Extending Mine Life With Exploration Success

Cautionary Statements

NYSE:HL

Cautionary Statement Regarding Forward Looking Statements,

This presentation contains "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, which are intended to be covered by the safe harbor created by such sections and other applicable laws, including Canadian Securities laws. Such forward-looking statements may include, without limitation: (i) estimates of future production and sales; (ii) estimates of future costs and cash cost, after by-product credits per ounce of silver/gold; (iii) guidance for 2017 including the impact of the Lucky Friday strike on silver and gold production, silver equivalent production, cash cost, after by-product credits, capital expenditures and pre-development and exploration expenditures (which assumes metal prices of gold at $1,225/oz., silver at $17.25/oz., zinc at $1.30/lb. and lead at $1.05/lb. and USD/CAD assumed to be $0.78, USD/MXN assumed to be $0.06); (iv) expectations regarding the development, growth and exploration potential of the Company's projects; (v) expectations of adding reserves and resources; (vi) the possibility of increasing production due to accessing higher grade material and surface pits at Casa Berardi; (vii) possible strike extensions of veins at San Sebastian, potential for new discoveries, ability to begin underground mining by the end of 2017 and ability to extend mine life through 2020; (viii) expectations of grade increases at depth at Lucky Friday and (ix) estimates or expectations of future events or results are based upon certain assumptions, which may prove to be incorrect. Such assumptions, include, but are not limited to: (i) there being no significant change to current geotechnical, metallurgical, hydrological and other physical conditions; (ii) permitting, development, operations and expansion of the Company's projects being consistent with current expectations and mine plans; (iii) political/regulatory developments in any jurisdiction in which the Company operates being consistent with its current expectations; (iv) the exchange rate for the Canadian dollar to the U.S. dollar, being approximately consistent with current levels; (v) certain price assumptions for gold, silver, lead and zinc; (vi) prices for key supplies being approximately consistent with current levels; (vii) the accuracy of our current mineral reserve and mineral resource estimates; and (viii) the Company's plans for development and production will proceed as expected and will not require revision as a result of risks or uncertainties, whether known, unknown or unanticipated. Where the Company expresses or implies an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, such statements are subject to risks, uncertainties and other factors, which could cause actual results to differ materially from future results expressed, projected or implied by the "forward-looking statements." Such risks include, but are not limited to gold, silver and other metals price volatility, operating risks, currency fluctuations, increased production costs and variances in ore grade or recovery rates from those assumed in mining plans, community relations, conflict resolution and outcome of projects or oppositions, litigation, political, regulatory, labor and environmental risks, and exploration risks and results, including that mineral resources are not mineral reserves, they do not have demonstrated economic viability and there is no certainty that they can be upgraded to mineral reserves through continued exploration. For a more detailed discussion of such risks and other factors, see the Company's 2016 Form 10-K, filed on February 23, 2017 with the Securities and Exchange Commission (SEC), as well as the Company's other SEC filings. The Company does not undertake any obligation to release publicly revisions to any "forward-looking statement," including, without limitation, outlook, to reflect events or circumstances after the date of this presentation, or to reflect the occurrence of unanticipated events, except as may be required under applicable securities laws. Investors should not assume that any lack of update to a previously issued "forward-looking statement" constitutes a reaffirmation of that statement. Continued reliance on "forward-loo king statements" is at investors' own risk.

Cautionary Note Regarding Estimates of Measured, Indicated and Inferred Resources

The United States Securities and Exchange Commission (SEC) permits mining companies, in their filings with the SEC, to disclose only those mineral deposits that a company can economically and legally extract or produce. We use certain terms in this presentation, such as "resource," "measured resources," "indicated resources," and "inferred resources" that are recognized by Canadian regulations, but that SEC guidelines generally prohibit U.S. registered companies from including in their filings with the SEC, except in certain circumstances. U.S. investors are urged to consider closely the disclosure in our most recent Form 10-K and Form 10-Q. You can review and obtain copies of these filings from the SEC's website at www.sec.gov.

Qualified Person (QP) Pursuant to Canadian National Instrument 43-101

Dean McDonald, PhD. P.Geo., Senior Vice President - Exploration of Hecla Mining Company, who serves as a Qualified Person under National Instrument 43-101("NI 43-101"), supervised the preparation of the scientific and technical information concerning Hecla's mineral projects in this presentation. Information regarding data verification, surveys and investigations, quality assurance program and quality control measures and a summary of analytical or testing procedures for the Greens Creek Mine are contained in a technical report titled "Technical Report for the Greens Creek Mine" effective date March 28, 2013, and for the Lucky Friday Mine are contained in a technical report titled "Technical Report for the Lucky Friday Mine Shoshone County, Idaho, USA" effective date April 2, 2014, for Casa Berardi are contained in a technical report titled "Technical Report on the mineral resource and mineral reserve estimate for Casa Berardi Mine, Northwestern Quebec, Canada" effective date March 31, 2014 (the "Casa Berardi Technical Report"), and for the San Sebastian Mine, Mexico, are contained in a technical report prepared for Hecla titled "Technical Report for the San Sebastian Ag-Au Property, Durango, Mexico" effective date September 8k 2015 . Also included in these four technical reports is a description of the key assumptions, parameters and methods used to estimate mineral reserves and resources and a general discussion of the extent to which the estimates may be affected by any known environmental, permitting, legal, title, taxation, socio-political, marketing or other relevant factors. Copies of these technical reports are available under Hecla's and Aurizon's profiles on SEDAR at www.sedar.com. The Casa Berardi Technical Report was reviewed by Dr. McDonald on behalf of Hecla. To the best of Hecla's knowledge, information and belief, there is no new material scientific or technical information that would make the disclosure of the mineral resources and mineral reserves for Casa Berardi in this document inaccurate or misleading.

