

Growing Production and Reserves in Mining-Friendly Jurisdictions

January 2014

Hecla MINING COMPANY

Cautionary Statements

Cautionary Note Regarding Forward Looking Statements

Statements made which are not historical facts, such as strategies, plans, production, exploration results and plans, costs, and prices or sales performance are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 and “forward looking information” under Canadian securities laws. Words such as “may,” “will,” “should,” “expects,” “intends,” “projects,” “believes,” “estimates,” “targets,” “anticipates,” and similar expressions are used to identify these forward-looking statements. Forward-looking statements involve a number of risks and uncertainties that could cause actual results to differ materially from those projected, anticipated, expected or implied. These risks and uncertainties include, but are not limited to, metals price volatility, volatility of metals production and costs, environmental and litigation risks, operating risks, project development risks, political risks, labor issues, ability to raise financing, and exploration risks. Refer to our Form 10-K and 10-Q reports for a more detailed discussion of risk factors that may impact expected future results. We undertake no obligation to update forward-looking statements other than as may be required by law.

Cautionary Note Regarding Estimates of Measured, Indicated and Inferred Resources

The United States Securities and Exchange Commission permits mining companies, in their filings with the SEC, to disclose only those mineral deposits that a company can economically and legally extract or produce. We use certain terms in this presentation, such as “resource,” “measured resources,” “indicated resources,” and “inferred resources” that are recognized by Canadian regulations, but that SEC guidelines generally prohibit U.S. registered companies from including in their filings with the SEC, except in certain circumstances. U.S. investors are urged to consider closely the disclosure in our most recent Form 10-K and Form 10-Q. You can review and obtain copies of these filings from the SEC’s website at www.sec.gov.

Qualified Person (QP) Pursuant to Canadian National Instrument 43-101

Dean McDonald, P.Geo., Vice President - Exploration of Hecla Mining Company, who serves as a Qualified Person under National Instrument 43-101, supervised the preparation of the scientific and technical information concerning Hecla’s mineral projects in this presentation. Information regarding data verification, surveys and investigations, quality assurance program and quality control measures and a summary of analytical or testing procedures for the Greens Creek Mine are contained in a technical report titled “Technical Report for the Greens Creek Mine” dated March 28, 2013, for the Lucky Friday Mine are contained in a technical report titled “Technical Report for the Lucky Friday Mine Shoshone County, Idaho, USA” dated March 28, 2013, for Casa Berardi are contained in a technical report titled "Technical Report on the mineral resource and mineral reserve estimate for Casa Berardi Mine, Northwestern Quebec, Canada" dated March 28, 2013 and in a technical report titled "Feasibility Study of the Hosco deposit - Joanna Gold project" dated June 5, 2012. Also included in these four technical reports is a description of the key assumptions, parameters and methods used to estimate mineral reserves and resources and a general discussion of the extent to which the estimates may be affected by any known environmental, permitting, legal, title, taxation, socio-political, marketing or other relevant factors. Copies of these technical reports are available under Hecla and Aurizon's profiles on SEDAR at www.sedar.com.

Cautionary Note Regarding Non-GAAP measures

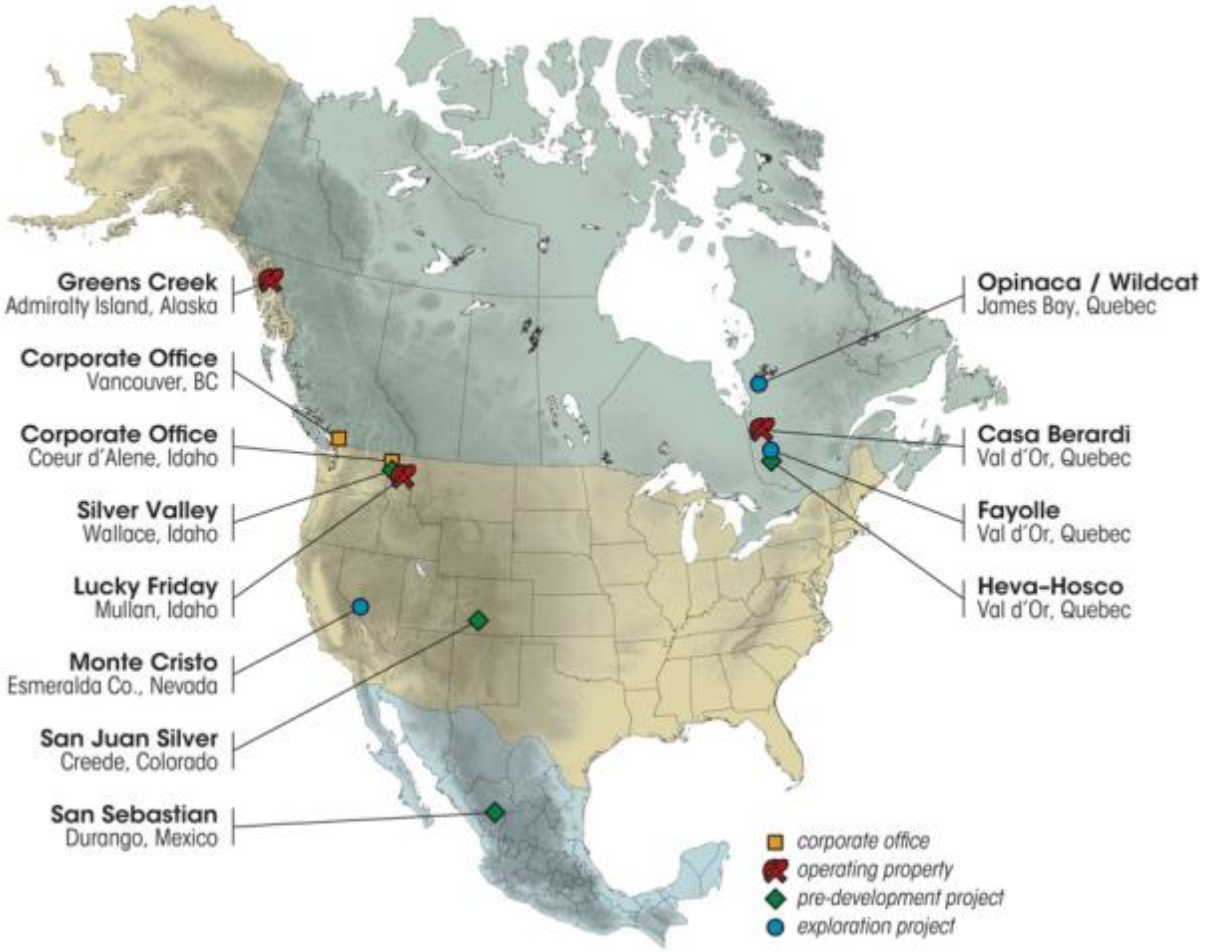

Total cash cost per ounce of silver and gold, net of by-product credits, adjusted EBITDA and earnings before adjustments represent non-U.S. Generally Accepted Accounting Principles (GAAP) measurement. A reconciliation of each of these non-GAAP measures to GAAP measures can be found in the Appendix.

A New Hecla

- Long Life Assets, Strong Reserve Growth
- Low Cost, High Margins
- Growing Silver and Gold Production
- Mining-Friendly Jurisdictions

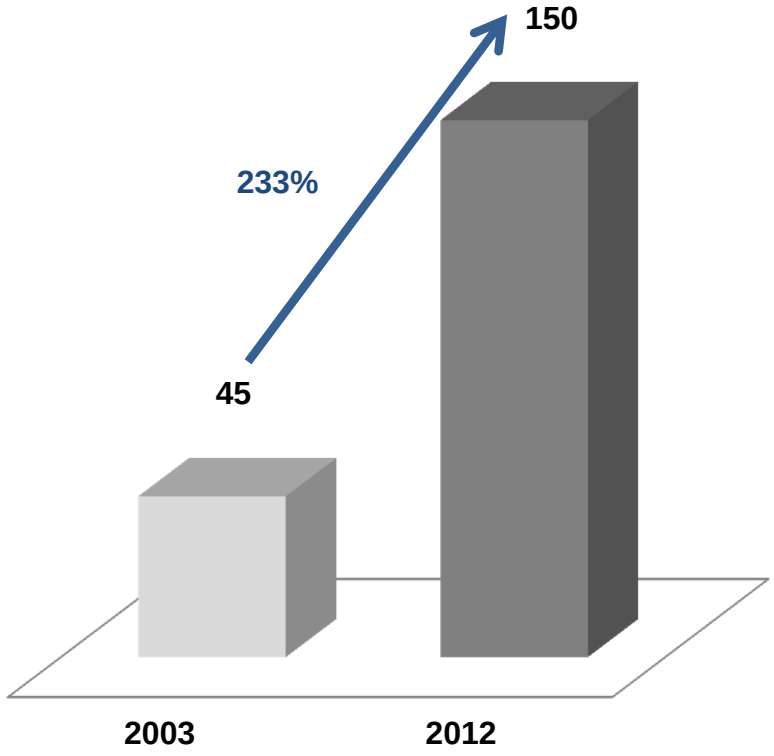

North American Focused Asset Portfolio

All operations in lower-risk, mining-friendly jurisdictions

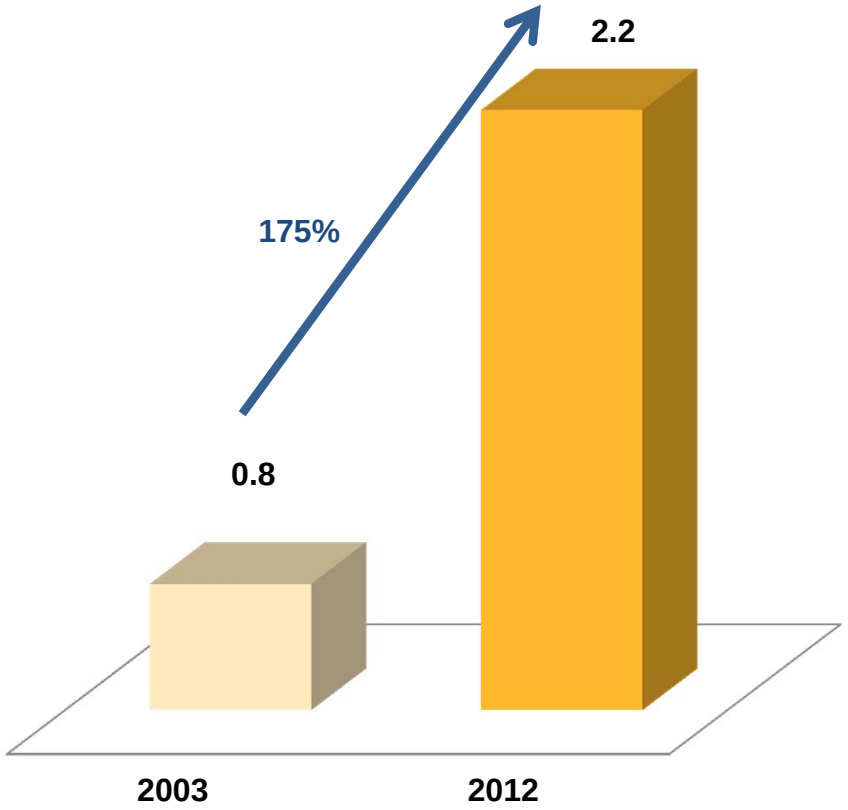

Strong Reserve Growth 2003[1] - 2012

Silver ounces (millions)

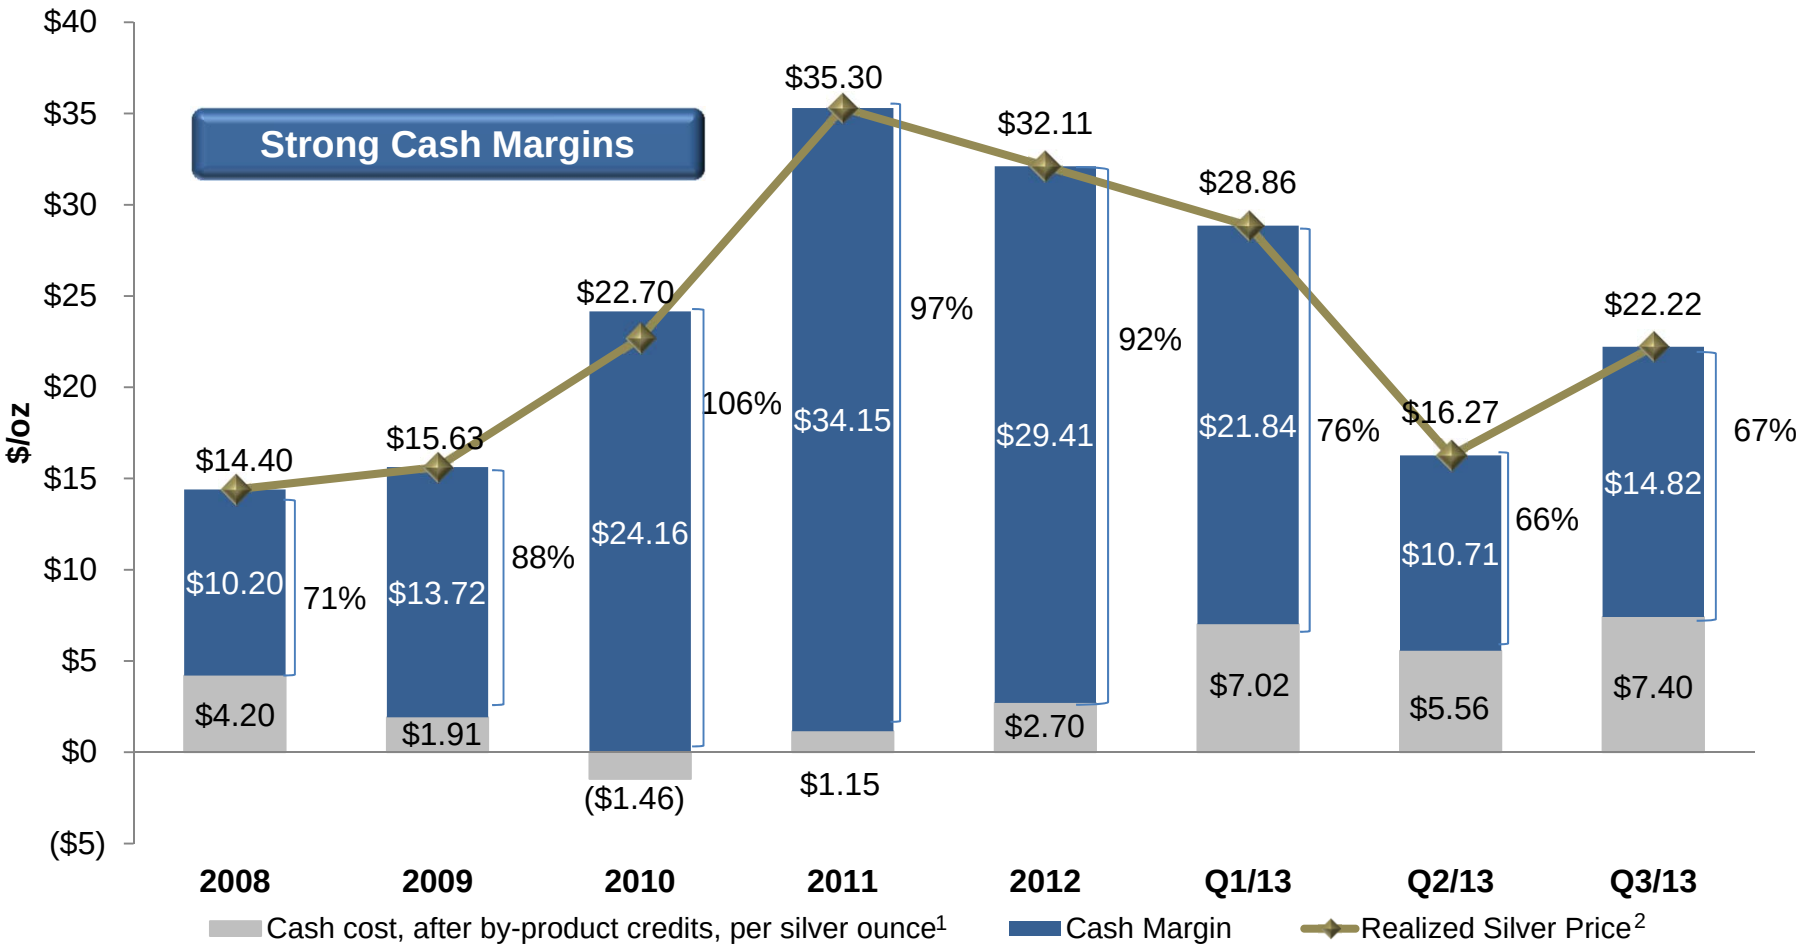

Gold ounces (millions)[2]

