Hecla MINING COMPANY

Bank of America Merrill Lynch Annual Canada Mining Conference

Toronto

September 10, 2015

Cautionary Statements

Cautionary Statement Regarding Forward Looking Statements,

This presentation contains "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, which are intended to be covered by the safe harbor created by such sections and other applicable laws, including Canadian Securities laws. Such forward-looking statements may include, without limitation: (i) estimates of future production and sales, including as a result of the #4 Shaft Project; (ii) estimates of future costs and cash cost, after by-product credits per ounce of silver/gold, including the expected cost of the #4 Shaft project; (iii) guidance for 2015 for silver and gold production, silver equivalent production, cash cost, after by-product credits, capital expenditures and pre-development and exploration expenditures (which assumes metal prices of gold at $1,225/oz., silver at $17.25/oz., zinc at $0.90/lb. and lead at $0.95/lb. and US dollar/Canadian dollar at $0.91); (iv) expectations regarding the development, growth and exploration potential of the Company's projects; (v) expectations of growth; (vi) expected level of hydroelectric usage at Greens Creek; (vii) the possibility of improving recoveries at Casa Berardi as a result of changes made to the plant; (viii)possible strike extensions of veins at San Sebastian, the ability to secure third party mill and the ability of the project to generate free cash flow in the next year or two; expectations for completion of the PEA; (ix) estimates or expectations of future events or results are based upon certain assumptions, which may prove to be incorrect; (x) expectations for 2015 capital and exploration expenses to be fully funded by adjusted EBITDA;(xi) completion of the acquisition of Revett and the ability to Permit and bring Rock Creek into production in 10-15 years; and (xii) expectations of grade increases at depth at Lucky Friday. Such assumptions, include, but are not limited to: (i) there being no significant change to current geotechnical, metallurgical, hydrological and other physical conditions; (ii) permitting, development, operations and expansion of the Company's projects being consistent with current expectations and mine plans; (iii) political/regulatory developments in any jurisdiction in which the Company operates being consistent with its current expectations; (iv) the exchange rate for the Canadian dollar to the U.S. dollar, being approximately consistent with current levels; (v) certain price assumptions for gold, silver, lead and zinc; (vi) prices for key supplies being approximately consistent with current levels; (vii) the accuracy of our current mineral reserve and mineral resource estimates; and (viii) the Company's plans for development and production will proceed as expected and will not require revision as a result of risks or uncertainties, whether known, unknown or unanticipated. Where the Company expresses or implies an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, such statements are subject to risks, uncertainties and other factors, which could cause actual results to differ materially from future results expressed, projected or implied by the "forward-looking statements." Such risks include, but are not limited to gold, silver and other metals price volatility, operating risks, currency fluctuations, increased production costs and variances in ore grade or recovery rates from those assumed in mining plans, community relations, conflict resolution and outcome of projects or oppositions, litigation, political, regulatory, labor and environmental risks, and exploration risks and results, including that mineral resources are not mineral reserves, they do not have demonstrated economic viability and there is no certainty that they can be upgraded to mineral reserves through continued exploration. For a more detailed discussion of such risks and other factors, see the Company's first quarter 2015 Form 10-Q and 2014 Form 10-K, filed on May 7, 2015 and February 18, 2015, respectively, with the Securities and Exchange Commission (SEC), as well as the Company's other SEC filings. The Company does not undertake any obligation to release publicly revisions to any "forward-looking statement," including, without limitation, outlook, to reflect events or circumstances after the date of this presentation, or to reflect the occurrence of unanticipated events, except as may be required under applicable securities laws. Investors should not assume that any lack of update to a previously issued "forward-looking statement" constitutes a reaffirmation of that statement. Continued reliance on "forward-loo king statements" is at investors' own risk.

Cautionary Note Regarding Estimates of Measured, Indicated and Inferred Resources

The United States Securities and Exchange Commission (SEC) permits mining companies, in their filings with the SEC, to disclose only those mineral deposits that a company can economically and legally extract or produce. We use certain terms in this presentation, such as "resource," "measured resources," "indicated resources," and "inferred resources" that are recognized by Canadian regulations, but that SEC guidelines generally prohibit U.S. registered companies from including in their filings with the SEC, except in certain circumstances. U.S. investors are urged to consider closely the disclosure in our most recent Form 10-K and Form 10-Q. You can review and obtain copies of these filings from the SEC's website at www.sec.gov.

Qualified Person (QP) Pursuant to Canadian National Instrument 43-101

Dean McDonald, PhD. P.Geo., Senior Vice President - Exploration of Hecla Mining Company, who serves as a Qualified Person under National Instrument 43-101("NI 43-101"), supervised the preparation of the scientific and technical information concerning Hecla's mineral projects in this presentation. Information regarding data verification, surveys and investigations, quality assurance program and quality control measures and a summary of analytical or testing procedures for the Greens Creek Mine are contained in a technical report titled "Technical Report for the Greens Creek Mine" effective date March 28, 2013, and for the Lucky Friday Mine are contained in a technical report titled "Technical Report for the Lucky Friday Mine Shoshone County, Idaho, USA" effective date April 2, 2014, and for Casa Berardi are contained in a technical report titled "Technical Report on the mineral resource and mineral reserve estimate for Casa Berardi Mine, Northwestern Quebec, Canada" effective date March 31, 2014 (the "Casa Berardi Technical Report"). Also included in these three technical reports is a description of the key assumptions, parameters and methods used to estimate mineral reserves and resources and a general discussion of the extent to which the estimates may be affected by any known environmental, permitting, legal, title, taxation, socio-political, marketing or other relevant factors. Copies of these technical reports are available under Hecla's and Aurizon's profiles on SEDAR at www.sedar.com. The Casa Berardi Technical Report was reviewed by Dr. McDonald on behalf of Hecla. To the best of Hecla's knowledge, information and belief, there is no new material scientific or technical information that would make the disclosure of the mineral resources and mineral reserves for Casa Berardi in this document inaccurate or misleading.

Cautionary Note Regarding Non-GAAP measures

Cash cost per ounce of silver and gold, net of by-product credits and adjusted EBITDA represent non-U.S. Generally Accepted Accounting Principles (GAAP) measurement. A reconciliation of each of these non-GAAP measures to GAAP measures can be found in the Appendix.

A Leading Silver, Gold, Base Metals Producer

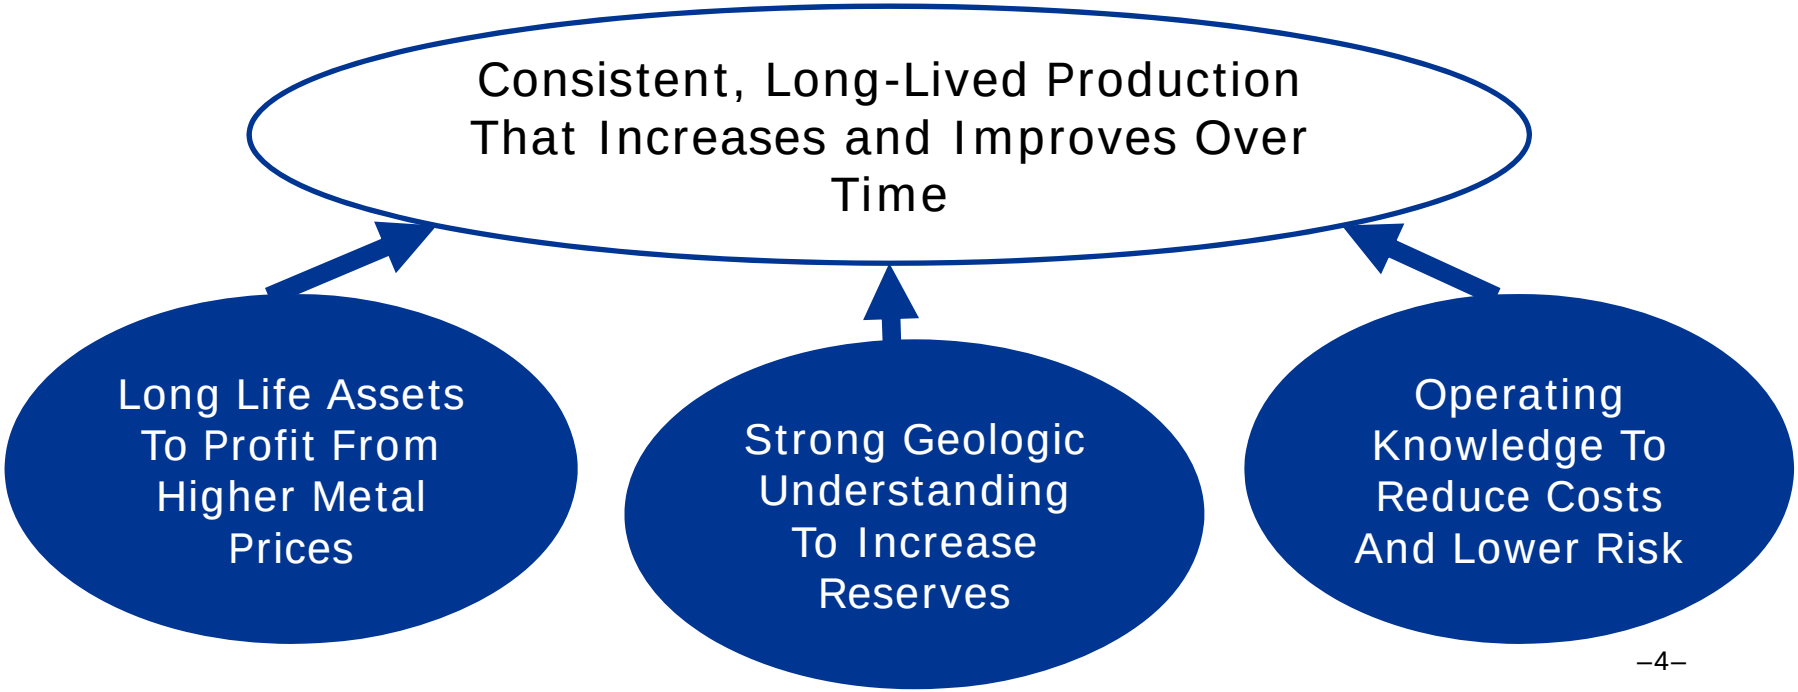

Quality mining assets	➢ Three producing mines in North America ➢ Strong margins in both silver and gold ➢ Diversified, long-life revenue streams
Generates cash flow	➢ $56.7M free cash flow[1] from mines in past 4 quarters after invested $116M in capital
Solid growth profile	➢ Reserve growth, production growth
Strong financial position	➢ Strong liquidity and capital structure
Operating experience	➢ Track record of mining excellence

1. Free cash flow is a non-GAAP measure calculated as cash flows from operations less capital expenditures. See slide 18 for calculation of free cash flows from our operating mines.