Cautionary Note Regarding Non-GAAP measures

Cash cost per ounce of silver and gold, net of by-product credits, EBITDA, adjusted EBITDA, all in sustaining capital ("AISC"), after by-product credits, and free cash flow represent non-U.S. Generally Accepted Accounting Principles (GAAP) measurements. A reconciliation of these non-GAAP measures to the most comparable GAAP measurements can be found in the Appendix.

San Sebastian: Hecla's Newest Mine…A History

NYSE:HL

- **1999** Acquired (Monarch Resource Investments)
- 40,324 ha of 31 contiguous mining concessions in Durango, Mexico
- **2001 – 2005** Mined 11.6 M oz Ag and 177,541 oz Au
- **2006-2012** General exploration
- **2014** Faulted offset of Francine Vein discovered
- **2014** Indicated resource up 46%, Inferred up 18%
- **2015** Positive PEA, construction decision, first doré poured Dec 20
- **2016** Mined 4.3 M oz Ag and 34 k oz Au
- **1H 2017** Mined 1.61 M oz Ag and 12.9 k oz Au
- **2017** Secured mill through 2020

Key Activities

Ongoing:

- Select, train mine rescue team
- Mine rescue & safety building upgrade
- Ventilation borehole excavation
- 800 kW generator (spare from Montanore) being installed on site
- Production fans ordered – TBD in November
- Main exhaust fan ordered – TBD in November
- Personnel selection underway (safety ops, mine planner, medical staff)

Upcoming:

- Develop power distribution design - substations
- Design water system – sumps
- Installation of main exhaust fan

San Sebastian

Exploration Overview

San Sebastian Background:

Location, reserve and resources, and exploration potential

NYSE:HL

San Sebastian Background

- The San Sebastian project is located in the center of the Mexican Silver belt.
- The San Sebastian land package covers about 42,000 hectares or about 162 square.
- The project is located 90 km northeast of the city of Durango, near the border of the states of Durango and Zacatecas.
- Infrastructure at the property is excellent and access is by paved road.
- High-grade epithermal vein system with both Au, Ag mineralization and also areas with Au, Ag + base metals (Cu, Pb, Zn).
- Reserves (Dec 31 2016) – 14.3 million silver equivalent ounces at 7.6 gpt gold and 959 gpt silver
- Current resource is approximately 70 million ounces silver equivalent contained in 6 million tons.
- Excellent exploration potential for new discoveries with highly active near mine and district wide exploration programs.