1. See Proven and Probable reserves data in the Appendix.
2. Includes Casa Berardi's reserves for 2012.

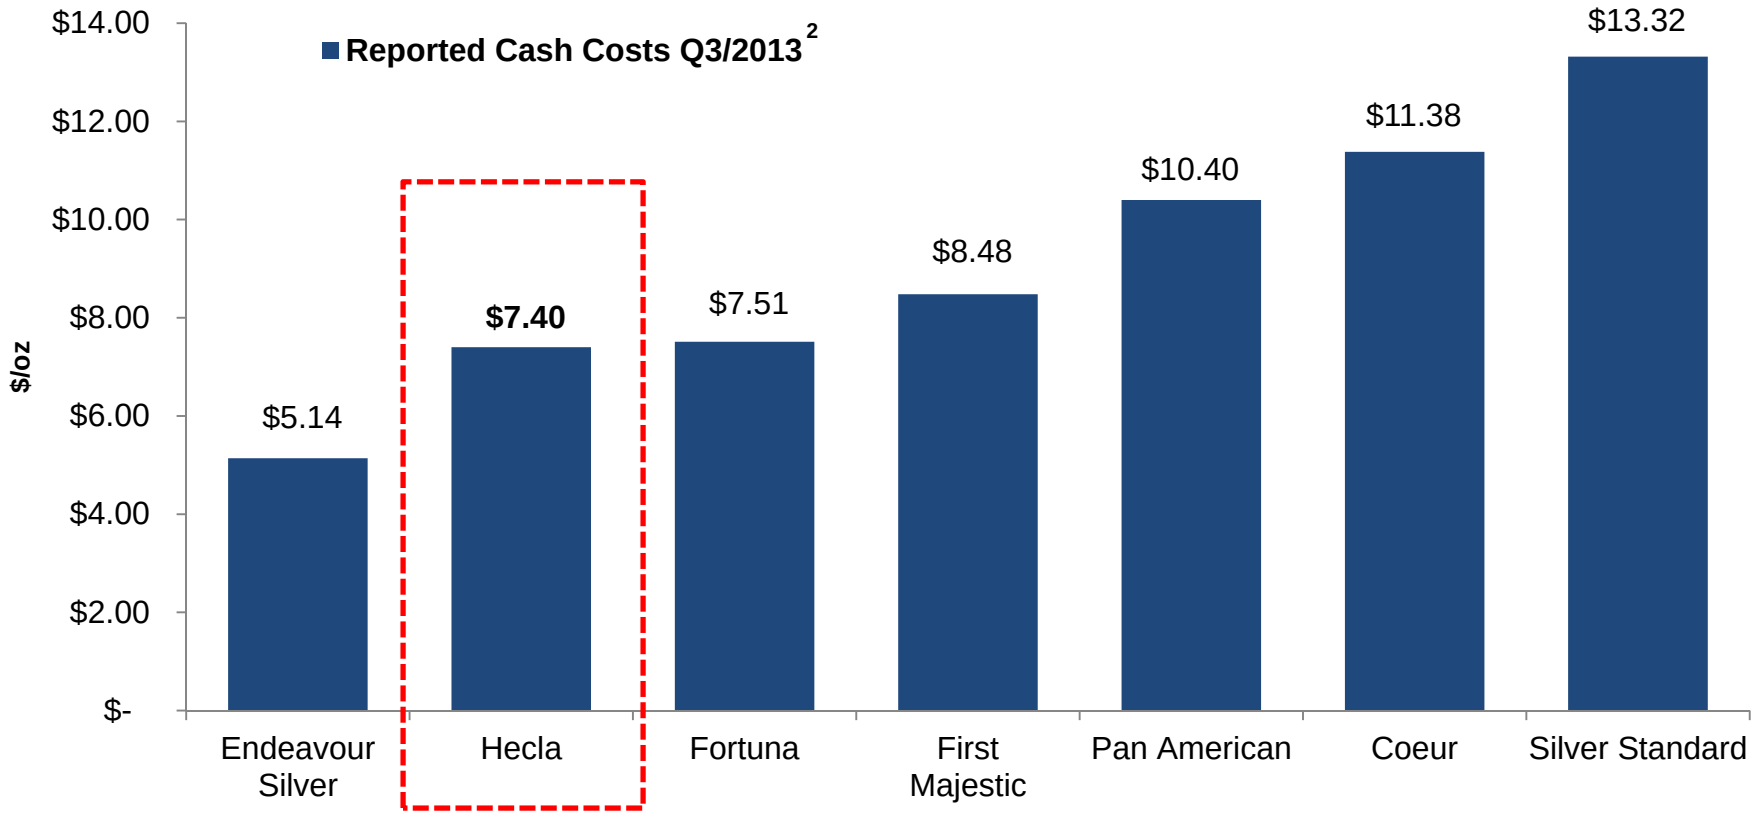

Q3 2013 - Continued Strong Margins

1. Cash cost, after by-product credits, per silver ounce represents a non-U.S. Generally Accepted Accounting Principles (GAAP) measurement. A reconciliation of which to cost of sales and other direct production costs and depreciation, depletion and amortization, the most comparable GAAP measures, can be found in the Appendix.
2. Realized prices are calculated by dividing gross revenues for each metal by the payable quantities of each metal included in the concentrate and doré sold during the period.

Q3 2013 - Peer Cash Cost Comparison

Hecla anticipates 2013 cash costs to be $6.50/oz silver[1]

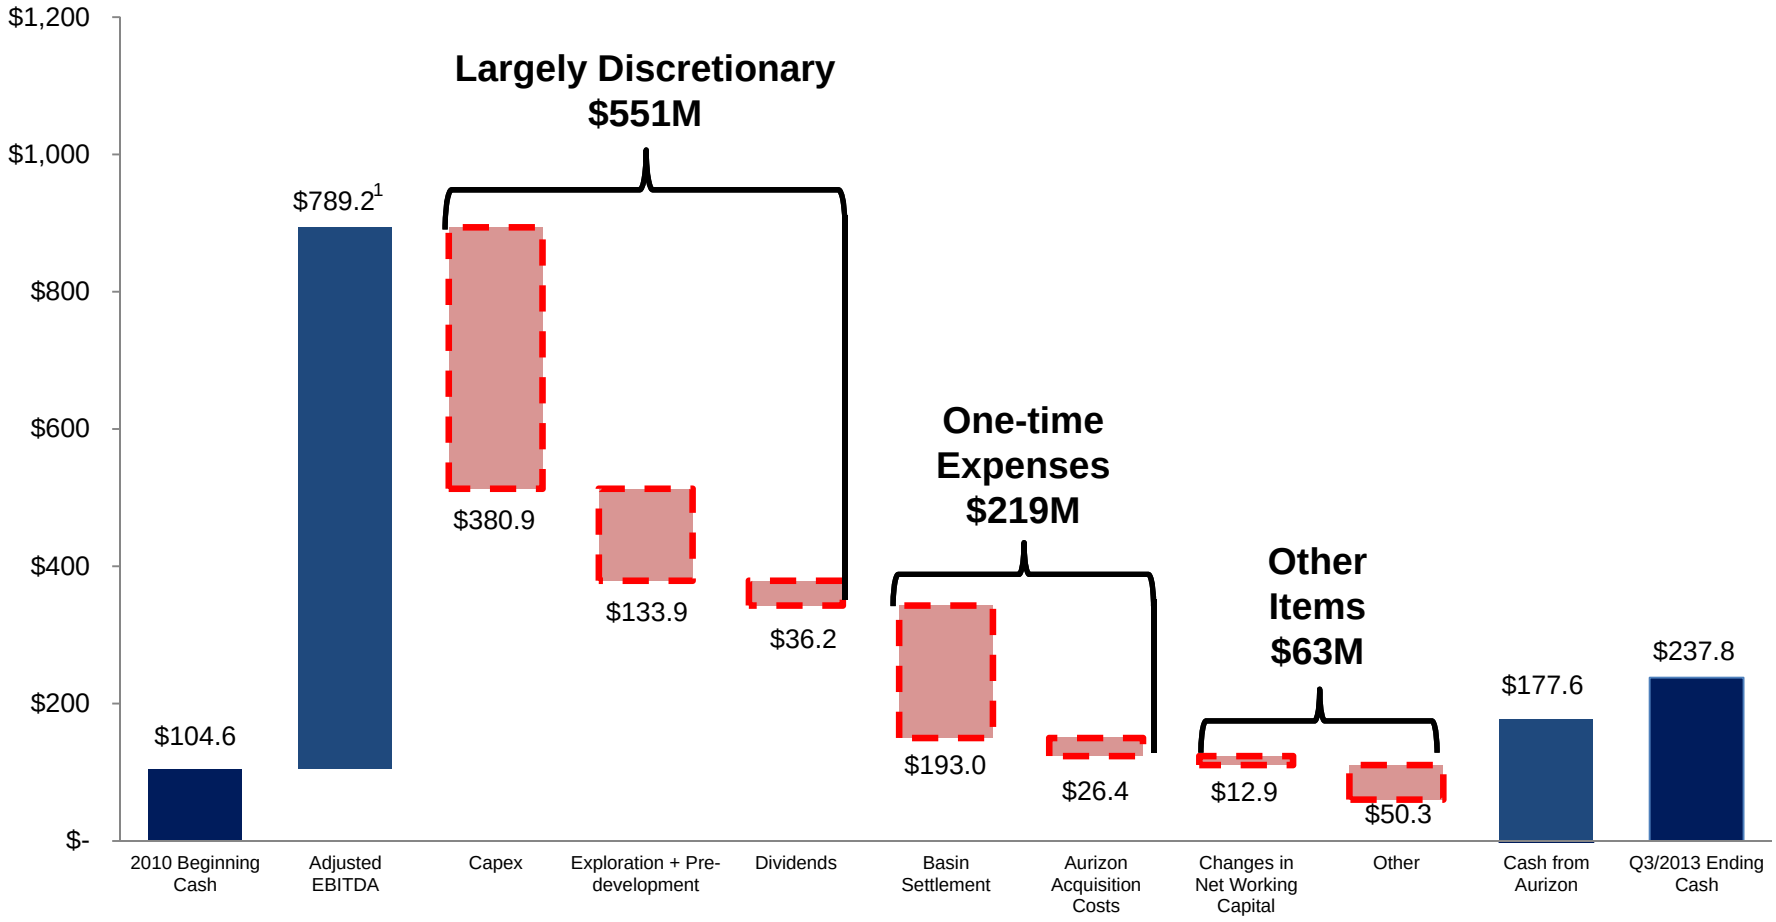

1. Cash cost, after by-product credits, per silver ounce represents a non-U.S. Generally Accepted Accounting Principles (GAAP) measurement. A reconciliation of which to cost of sales and other direct production costs and depreciation, depletion and amortization, the most comparable GAAP measures, can be found in the Appendix.
2. From public quarterly reports