Our Mission

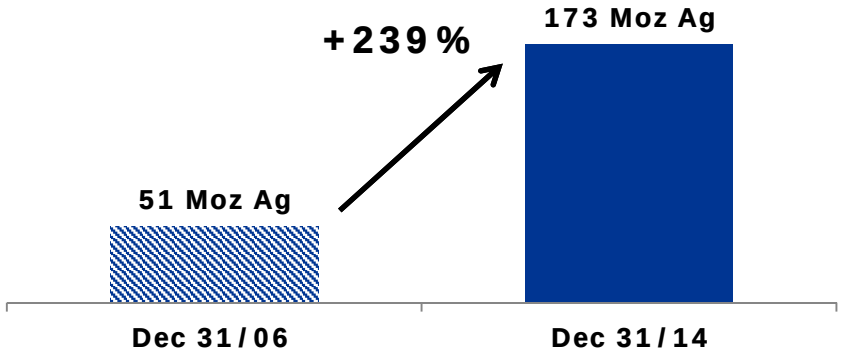

To Create long-term value for shareholders from mining silver, gold and associated base metals

Our Strategy

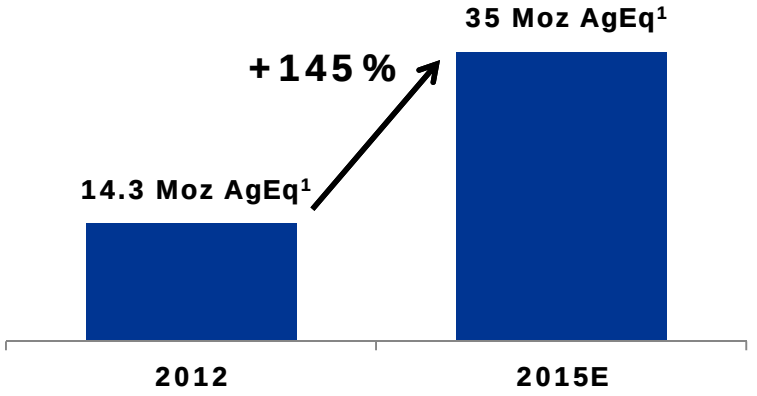

The Strategy Has Worked

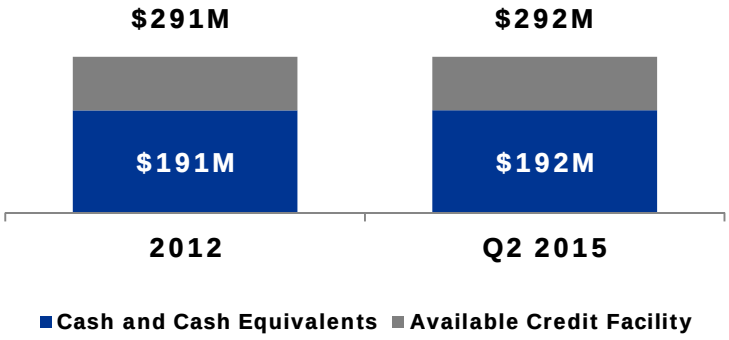

Record (P+P) Silver Reserves for Past 9 Yrs

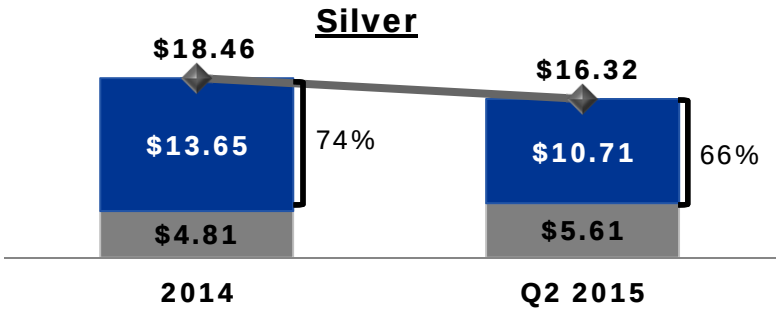

Strong Production Growth

Consistently Strong Liquidity

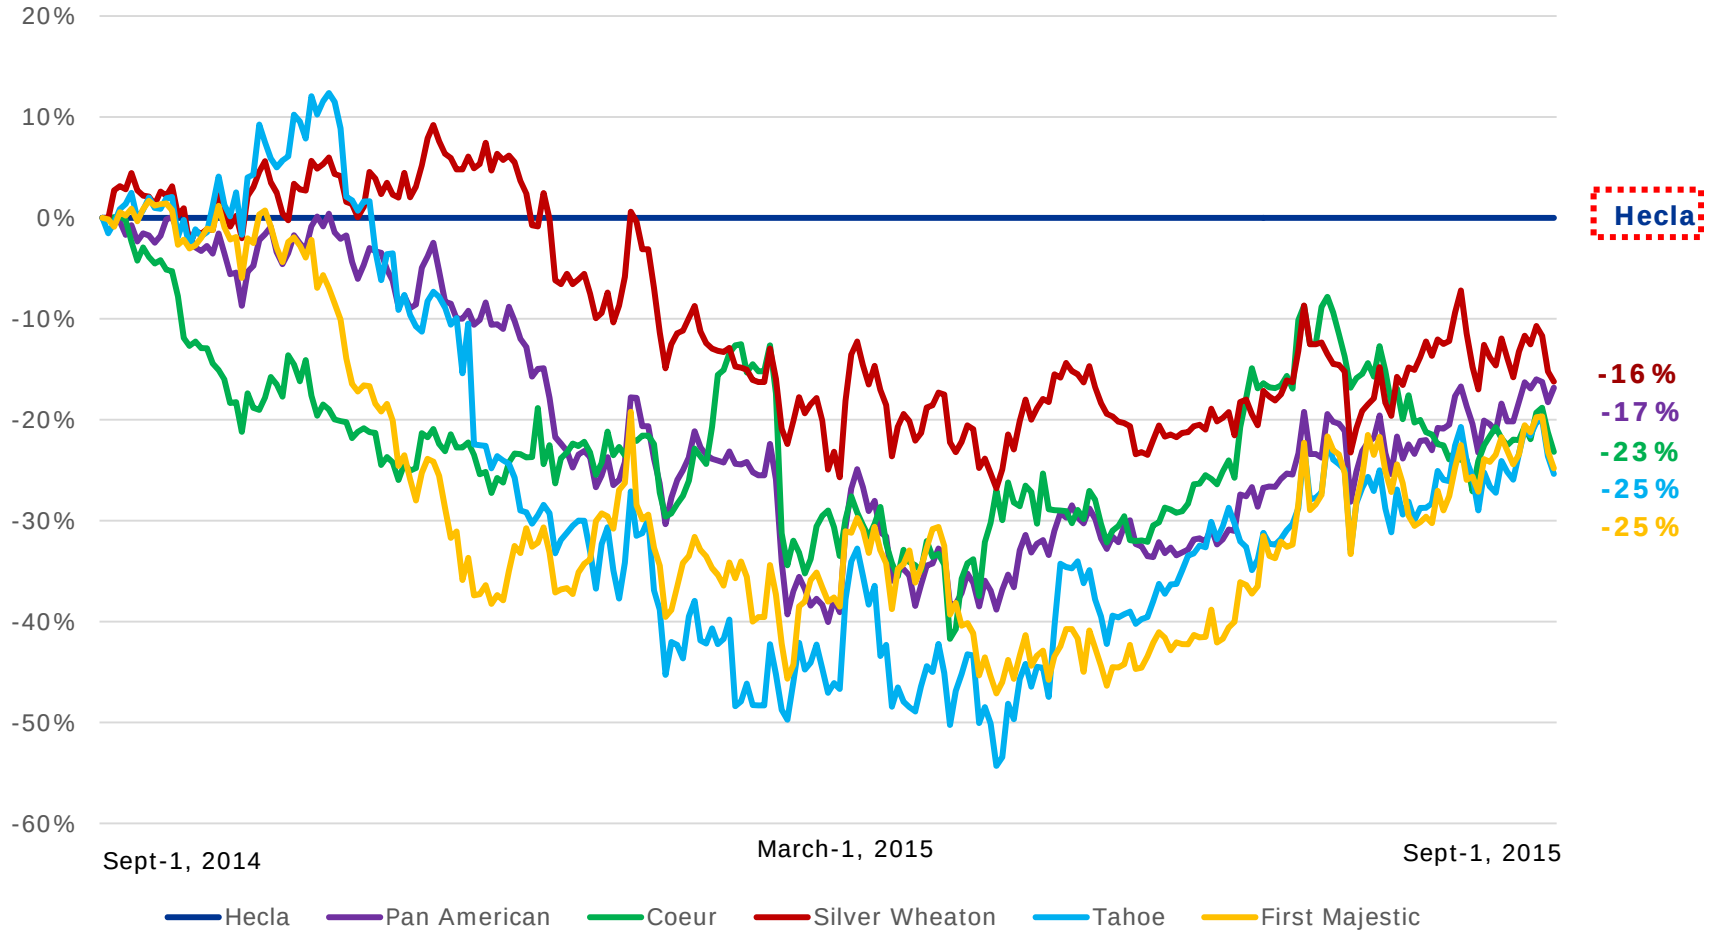

Healthy Margins

1. 2012 silver equivalent calculations based on: $31.15/oz silver, $1,669/oz for gold, $0.94/lb for lead, and $0.88/lb for zinc. 2015 silver equivalent calculations based on: $17.25/oz silver, $1,225/oz silver, $0.95/lb lead, $0.90/lb zinc, USD/CAD assumed at 0.91.
2. Cash cost, after by-product credits, per silver/gold ounce represents a non-U.S. Generally Accepted Accounting Principles (GAAP) measurement, a reconciliation of which to cost of sales and other direct production costs and depreciation, depletion and amortization, the most comparable GAAP measures, can be found in the Appendix.
3. Realized prices are calculated by dividing gross revenues for each metal by the payable quantities of each metal included in the concentrate and doré sold during the period.

Share Price Outperformance

Relative Price Performance – Normalized to Hecla (52 week)

Source: Bloomberg

Q2 2015 Highlights: Consistent Performance

	Q2 2014	Q2 2015
Silver Production	2.5Moz	2.5Moz
Gold Production	43.6Koz	44.7Koz
Revenue	$117.5M	$104.2M
Adjusted EBITDA[1]	$39.8M	$29.5M
Cash cost, after by-product credits, per silver oz[2]	$5.34/oz	$5.61/oz
Cash cost, after by-product credits, per gold oz[2]	$952/oz	$832/oz

1. Adjusted EBITDA is a non-GAAP measurement, a reconciliation of which to net income, the most comparable GAAP measurement can be found in the Appendix.
2. Cash cost, after by-product credits, per gold or silver ounce represents non-GAAP measurements, a reconciliation of which to cost of sales and other direct production costs and depreciation, depletion and amortization, the most comparable GAAP measurements, can be found in the Appendix.

Higher Grade Mines Than Peers

BMO Silver Coverage, Silver Equiv. Reserves vs. Grade

Source: BMO Capital Markets (08/04/2015)

Greens Creek: Consistent Low-Cost Production

	Silver Production		Gold Production		Cash cost, after by-product credits, per Ag oz[1]	
2014, Q2/15 Actual	7.8Moz	1.9Moz	59koz	14koz	$2.89/oz	$3.30/oz
2015E	7.7-8.0 Moz		55koz		$3.75/oz	
2015E Capital	$44M					
2P Reserves	94.0 Moz silver @ 12.2 oz/t Ag					
M+I Resources	9.1 Moz silver @ 11.0 oz/t Ag					

1. Cash cost, after by-product credits, per silver ounce represents a non-U.S. Generally Accepted Accounting Principles (GAAP) measurement, a reconciliation of which to cost of sales and other direct production costs and depreciation, depletion and amortization, the most comparable GAAP measurements, can be found in the Appendix.

