slide in Appendix).

Strong Balance Sheet

Cash and Cash Equivalents

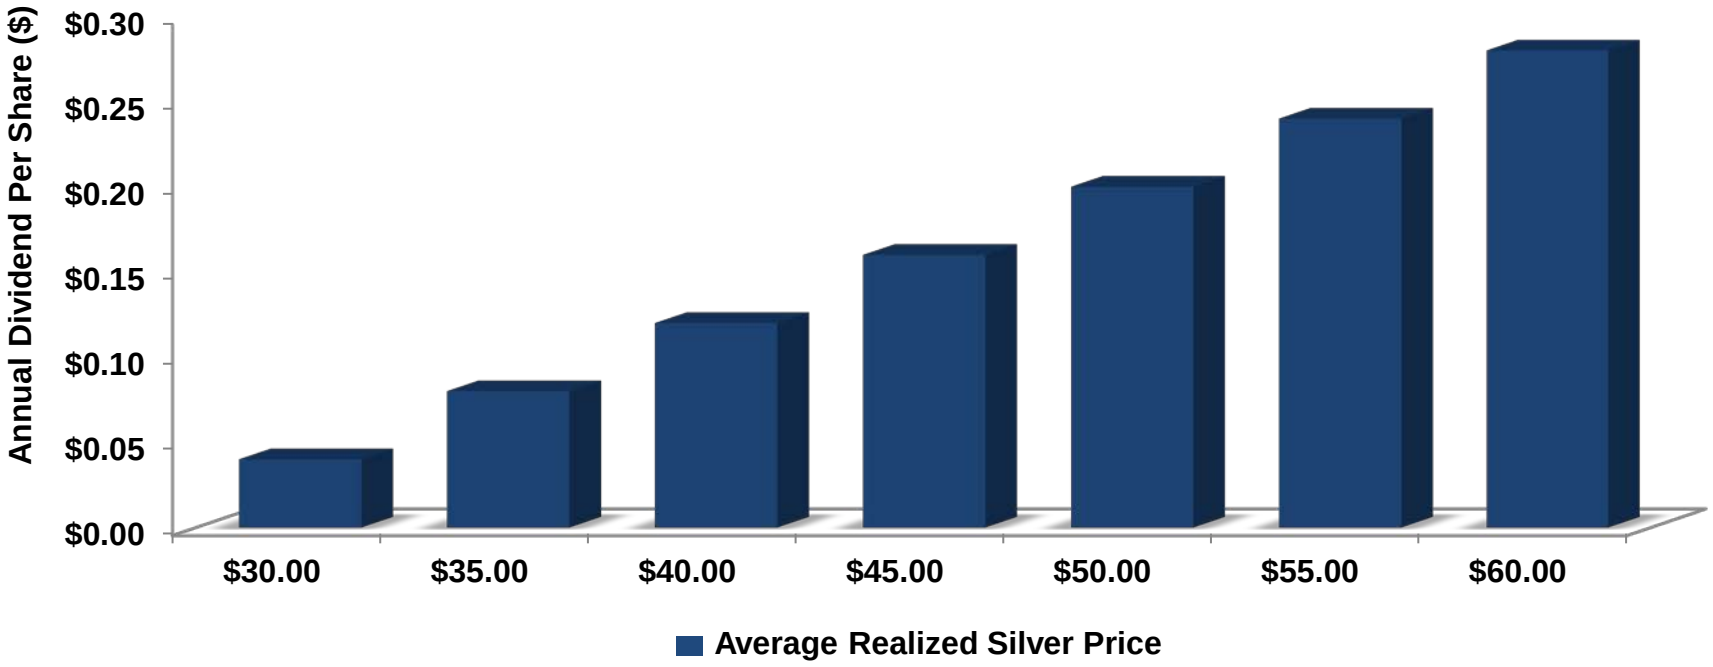

(millions)

1. After environmental litigation settlement payment of $168 million in the fourth quarter 2011.

Dividend Policy

- Silver-linked dividend policy commenced in Q3/11
- Minimum annual dividend of $0.01 per share paid quarterly

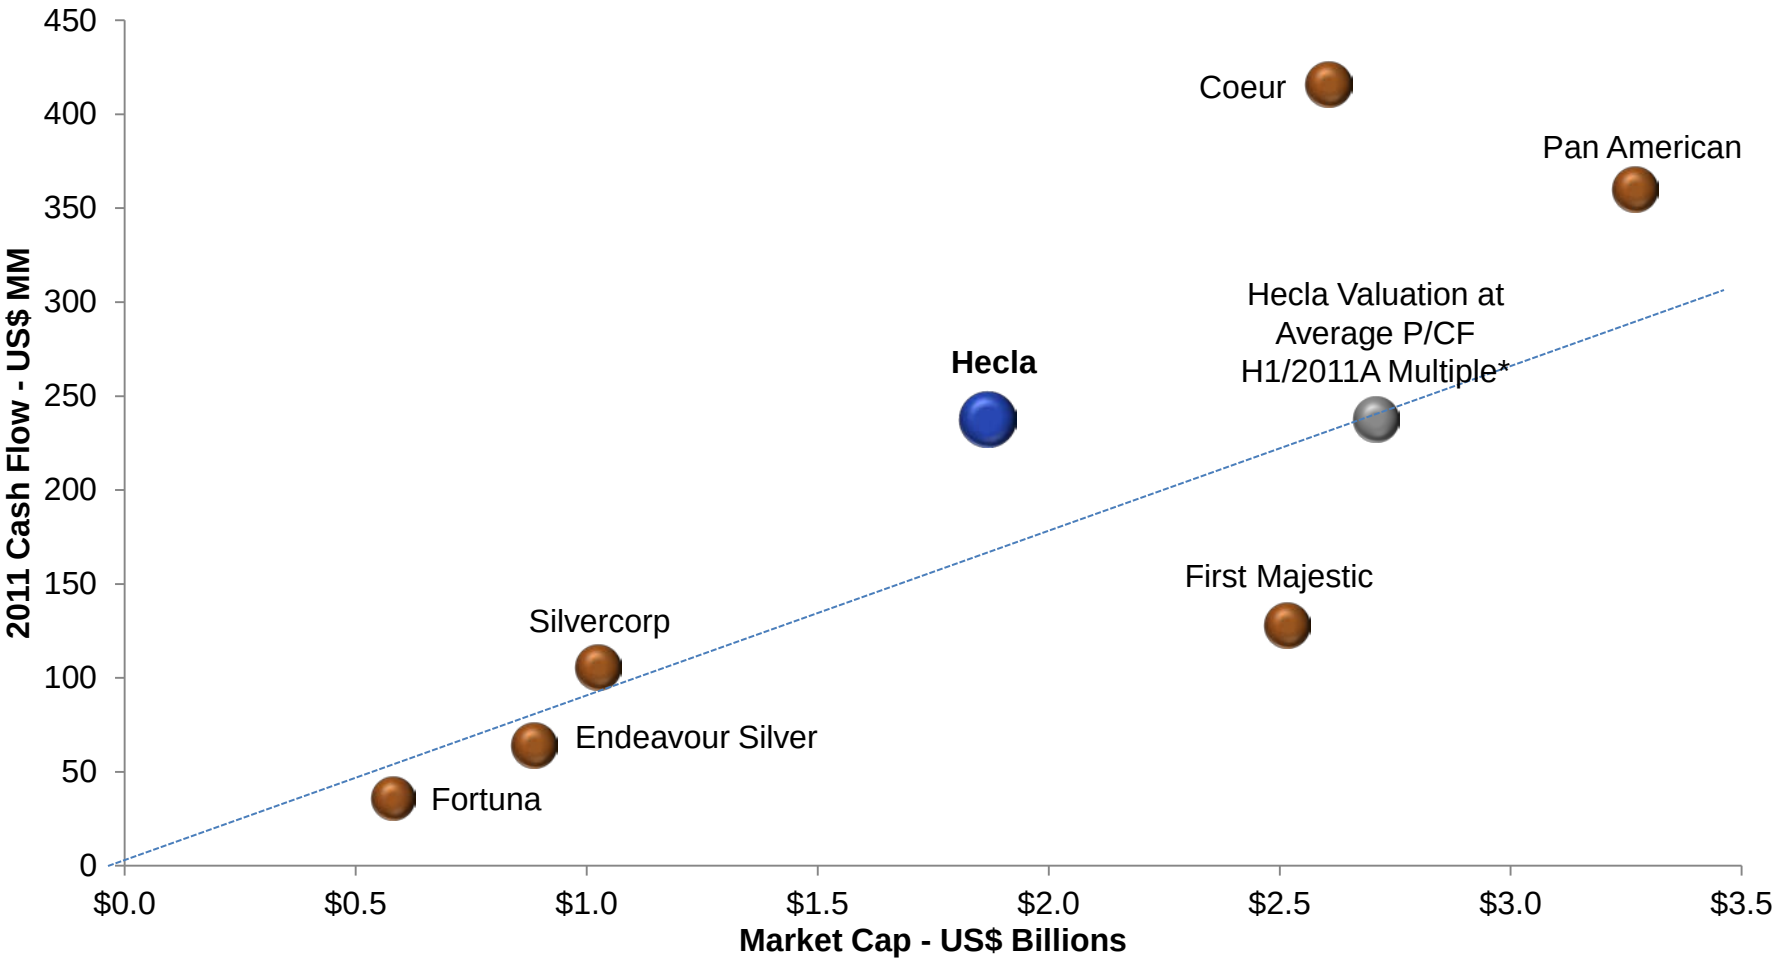

Notes:

1. The declaration and payment of dividends remains at the sole discretion of the Board of Directors and will depend on Hecla's financial results, cash requirements, future prospects and other factors deemed relevant by the Board. Investors are cautioned that this new policy is not a guarantee that a dividend will be declared or paid in any particular period in the future.
2. Realized prices are calculated by dividing gross revenues for each metal by the payable quantities of each metal included in the concentrate and doré sold during the period.