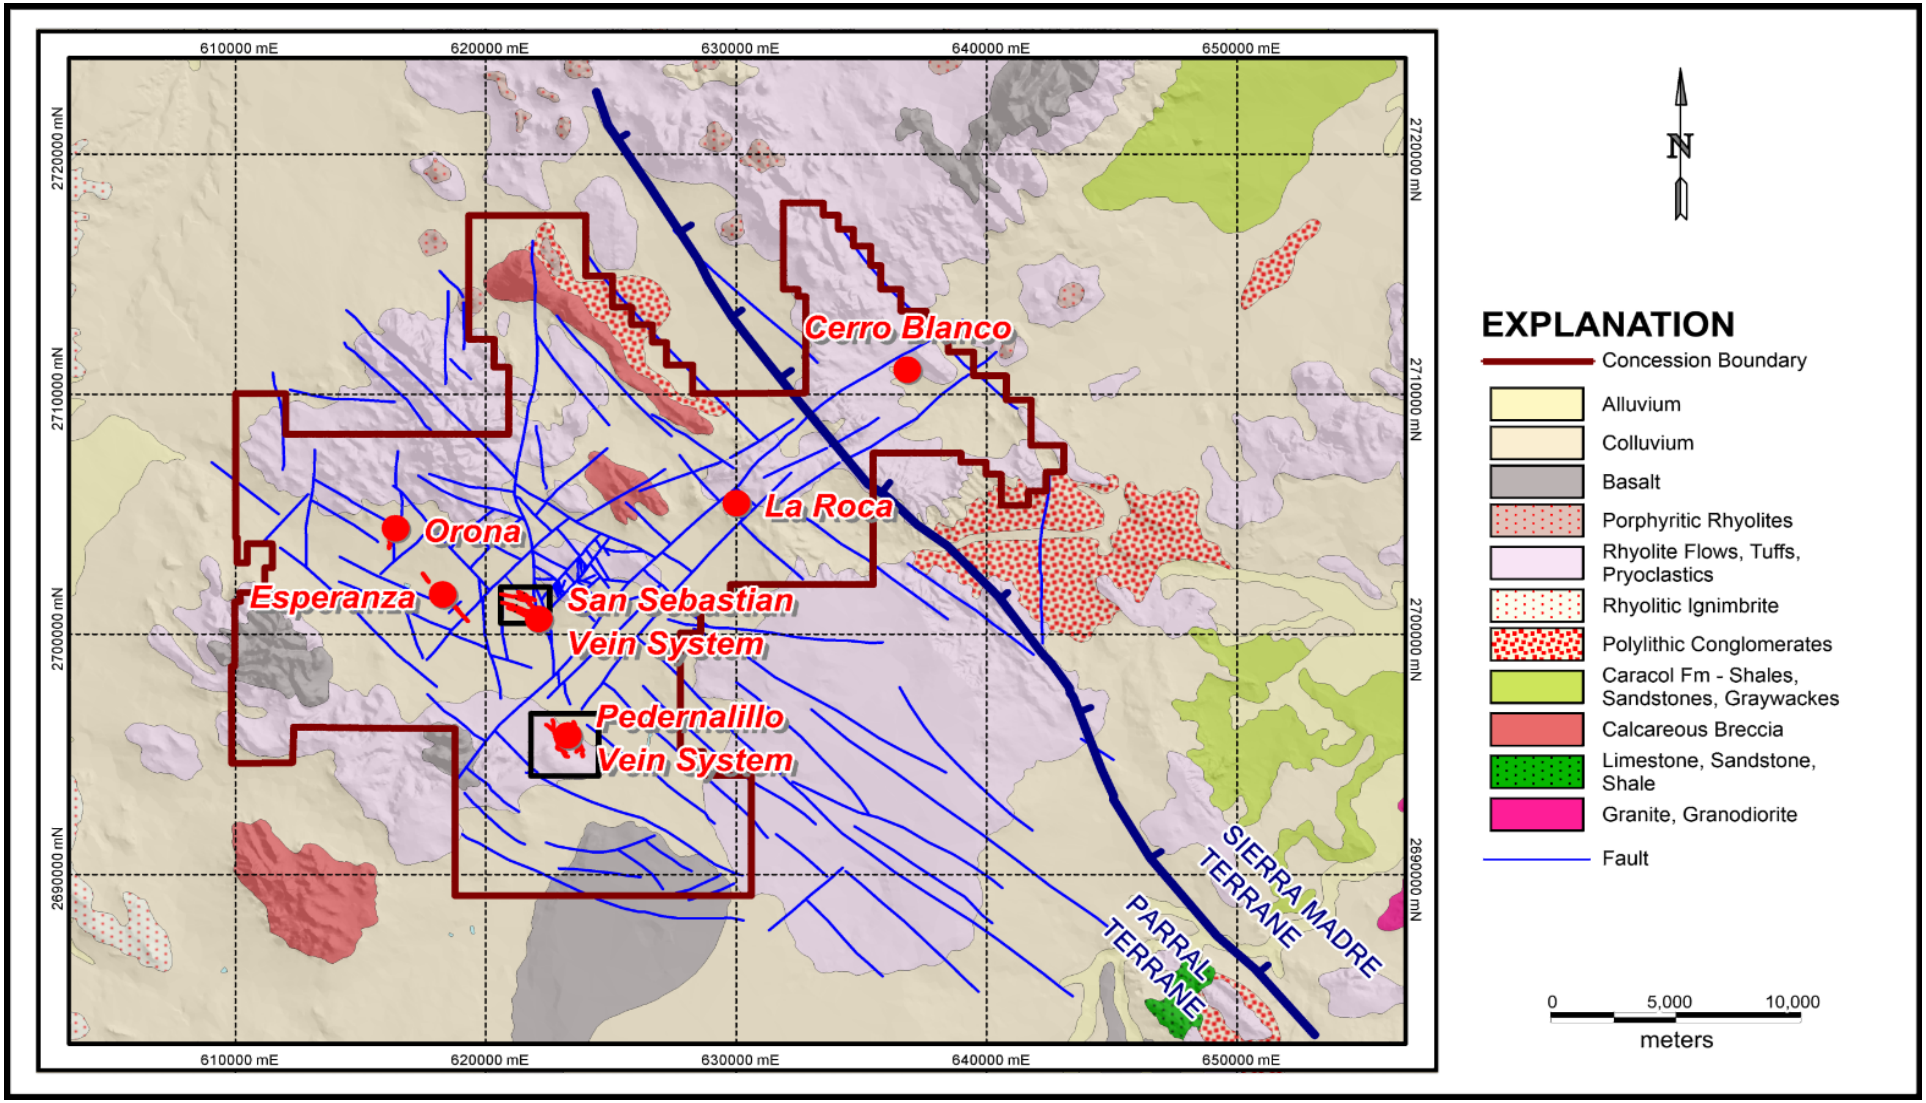

San Sebastian Geology

Regional structures main control of mineralization

NYSE:HL

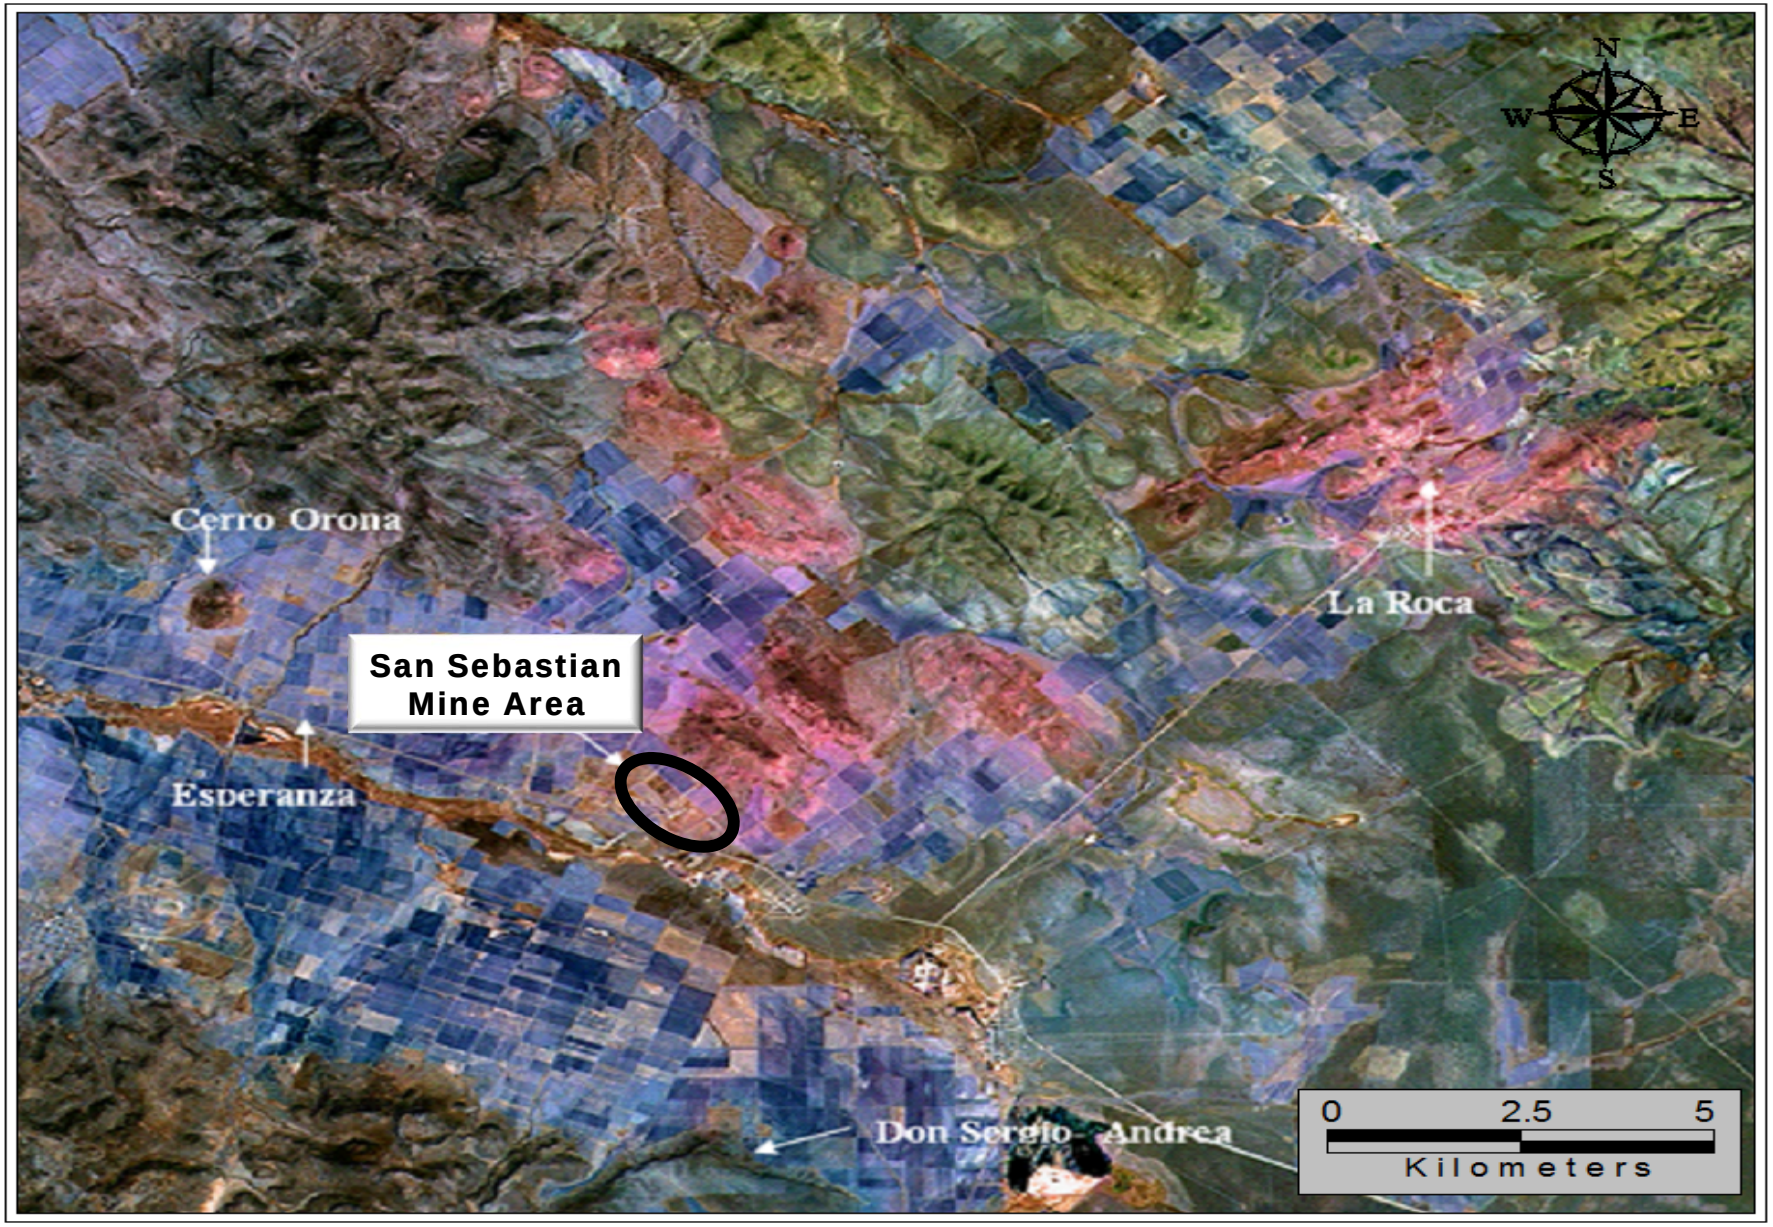

- *Potential for Epithermal, Scarn