Greens Creek: Long-Term Outperformance

Consistently Generates Positive Free Cash Flow

Past 25 Years[1]	
Revenue	$4.4 billion
Net Income	$1.1 billion
Free Cash Flow[2]	**$941 million**

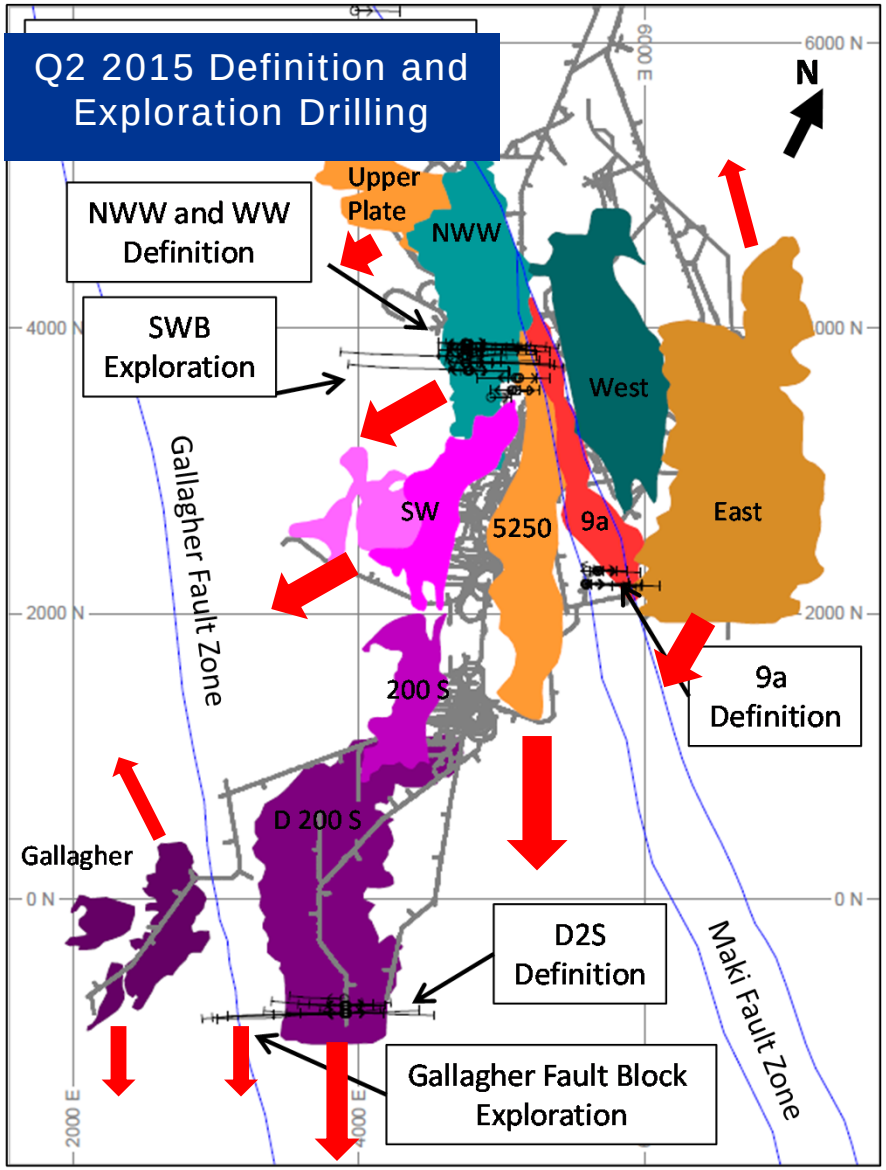

22% Free Cash Flow Conversion

Historical Production Past 25 Years	
Silver Production: 191.4 Moz	Zinc Production: 1.4 M tons
Gold Production: 1.4 Moz	Lead Production: 0.5 M tons

Remaining 2P Reserves of 94.0 Moz silver @ 12.2 oz/t

1. Statistics from 1989 – 2014 on a 100% joint-venture basis (Hecla owned 29.7% until 2008)
2. Free cash flow is a non-GAAP measure calculated as net income from operations less capital expenditures, asset sales proceeds, lease financing, reclamation expenditures and working capital.

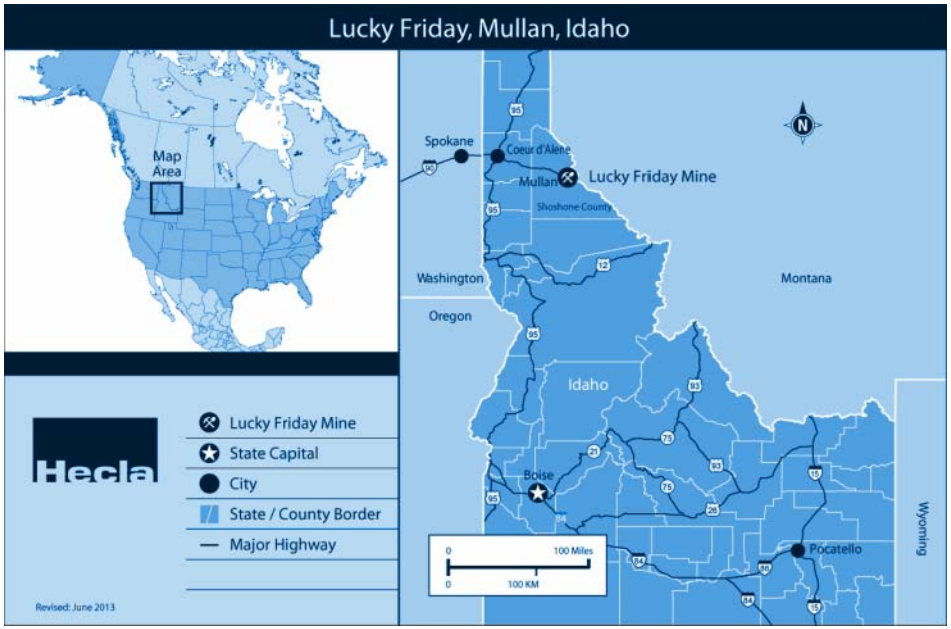

Greens Creek – Expanding Reserves and Resources

Key Exploration Trends

- Southern extensions of 5250, Deep 200 South and Gallagher zones
- Southwest dipping mine contact at 200 South, NWW, SW Bench and Deep SW
- Southeast extension of the East Ore Zone
- Northern extensions to Gallagher and East Ore
- 3 year definition drilling program underway to increase reserves

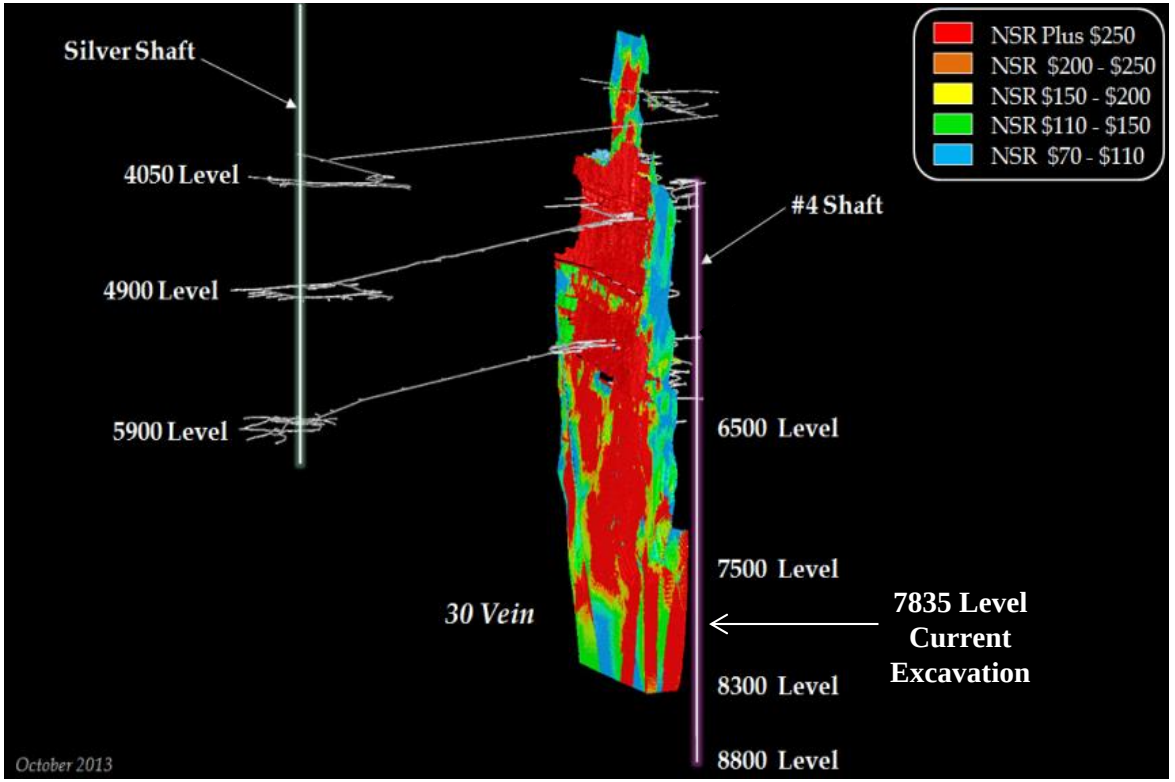

Lucky Friday: Solid Performance

	Silver Production		Cash cost, after by-product credits, per silver oz[1]	
2014, Q2/15 Actual	3.2 Moz	0.61 Moz	$9.44/oz	$12.58/oz
2015E	2.8-3.0 Moz		$10.75/oz	
2015E Capital	$60M			
2P Reserves	78.9 Moz silver @ 13.4 oz/t Ag			
M+I Resources	125.0Moz silver @ 5.7 oz/t Ag			

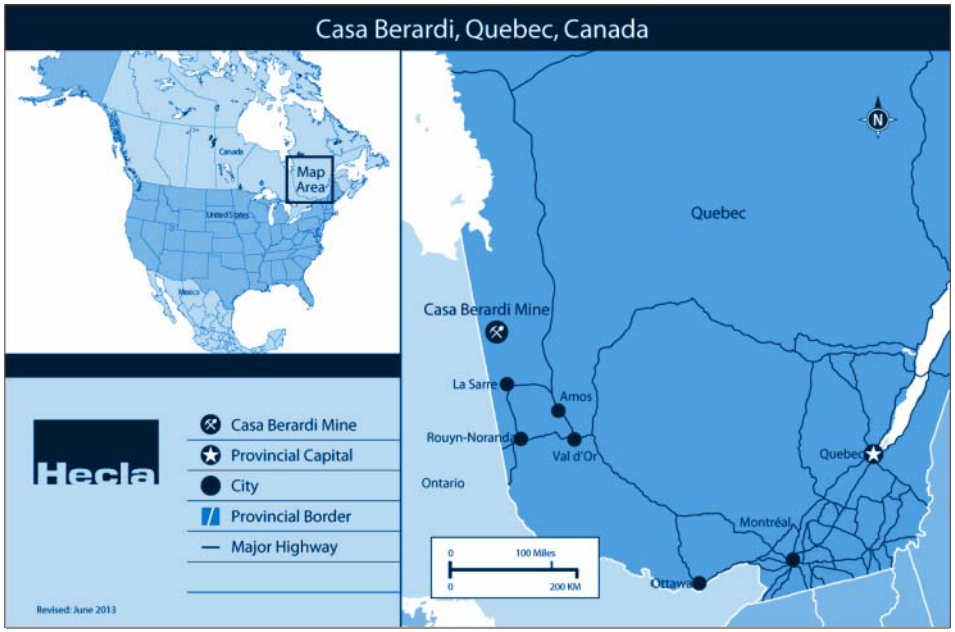

1. Cash cost, after by-product credits, per silver ounce represents a non-U.S. Generally Accepted Accounting Principles (GAAP) measurement, a reconciliation of which to cost of sales and other direct production costs and depreciation, depletion and amortization, the most comparable GAAP measurements, can be found in the Appendix.