Value Proposition

2011 Cash Flow - Price / Cash Flow

* Weighted Average P/CF 2011A multiple of companies shown in chart – 10.58x, with the exception of Hecla. Stock prices as of October 10, 2012.

Growth and Value in Silver

- Expected 2012 production of more than 6 million ounces
- Lowest operating costs of major primary silver producers
- Planned restart of Lucky Friday - expected 50% production growth in 2013
- Diversified organic growth program - reduced risk North American focus
- Accelerated reserve and resource development programs
- Strong cash position – No significant debt – Stock repurchase program

Lucky Friday & Silver Valley (Idaho)

2012 Work Plan

- Driving a new drift to maintain pumps - accessible from the #2 Shaft
- Remove loose cementitious material and unused utilities from the Silver Shaft
- Construct a water ring to prevent ice from forming in the winter
- Install a metal brattice which should improve safety & functionality of Silver Shaft
- 5900 haulage way bypass construction
- Other surface and underground capital programs
- 2012 capital program ~ $50 mm
- Production is expected to resume Q1/13

Excellent Progress at Lucky Friday (Idaho)

Galloway (work decks)

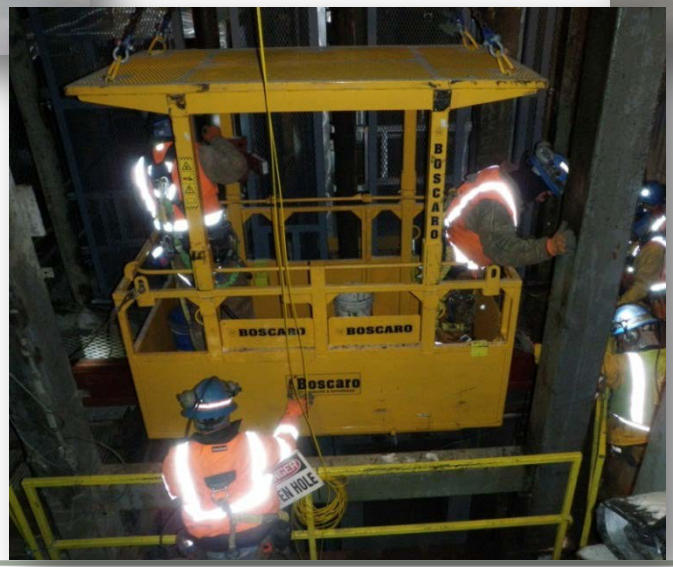

Looking down shaft at Galloway and brattice

Excellent Progress at Lucky Friday (Idaho)

Lucky Friday - #4 Shaft

- Upon restart of #4 Shaft construction, work is expected to focus on shaft sinking & station development activities
- Total project is 45% complete and 80% of major procurements have been ordered or installed
- Capital expenditures for 2011 were $42 mm for a total of approximately $90 mm invested to date
- Total project capital is expected to be approximately $200 mm