2010 - Q3 2013 Cash Flow Flexibility

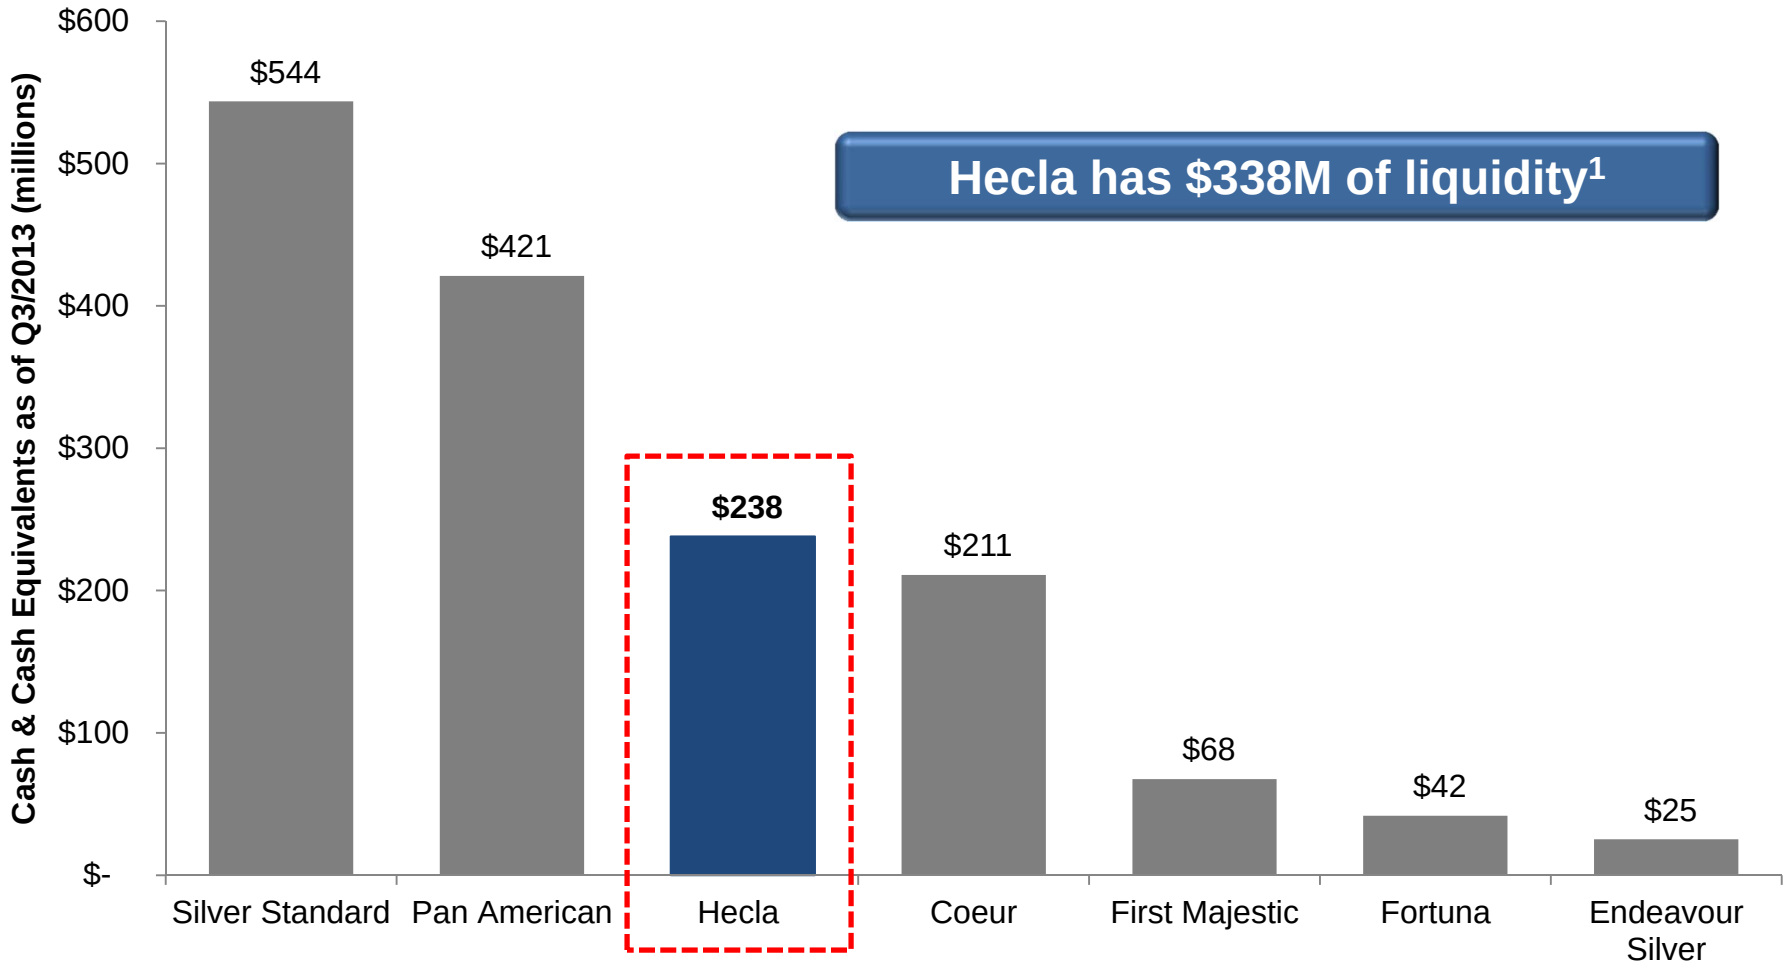

Cash Bridge 2010 - Q3 2013

(US$M)

1. Adjusted EBITDA represents a non-GAAP measurement. A reconciliation can be found in the Appendix.
2. Average prices for the period: Gold - $1,479/oz, Silver $27.92/oz, Lead $0.99/lb, Zinc $0.92/lb

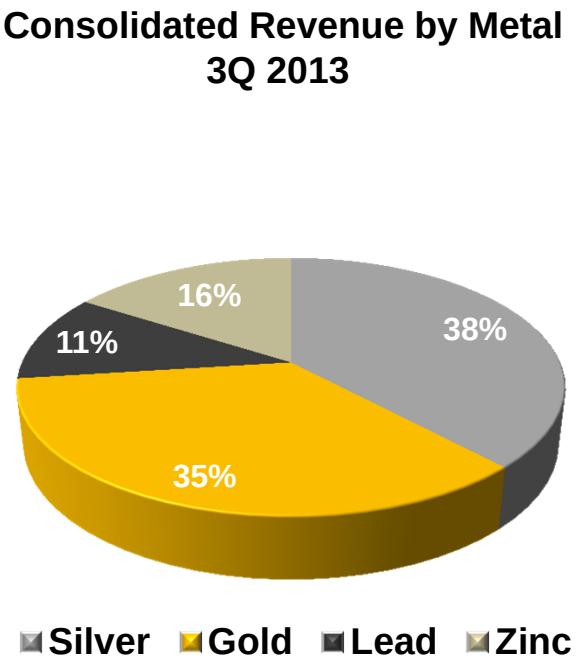

Solid Cash Position

Cash and Cash Equivalents Q3/2013

1. $238 million cash plus $100 million revolving credit agreement

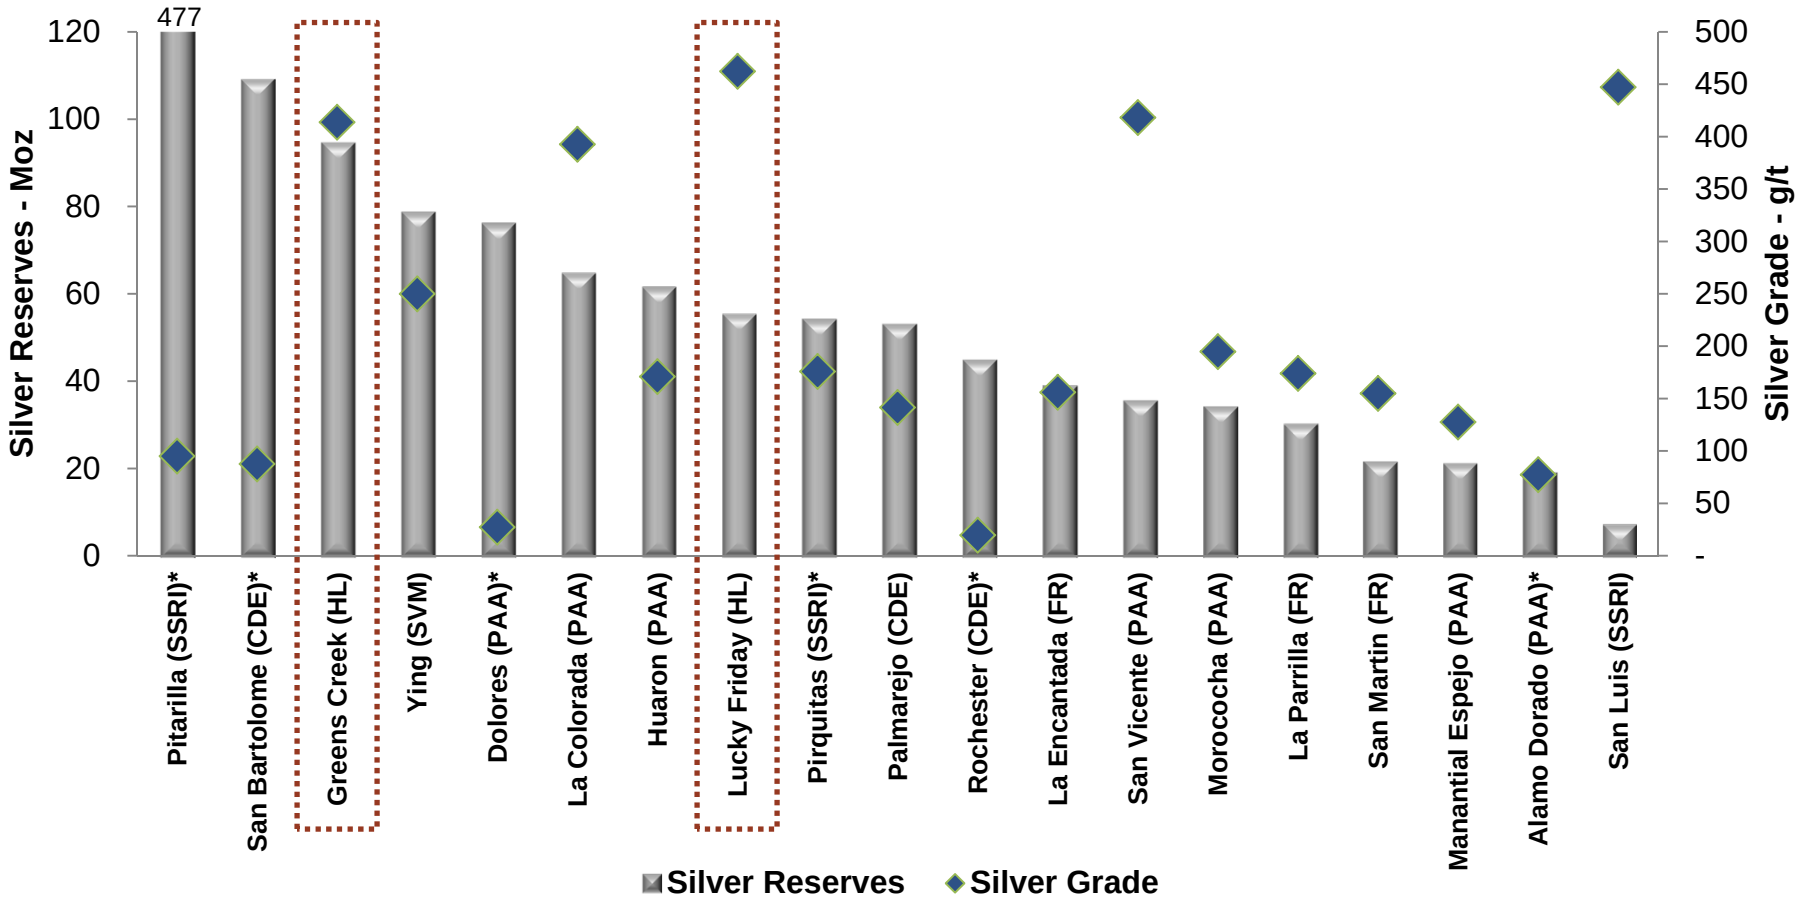

Diversified Revenue: Silver, Gold, Lead and Zinc

- Diversified revenue stream (silver, gold, lead and zinc) from 3 mines
- Policy allows hedging of 60% of the next 3 years of lead and zinc production
- Currently have ~$300 million sold, or about 1 year of operating expenses
- Locking in revenue for all metals when concentrate shipped beginning Q3
- **NO LONG TERM HEDGING OF GOLD AND SILVER!**

Large and High Quality Silver Assets

Silver Reserves and Grades of Silver Peers

1. Reserves capped at 120M ounces
Source: Public filings, *Open pit mines - Palmarejo is both open pit and underground.

Greens Creek - Consistent Performer

Key Highlights:

- One of the largest and lowest-cost primary silver mines in the world

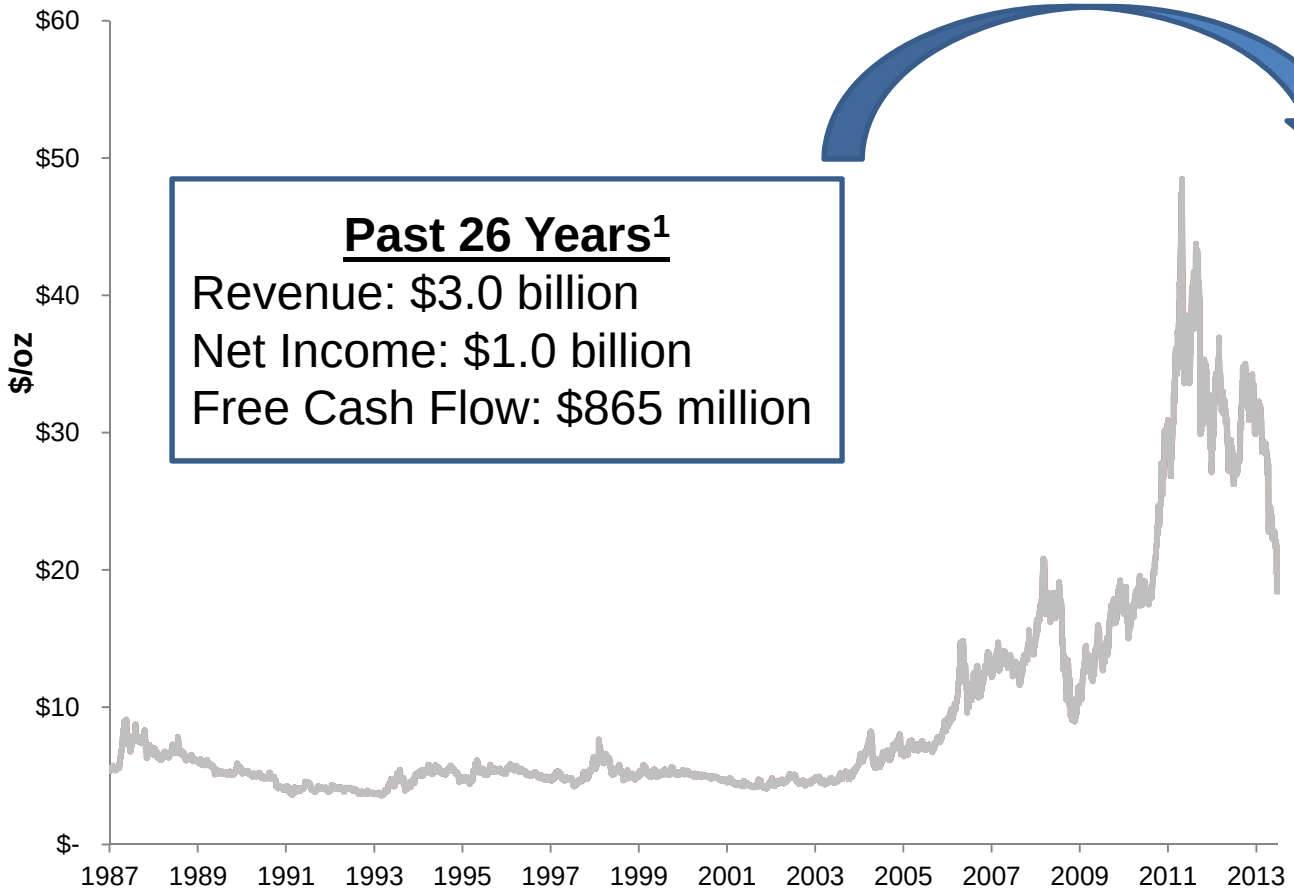

2014 Guidance	
Silver Production (oz)	6.5 - 7.0 M
Gold Production (oz)	50,000
Cash cost, after by-product credits, per silver ounce[2]	$6.00/oz

Overview	
Location	Admiralty Island, Alaska
Deposit	Polymetallic, stratiform, massive sulfide
Ownership (Since)	100% Hecla (2008)
Type	Underground
Expected Life of Mine[1]	9 years
Primary Metal Produced	Silver
Reserves & Resources (at December 31, 2012)	
2P Reserves	94.5 Moz @ 12 oz/t
M+I Resources	2.7 Moz @ 5.9 oz/t
Inferred Resources	43.0 Moz @ 11.4 oz/t
Production & Cash Costs (2013)	
Silver Production (oz)	7.4 M
Cash cost, after by-product credits, per silver ounce[2]	$4.42/oz

1. Source: NI 43-101 – March 28, 2013
2. Cash cost, after of by-product credits, per silver ounce represents a non-U.S. Generally Accepted Accounting Principles (GAAP) measurement. A reconciliation of which to cost of sales and other direct production costs and depreciation, depletion and amortization (GAAP) can be found in the Appendix.