Lucky Friday #4 Shaft: Increasing Silver Grade with Depth

- Operational shaft expected in Q4/16 at a total cost of $225 million
- As of Q2/15:
  - 85% completed and $184 million spent
- Production growth expected from higher-grade ore at depth

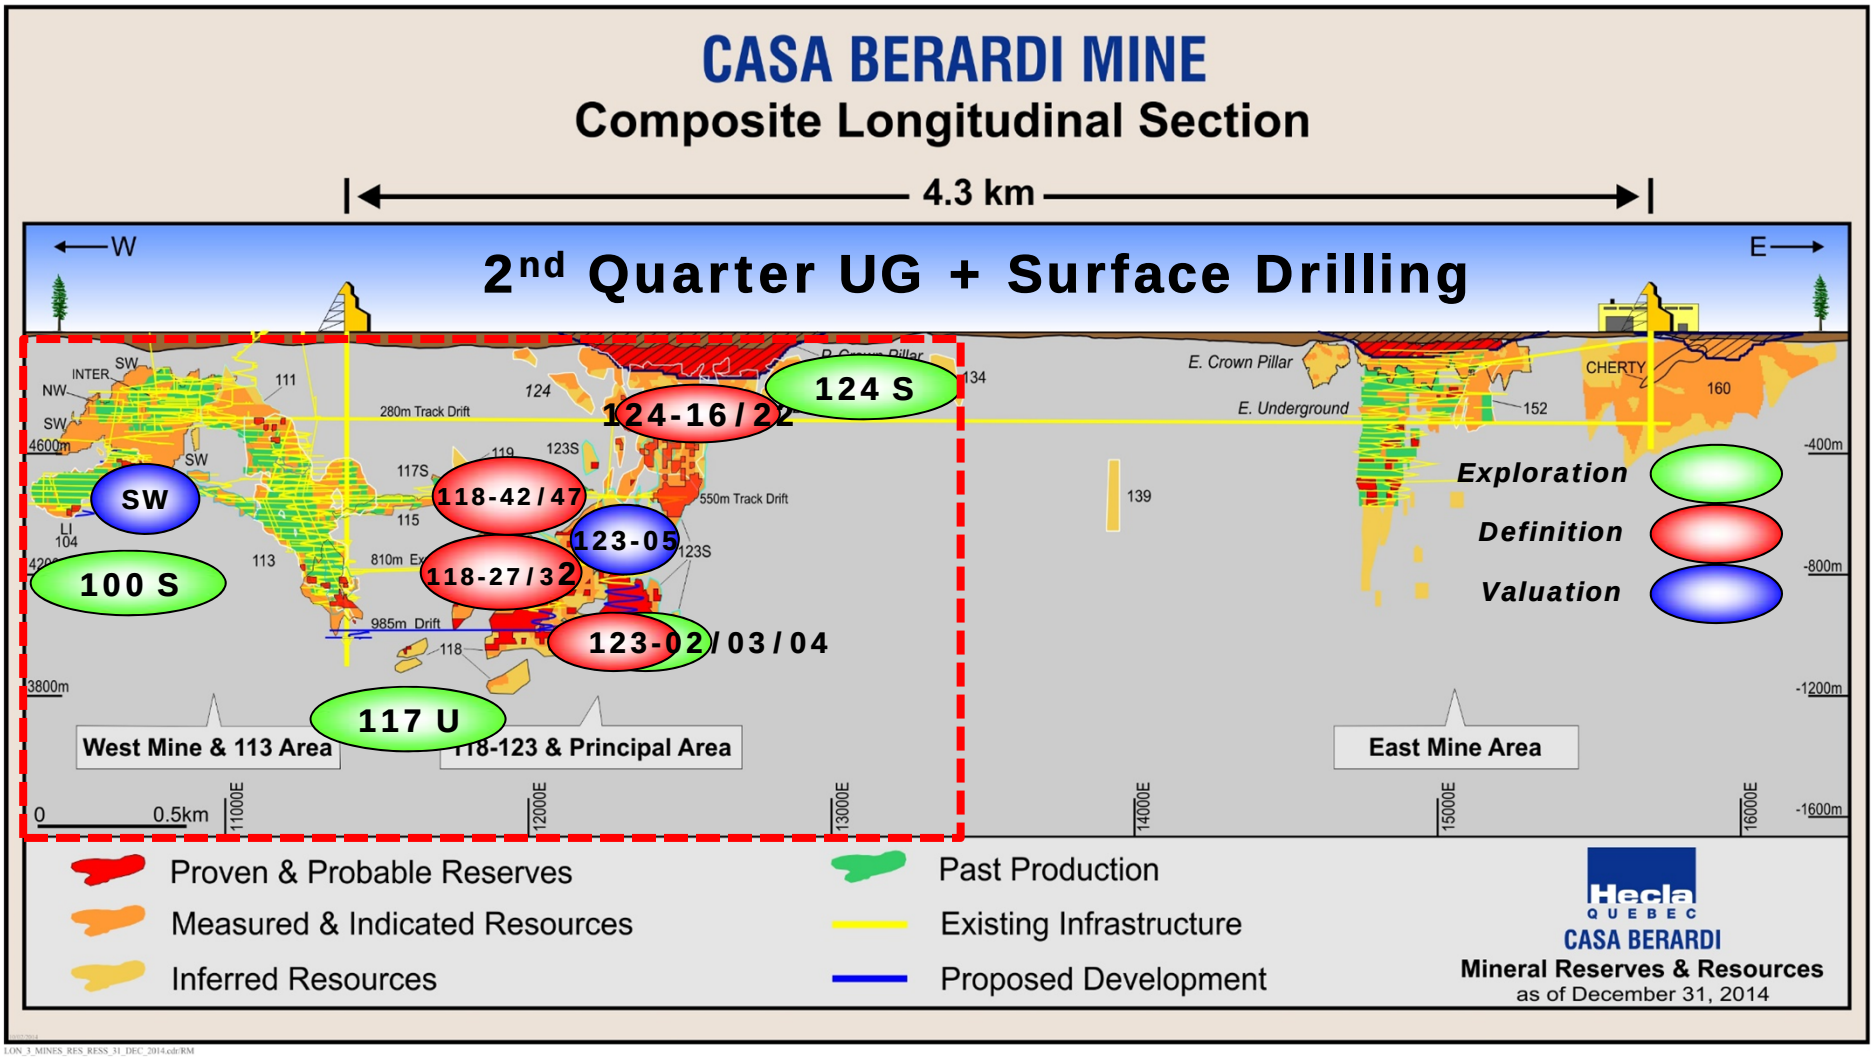

Casa Berardi: Increasing Gold Exposure

	Gold Production		Cash cost, after by-product credits, per gold oz[1]	
2014, Q2/15 Actual	128,244 oz	31koz	$826/oz	$832/oz
2015E	130,000 oz		$825/oz	
2015E Capital	$44M			
2P Reserves	1.3 Moz gold @ 0.14 oz/t gold			
M+I Resources	1.4 Moz gold @ 0.12 oz/t gold			

1. Cash cost, after by-product credits, per gold ounce represents a non-U.S. Generally Accepted Accounting Principles (GAAP) measurement, a reconciliation of which to cost of sales and other direct production costs and depreciation, depletion and amortization, the most comparable GAAP measurements, can be found in the Appendix.

Our Mines Generated $56.7 Million FCF After $116 Million Capital Investment

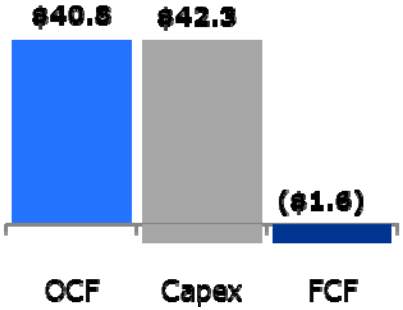

(Rolling 4 quarters)

Greens Creek

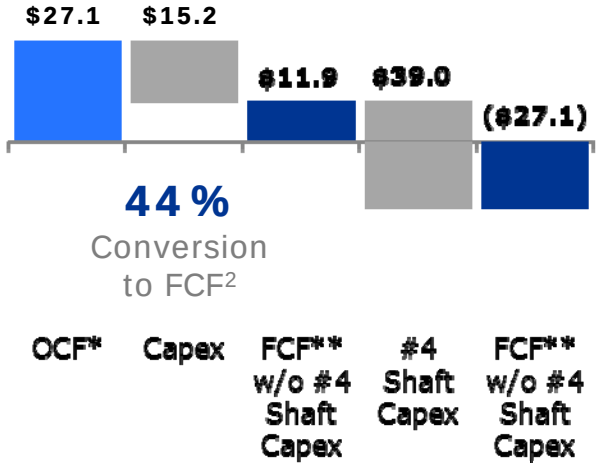

71%
Conversion to FCF[1]

Casa Berardi

-3.9%
Conversion to FCF[1]

Lucky Friday

44%
Conversion to FCF[2]

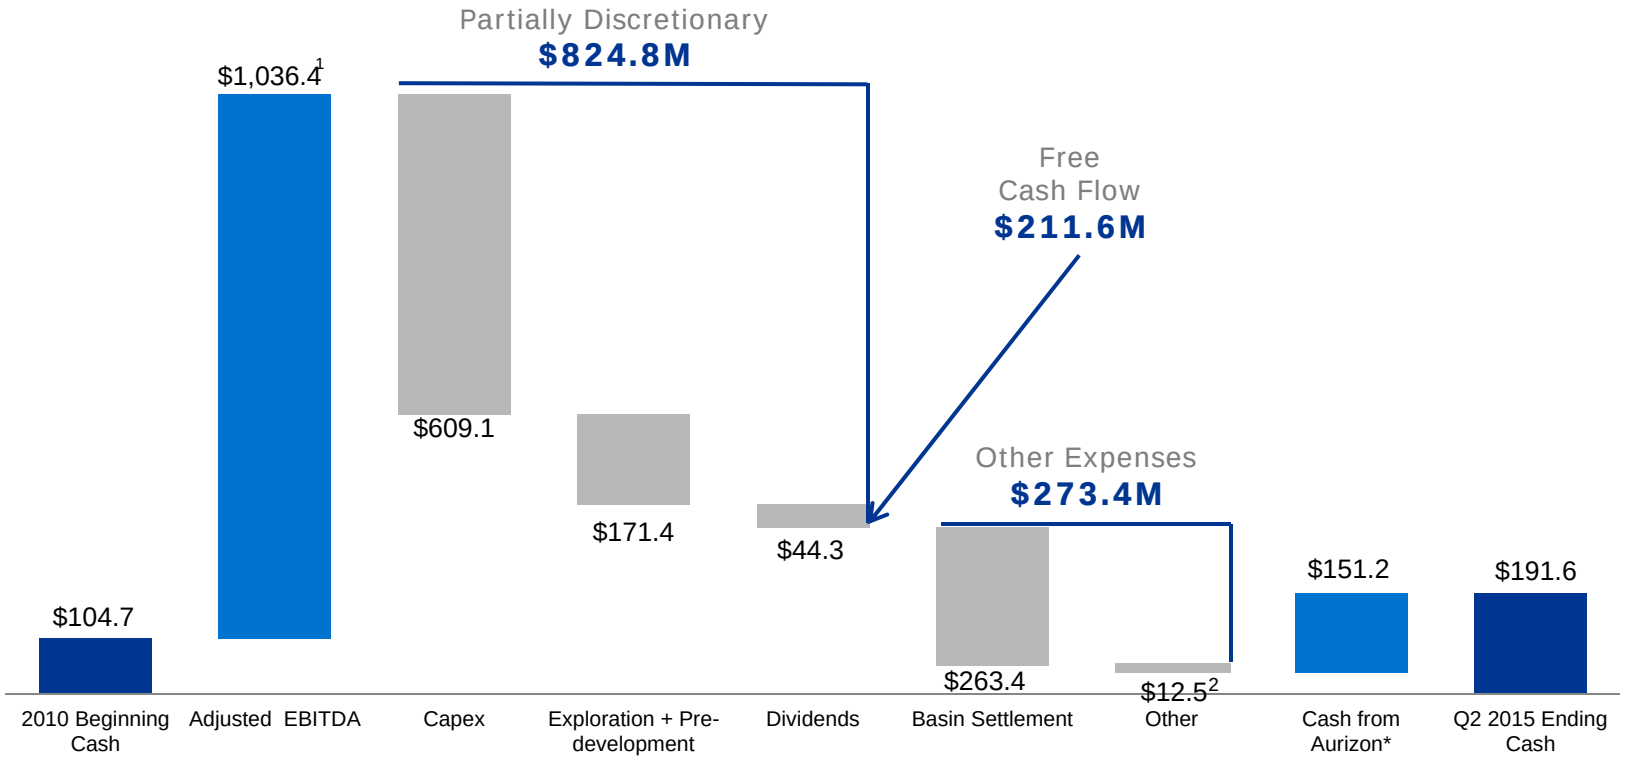

1. Cash flow conversion calculated as FCF from mines/OCF
2. Based on free cash flow w/o #4 Shaft capex

* OCF stands for Operating Cash Flow

** FCF stands for Free Cash Flow

Hecla Is A Strong Cash Flow Generator

Cash Bridge 2010 – Q2 2015 (US$ Millions)