Hoist Room	Shaft	Sheave Deck

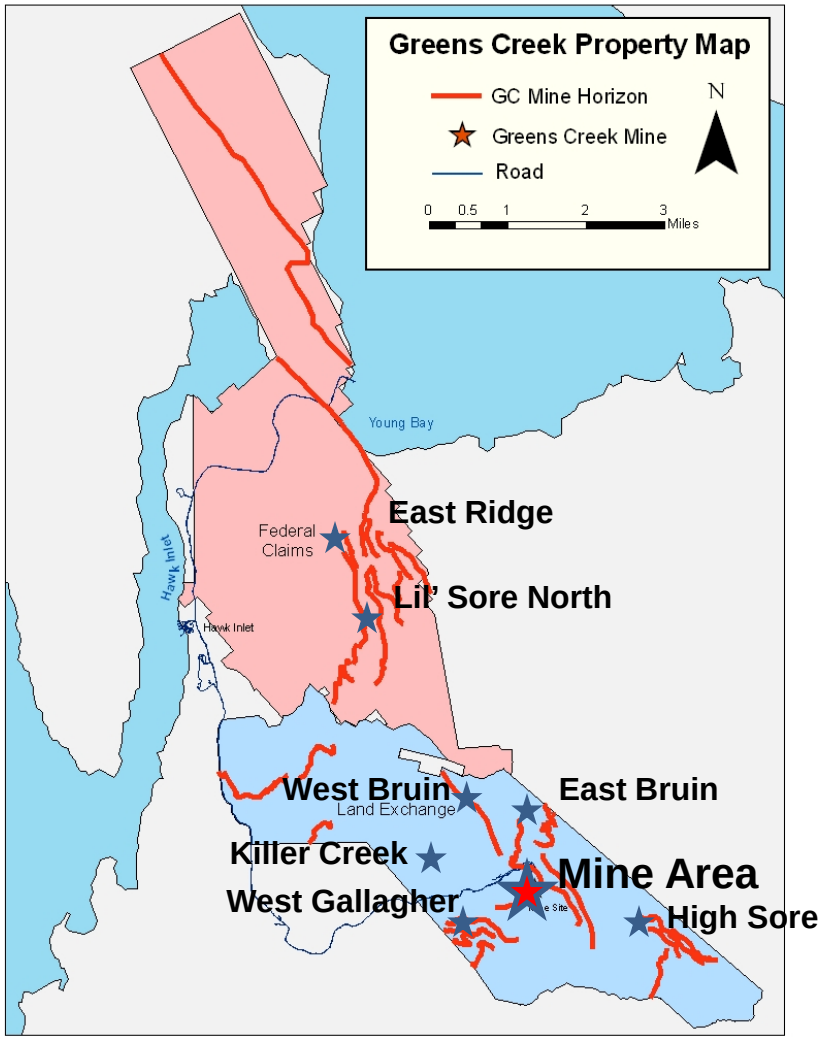

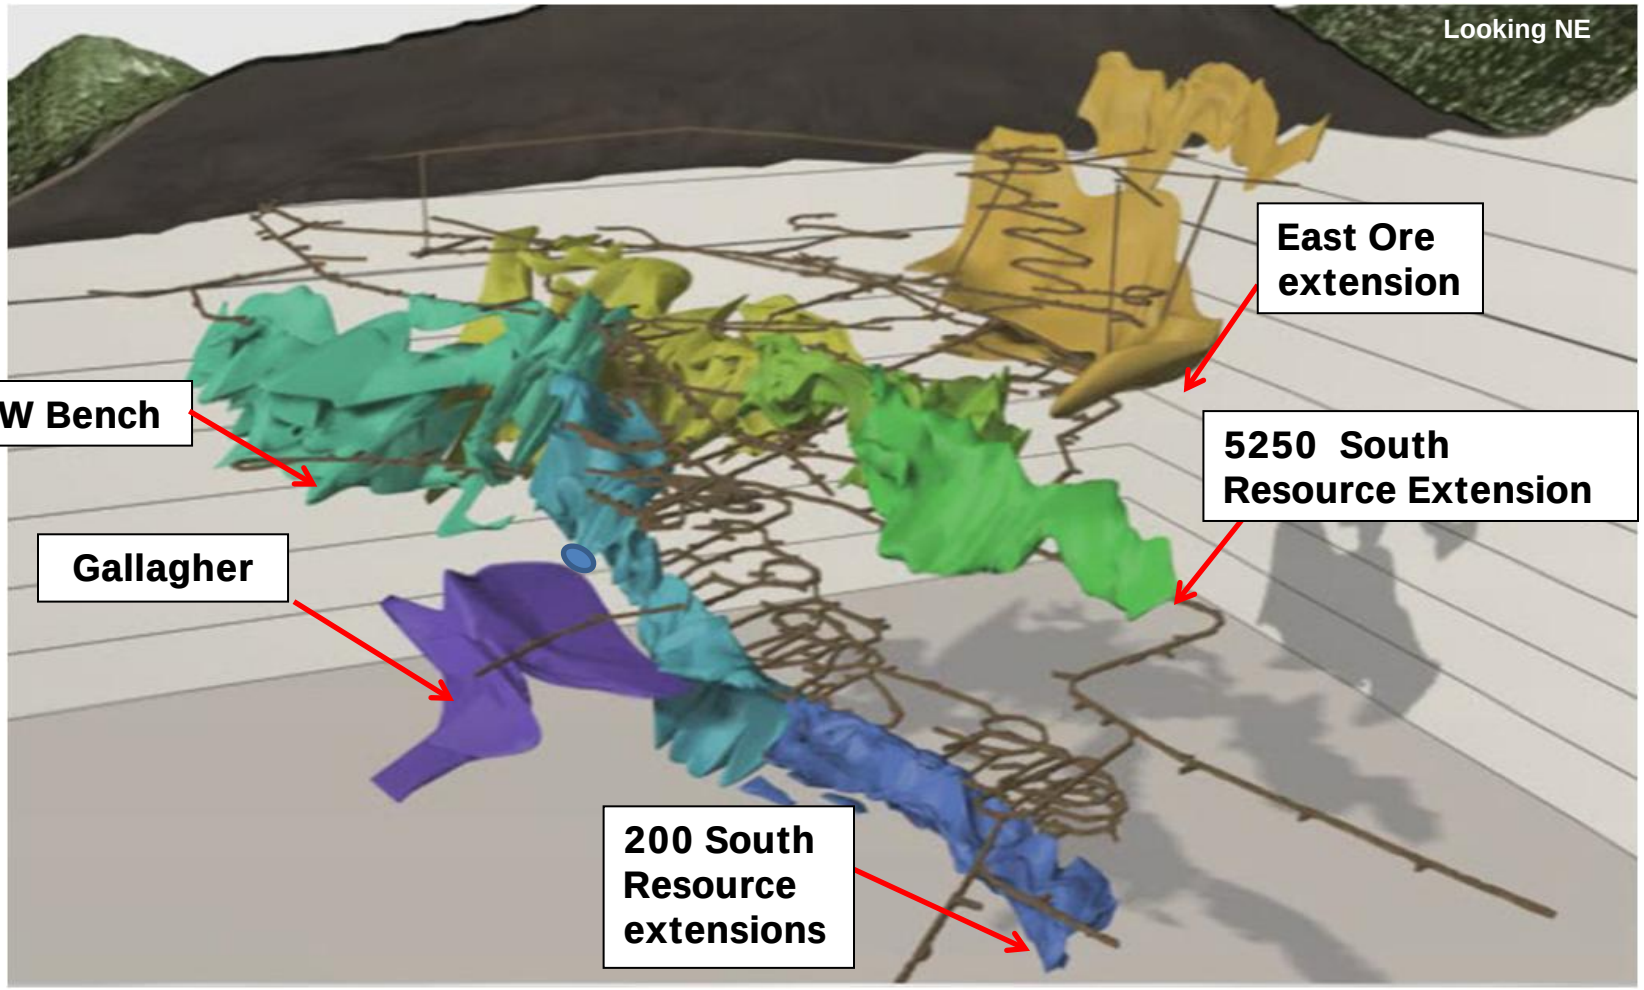

Greens Creek - Exploration

- Very large and under-explored 27-square-mile land position
- Over 30 miles of unexplored mine contact (red-trace) with multiple targets
- Surface exploration only resumed in 1999 due to establishment of Land Exchange
- 2012 Program - $7 mm
  - 3 underground drills
  - 3 surface drills (June to Sept)