Greens Creek: World-Class Silver Mine

Spectacular Performance Over a Variety of Silver Prices

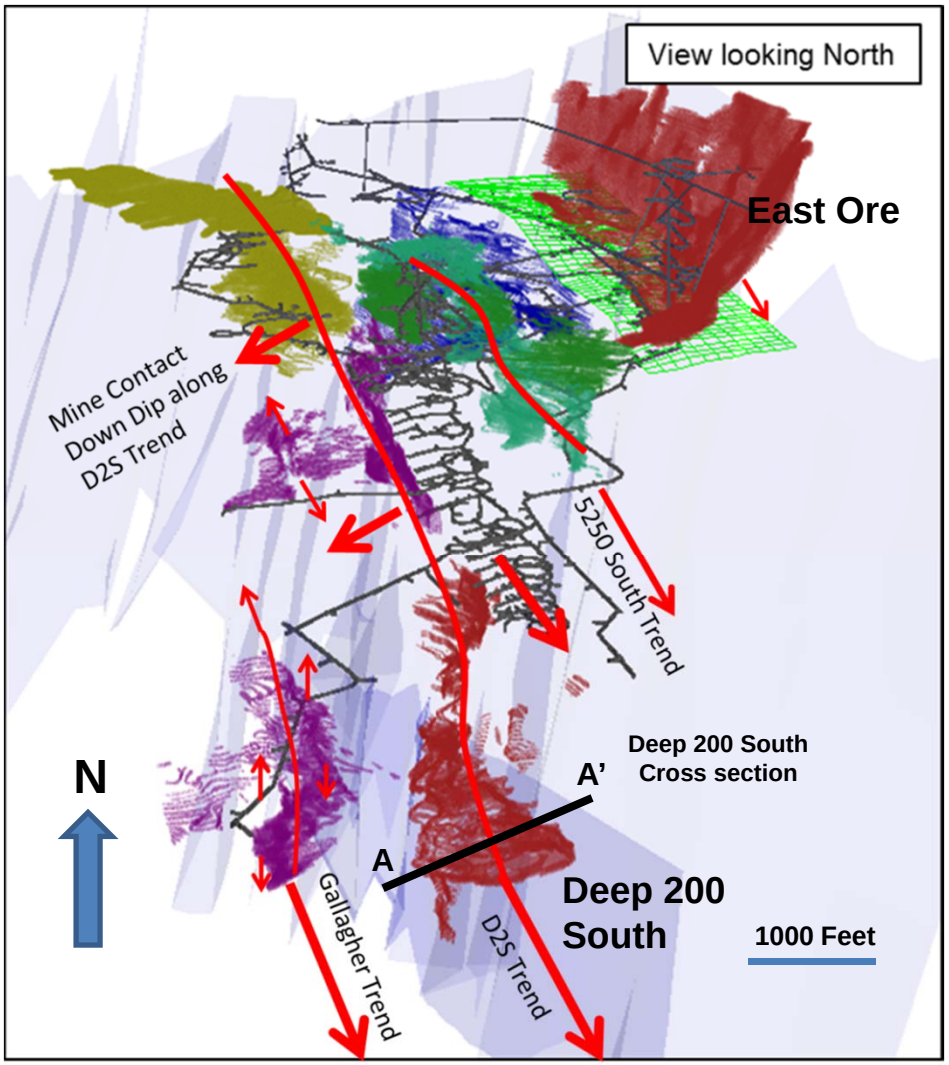

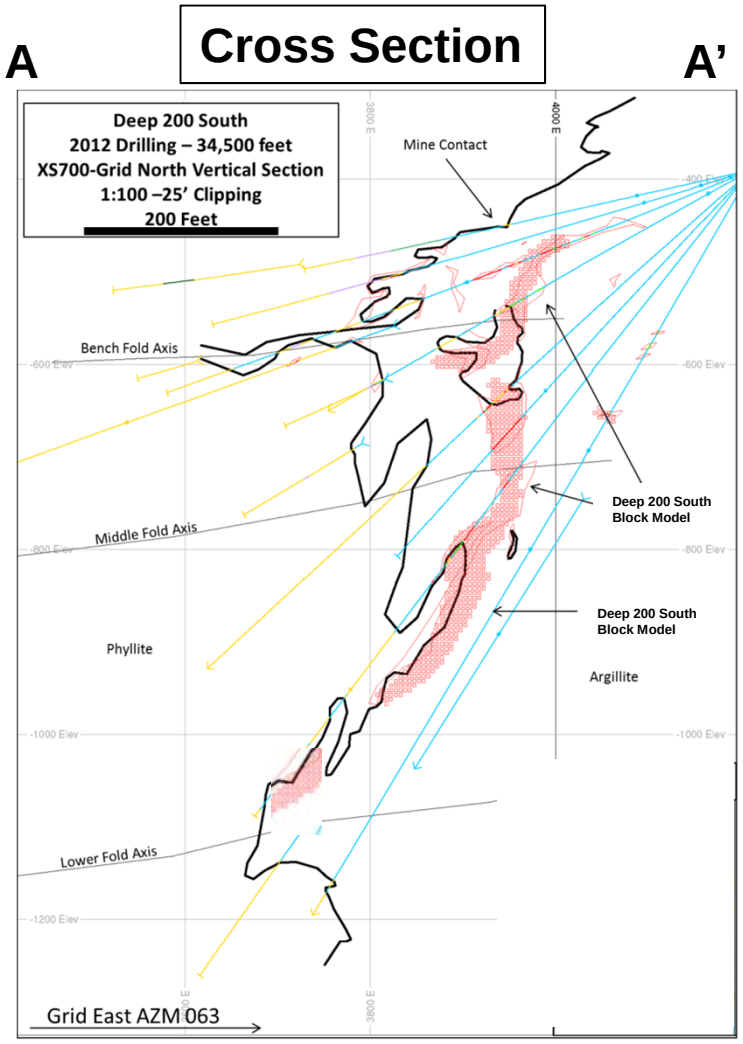

Past 26 Years[1]
Revenue: $3.0 billion
Net Income: $1.0 billion
Free Cash Flow: $865 million

Next 10 Years
Continued strong performance expected

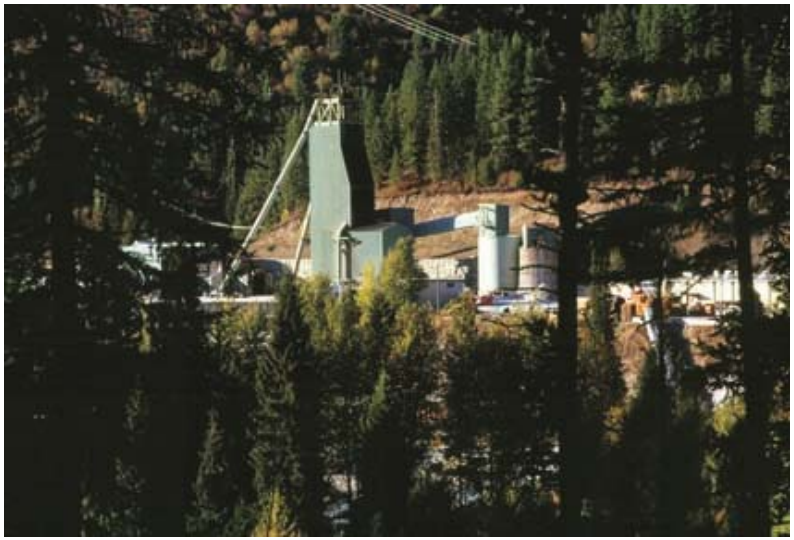

1. Statistics from 1987 – H1 2013

Greens Creek - Underground Exploration

Lucky Friday - Ramping Up Production

Key Highlights:

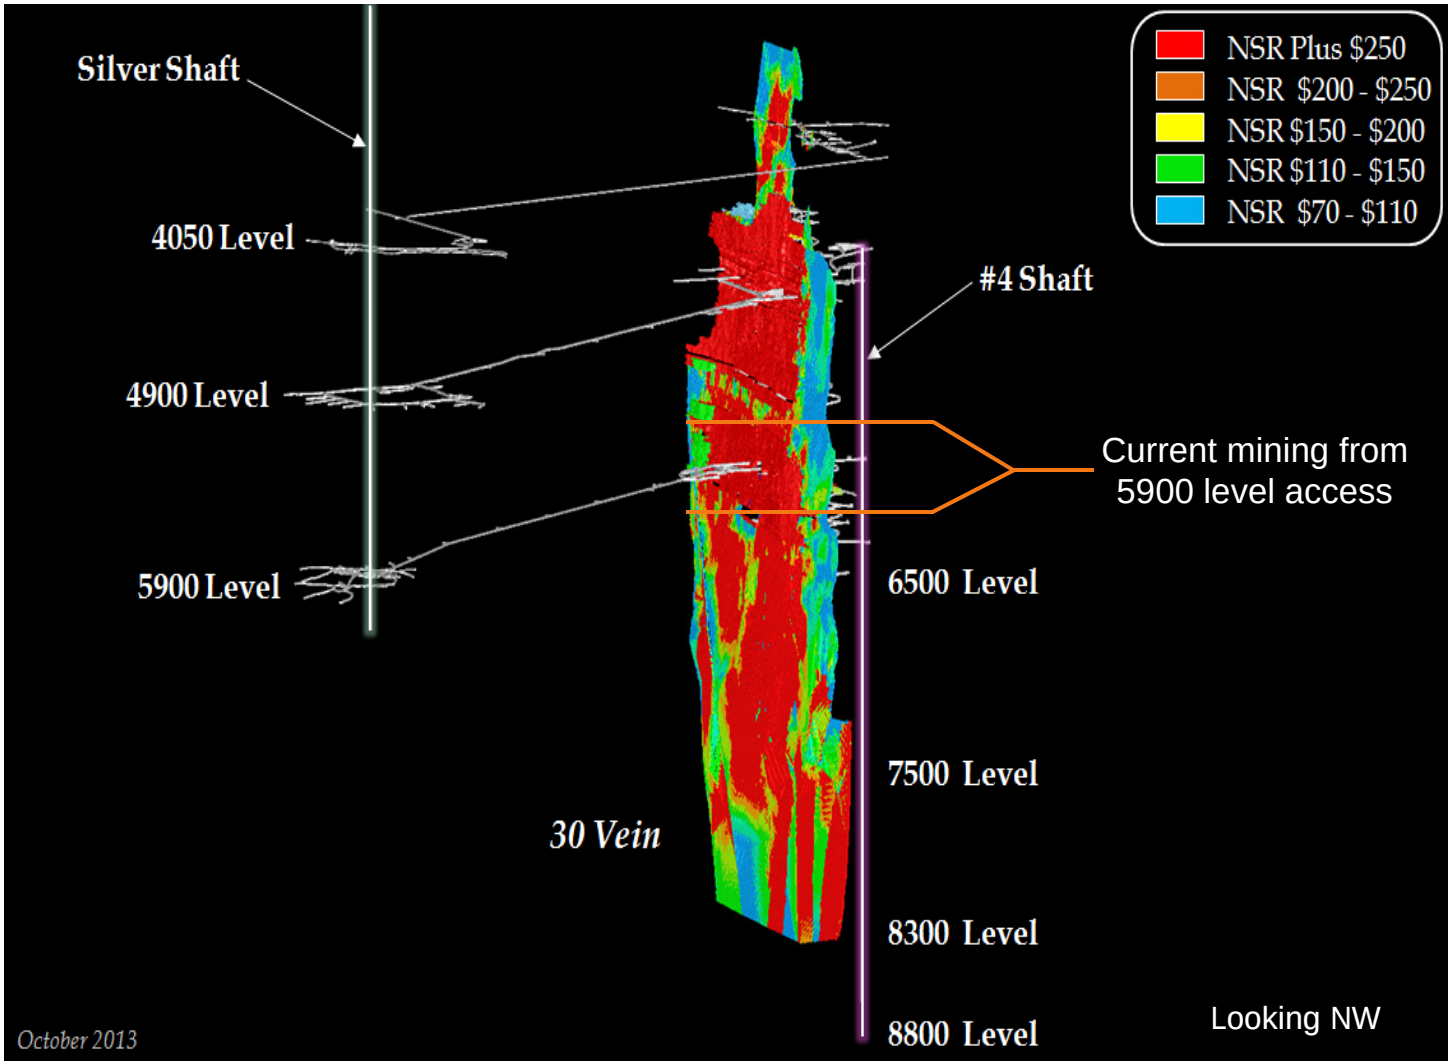

- A deep underground silver, lead, and zinc mine

2014 Guidance	
Silver Production (oz)	3.0 M
Cash cost, after by-product credits, per silver ounce[2]	$9.00/oz

Overview	
Location	Mullan, Idaho
Deposit	Silver & base metal bearing vein structures
Ownership (Since)	100% Hecla (1958)
Type	Underground
Expected Life of Mine[1]	25 years
Silver Production (oz)	Silver
Reserves & Resources (at December 31, 2012)	
2P Reserves	55.5 Moz @ 13.5 oz/t
M+I Resources	108.7 Moz @ 5.7 oz/t
Inferred Resources	62.7 Moz @ 9.1 oz/t
Production & Cash Costs (2013)	
Silver Production (oz)	1.5 M
Cash cost, after by-product credits, per silver ounce[2]	$19.21/oz

1. Source: NI 43-101 – March 28, 2013
2. Cash cost, after of by-product credits, per silver ounce represents a non-U.S. Generally Accepted Accounting Principles (GAAP) measurement. A reconciliation of which to cost of sales and other direct production costs and depreciation, depletion and amortization (GAAP) can be found in the Appendix.