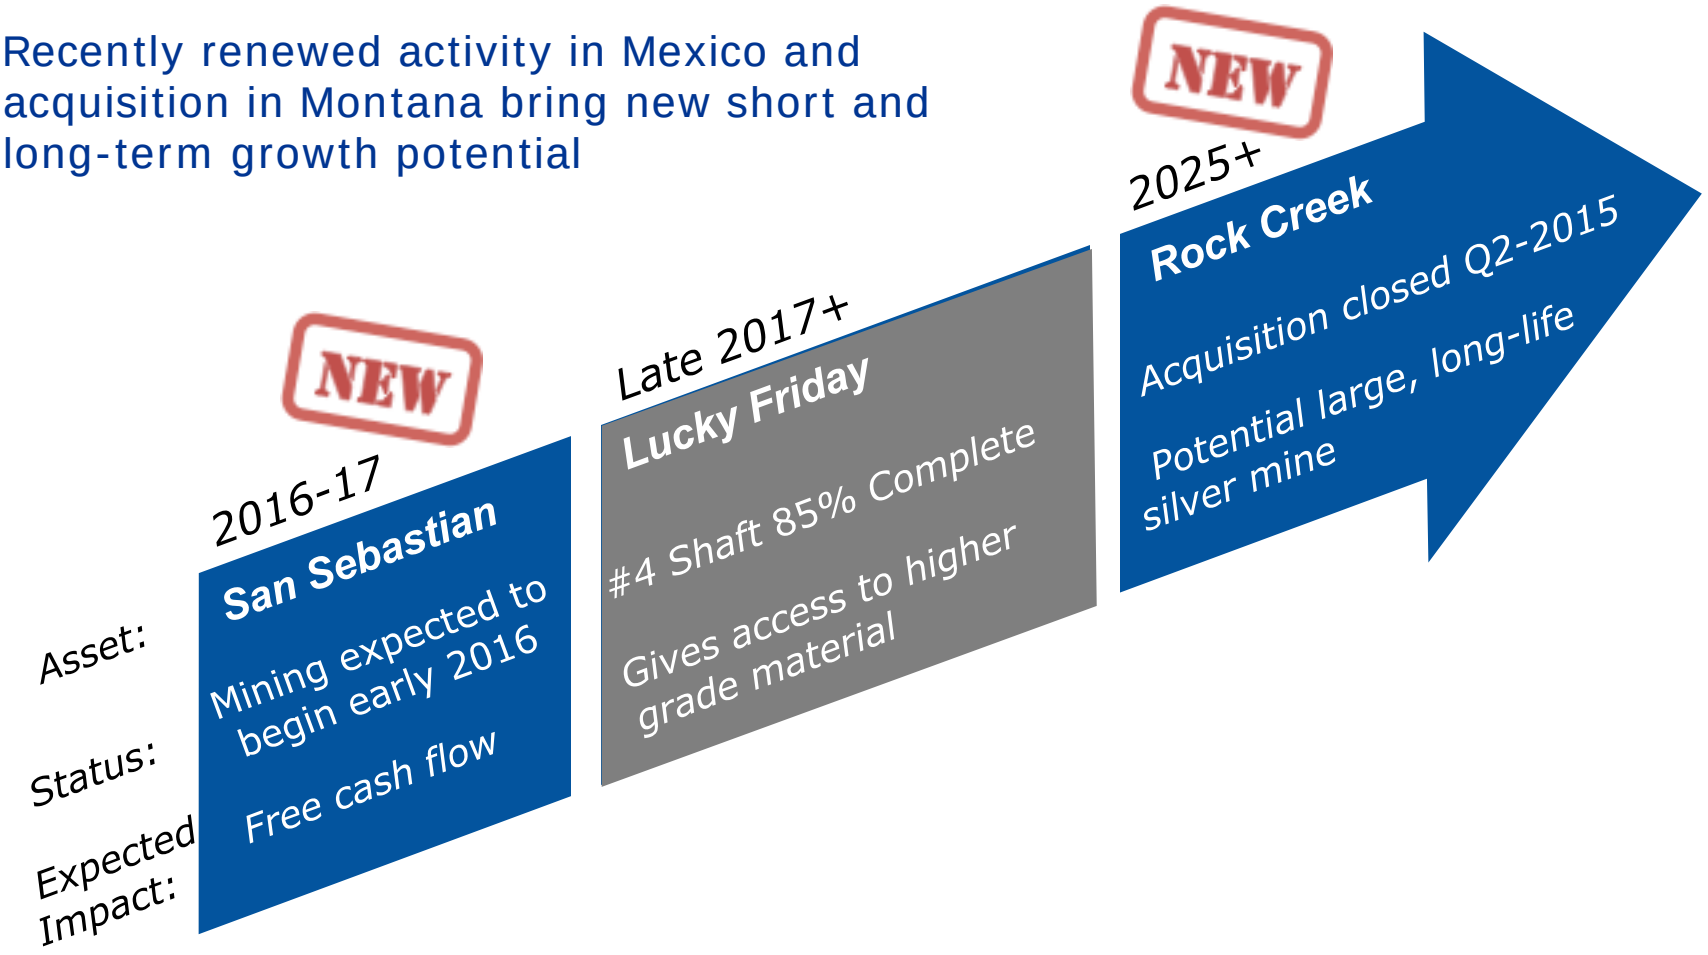

1. Adjusted EBITDA represents a non-GAAP measurement, a reconciliation of which to net income, the most comparable GAAP measure, can be found in the Appendix.
2. Includes: Capital leases, reclamation activities, investments, proceeds from warrant exercise, interest, etc.
   Average prices for the period: Gold - $1,429/oz, Silver $25.92/oz, Lead $0.99/lb, Zinc $0.94/lb
   Numbers might not add up due to rounding.

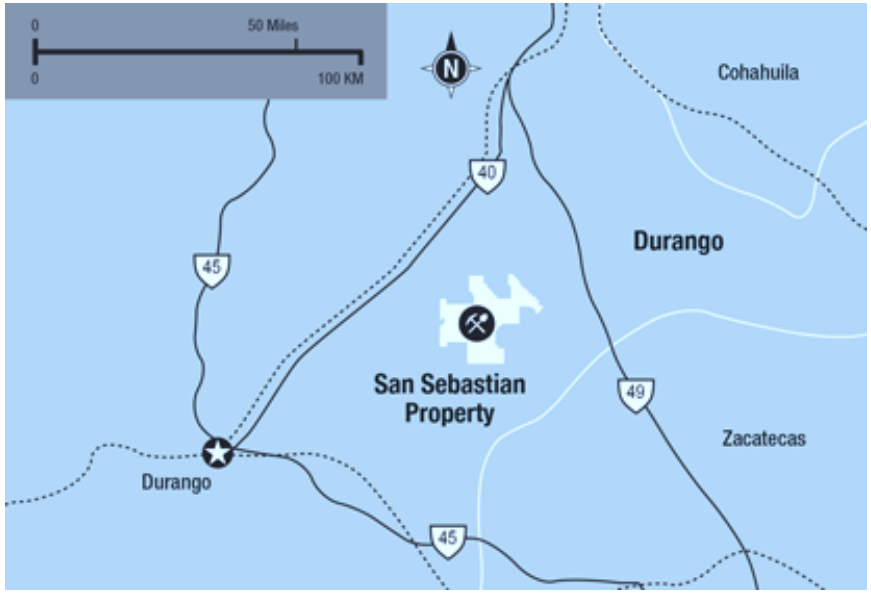

* Net of Aurizon acquisition costs of $26.4M.

Strong Growth Pipeline

Recently renewed activity in Mexico and acquisition in Montana bring new short and long-term growth potential

San Sebastian: Near-Term Growth Opportunity

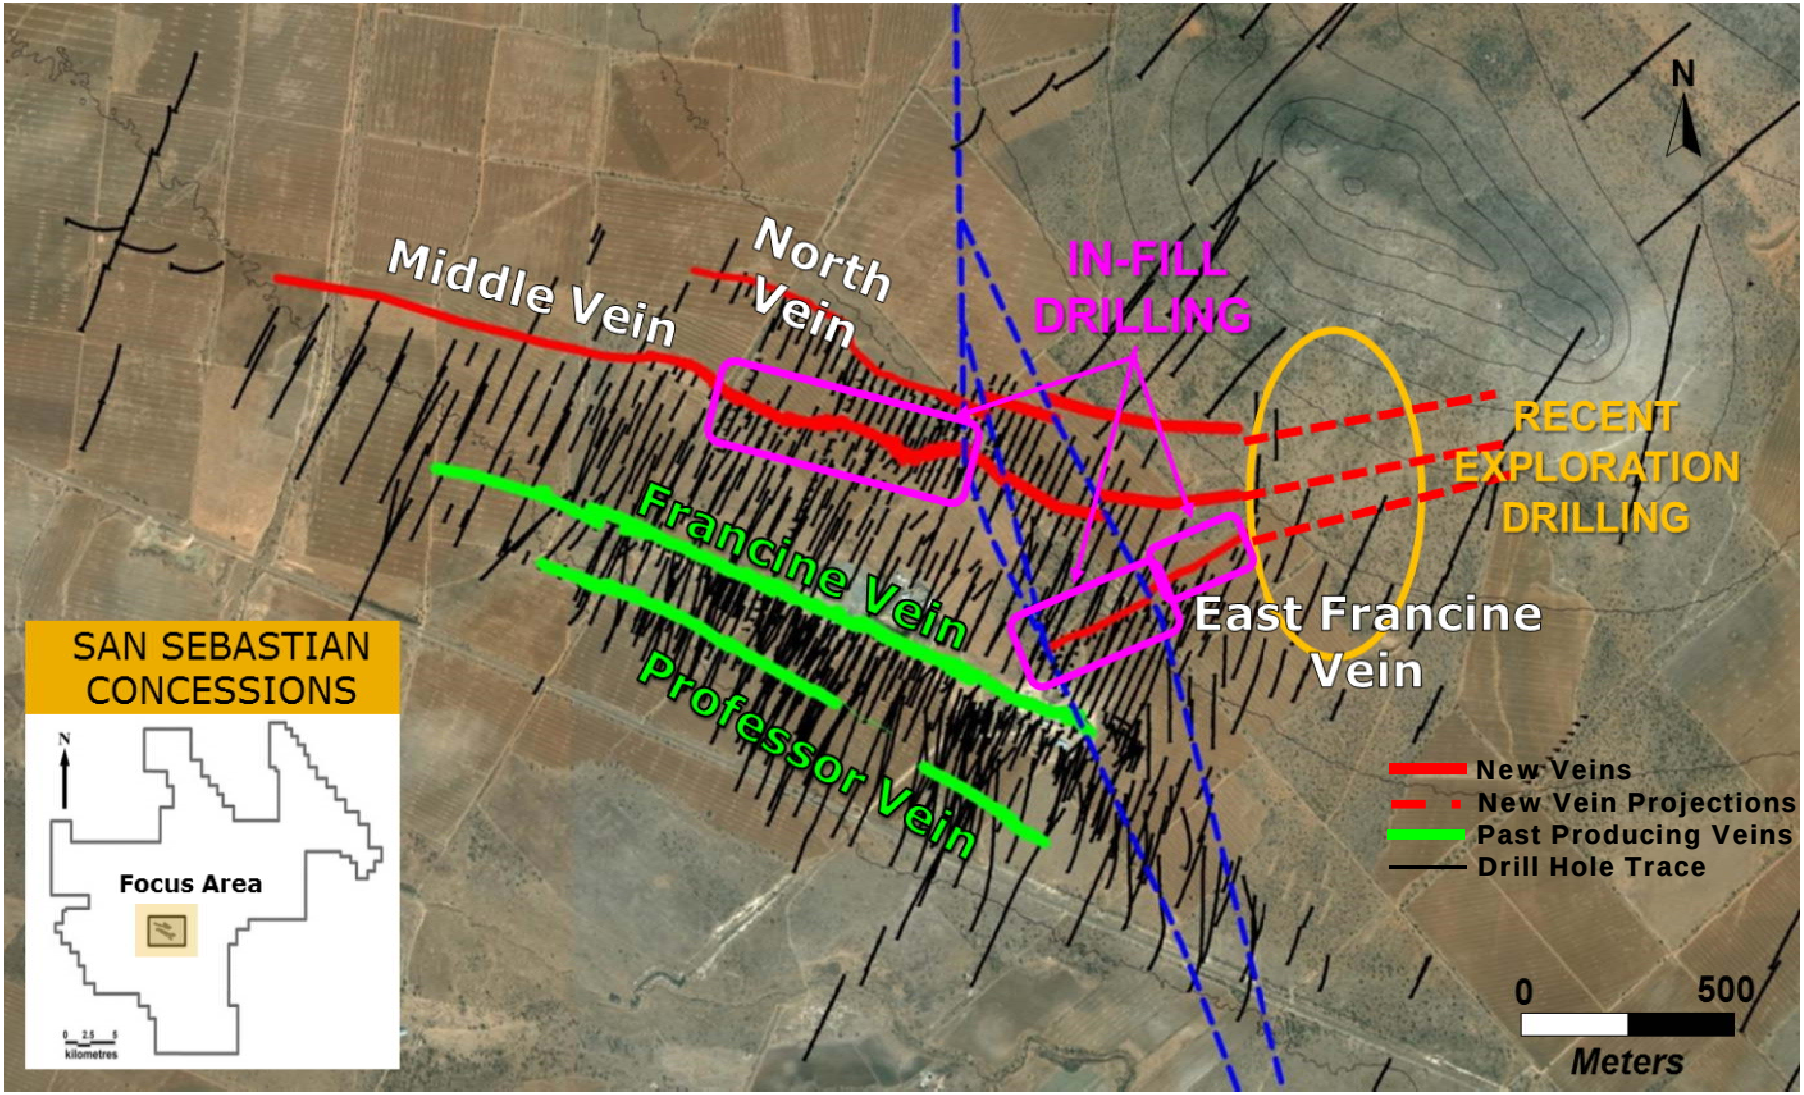

Could Potentially Become a 100 Moz AgEq District

- Mined 11.6 Moz Ag and 177,541 oz Au from 2001-05
- Total indicated resources ▲46% to 37.7 Moz AgEq in 2014
- Total inferred resources ▲18% to 34.9 Moz AgEq in 2014
- Near surface, high-grade veins discovered (4.5 miles strike, open)
- Very low capital expected(approx $5M), leased mill
- PEA underway; mining targeted to begin in early 2016