Greens Creek - Exploration

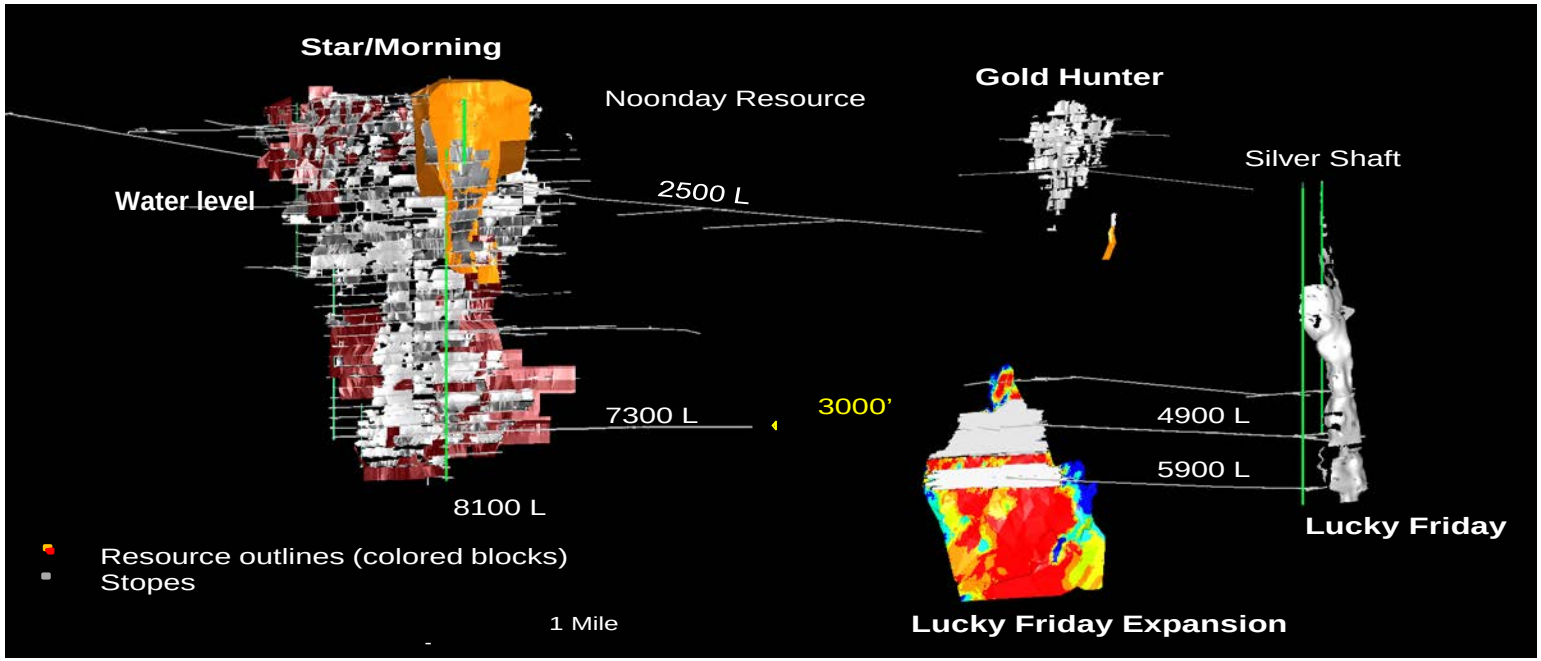

Underground Exploration Targets

Organic Growth - Star Pre-development

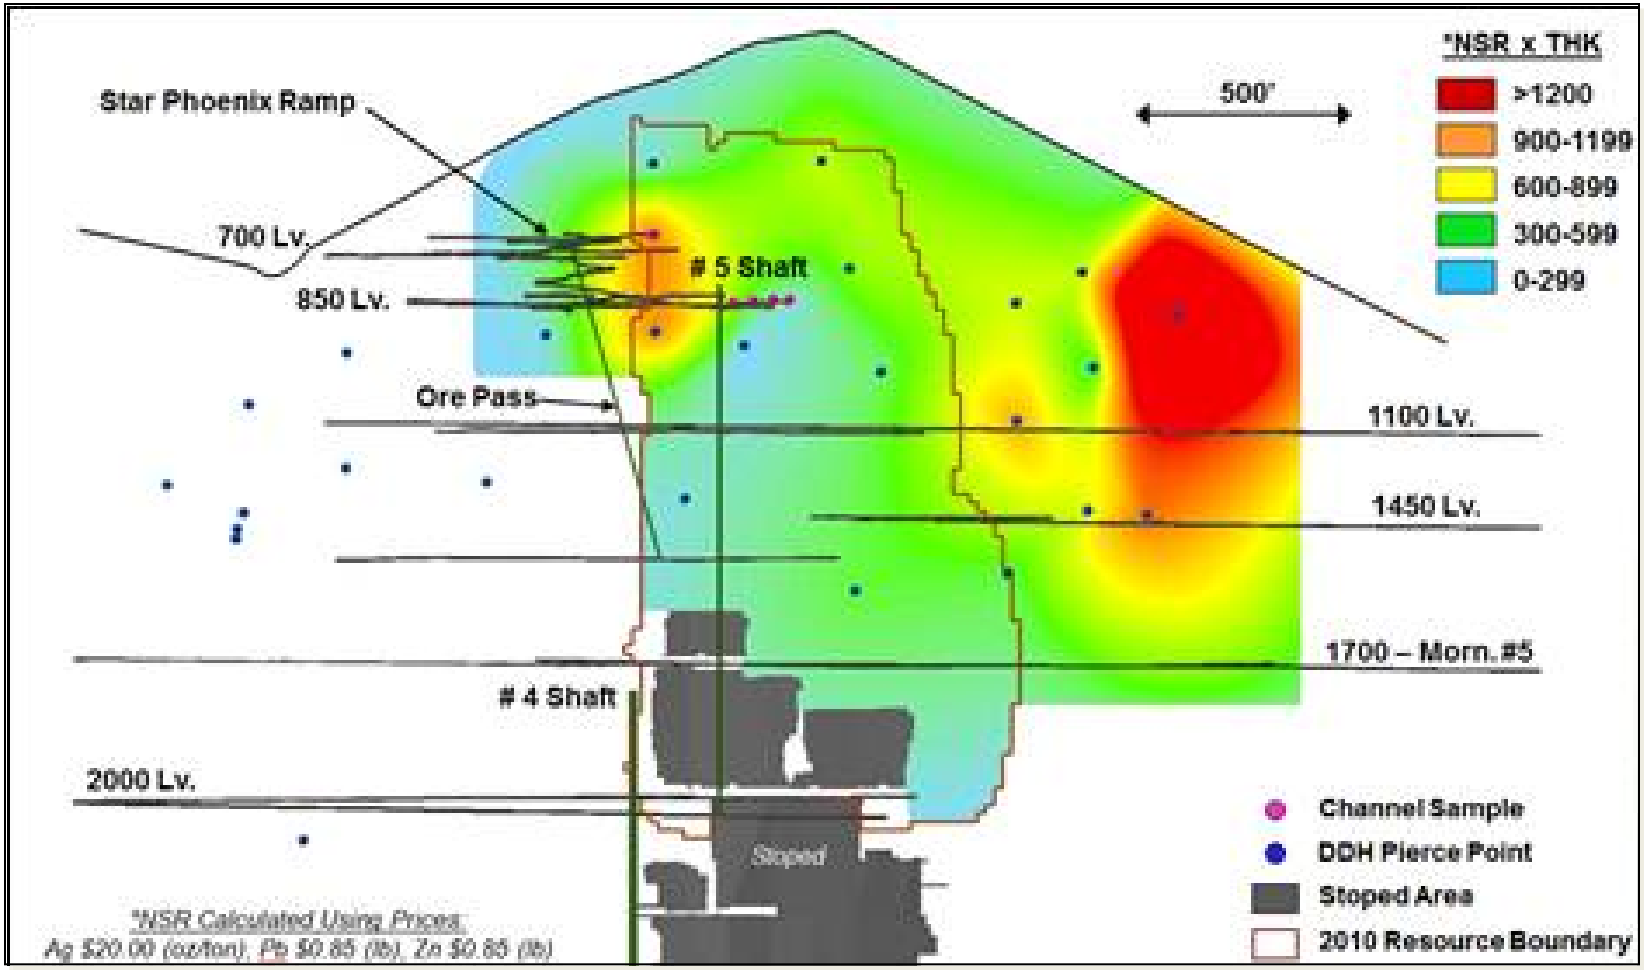

- Hecla has re-opened the Star for definition & exploration drilling
- Portal rehabilitation and ventilation adit have been successfully completed
- A Preliminary Economic Assessment (PEA) of the “Upper Country” Star mine complex is under review
- A mine dewatering study is also under way