and CRD style mineralization*

San Sebastian District Alteration

Extensive acid sulfate alteration along regional structures where rocks exposed

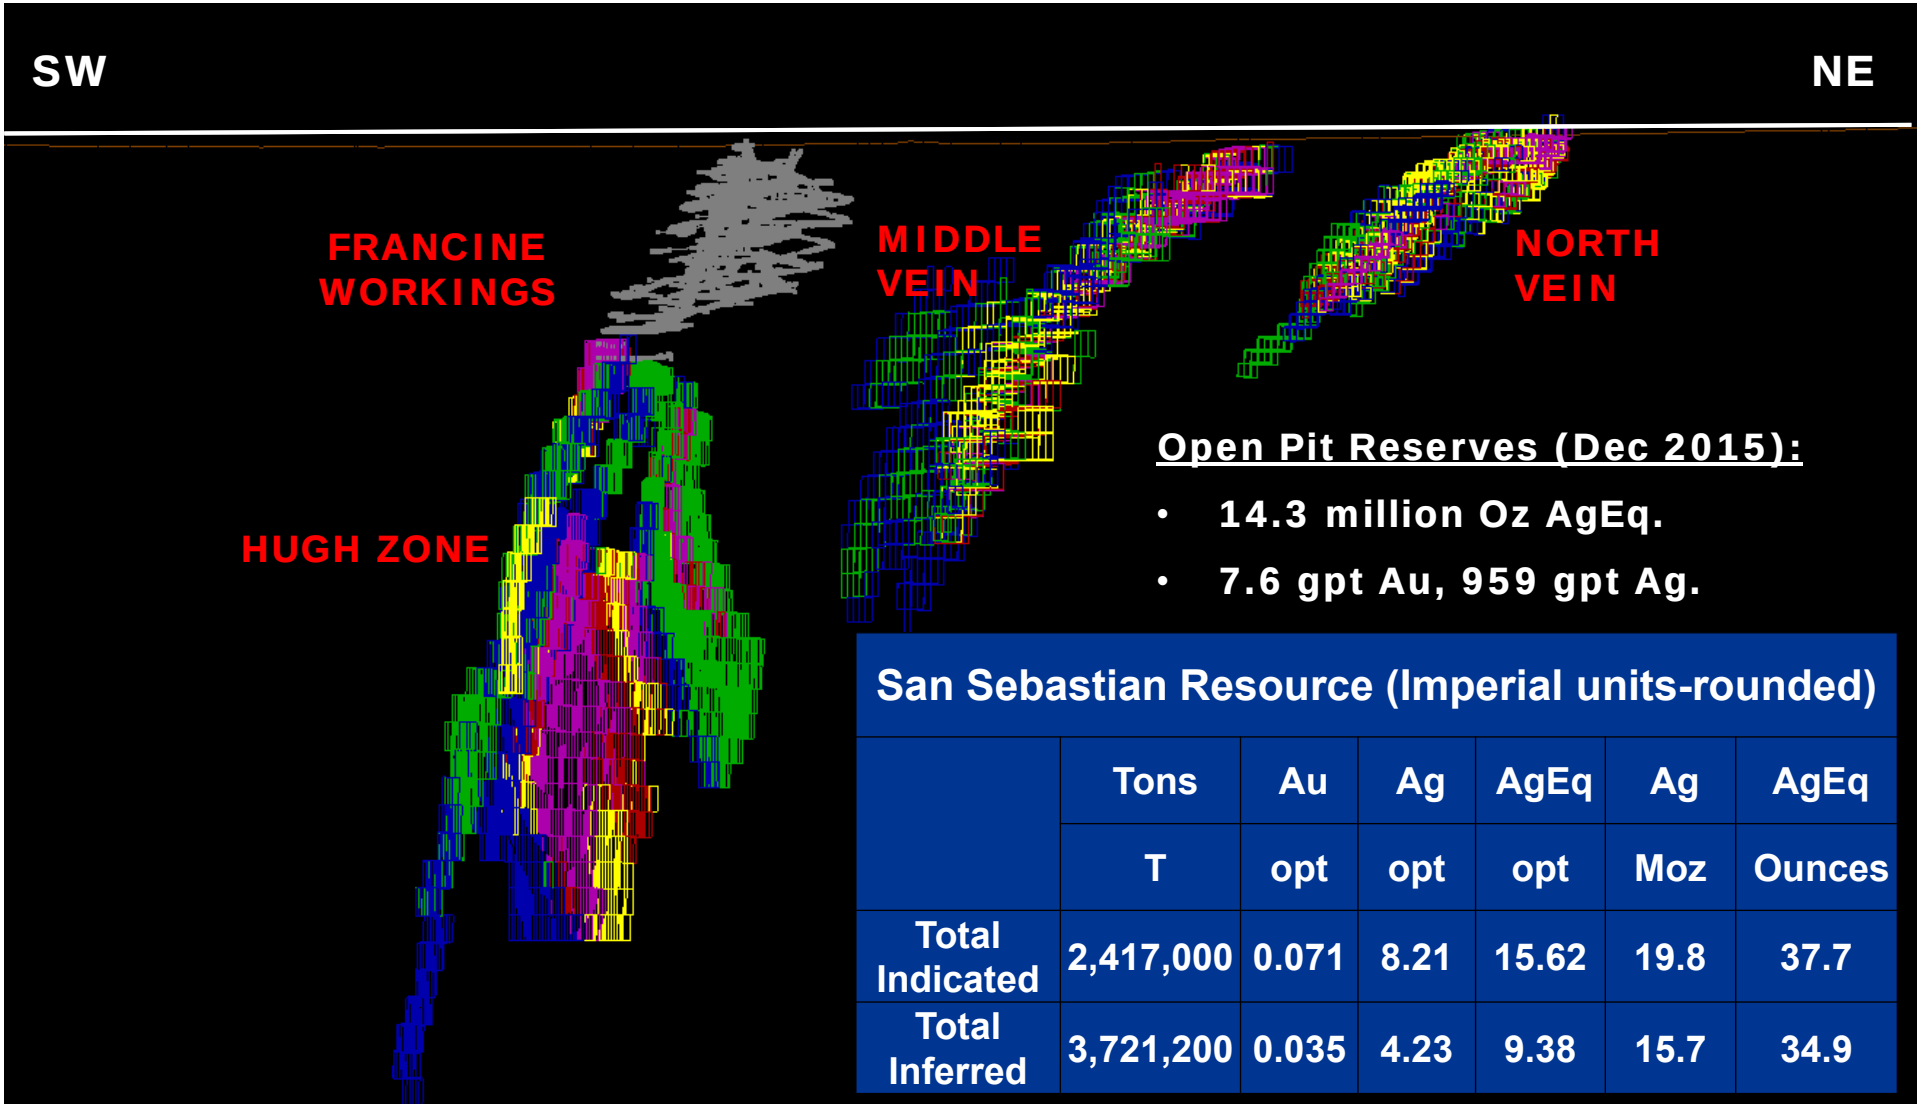

NYSE:HL

San Sebastian – Resources

New reserves and resources downdip and along strike from current resource blocks

NYSE:HL

Open Pit Reserves (Dec 2015):

- 14.3 million Oz AgEq.
- 7.6 gpt Au, 959 gpt Ag.

San Sebastian Resource (Imperial units-rounded)

	Tons	Au	Ag	AgEq	Ag	AgEq
	T	opt	opt	opt	Moz	Ounces
Total Indicated	2,417,000	0.071	8.21	15.62	19.8	37.7
Total Inferred	3,721,200	0.035	4.23	9.38	15.7	34.9