Note: Metal price assumptions used for calculations: Au $1,300/oz, Ag $20/oz, Zn $0.90/lb, Pb $0.95/lb, Cu $3.00/oz; USD/CAD assumed at par.
1. See resource data in appendix.

San Sebastian: Significant New Discoveries

San Sebastian: High–Grade Resources

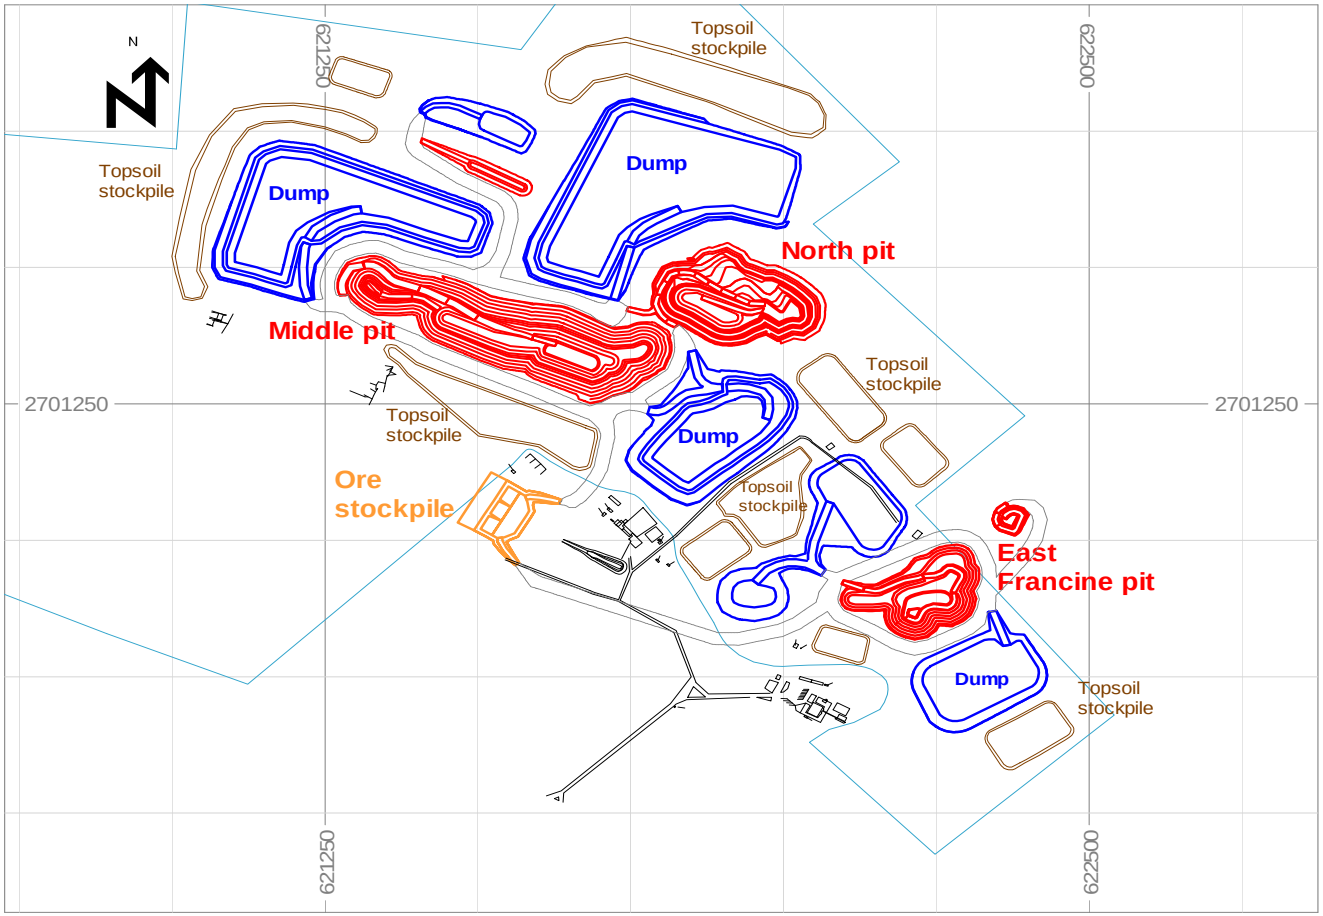

Indicated Resources	Tons	Au	Ag	Pb	Zn	Cu	AgEq	Au	Ag	Pb	Zn	Cu	AgEq

Total Inferred	3,721,200	0.035	4.23	-	-	-	9.38	129,200	15,744,300	-	-	-	34,894,300

Tabulation 12/31/2014 -*(Imperial units - rounded)*

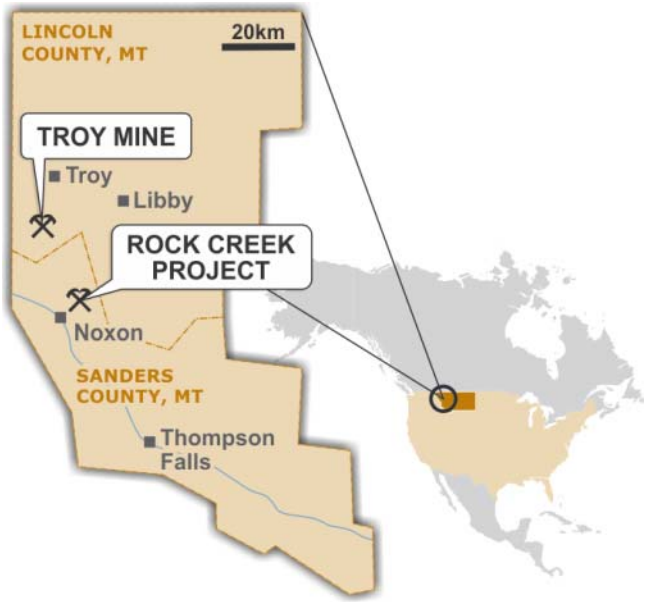

- Cut-off grades: Hugh Zone: $100 NSR; Andrea: $50 NSR; Middle Vein: $100 NSR; North Vein: $100 NSR; East Francine: $100 NSR
- Resources reported at a minimum horizontal width of 2.0 meters for Hugh Zone and 1.5 meters for Andrea Vein, Middle Vein, and North Vein.
- East Francine is reported at true vein width.
- Tonnages rounded to nearest 100; contained metal in ounces (Au, Ag) rounded to nearest 100; contained metal in tons (Pb, Zn, Cu) rounded to nearest 10. Totals may not agree due to rounding.
- 2014 silver equivalent calculation based on the following prices: $1300/oz Au, $20/oz Ag, $0.95/lb Pb, $0.9/lb Zn, $3.0/lb Cu
- Ag Equivalent Factor calculated as follows (example for Au): [(($Price Au) - ($Refining Au)) / (($Price Ag) - ($Refining Ag))] x [(%Recovery Au) / (%Recovery Ag)] x [(%Payable Au) / (%Payable Ag)] = AgEq Factor. Equivalence factors are calculated for each metal based on this formula.

San Sebastian: Preliminary Mine Layout

Plan View

Rock Creek: Long-Term Growth Opportunity

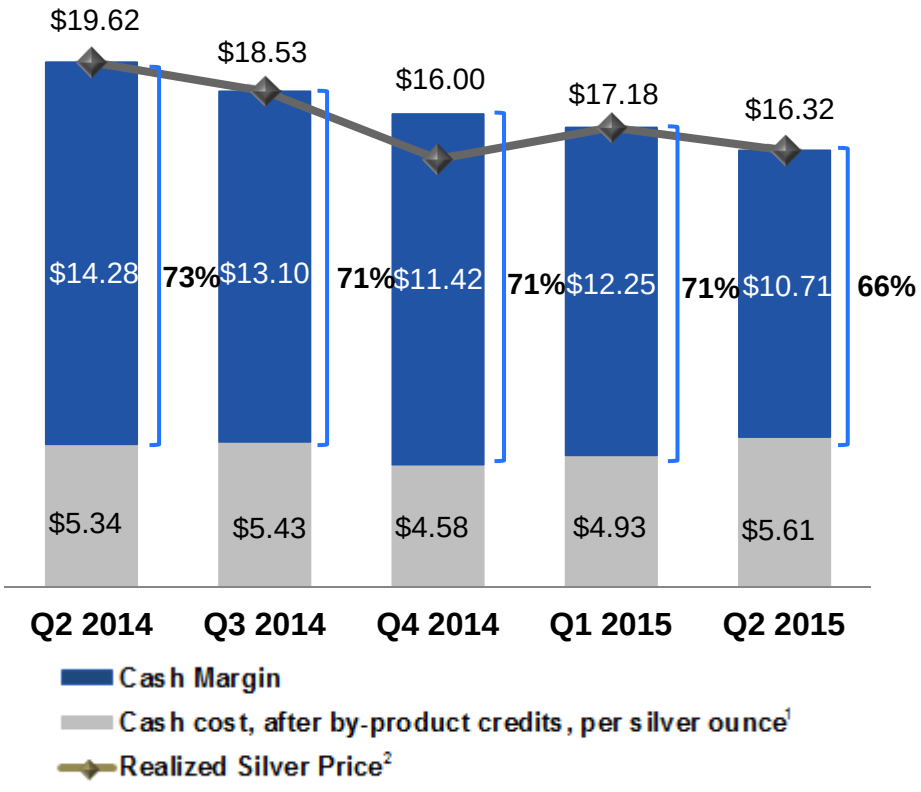

Rock Creek Could Become a 20-30 year mine
Acquired Revett for ~$19 million of Hecla stock on June 15, 2015
Rock Creek: Total inferred resource 229 million oz Ag, 2.0 billion lbs Cu[1]
Rock Creek permitting ongoing: SEIS for public comment expected this year from the Forest Service
Located in Montana approximately 50 miles north of Lucky Friday
Large land position: good exploration potential
Troy Mine is closed, to be reclaimed with insurance proceeds