Longitudinal Section Looking North

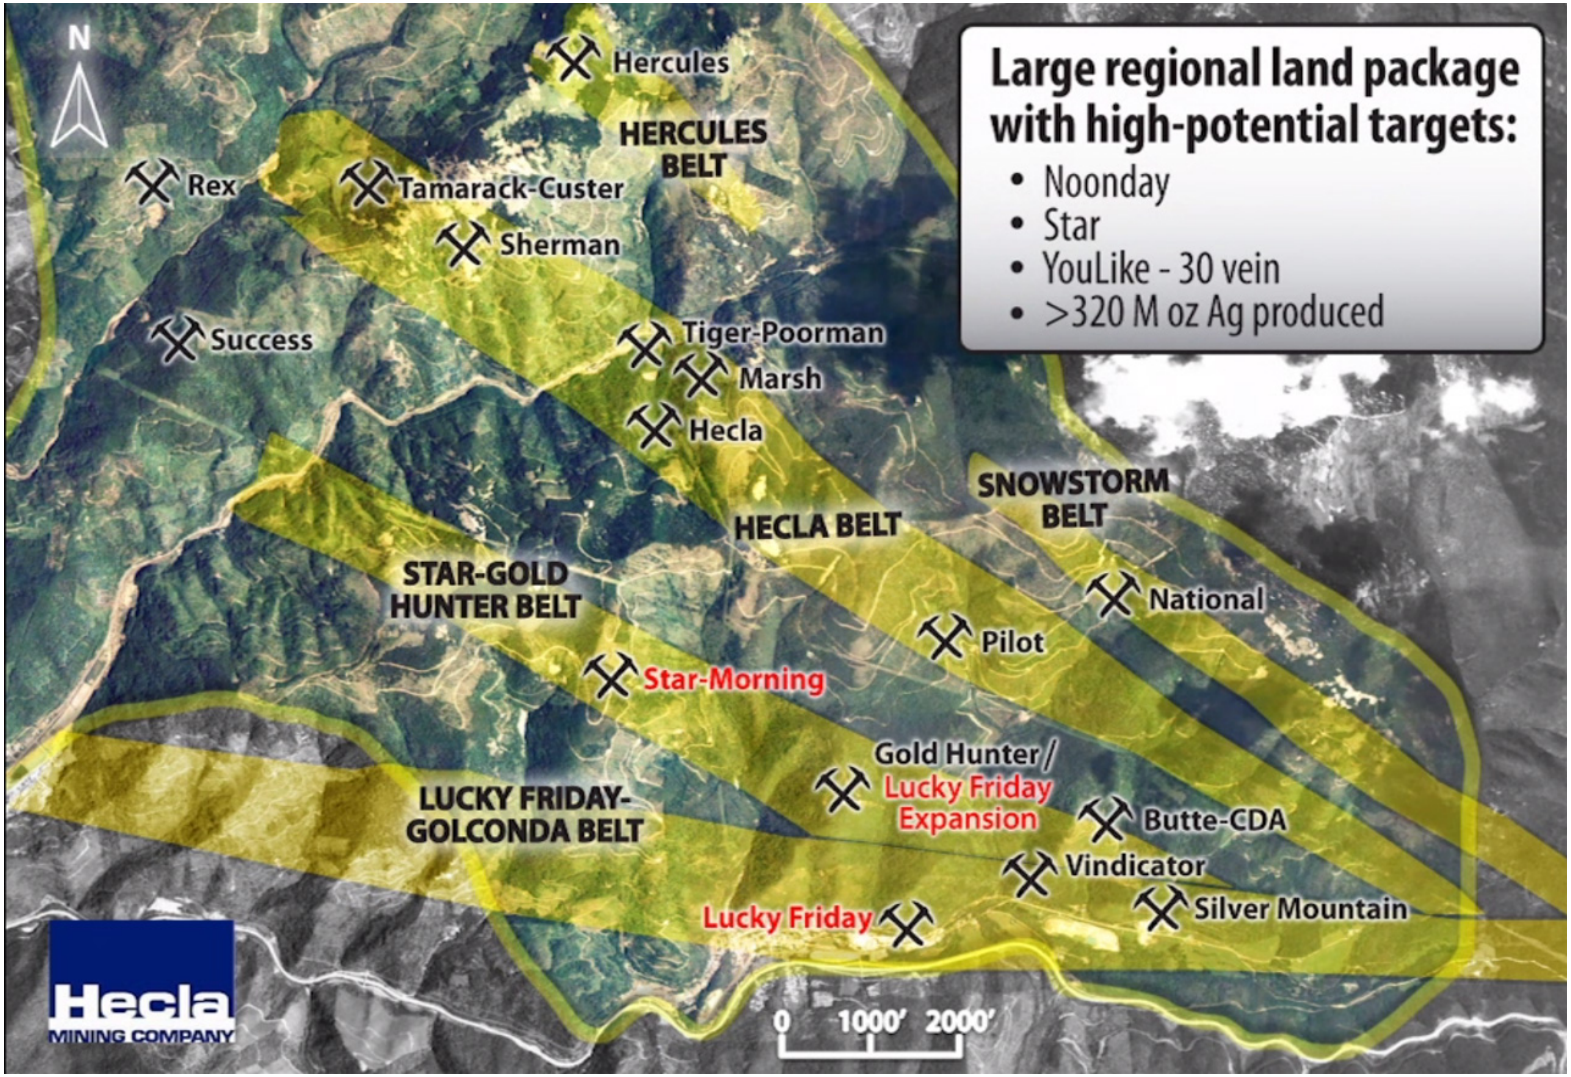

Organic Growth - Star Pre-development

Noonday - Silver and Lead-Rich Mineralization Open to the East

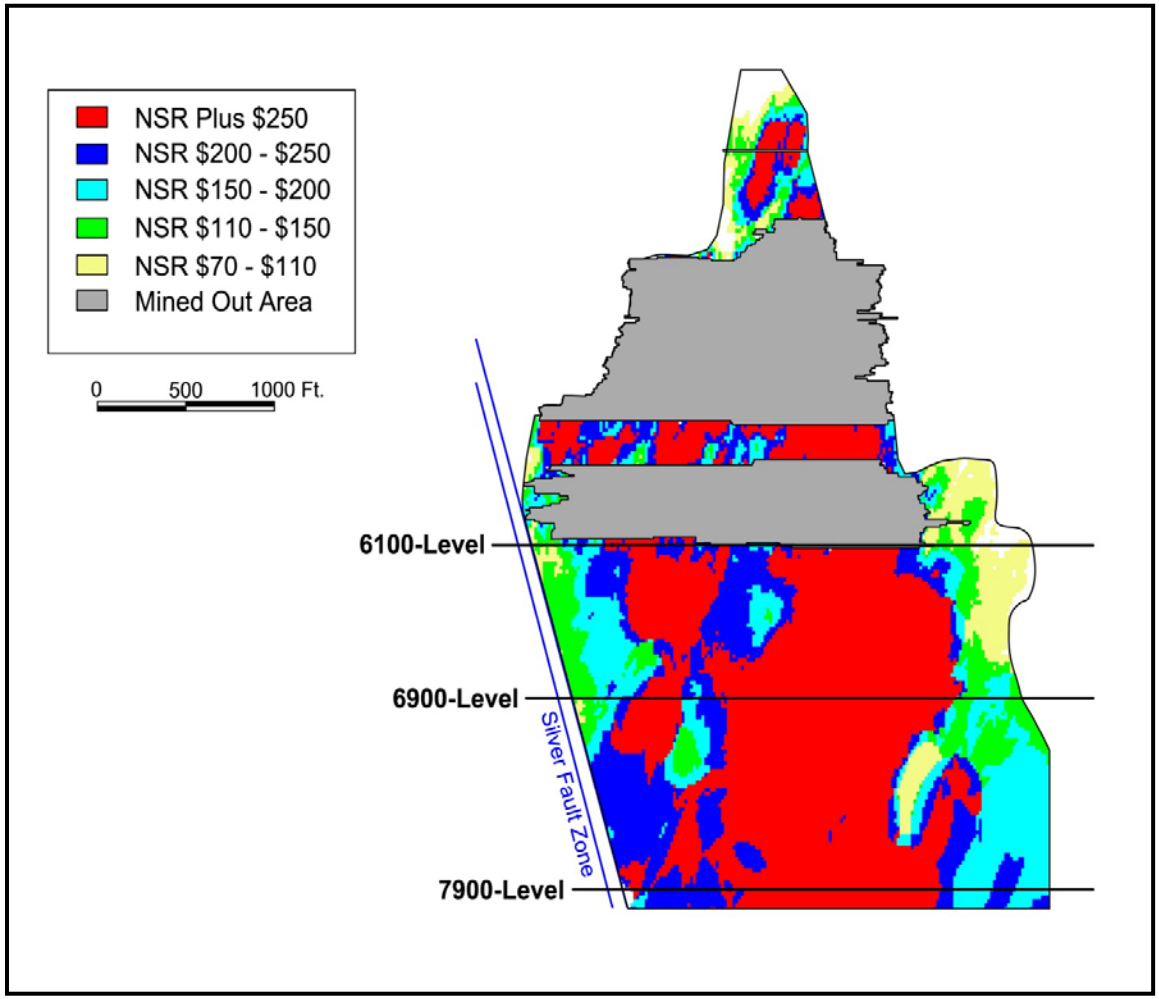

Lucky Friday & Silver Valley - Exploration

Organic Growth - Lucky Friday

Lucky Friday Expansion Area - Increased Grade and Thickness at Depth

*As of 2010

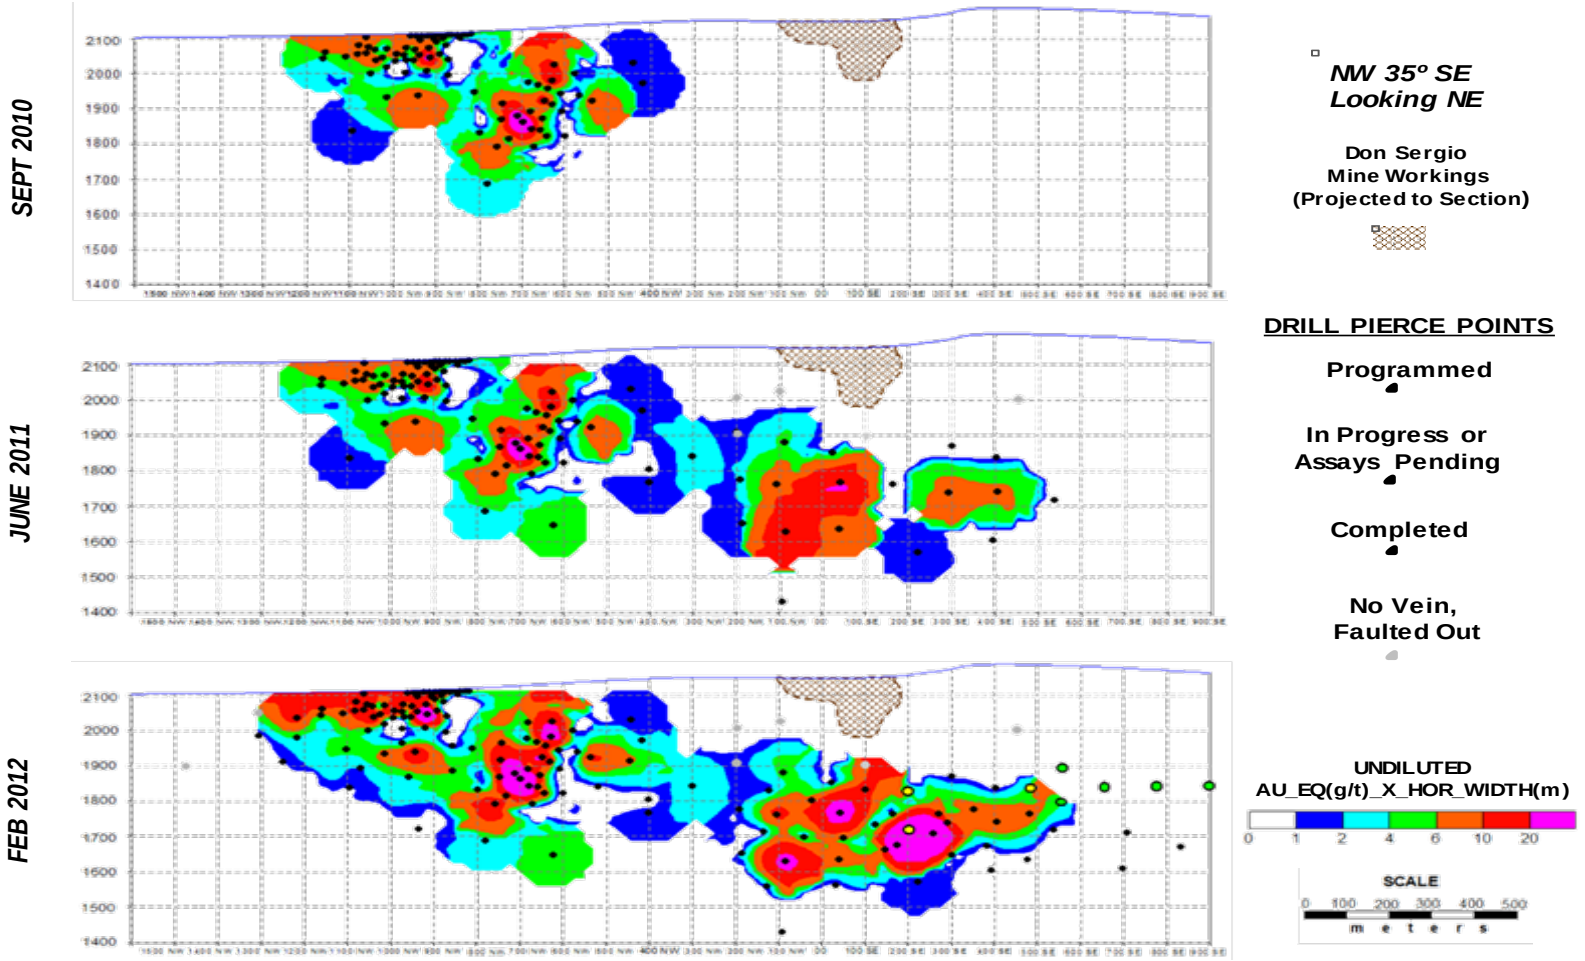

San Sebastian (Mexico)

300+ Square Mile Land Package

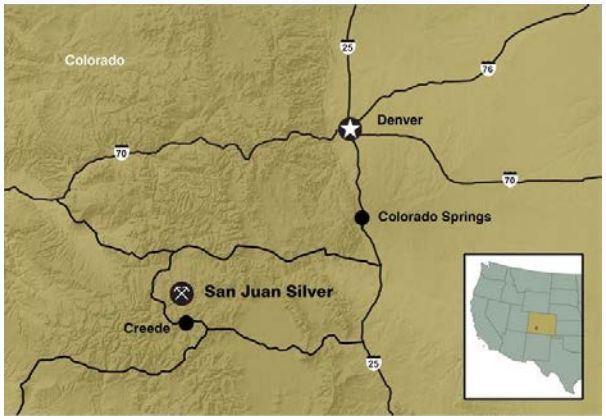

Organic Growth - San Sebastian, Mexico

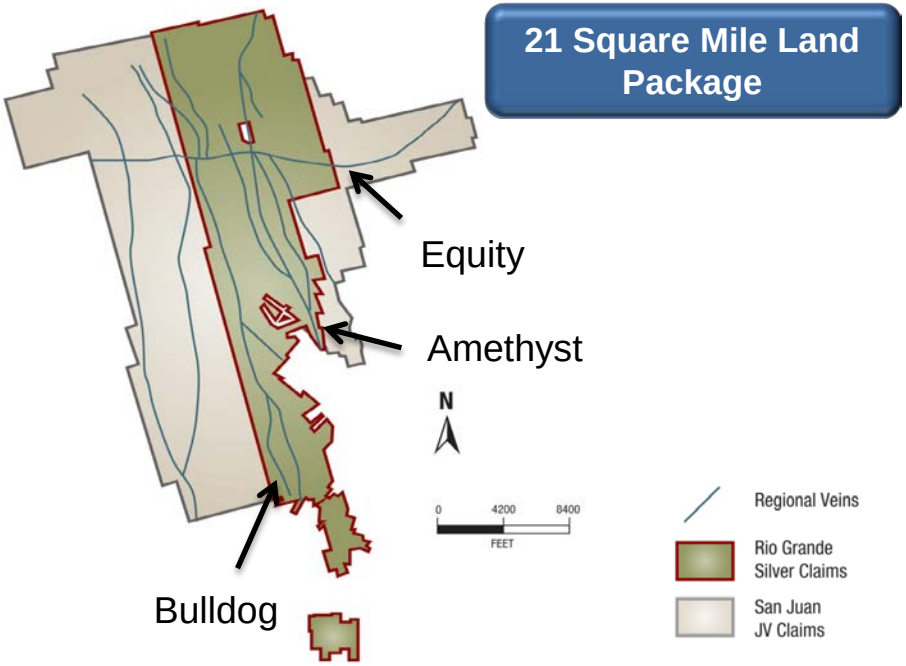

Andrea Vein - Potential New Silver and Gold-Rich Resource in 2012

Organic Growth - San Juan Silver

- Historic Bulldog mine produced 25 mm ounces of silver before closing in 1985
- Acquired 100% interest in defined mineralization of San Juan Silver property
- Silver resources of 37.1 mm ounces
- 2011 Activities:
  - Completed conceptual study & water management ponds
  - Equity ramp rehabilitation near completion
- 2012 Activities:
  - Bulldog decline portal construction underway
  - A conceptual study to evaluate the re-opening of Bulldog mine has commenced and is expected to be complete Q4/12
  - Year-round underground drilling at the Equity