Lucky Friday - Unlocking Value at Depth

*Assuming prices of $20.00/oz silver, $0.90/lb lead, and $0.80/lb zinc

Casa Berardi - Great New Addition

Key Highlights:

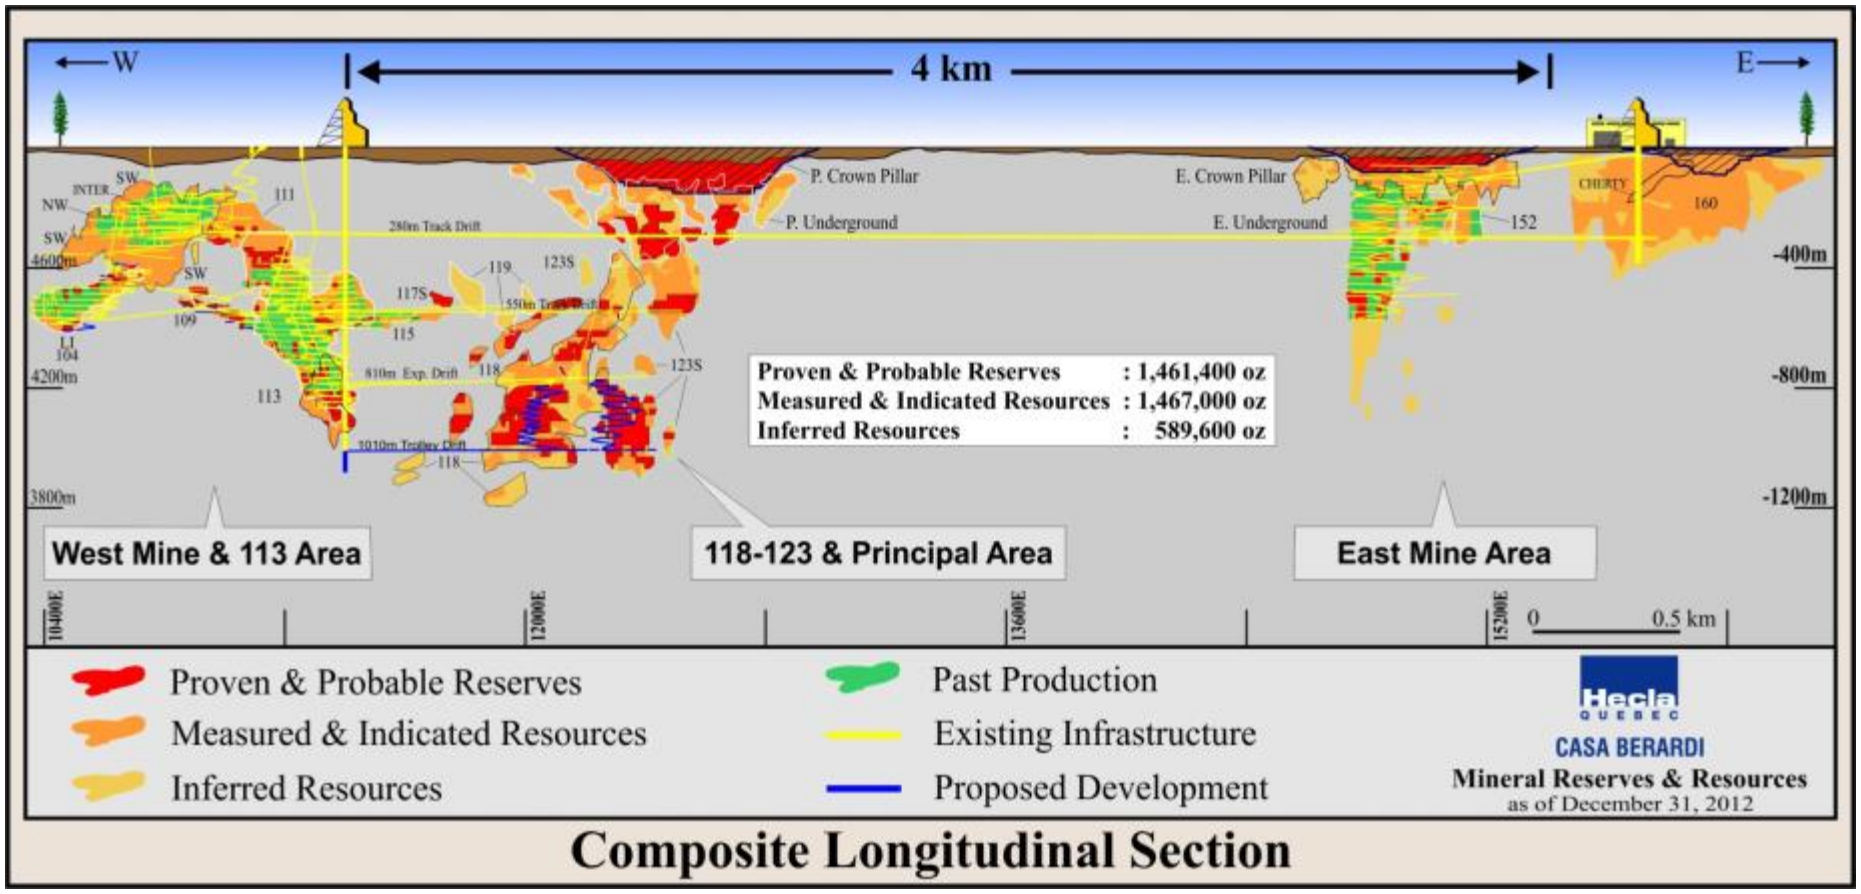

- Acquired June 1, 2013 from Aurizon Mines Ltd.

2014 Guidance	
Gold Production (oz)	125,000
Cash cost, after by-product credits, per gold ounce[2]	$900/oz

Overview	
Location	La Sarre, Quebec
Deposit	Archean, shear & vein hosted gold deposit
Ownership (Since)	100% Hecla (June 2013)
Type	Underground
Expected Life of Mine[1]	9 years
Primary Metal Produced	Gold
Reserves & Resources (at December 31, 2012)	
2P Reserves	1.5 Moz @ 0.16 oz/t
M+I Resources	1.5 Moz @ 0.12 oz/t
Inferred Resources	0.59 Moz @ 0.11 oz/t
Production & Cash Costs (June - December 2013)	
Gold Production (oz)	62,532
Cash cost, after by-product credits, per gold ounce[2]	$951/oz

1. Source: NI 43-101 – March 28, 2013
2. Cash cost, after of by-product credits, per gold ounce represents a non-U.S. Generally Accepted Accounting Principles (GAAP) measurement. A reconciliation of which to cost of sales and other direct production costs and depreciation, depletion and amortization (GAAP) can be found in the Appendix.

Casa Berardi - Great Exploration Potential

Composite Longitudinal Section

Response to Metals Price Weakness

- Decline in precious metals prices led to review of 2013 expenses
- Maintained programs with long logistical requirements or short implementation windows
- Revised guidance
  - Capital expenditures reduced by 26% to $163 million
  - Exploration expenditures reduced by 41% to $21 million
  - Pre-development expenditures reduced by 35% to $14 million
- Growing production of gold and silver

Goal for 2014 is for capital, exploration and pre-development expenditures to be within Adjusted EBITDA

Silver - The Metal of This Age

- Has the highest electrical conductivity of all the metals
  - 80% more conductive than aluminum
  - 50% more conductive than gold, 6% more conductive than copper
  - Critically important in the miniaturization of circuits as electronic items become increasingly compact and users expect more power or utility
- Has superior thermal conductivity
  - Transfers heat efficiently; doesn't overheat
- Highest reflectivity (94%) in visible light of the metals
  - Gold 72%, Aluminum 92%

 Source – The Silver Institute 2011

2014 Expectations

Mine	2014E Silver Production (Moz)	2014E Gold Production (oz)	Cash cost, after by-product credits, per silver/gold ounce[1]
Greens Creek	6.5 – 7.0	55,000	$6.00
Lucky Friday	3.0	n/a	$9.00
Casa Berardi	n/a	125,000	$900 per gold oz
Company-wide	9.5 – 10.0	180,000	N/A

2014E capital expenditures (excluding capitalized interest)	$150 million
2014E pre-development and exploration expenditures	$18 million

1. Metal price assumptions used for calculations: Au $1,300/oz, Ag $20/oz, Zn $0.80/lb, Pb $0.90/lb; USD/CAD assumed at par.

Appendix 1

Seasoned Management Team with Significant Experience

Phillips S. Baker, Jr., has 26 years of mining experience. He was previously VP and CFO of Battle Mountain Gold Company and before that was CFO at Pegasus Gold Inc.

President and CEO

Dr. Dean W.A. McDonald, is a geologist with over 30+ years experience. He was previously VP of Exploration for Committee Bay Resources Ltd. and exploration manager at Miramar Mining Company.

Senior VP - Exploration

James A. Sabala, has 30+ years mining experience. James was previously executive VP and CFO at Coeur d'Alene Mines and VP and CFO of Stillwater Mining.

Senior VP and CFO

Don Poirier, has 25 years of mining experience. Prior to joining Hecla, Mr. Poirier was a mining analyst with Blackmont Capital from 2002-2007. Don held other mining analyst positions from 1988 to 2002.

VP - Corporate Development

Lawrence P. Radford, has 30+ years mining experience. He previously worked for Kinross Gold as VP of South American operations overseeing the La Coipa and Maricunga mines.

Senior VP - Operations

David C. Sienko, has 10 years experience representing Hecla and was appointed VP and General Counsel in 2010. Prior to working at Hecla, he was a partner of K&L Gates LLP, where he specialized in counseling public and private entities on securities compliance, M&A, and corporate governance.

VP - General Counsel

Over 150 Years of Combined Experience

Appendix 2

Total Cash Cost GAAP Reconciliation

Reconciliation of cash cost, after by-product credits, per silver ounce to Generally Accepted Accounting Principles (GAAP) for Greens Creek & Lucky Friday
(dollars and ounces in thousands, except per ounce - unaudited)

	Q3/2013	Q2/2013	Q1/2013	2012	2011	2010	2009	2008
Cash costs, before by-product credits[1]	$ 63,087	$ 61,777	$ 59,923	$ 208,178	$ 265,306	$ 251,837	$ 227,566	$ 201,584
By-product credits	(46,134)	(49,324)	(46,577)	(190,916)	(254,372)	(267,272)	(206,608)	(164,963)
Cash cost, after by-product credits	16,953	12,453	13,346	17,262	10,934	(15,435)	20,958	36,621
Divided by silver ounces produced	2,287	2,237	1,901	6,394	9,483	10,566	10,989	8,709
Cash cost, before by-product credits, per silver ounce	$ 27.57	$ 27.61	$ 31.52	$ 32.56	$ 27.98	$ 23.83	$ 20.71	$ 23.15
By-product credits per silver ounce	$ (20.17)	$ (22.05)	$ (24.50)	$ (29.86)	$ (26.82)	$ (25.30)	$ (18.80)	$ (18.94)
Cash cost, after by-product credits, per silver ounce	$ 7.40	$ 5.56	$ 7.02	$ 2.70	$ 1.15	$ (1.46)	$ 1.91	$ 4.20
Reconciliation to GAAP:								
Cash cost, after by-product credits	$ 16,953	$ 12,453	$ 13,346	$ 17,262	$ 10,934	$ (15,435)	$ 20,958	$ 36,621
Depreciation, depletion and amortization	15,735	16,888	14,007	43,522	47,066	60,011	62,837	35,207
Treatment costs	(18,486)	(18,972)	(18,597)	(73,355)	(99,019)	(92,144)	(80,830)	(70,776)
By-products credits	46,134	49,324	46,577	190,916	254,372	267,272	206,608	164,963
Change in product inventory	7	8,436	(4,604)	(1,381)	(4,805)	3,660	310	20,254
Suspension-related costs[2]	-	-	-	-	4,135	-	-	-
Reclamation, severance and other costs	734	536	103	663	(44)	630	1,596	537
Costs of sales and other direct production costs and depreciation, depletion and amortization (GAAP)	**$ 61,077**	**$ 68,665**	**$ 50,832**	**$ 177,627**	**$ 212,639**	**$ 223,994**	**$ 211,479**	**$ 186,806**

1. Includes all direct and indirect operating cash costs related directly to the physical activities of producing metals, including mining, processing and other plant costs, third-party refining and marketing expense, on-site general and administrative costs, royalties and mining production taxes, net of by-product revenues earned from all metals other than the primary metal produced at each unit.
2. Production was temporarily suspended at the Lucky Friday unit during 2012 as work was performed to rehabilitate the Silver Shaft, the primary access from surface to the underground workings at the Lucky Friday mine.

Appendix 2

Total Cash Cost GAAP Reconciliation

	Greens Creek Unit			
	Three Months Ended December 31,		Twelve Months Ended December 31,	
	2013	**2012**	**2013**	**2012**
Total cash cost, before by-product credits [1]	**$ 50,906**	$ 58,608	**$ 203,496**	$ 208,178

Cost of sales and other direct production costs and depreciation, depletion and amortization (GAAP)	**$ 43,790**	$ 47,063	**$ 193,526**	$ 177,627

1. Includes all direct and indirect operating cash costs related directly to the physical activities of producing metals, including mining, processing and other plant costs, third-party refining and marketing expense, on-site general and administrative costs, royalties and mining production taxes, net of by-product revenues earned from all metals other than the primary metal produced at each unit.

Appendix 2

Total Cash Cost GAAP Reconciliation

	Lucky Friday Unit (2)			
	Three Months Ended December 31,		Twelve Months Ended December 31,	
	2013	2012	2013	2012
Total cash cost, before by-product credits [1]	$ 18,766	$ —	$ 50,964	$ —
By-product credits	(10,036)	—	(22,933)	—
Cash cost, after by-product credits	8,730	—	28,031	—
Divided by silver ounces produced	642	—	1,459	—
Cash cost, before by-product credits, per silver ounce	$ 29.22	$ —	$ 34.93	$ —
By-product credits per silver ounce	$ (15.63)	$ —	$ (15.72)	$ —
Total cash cost, after by-product credits, per ounce	$ 13.59	$ —	$ 19.21	$ —
Reconciliation to GAAP:				
Total cash cost, after by-product credits	$ 8,730	$ —	$ 28,031	$ —
Depreciation, depletion and amortization	2,319	—	7,833	—
Treatment costs	(4,002)	—	$ (9,482)	—
By-product credits	10,036	—	22,933	—
Change in product inventory	1,048	—	$ (405)	—
Suspension-related costs (2)	—	—	—	—
Reclamation and other costs	92	—	153	—
Cost of sales and other direct production costs and depreciation, depletion and amortization (GAAP)	$ 18,223	$ —	$ 49,063	$ —

1. Includes all direct and indirect operating cash costs related directly to the physical activities of producing metals, including mining, processing and other plant costs, third-party refining and marketing expense, on-site general and administrative costs, royalties and mining production taxes, net of by-product revenues earned from all metals other than the primary metal produced at each unit.
2. Production was temporarily suspended at the Lucky Friday Unit during 2012 as work was performed to rehabilitate the Silver Shaft, the primary access from surface to the underground workings at the Lucky Friday mine. Care and maintenance income and expense related to the suspension of production at the Lucky Friday have been excluded from the calculation of cash cost, before by-product credits for the three- and twelve- month periods ended December 31, 2013 and 2012.