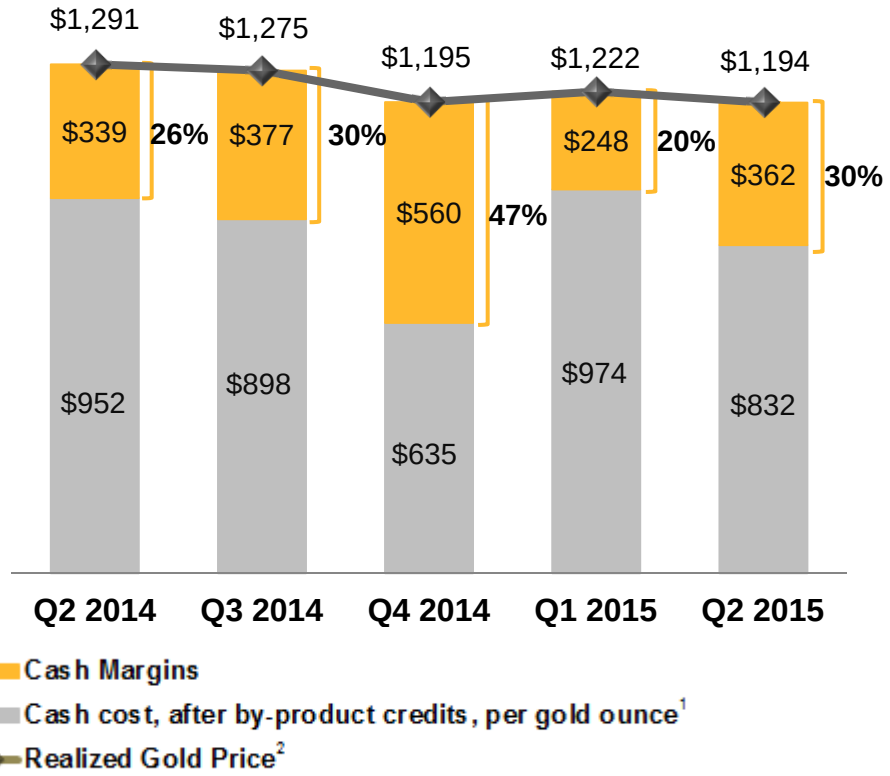

1. Rock Creek resources calculated for Revett based upon a technical report (the "Rock Creek Report") dated May 7, 2004, amended as of January 27, 2005, prepared by SRK Consulting, Toronto in accordance with 43-101. Total inferred resource of 137 Mtons containing 1.67 opt Ag and 0.72% Cu for 229 Moz Ag and 2,022 Mlbs Cu.

Strong Margins

Silver Margins

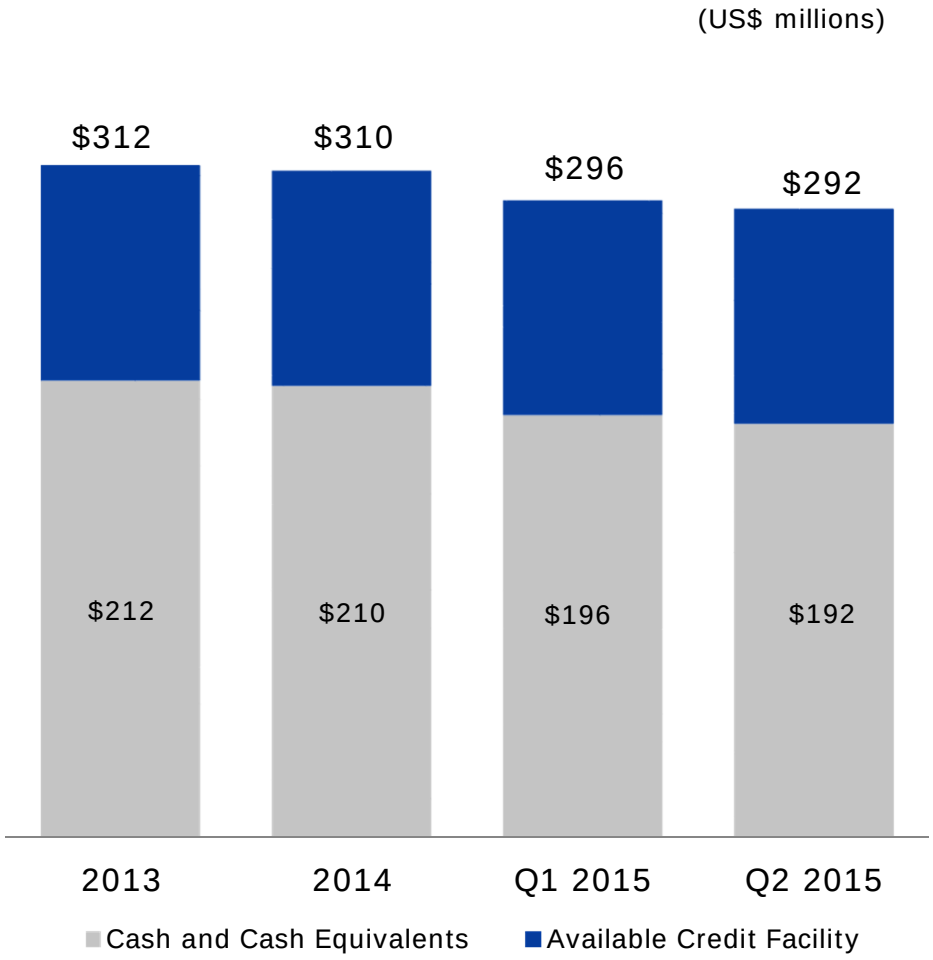

Casa Berardi Margins

1. Cash cost, after by-product credits, per silver/gold ounce represents a non-GAAP measurement, a reconciliation of which to cost of sales and other direct production costs and depreciation, depletion and amortization, the most comparable GAAP measurements, can be found in the Appendix.
2. Realized prices are calculated by dividing gross revenues for each metal by the payable quantities of each metal included in the concentrate and doré sold during the period.

Consistently Strong Liquidity

Debt is Long Term with Good Metrics

- Senior notes **due in 2021** is the only substantial indebtedness
  - **Limited covenants**
- No off balance sheet arrangements
- **Credit Metrics**
  - Total Net Debt/EBITDA less than 2.08x
  - Net Debt/Total Capitalization of 17%
- $100 million **revolving credit** facility
  - **Undrawn**

Capitalization

	Actual Q2 2015
Cash and cash equivalents	$192
Capital lease liability	20
Borrowing, term loans and leases	501
Total debt	$521
Net debt	$329
Shareholders' equity	$1,412
Total capitalization	$1,933
Last Twelve Months Adjusted EBITDA[1]	$158
Total net debt/adjusted EBITDA	2.08x
Net debt/capitalization	17%

Note: All monetary amounts presented in millions of dollars.

1. Adjusted EBITDA represents a non-GAAP measurement, a reconciliation of which to net income, the most comparable GAAP measurement, can be found in the Appendix.

Flexible, Patient Capital Structure

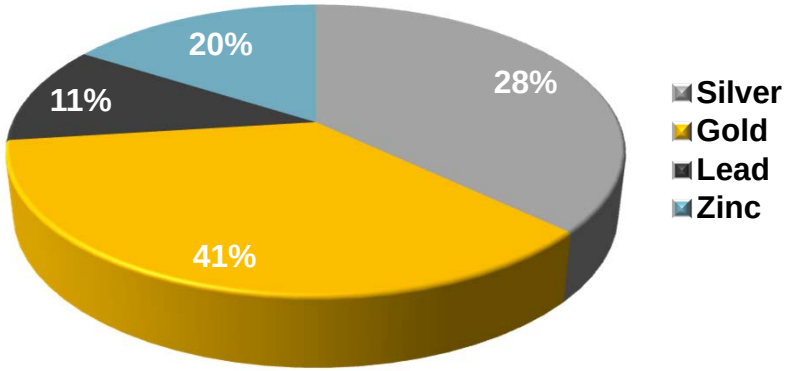

$500M in high yield notes gives us:		
Growth	▶	Purchased Casa Berardi, a long-life gold mine
Flexibility	▶	No restrictive maintenance covenants
Low cost capital	▶	6.875% coupon or ~5% after tax
Long term borrowing	▶	Zero repayment obligations until 2021
Minimal dilution	▶	A benefit for shareholders

Focused on further improving credit metrics in the coming years

Stability from diversified revenue streams

Lead and zinc positions supplement core exposure in silver and gold

Consolidated Revenue by Metal
Q2 2015

- #3 US lead and zinc producer
- Periodically hedge up to 60% of payable lead and zinc production out to 3 years
- Benefit: More stable revenue
- Currently 34k lbs of zinc sold forward, zero lead
- No long-term hedging of gold and silver

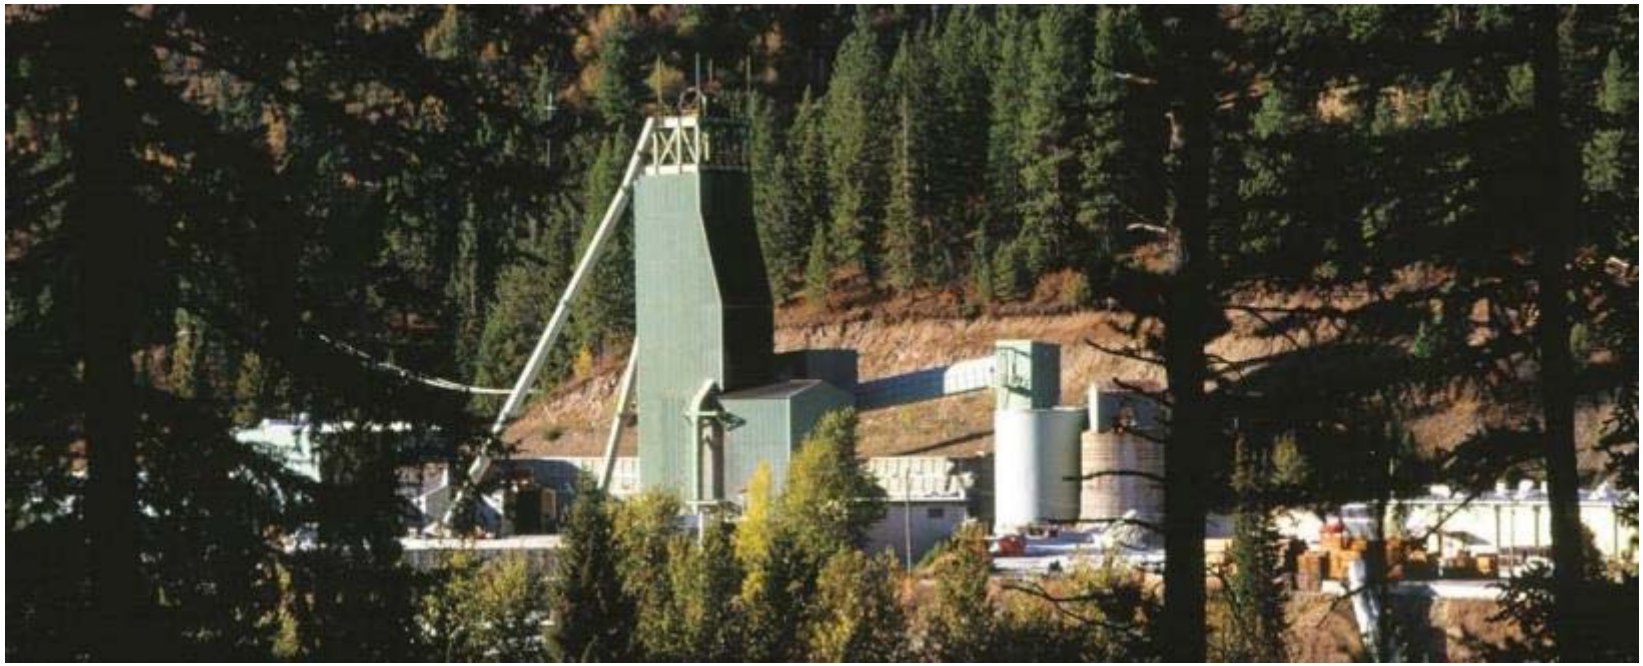

What Differentiates Hecla From Its Peers

Outperformance	Quality assets and strong reserves	Our mines are strong cash flow generators	Solid growth profile	Financially strong

Thank you

Hecla Celebrates 50 Years on the NYSE – March 25, 2015

Appendix

2015 Expectations

Mine	2015E[1] Silver Production (Moz)	2015E[1] Gold Production (oz)	Cash Cost, after by-product credits, per silver/gold ounce[2]
Greens Creek	7.7-8.0	55,000	$3.75
Lucky Friday	2.8-3.0	n/a	$10.75
Casa Berardi	n/a	130,000	$825
Total	**10.5-11**	**185,000**	**$6.00 per silver oz**
Equivalent Production:			
Including all Metals	35[3]		