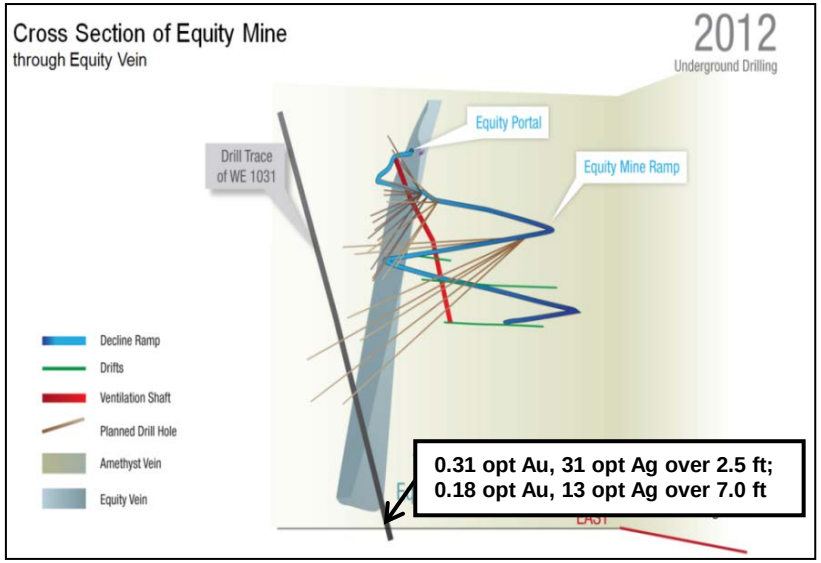

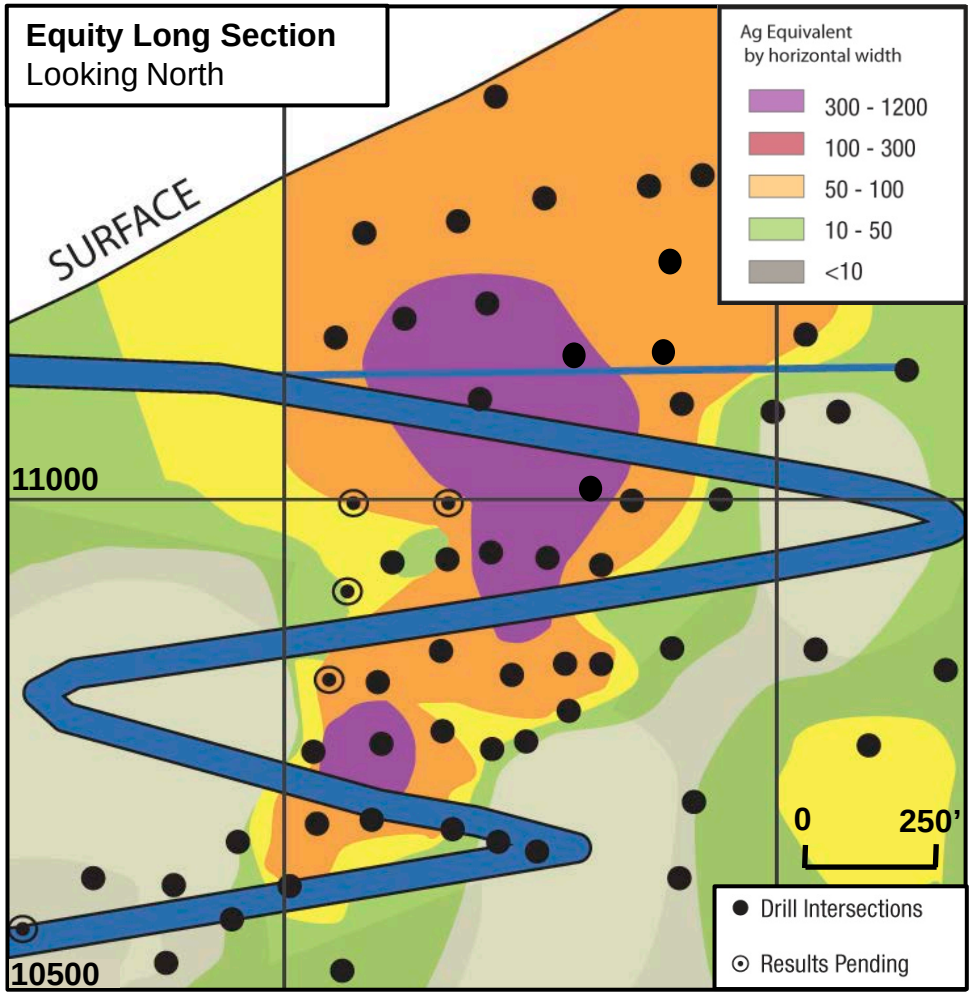

Organic Growth - San Juan Silver

Equity Longitudinal with Development Ramp and Drilling

- Recent drilling has defined high-grade, gold/silver bearing veins
- Equity Veins may represent a mineralized structure with more that 1,400 feet of vertical continuity

Organic Growth - Exploration Upside

Increasing Exploration Expenditures

Greens Creek (Alaska) - 2011 Overview

	2011
Probable Reserves (mm oz)	98.4
Silver Resources (mm oz)	55.2
Cash Costs (net of by-products)	$ (1.29)/oz[1]
Silver Grade (oz/t)	11.5
Tons Milled	772,069
Ag Produced (oz)	6,498,337
Au Produced (oz)	56,818
Lead Produced (t)	21,055
Zinc Produced (t)	66,050
Mining & Milling Cost per Ton	$80.00

1. Total cash cost per ounce of silver represents a non-U.S. Generally Accepted Accounting Principles (GAAP) measurement. A reconciliation of total cash costs to cost of sales and other direct production costs and depreciation, depletion and amortization (GAAP) can be found in the Appendix.

Lucky Friday (Idaho) - 2011 Overview

	2011
Proven Reserves (mm oz)	29.6
Probable Reserves (mm oz)	19.7
Silver Resources (mm oz)	161.3
Cash Costs (net of by-products)	$ 6.47/oz[1]
Silver Grade (oz/t)	10.7
Tons Milled	298,672
Ag Produced (oz)	2,985,339
Lead Produced (t)	18,095
Zinc Produced (t)	7,305
Mining & Milling Cost per Ton	$77.72

1. Total cash cost per ounce of silver represents a non-U.S. Generally Accepted Accounting Principles (GAAP) measurement. A reconciliation of total cash costs to cost of sales and other direct production costs and depreciation, depletion and amortization (GAAP) can be found in the Appendix.

Coeur d'Alene Basin Litigation

- Court approved consent decree for the Coeur d'Alene River Basin environmental litigation on September 8, 2011
- Settled Hecla Limited's historic environmental liability in the Basin and the remaining obligations in the Box
- Hecla expects to pay $159 mm, net of expected related income tax benefits of $105 million, over a three-year period

Basin Settlement Payment Schedule				
	Payments	**Tax Benefit**	**Existing Warrants**	**Net**
2011	$168[1] mm	$(67) mm		$101 mm
2012	$25[2] mm	$(10) mm		$15 mm
2013	$15 mm	$(6) mm		$9 mm
2014	$56 mm[3]	$(22) mm	$56 mm	$(22) mm
Total	**$264 mm**	**$(105) mm**	**$56 mm**	**$103 mm**

1. Payment made on October 11, 2011
2. Payment made on October 5, 2012
3. Proceeds from the exercise of any outstanding Series 1 and Series 3 warrants (which have an exercise price between $2.42 and $2.53 per share) will be payable as quarterly payments, with the remaining balance, if any, due in August 2014. Approximate total value of $56 mm.