Appendix 2

Cash Cost Reconciliation to GAAP - Casa Berardi

Reconciliation of Cash Costs per Ounce to Generally Accepted Accounting Principles (GAAP)

(dollars and ounces in thousands, except per ounce - unaudited)

		Q1/2013	2012	2011	2010	2009	2008	2007	2006
Cash Operating Costs [1]	US$000	$ 21,276	$ 93,259	$ 88,711	$ 75,713	$ 63,869	$ 63,602	$ 53,099	$ 2,120

Reconciliation to GAAP for Q3/2013 cash costs is shown separately below to account for the way Hecla shows cash cost reconciliations. Reconciliation to GAAP from 2006 - Q1/2013 are from Aurizon's disclosures.

Appendix 2

Total Cash Cost GAAP Reconciliation

Reconciliation of cash cost, after by-product credits, per gold ounce after to Generally Accepted Accounting Principles (GAAP) for Casa Berardi (dollars and ounces in thousands, except per ounce - unaudited)[2]

	2013	Q4/13	Q3/13
Cash costs, before by-product credits[1]	$ 59,717	$ 26,806	$ 25,068
By-product credits	(262)	(112)	(113)
Cash cost, after by-product credits	59,455	26,694	24,955
Divided by gold ounces produced	62.53	32.39	23.41
Cash cost, before by-product credits, per gold ounce	$ 954.98	$ 827.70	$ 1,070.82
By-product credits per silver ounce	$ (4.19)	$ (3.46)	$ (4.83)
Cash cost, after by-product credits, per gold ounce	$ 950.79	$ 824.24	$ 1,065.99
Reconciliation to GAAP:			
Cash cost, after by-product credits	$ 59,455	$ 26,694	$ 24,957
Depreciation, depletion and amortization	18,161	11,567	3,270
Treatment costs	(268)	(143)	(78)
By-products credits	262	112	113
Change in product inventory	(3,766)	(723)	(3,456)
Reclamation, severance and other costs	142	60	60
Costs of sales and other direct production costs and depreciation, depletion and amortization (GAAP)	**$ 73,986**	**$ 37,567**	**$ 24,866**

1. Includes all direct and indirect operating cash costs related directly to the physical activities of producing metals, including mining, processing and other plant costs, third-party refining and marketing expense, on-site general and administrative costs, royalties and mining production taxes, net of by-product revenues earned from all metals other than the primary metal produced at each unit.
2. On June 1, 2013, we completed the acquisition of Aurizon Mines Ltd., which gave us 100% ownership of the Casa Berardi mine in Quebec, Canada. The information presented reflects our ownership of Casa Berardi commencing as of that date. The primary metal produced at Casa Berardi is gold, with a by-product credit for the value of silver production.

Appendix 2

Hecla Adjusted EBITDA Reconciliation

Reconciliation of Adjusted EBITDA (non-GAAP) to Net Income (GAAP)

	Three Months Ended September 30,	
	2013	**2012**
Net Income	**$ (8,458)**	$ (885)
Plus: Interest expense, net of amount capitalized	**7,348**	591
Plus/(Less): Income taxes	**(2,542)**	14
Plus: Depreciation, depletion, and amortization	**20,445**	13,243
Plus: Exploration expense	**5,797**	11,722
Plus: Pre-development expense	**3,444**	5,409
Plus: Aurizon acquisition costs	**768**	-
Plus: Aurizon product inventory fair value adjustment	**0**	-
Plus/(Less): Lucky Friday suspension-related costs (income)	**(59)**	6,114
Plus/(Less): Interest and other (income) expense	**829**	(47)
Less: Gains on derivative contracts	**4,564**	9,053
Plus/(Less): Provisional price (gains)/losses	**(1,740)**	(5,861)
Adjusted EBITDA	**$ 30,396**	$ 39,353

This presentation refers to a non-GAAP measure of Adjusted earnings before interest, taxes, depreciation and amortization ("Adjusted EBITDA"), which is a measure of our operating performance. Adjusted EBITDA is calculated as net income before the following items: interest expense, income tax provision, depreciation, depletion, and amortization expense, exploration expense, predevelopment expense, Aurizon acquisition costs, Lucky Friday suspension-related costs, interest and other income (expense), gains and losses on derivative contracts, and provisional price gains and losses. Management believes that, when presented in conjunction with comparable GAAP measures, Adjusted EBITDA is useful to investors in evaluating our operating performance. The table above reconciles net income to Adjusted EBITDA.

Note: All monetary amounts presented in thousands of dollars.

Appendix 2

Cash Margins at Casa Berardi

1. Cash cost per ounce of gold represents a non-U.S. Generally Accepted Accounting Principles (GAAP) measurement. A reconciliation of total cash costs to cost of sales and other direct production costs and depreciation, depletion and amortization (GAAP) can be found in the Appendix.
2. Realized prices are calculated by dividing gross revenues for each metal by the payable quantities of each metal included in the concentrate and doré sold during the period.
3. Q3/2013 was first full quarter under Hecla ownership. Previous results reported by Aurizon Mines Ltd.

Appendix 2

Hecla: Zero Debt Obligations Until 2021

Peer Comparison

Issuer	Date Issued	Coupon		Maturity	Gross Proceeds[1]	Current Rating
Hecla	12-Apr-13	6.875%	Sr. Notes	1-May-21	$500	B2/B
Coeur	24-Jan-13	7.875%	Sr. Notes	1-Feb-21	$300	B3/BB-
Eldorado Gold	10-Dec-12	6.125%	Sr. Notes	20-Dec-20	$600	Ba3/BB
IAMGOLD Corp.	14-Sep-12	6.750%	Sr. Notes	1-Oct-20	$650	B1/BB-

Appendix 2

Clearing the Path Forward

Settled Legacy Liabilities

- ✓ Settled environmental liability in the Coeur d'Alene River Basin from mining practices ending over 50 years ago
- ✓ $125 million payments made to date (net of tax benefit)
- ✓ Payment remaining of $34 million (net of tax benefit) in 2014 (expected to be covered by warrants)
- ✓ Removes unquantifiable liability making acquisitions possible (Aurizon)

Rehabilitated Lucky Friday

- ✓ Mine has operated for over 70 years in the Silver Valley, Idaho
- ✓ Mine was shut down and fully rehabilitated during 2012
- ✓ Re-opened in Q1/13, all stopes back in operation
- ✓ Expected to ramp up to approximately 5 million ounces in 2017
- ✓ Current mine life in excess of 25 years, excellent opportunity to expand resource

Monte Cristo (14)(a)	United States	100.0%	913	0.3	0.14	--	--	271	131	--	--
Total			40,528					172,270	1,959	718,010	625,850

Note: All estimates are in-situ, Resources are Exclusive of Reserves

* Totals may not represent the sum of parts due to rounding

(a) Underground Mineral Reserves and Mineral Resources are based on $1400 gold, $26.50 silver, $0.85 lead, $0.85 zinc and $3.40 copper

(1) Underground Mineral Reserves and Resources are based on $1,350 gold and a US$/CAN$ exchange rate of 1:1. Reserve diluted to an average of 23.7% to minimum width of 3 meters
Open pit Mineral Reserves of the East Mine were estimated in February 2009 based on $700 gold and a US$/CAN$ exchange rate of 0.85:1. Reserve diluted to 20%
Open pit Mineral Reserves of the Principal Mine were estimated in February 2011 based on $950 gold and a US$/CAN$ exchange rate of 1:1. Reserve diluted to 10%

(2) Indicated Resources only in Gallagher orebody, factored for dilution and mining recovery.

(3) Measured and Indicated resources from Gold Hunter and Lucky Friday vein systems diluted and factored for expected mining recovery.

(4) Measured, Indicated and inferred resources are based on $1,350 gold and a US$/CAN$ exchange rate of 1:1. Underground resources are diluted to 20% to minimum mining width of 2 to 3 meters
Open pit Mineral Resources of the Principal Mine were estimated based on $950 gold and a US$/CAN$ exchange rate of 1:1
Open pit Mineral Resources of the 160 Zone were based on $1,250 gold and a US$/CAN$ exchange rate of 1:1, Resources diluted to 12%

(5) The Heva and Hosco optimised shells were done using a gold price of US$1,300 per oz Au with respectively a mining dilution of 10% and 6.5% (at 0 oz/st Au) and an ore loss of 5% and 4%. Resource completed in July 2013.

(6) Indicated resources diluted to minimum mining width of 2.0 meters for Hugh Zone, 1.5 meters for Andrea Vein.

(7) Indicated resources diluted to minimum mining width of 6.0 feet for Bulldog.

(8) Indicated resources, diluted to minimum mining width of 4.3 feet.

(9) Inferred Resources in East Ore, Gallagher, NWW, 200S orebodies, factored for dilution and mining recovery.

(10) Inferred Resources from Gold Hunter and Lucky Friday vein systems diluted and factored for expected mining recovery.

(11) Inferred Resources diluted to minimum mining width of 2.0 meters for Hugh Zone, 1.5 meters for Andrea & Middle veins.
San Sebastian Hugh Zone also contains 29,720 tons of Cu at 1.46% Cu within 1,949,800 tons of ore.

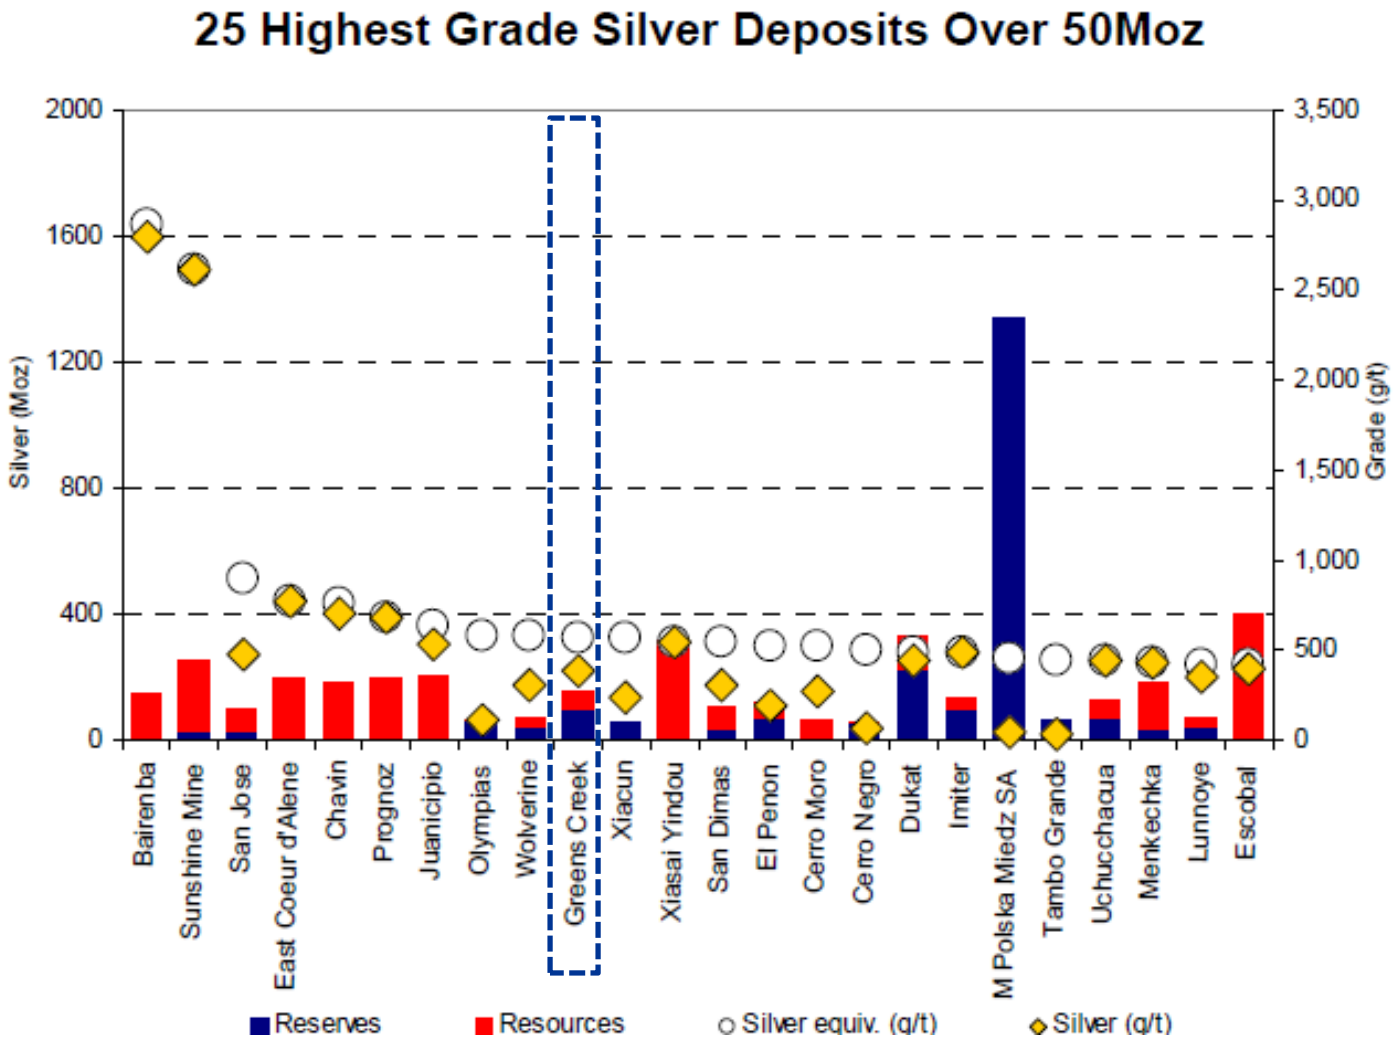

(12) Inferred Resources diluted to minimum mining width of 6.0 feet for Bulldog, 5.0 feet for Equity & North Amethyst veins.

(13) Inferred Resources diluted to minimum mining width of 4.3 feet.

(14) Inferred Resource diluted to minimum mining width of 5.0 feet.