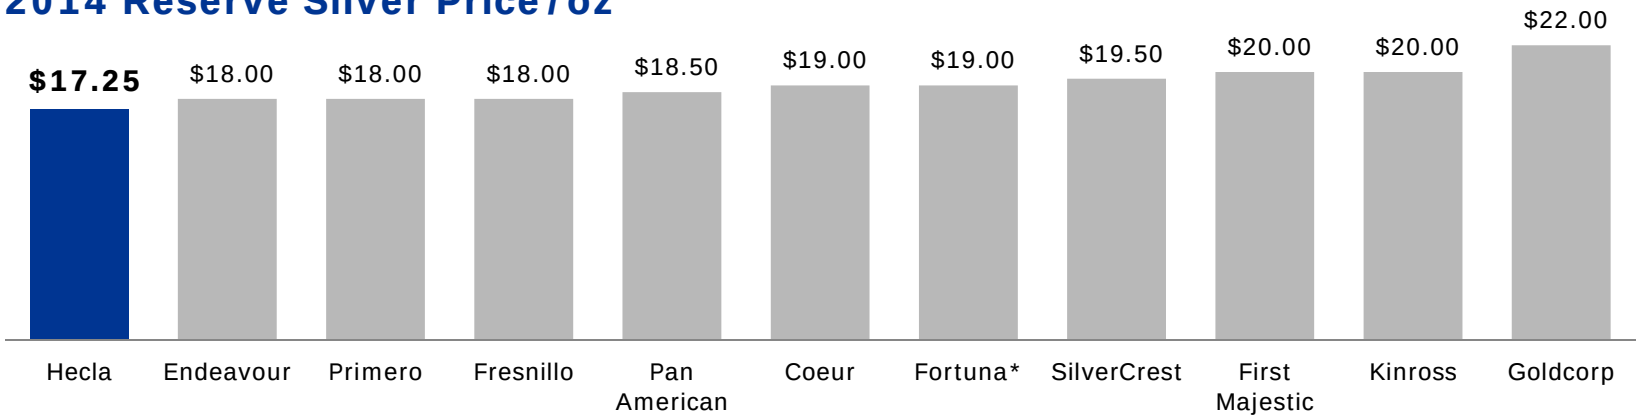

2015E[1] capital expenditures (excluding capitalized interest)	$150 million
2015E[1] pre-development and exploration expenditures	$24 million

Note: Metal price assumptions used for calculations: Au $1,225/oz, Ag $17.25/oz, Zn $0.90/lb, Pb $0.95/lb; USD/CAD assumed at 0.91.

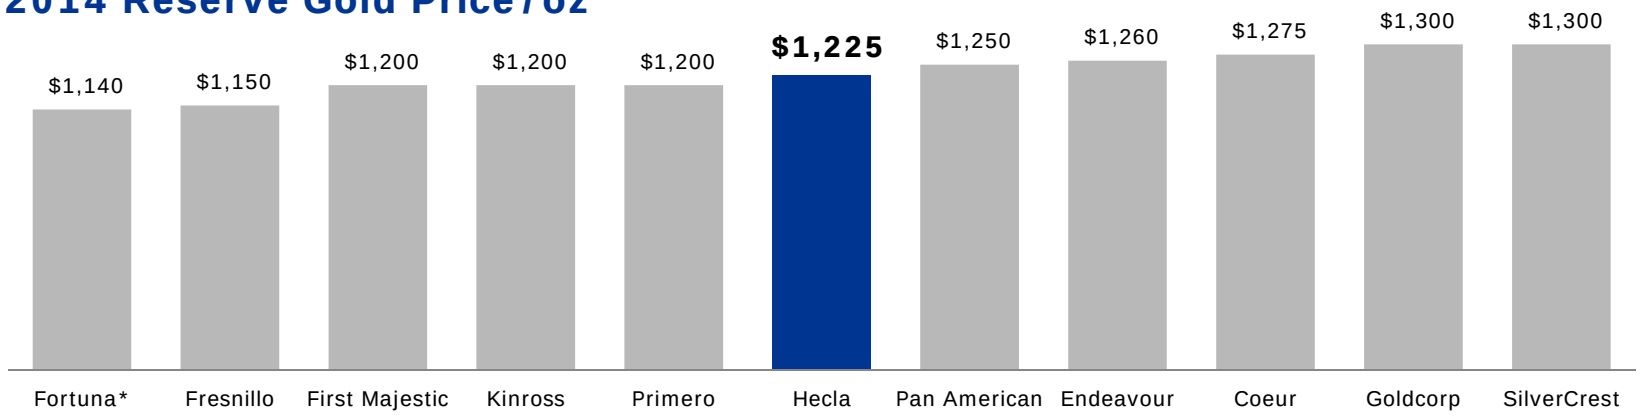

1. 2015E refers to Hecla's expectations for 2015.
2. Cash cost, after by-product credits, per silver and gold ounce represents a non-GAAP measurement.
3. All metal equivalent production of 35 million oz includes silver, gold, lead and zinc production from Lucky Friday, Greens Creek and Casa Berardi converted using the following conversion ratios: 60:1 gold to silver, 80:1 zinc to silver and 90:1 lead to silver.

(a) Mineral reserves are based on $1225 gold, $17.25 silver, $0.95 lead, $0.90 zinc and $3.00 copper, unless otherwise stated.

(1) Mineral reserves are based on $1225 gold and a US$/CAN$ exchange rate of 1:1.1. Reserve diluted to an average of 23.7% to minimum width of 3 meters.

Open pit mineral reserves of the East Mine were estimated in August 2013 based on $1300 gold and a US$/CAN$ exchange rate of 1:1. Reserve diluted to 20%.

Open pit mineral reserves of the Principal Mine were estimated in February 2011 based on $950 gold and a US$/CAN$ exchange rate of 1:1. Reserve diluted to 10%.

Note: All estimates are in-situ except for the proven reserve at Greens Creek which is in a surface stockpile. Resources are exclusive of reserves.

(a) Mineral reserves are based on $1,225 gold, $17.25 silver, $0.95 lead, and $0.90 zinc, unless otherwise stated.

(b) Mineral resources are based on $1,300 gold, $20 silver, $0.95 lead, $0.90 zinc and $3.00 copper, unless otherwise stated.

(1) Mineral reserves are based on $1,225 gold and a US$/CAN$ exchange rate of 1:1.1. Reserve diluted to an average of 23.7% to minimum width of 3 meters.
Open pit mineral reserves of the East Mine were estimated in August 2013 based on $1,300 gold and a US$/CAN$ exchange rate of 1:1. Reserve diluted to 20%.
Open pit mineral reserves of the Principal Mine were estimated in February 2011 based on $950 gold and a US$/CAN$ exchange rate of 1:1. Reserve diluted to 10%.

(2) Measured and indicated resources from Gold Hunter and Lucky Friday vein systems are diluted and factored for expected mining recovery.

(3) Measured, indicated and inferred resources are based on $1,300 gold and a US$/CAN$ exchange rate of 1:1.1. Underground resources are reported at a minimum mining width of 2 to 3 meters.
Open pit mineral resources of the Principal Mine were estimated based on $950 gold and a US$/CAN$ exchange rate of 1:1.
Open pit mineral resources of the 160 Zone were based on $1,250 gold and a US$/CAN$ exchange rate of 1:1. Resources diluted to 12%.

(4) Measured, indicated and inferred resources are based on $1,300 gold and a US$/CAN$ exchange rate of 1:1. The resources are in-situ without dilution and material loss. Resource model completed in 2011.

(5) Indicated resources reported at a minimum mining width of 2.0 meters for Hugh Zone and 1.5 meters for Andrea Vein, Middle Vein, and North Vein. East Francine resources reported at actual vein width.
San Sebastian Hugh Zone also contains 8,400 tons of copper at 1.7% Cu within 492,700 tons of indicated resource.

(6) Indicated resources reported at a minimum mining width of 6.0 feet for Bulldog; resources based on $26.5 Ag, $0.85 Pb, and $0.85 Zn.

(7) Indicated resources reported at a minimum mining width of 4.3 feet.

(8) Inferred resources from Gold Hunter and Lucky Friday vein systems are diluted and factored for expected mining recovery.

(9) Inferred resources reported at a minimum mining width of 2.0 meters for Hugh Zone and 1.5 meters for Andrea Vein, Middle Vein, and North Vein. East Francine resources reported at actual vein width.
San Sebastian Hugh Zone also contains 18,860 tons of copper at 1.5% within 1,255,100 tons of inferred resource.

(10) Inferred resources reported at a minimum mining width of 6.0 feet for Bulldog, 5.0 feet for Equity & North Amethyst veins; resources based on $1,400 Au, $26.5 Ag, $0.85 Pb, and $0.85 Zn.

(11) Inferred resources reported at a minimum mining width of 4.3 feet.

(12) Inferred resource reported at a minimum mining width of 5.0 feet; resources based on $1,400 Au, $26.5 Ag.

* Totals may not represent the sum of parts due to rounding.

Cash Cost GAAP Reconciliation

Reconciliation of cash cost, after by-product credits, per silver ounce to cost of sales and other direct production costs and depreciation, depletion and amortization, the most comparable GAAP measurements, for Greens Creek & Lucky Friday
(dollars and ounces in thousands, except per ounce - unaudited)

	Q2/2015	Q1/2015	Q4/2014	Q3/2014	Q2/2014
Cash costs, before by-product credits[1]	$ 67,059	$ 65,426	$ 70,189	$ 72,083	$ 70,051
By-product credits	(53,183)	(51,090)	(55,510)	(56,523)	(56,638)
Cash cost, after by-product credits	13,876	14,156	14,679	15,560	13,413
Divided by silver ounces produced	2,469	2,873	3,205	2,864	2,509
Cash cost, before by-product credits, per silver ounce	$ 27.15	$ 22.71	$ 21.89	$ 25.17	$ 27.91
By-product credits per silver ounce	$ (21.54)	$ (17.78)	$ (17.31)	$ (19.74)	$ (22.57)
Cash cost, after by-product credits, per silver ounce	$ 5.61	$ 4.93	$ 4.58	$ 5.43	$ 5.34
Reconciliation to GAAP:					
Cash cost, after by-product credits	$ 13,851	$ 14,156	$ 14,679	$ 15,560	$ 13,413
Depreciation, depletion and amortization	16,451	16,612	19,230	17,204	19,280
Treatment costs	(19,305)	(19,921)	(21,293)	(21,430)	(20,010)

Hecla Adjusted EBITDA Reconciliation to GAAP

Reconciliation of Adjusted EBITDA to Generally Accepted Accounting Principles (GAAP)

Dollars are in thousands

	Twelve Months Ended 30-Jun-15
Net income	$ 20,163
Plus: Interest expense	$ 25,524
Plus: Income taxes	$ (7,475)
Plus: Depreciation, depletion and amortization	$ 110,016
Plus: Exploration expense	$ 19,616
Plus: Pre-development expense	$ 3,251
Less: Foreign exchange gain	$ (23,073)
Less: Gains on derivatives contracts	$ (16,188)
Plus/(Less): Provisional price (gains)/losses	$ (195)
Plus: Acquisition costs	$ 2,147
Less: Other	$ 24,488
Adjusted EBITDA	**$ 158,274**

This presentation refers to a non-GAAP measure of adjusted earnings before interest, taxes, depreciation and amortization ("Adjusted EBITDA"), which is a measure of our operating performance. Adjusted EBITDA is calculated as net income (loss) before the following items: interest expense, income tax provision, depreciation, depletion, and amortization expense, exploration expense, predevelopment expense, Aurizon acquisition costs, Lucky Friday suspension-related income, interest and other income (expense), foreign exchange gains and losses, gains and losses on derivative contracts, and provisional price gains and losses. Management believes that, when presented in conjunction with comparable GAAP measures, Adjusted EBITDA is useful to investors in evaluating our operating performance. The table above reconciles net income (loss), the most comparable GAAP measurement, to Adjusted EBITDA.