Historical Milestones

Over a Century of Silver Mining Experience

1891	▪ Hecla Mining Company is incorporated & mining commences at the Star
1958	▪ Becomes the largest shareholder in the Lucky Friday Silver-Lead Mines Company
1964	▪ Merger between Hecla and Lucky Friday Silver-Lead Mines is completed ▪ Hecla is listed on the New York Stock Exchange
1979	▪ Best performer on the New York Stock Exchange
1981	▪ Merger with Day Mines consolidating the Silver Valley
1987	▪ Acquisition of 30% of Greens Creek silver-gold-zinc-lead mine on Admiralty Island
2000	▪ San Sebastian acquisition
2006	▪ Increases silver reserves & resources by 25%
2008	▪ Completes transaction to acquire remaining interest in Greens Creek silver mine ▪ Acquisition of Independence Lead Mines & San Juan Silver Joint Venture
2009	▪ Initiated construction of the #4 Shaft at Lucky Friday ▪ Greens Creek produced to date 200 mm ounces of silver and 1 mm ounces of gold
2010	▪ Reports highest annual revenue ($418.8 mm) and operating cash flow ($197.8 mm)
2011	▪ Highest level of silver reserves & resources with 148 mm ounces and 281 mm ounces, respectively ▪ New silver-linked dividend policy ▪ Settled historic Coeur d'Alene Basin environmental liability

Reserves & Resources Update (on Dec. 31, 2011)

Total cash cost per ounce produced	$ 1.03	$ 2.24	$ 1.15	$ (1.46)	$ 1.91	$ 4.20	$ (2.81)	$ 0.24
Reconciliation to GAAP:								
Total cash costs	$ 1,410	$ 2,976	$ 10,934	$ (15,435)	$ 20,958	$ 36,621	$ (15,873)	$ 1,329
Depreciation, depletion and amortization	$ 9,879	$ 9,661	$ 47,066	$ 60,011	$ 62,837	$ 35,207	$ 12,323	$ 11,757
Treatment costs	$ (16,164)	$ (17,695)	$ (99,019)	$ (92,144)	$ (80,830)	$ (70,776)	$ (27,617)	$ (33,523)
By- products credits	$ 45,352	$ 46,353	$ 254,372	$ 267,272	$ 206,608	$ 164,963	$ 112,079	$ 86,216
Change in product inventory	$ 2,101	$ 1,805	$ (4,805)	$ 3,660	$ 310	$ 20,254	$ (1,261)	$ 1,278
Suspension-related costs[2]	$ -	$ -	$ 4,135	$ -	$ -	$ -	$ -	$ -
Reclamation, severance and other costs	$ 473	$ (149)	$ (44)	$ 630	$ 1,596	$ 537	$ 203	$ 190
Costs of sales and other direct production costs and depreciation, depletion and amortization (GAAP)	**$ 43,051**	**$ 42,951**	**$ 212,639**	**$ 223,994**	**$ 211,479**	**$ 186,806**	**$ 79,854**	**$ 67,247**

1. Cash cost per ounce of silver represents a non-U.S. Generally Accepted Accounting Principles (GAAP) measurement that the Company believes provide management and investors an indication of net cash flow. Management also uses this measurement for the comparative monitoring of performance of mining operations period-to-period from a cash flow perspective. “Total cash cost per ounce” is a measure developed by gold companies in an effort to provide a comparable standard; however, there can be no assurance that our reporting of this non-GAAP measure is similar to that reported by other mining companies. Cost of sales and other direct production costs and depreciation, depletion and amortization, was the most comparable financial measures calculated in accordance with GAAP to total cash costs.
2. Various accidents and other events resulted in temporary suspensions of production at the Lucky Friday unit during 2011. See the Lucky Friday Segment section for more further discussion of these events. Care-and-maintenance, mine rehabilitation, investigation, and other costs incurred during the suspension periods not related to production have been excluded from total cash costs and the calculation of total cash cost per ounce produced.

Total Cash Cost GAAP Reconciliation

Reconciliation of Cash Costs per Ounce to Generally Accepted Accounting Principles (GAAP)
(dollars and ounces in thousands, except per ounce - unaudited)

	Q2/12	Q2/11	YTD June 30, 2012
Total cash costs[1]	$ 1,410	$ 1,169	$ 4,386
Divided by silver ounces produced	1,365	2,250	2,694

Reconciliation to GAAP			
Total cash costs	$ 1,410	$ 1,169	$ 4,386
Depreciation, depletion and amortization	9,879	11,204	19,540
Treatment and freight costs	(16,164)	(25,948)	(33,859)
By-product credits	45,352	66,931	91,705
Change in product inventory	2,101	(4,164)	3,906
Reclamation and other costs	473	877	324
Cost of sales and other direct production costs and depreciation, depletion and amortization	**$ 43,051**	**$ 50,069**	**$ 86,002**

1. Cash cost per ounce of silver represents a non-U.S. Generally Accepted Accounting Principles (GAAP) measurement that the Company believes provides management and investors an indication of net cash flow. Management also uses this measurement for the comparative monitoring of performance of mining operations period-to-period from a cash flow perspective. "Total cash cost per ounce" is a measure developed by silver companies in an effort to provide a comparable standard; however, there can be no assurance that our reporting of this non-GAAP measure is similar to that reported by other mining companies. Cost of sales and other direct production costs and depreciation, depletion and amortization, was the most comparable financial measures calculated in accordance with GAAP to total cash costs.

Adjusted Earnings Reconciliation

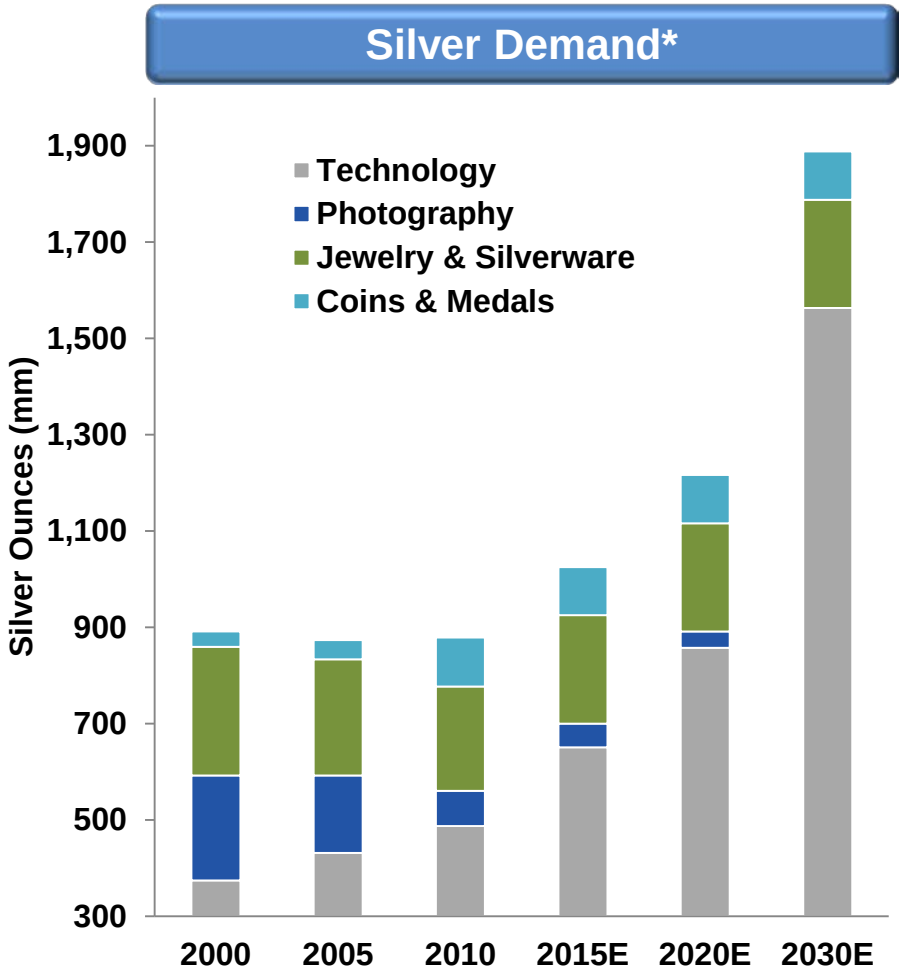

Reconciliation of Net Income Applicable to Common Shareholders (GAAP) to Earnings Before Adjustments
(dollars and ounces in thousands, except per ounce - unaudited)

	Three Months Ended June 30, 2012	
	2012	**2011**
Net income applicable to common shareholders (GAAP)	**$ 2,386**	$ 33,179
Adjusting items:		
(Gains)/losses on derivatives contracts	**(6,171)**	(559)
Environmental accruals	**527**	-
Provisional price (gains)/losses	**2,378**	7,541
Lucky Friday suspension-related costs	**6,465**	-
Income tax effect of above adjustments	**(1,152)**	(2,514)
Adjusted income applicable to common shareholders	**$ 4,433**	$ 37,647
Weighted average shares - basic	**285,312**	279,347
Weighted average shares - diluted	**295,160**	295,756
Basic adjusted income per common share	**$ 0.02**	$ 0.13
Diluted adjusted income per common share	**$ 0.02**	$ 0.13

1. Earnings After Adjustments and Earnings After Adjustments per share are non-GAAP measures which are indicators of our performance. They exclude certain impacts which are of a nature which we believe are not reflective of our underlying performance. Management believes that earnings after adjustments per common share provides investors with the ability to better evaluate our underlying operating performance.