San Sebastian – Extremely High Grades

Supergene and oxide ores from shallow open pit mining areas

NYSE:HL

San Sebastian – Recent Exploration

Drilling defining new reserves and advancing exploration on many fronts

NYSE:HL

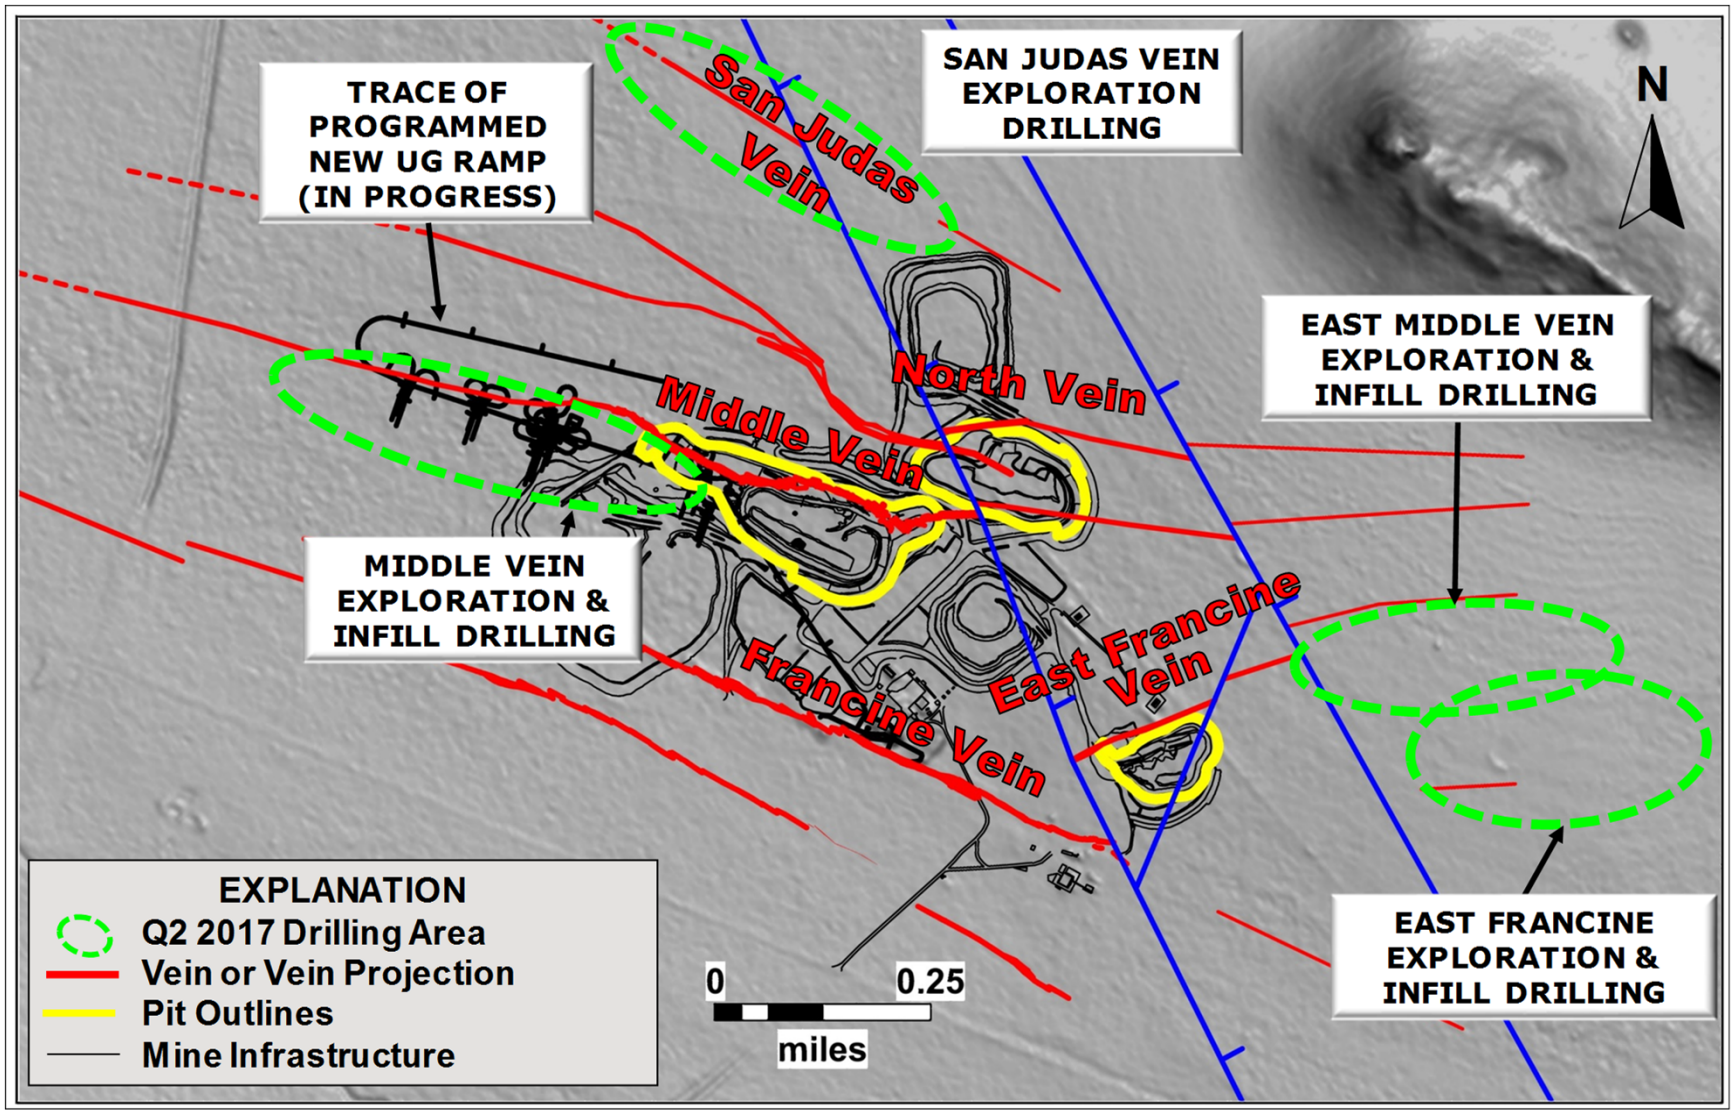

San Sebastian

- Exploration and infill drilling of the East Francine Vein recently identified a high-grade shoot with 300 m strike length and 200 m down dip.
- Drilling of the East Middle Vein defines an area with 200 m strike length and 180 m down dip. It is adjacent to the East Francine Vein and may provide the critical mass to develop a new mining area east of previous Francine Vein mining.
- High-grade intersections at the western Middle Vein will require minimal additional development to access ramp.
- Deeper drilling in the West Middle Vein has identified base metal-bearing mineralization. Additional drilling will evaluate the potential of additional base metal mineralization in the Middle and West Francine veins.
- Initial drilling of San Judas vein intersects broad mineralization.