Appendix 5

Lucky Friday - #4 Shaft

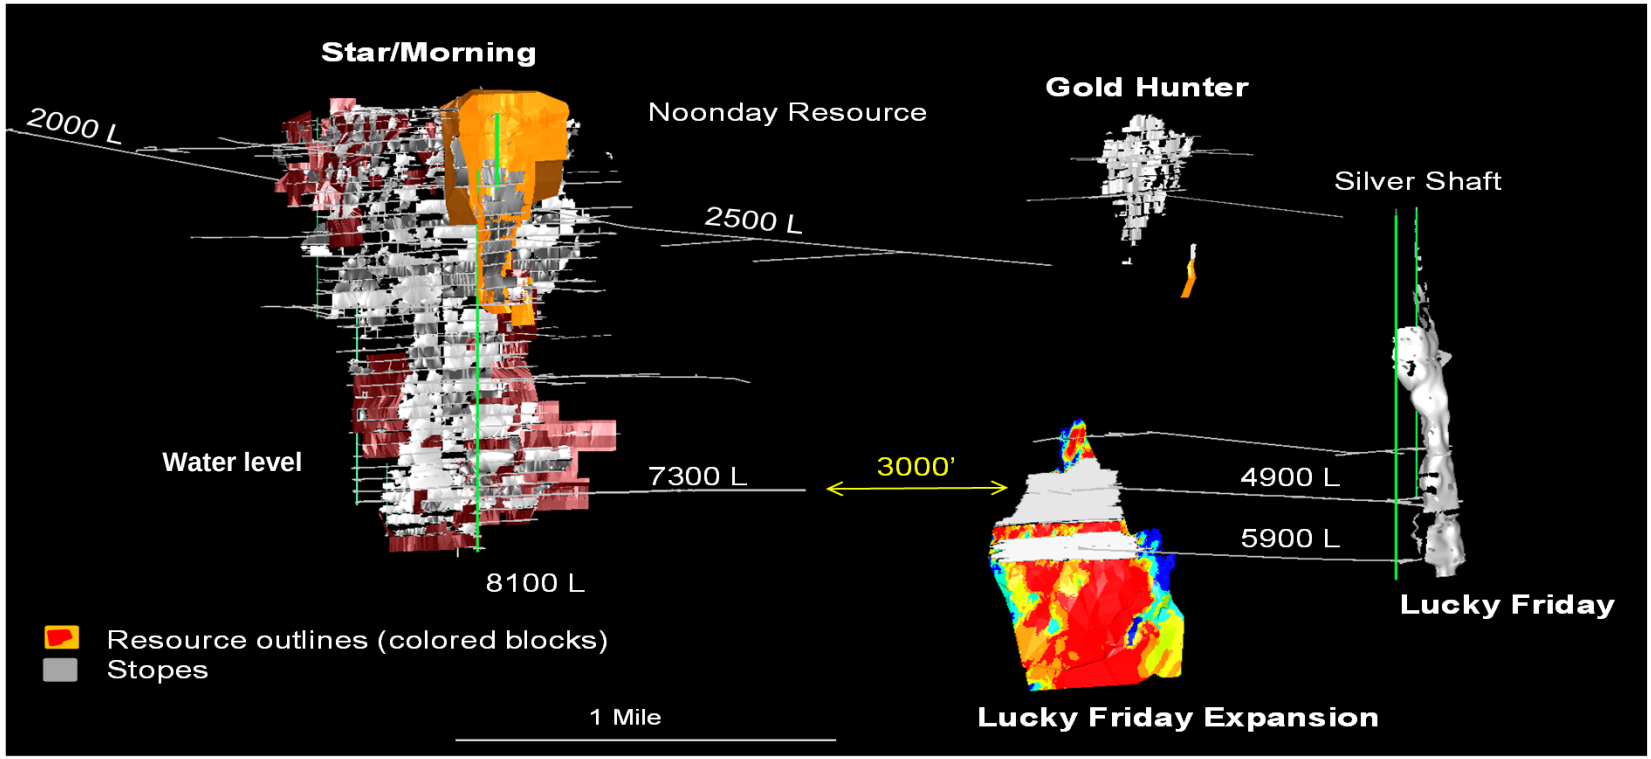

- #4 Shaft project is engineered to access higher grade ore zones and to take Lucky Friday silver production to 5 million ounces per year in 2017
- #4 Shaft construction resumed in Q1/13
- Currently at the 5900 level, work on the first of three shaft stations underway
- Total project is more than 50% complete
- Total project capital is expected to be approximately $200 million

Appendix 5

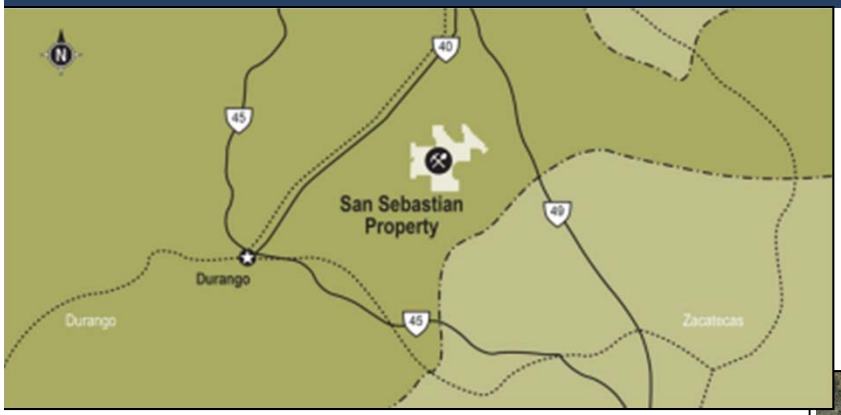

Organic Growth - Star Pre-Development (Idaho)

Longitudinal Section Looking North

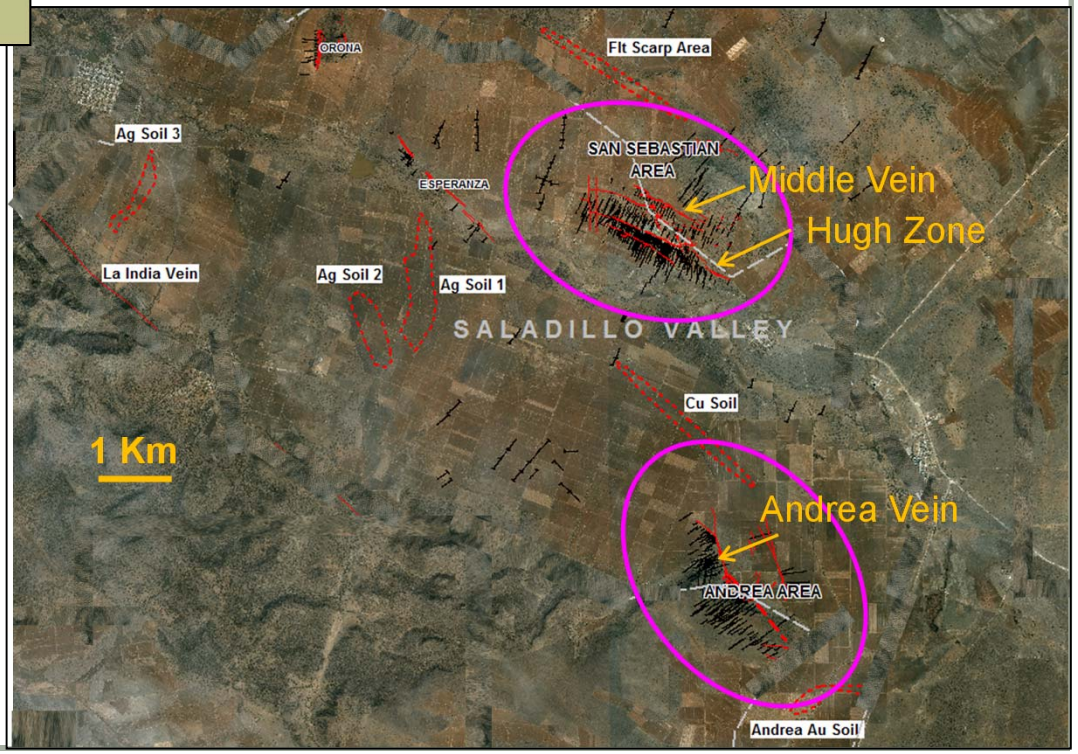

Appendix 5

Organic Growth - San Sebastian (Mexico)

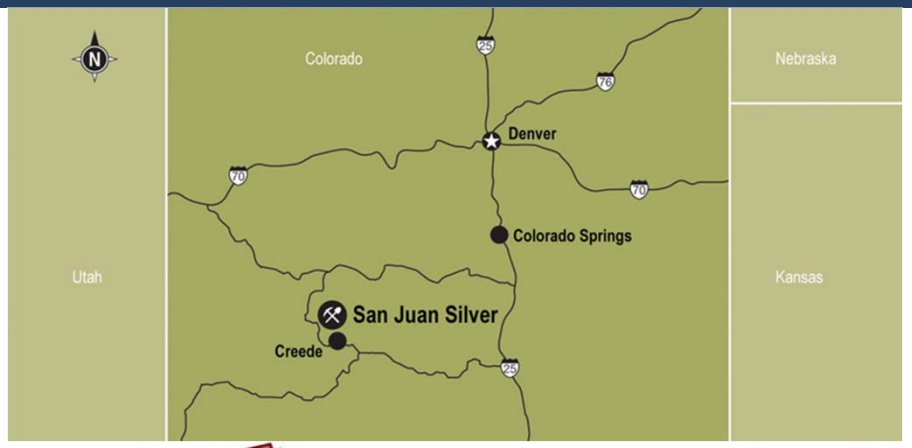

- 185-square-mile land package
- Potential extensions to both Middle Vein and Hugh Zone structures
- Andrea Vein remains open along strike and at depth

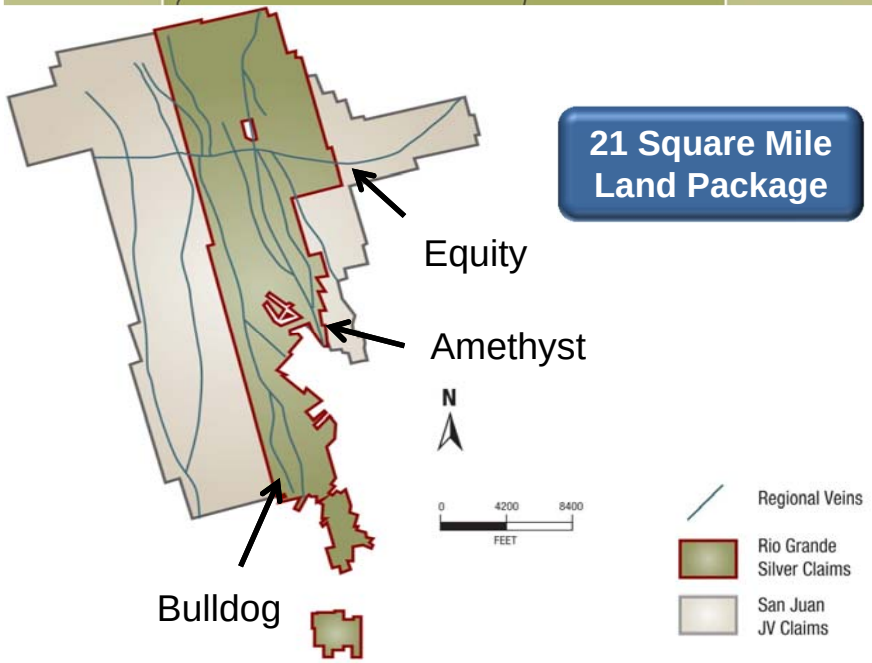

Appendix 5

Organic Growth - San Juan Silver (Colorado)

- Includes historic Bulldog mine: produced 25 million ounces of silver before closing in 1985
- 7.6 million ounces of silver Indicated Resources
- 33.1 million ounces of silver Inferred Resources
- Bulldog decline has broken through to previous underground workings
- Rehabilitation of old workings dependent on permits, available cash flow and priority of other opportunities