Strong Silver Market Fundamentals

- Mine production rise of 40% over past 20 years to 700 mm ounces
- Modern/technology-driven demand up 78% in same period to nearly 500 mm ounces – nearly half total world demand
- Strong ETF demand
- China and India will see the largest growth in modern/technology driven demand of approximately 9% annually
- The U.S. and Japan will continue to be large consumers of modern silver

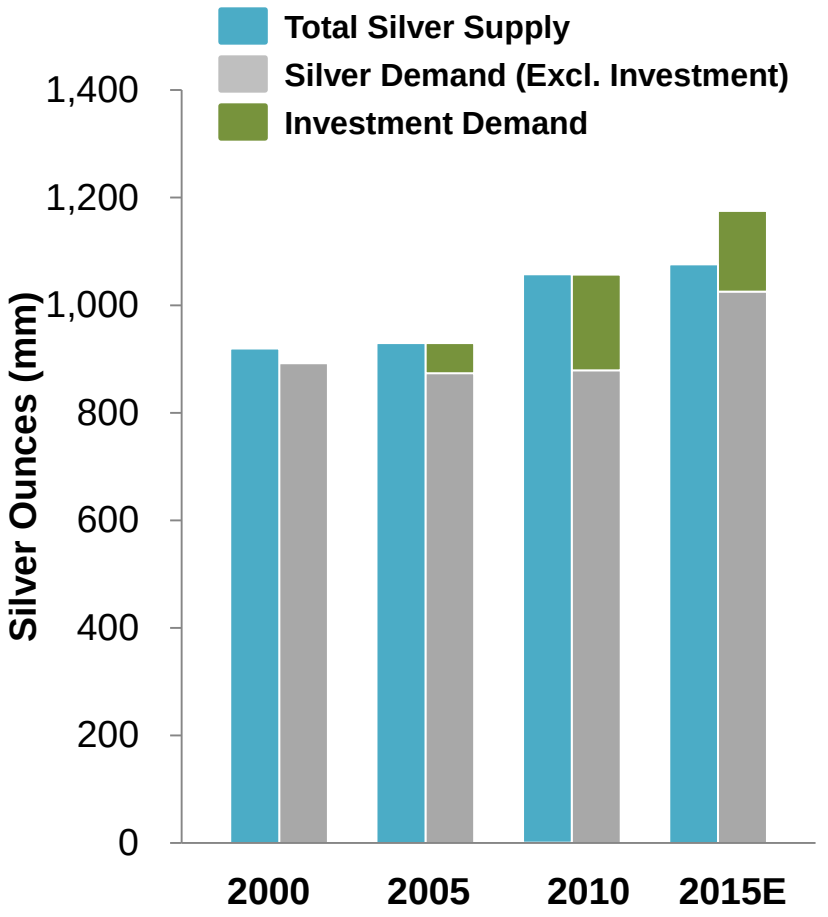

*Source GFMS – Hecla, does not include investment/ETF demand

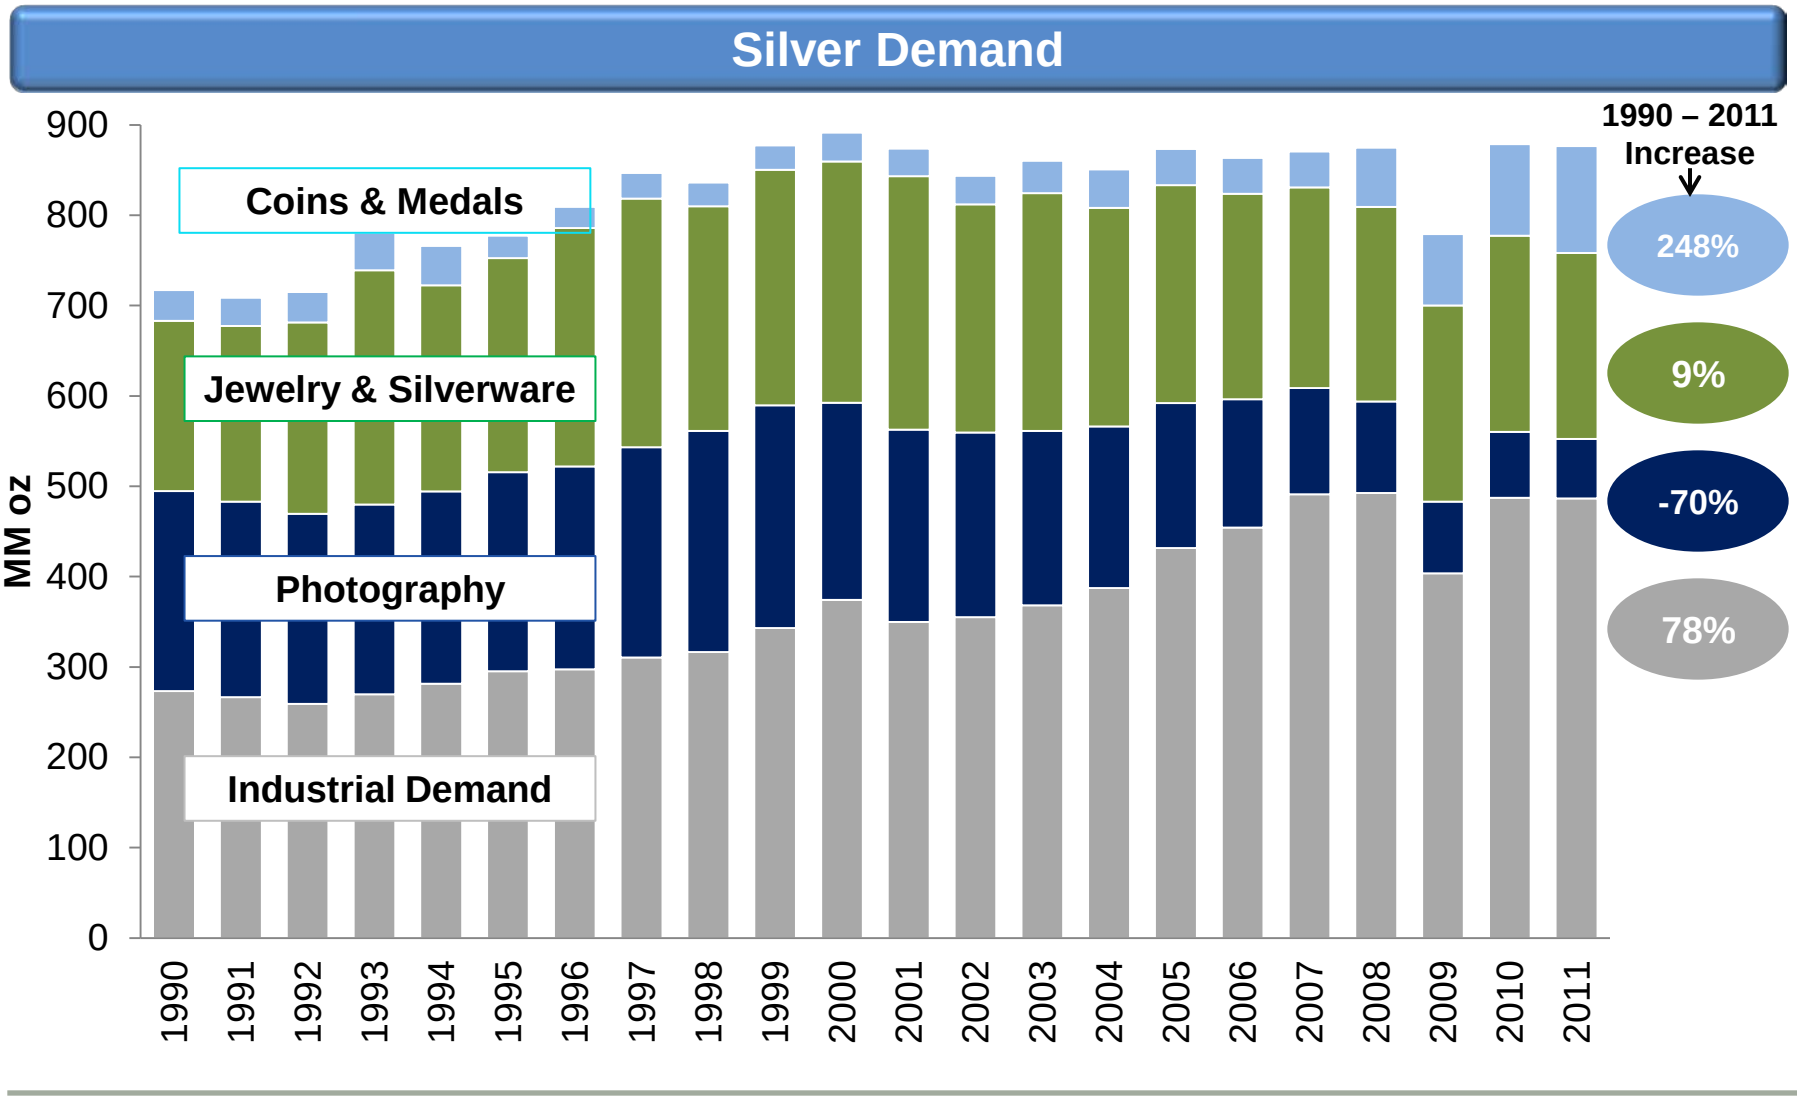

Supply & Demand Conclusions

- Present silver supply is approximately 950 mm oz and should increase by 90 mm oz to 1.05 bn oz by 2015
- Silver demand of 1.06 bn oz today is expected grow to approximately 1.18 bn oz by 2015
- Maximum mine production achieved in 2014-15; no anticipated large scale projects in pipeline
- Growing modern demand in Asia could result in a shortage of supply

Silver Supply and Demand

Silver Demand