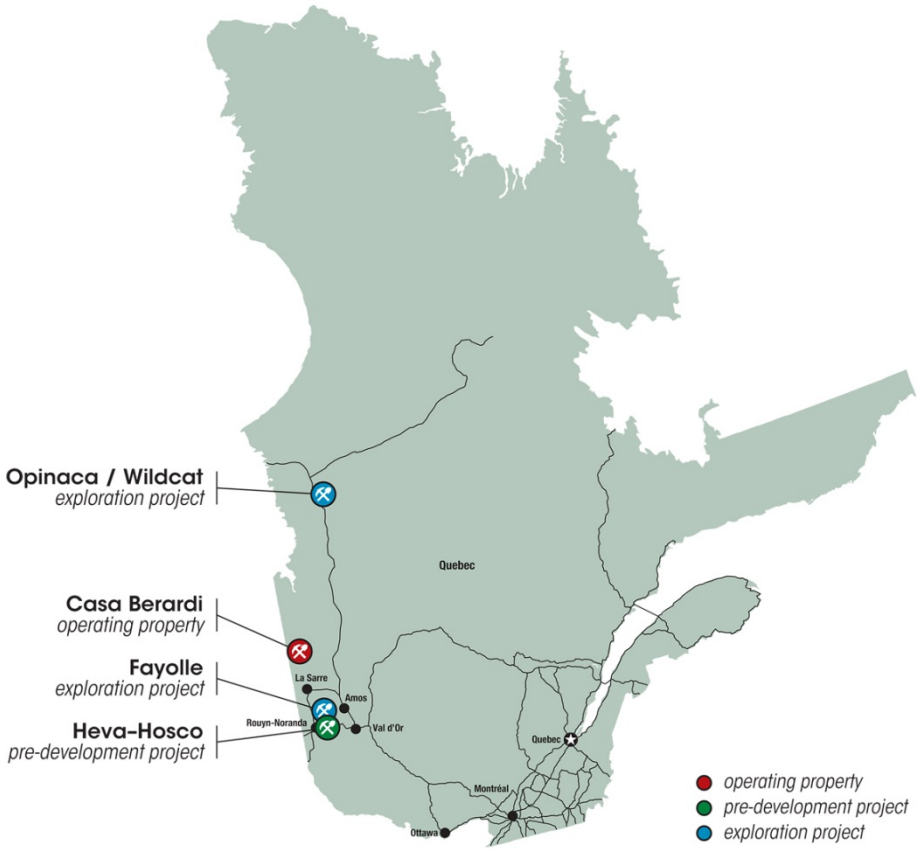

Appendix 5

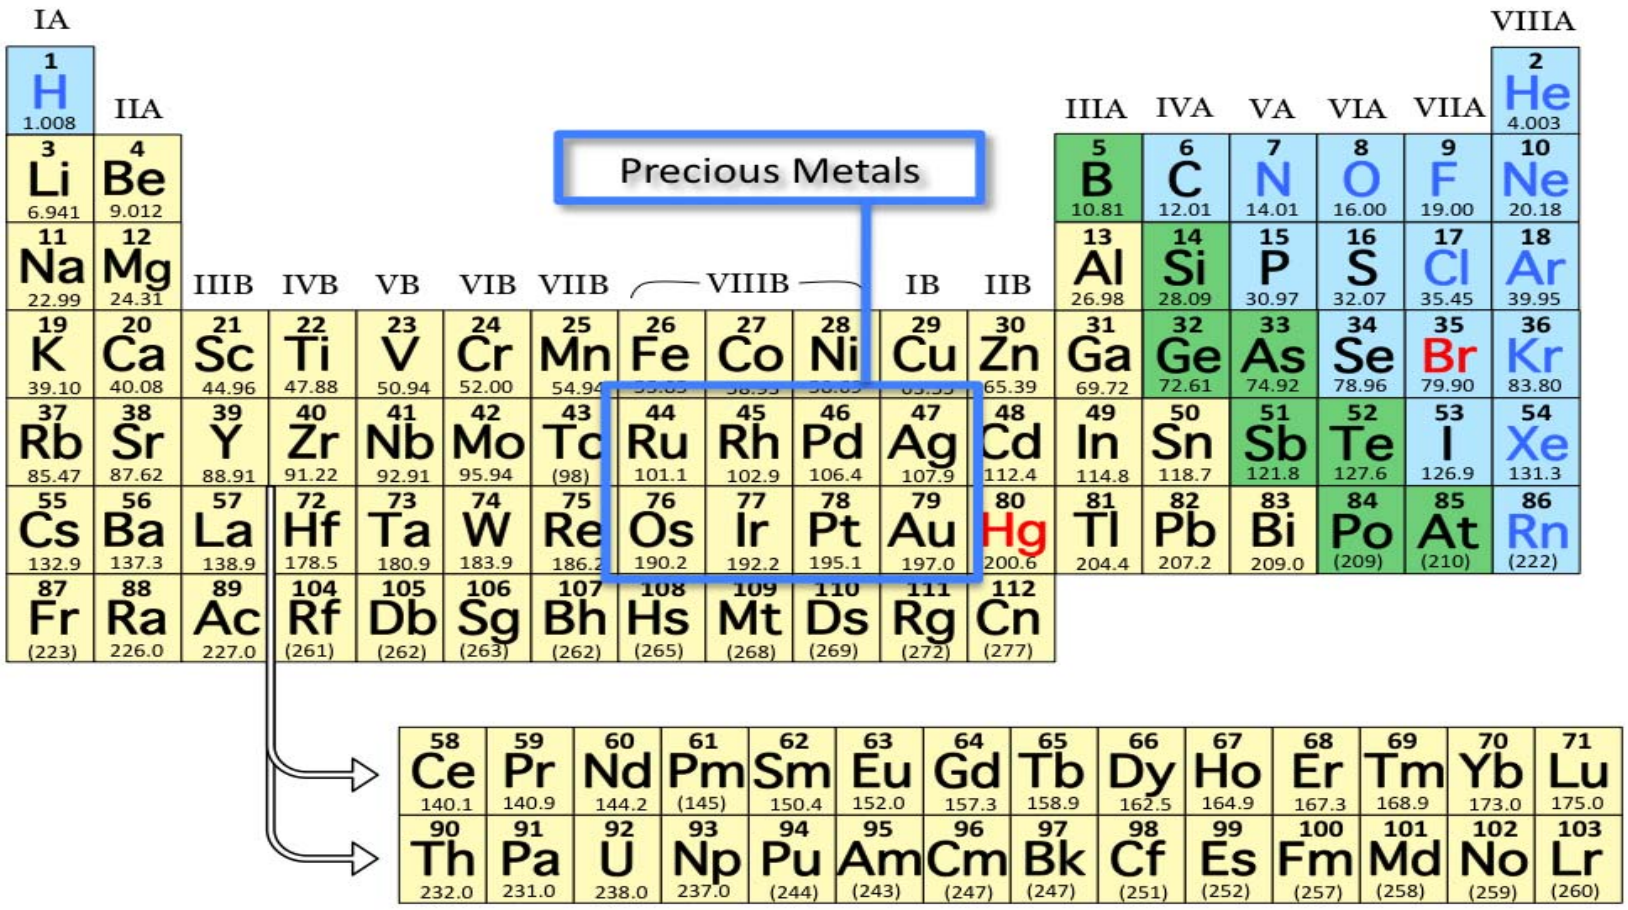

New Quebec Gold Assets

- Gold producer and exploration portfolio in western Quebec
- Heva and Hosco West extension
- Large in-pit gold resource at Hosco
  - Additional gold resources at Heva and Hosco West Extension
  - Attractive exploration potential
- Growth potential with future open pit development and shaft deepening at Casa Berardi
- Significant exploration portfolio
- Portfolio of other earlier stage projects and investments

Appendix 6

Gold Fundamentals

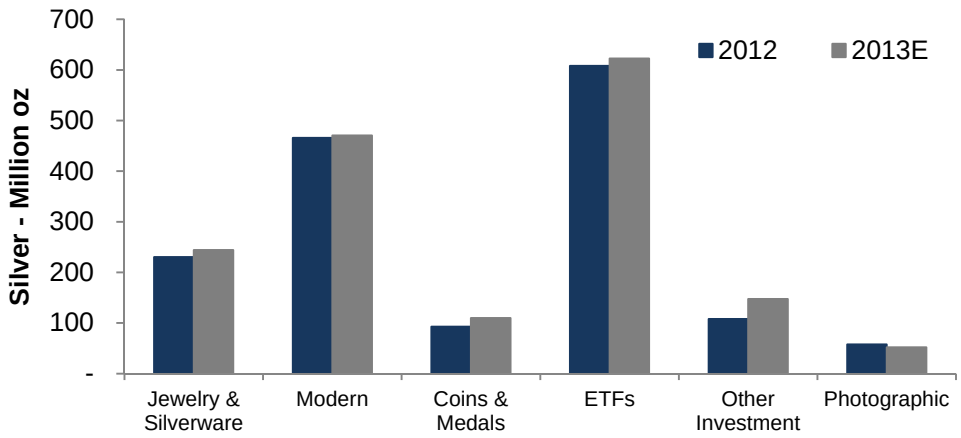

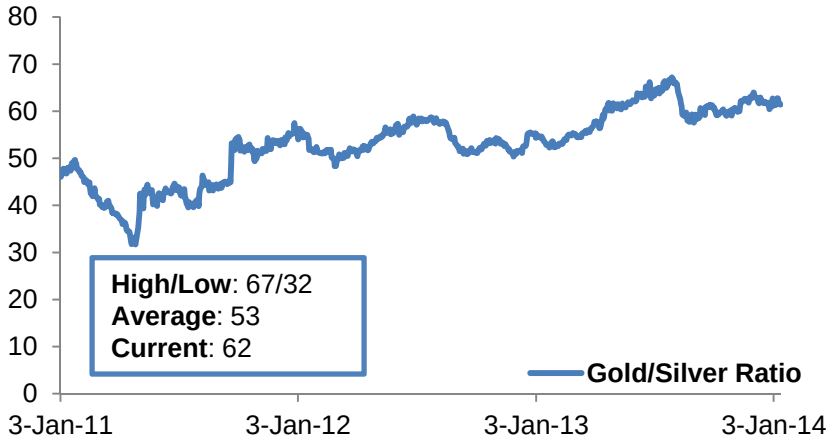

- **Jewelry consumption:** Up 20% in the first nine months of 2013 versus 2012
  - Driven by high demand in South East Asia, China and India
- **Chinese consumer demand:** Up 37% in the first nine months of 2013 versus 2012
- **Indian consumer demand:** Up 12% in the first nine months of 2013 versus 2012 - has been dampened by government regulations
- **Central banks:** Net buyers (slower rate than 2012)
- **Overall demand:** Down 12%, mainly due to the large outflow from ETF's (outflow of 697 tonnes as of September 30, 2013 versus in flow of 191 tonnes in 2012)

Source: World Gold Council
Total demand for Q1-Q3 2013 = 2,805 tonnes

Appendix 6

Silver Fundamentals - 2013E vs. 2012

- **Coinage demand:** Up 19% over 2012; the USA, China, and Canada saw the largest increases
- **Jewelry & silverware demand:** Up 6% over 2013 - driven by China, India and the USA
- **Indian demand:** Physical silver increased significantly due to strict gold import restrictions
- **ETFs net inflow:** 15 Moz in 2013**,** lower than 2012
- **Overall investment demand** (inclusive of ETF additions): Higher in 2013 vs. 2012
- **Fabrication demand** (excluding coins): Declined 1% - increases in jewelry, silverware and modern demand offset by falling photographic demand

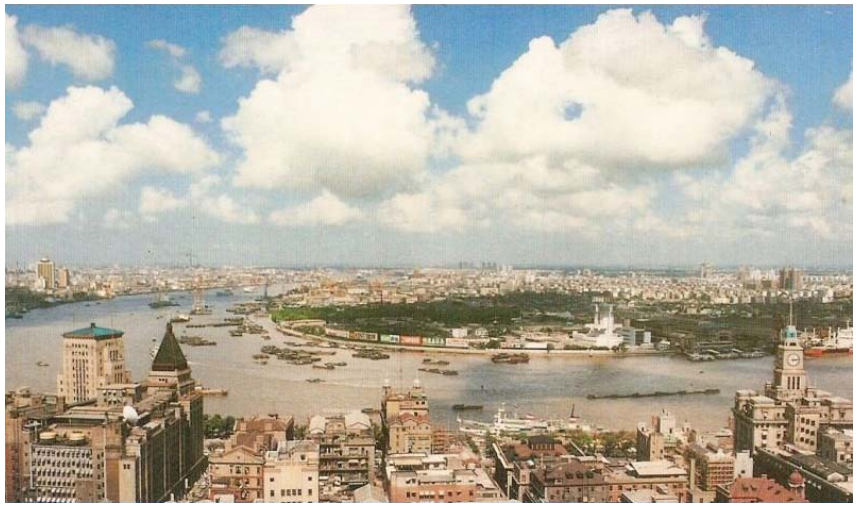

Source: GFMS Silver Survey, Bloomberg
Total demand for 2013E = 1,039 Million oz of silver

Appendix 6

Silver is a Lifestyle Metal

Shanghai, China

1990

2010

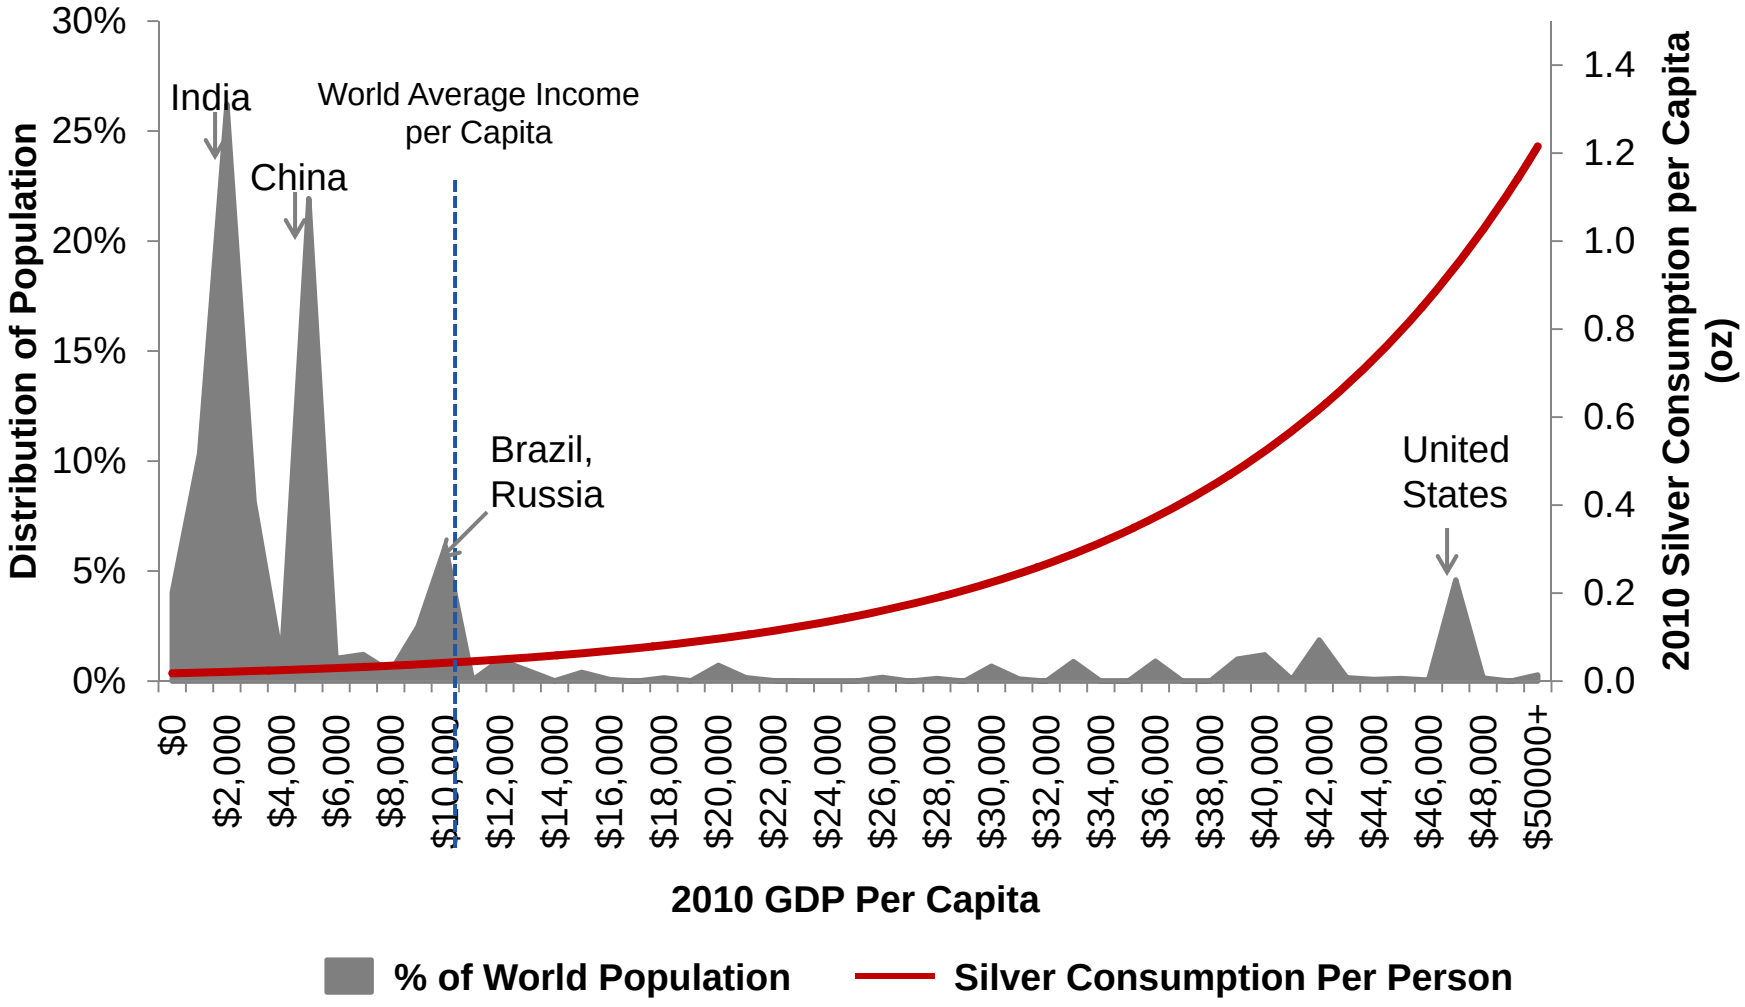

- Silver is not an infrastructure material such as cement, steel, copper; its use is further downstream and is partly tied to discretionary spending
- We expect Chinese modern demand to increase to approximately 120 mm oz by 2015, assuming an annual growth of 9.8% (based on historical 20-year annualized growth rate)