San Sebastian Mine Area Plan View:

Current open pits and recent exploration and development advances

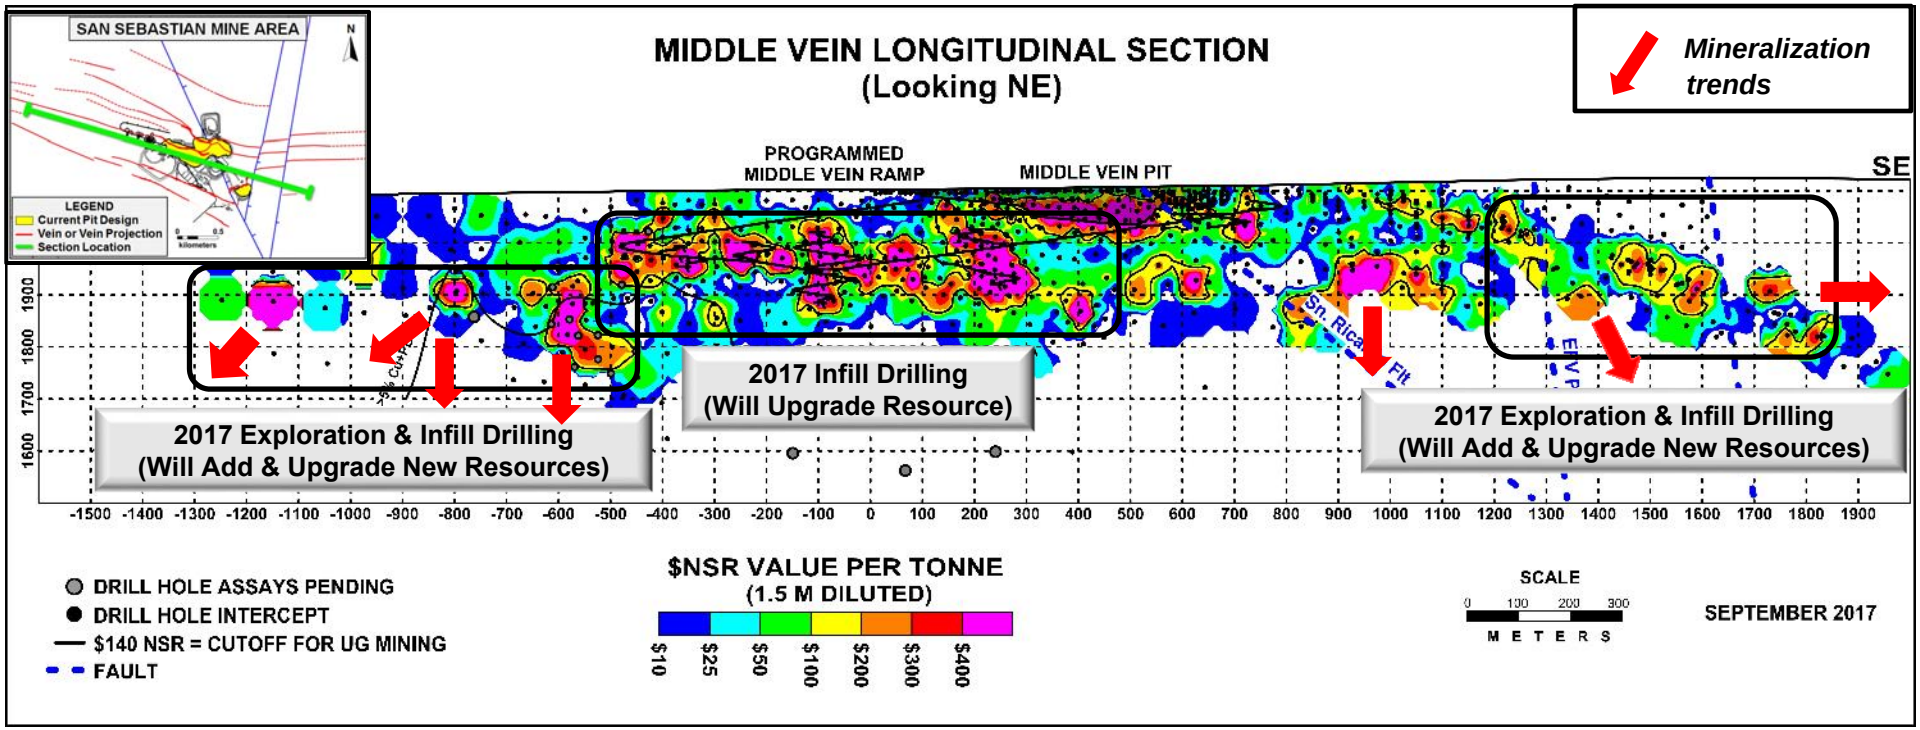

NYSE:HL

Middle Vein Longitudinal Section:

2017 exploration and infill drilling and potential extensions

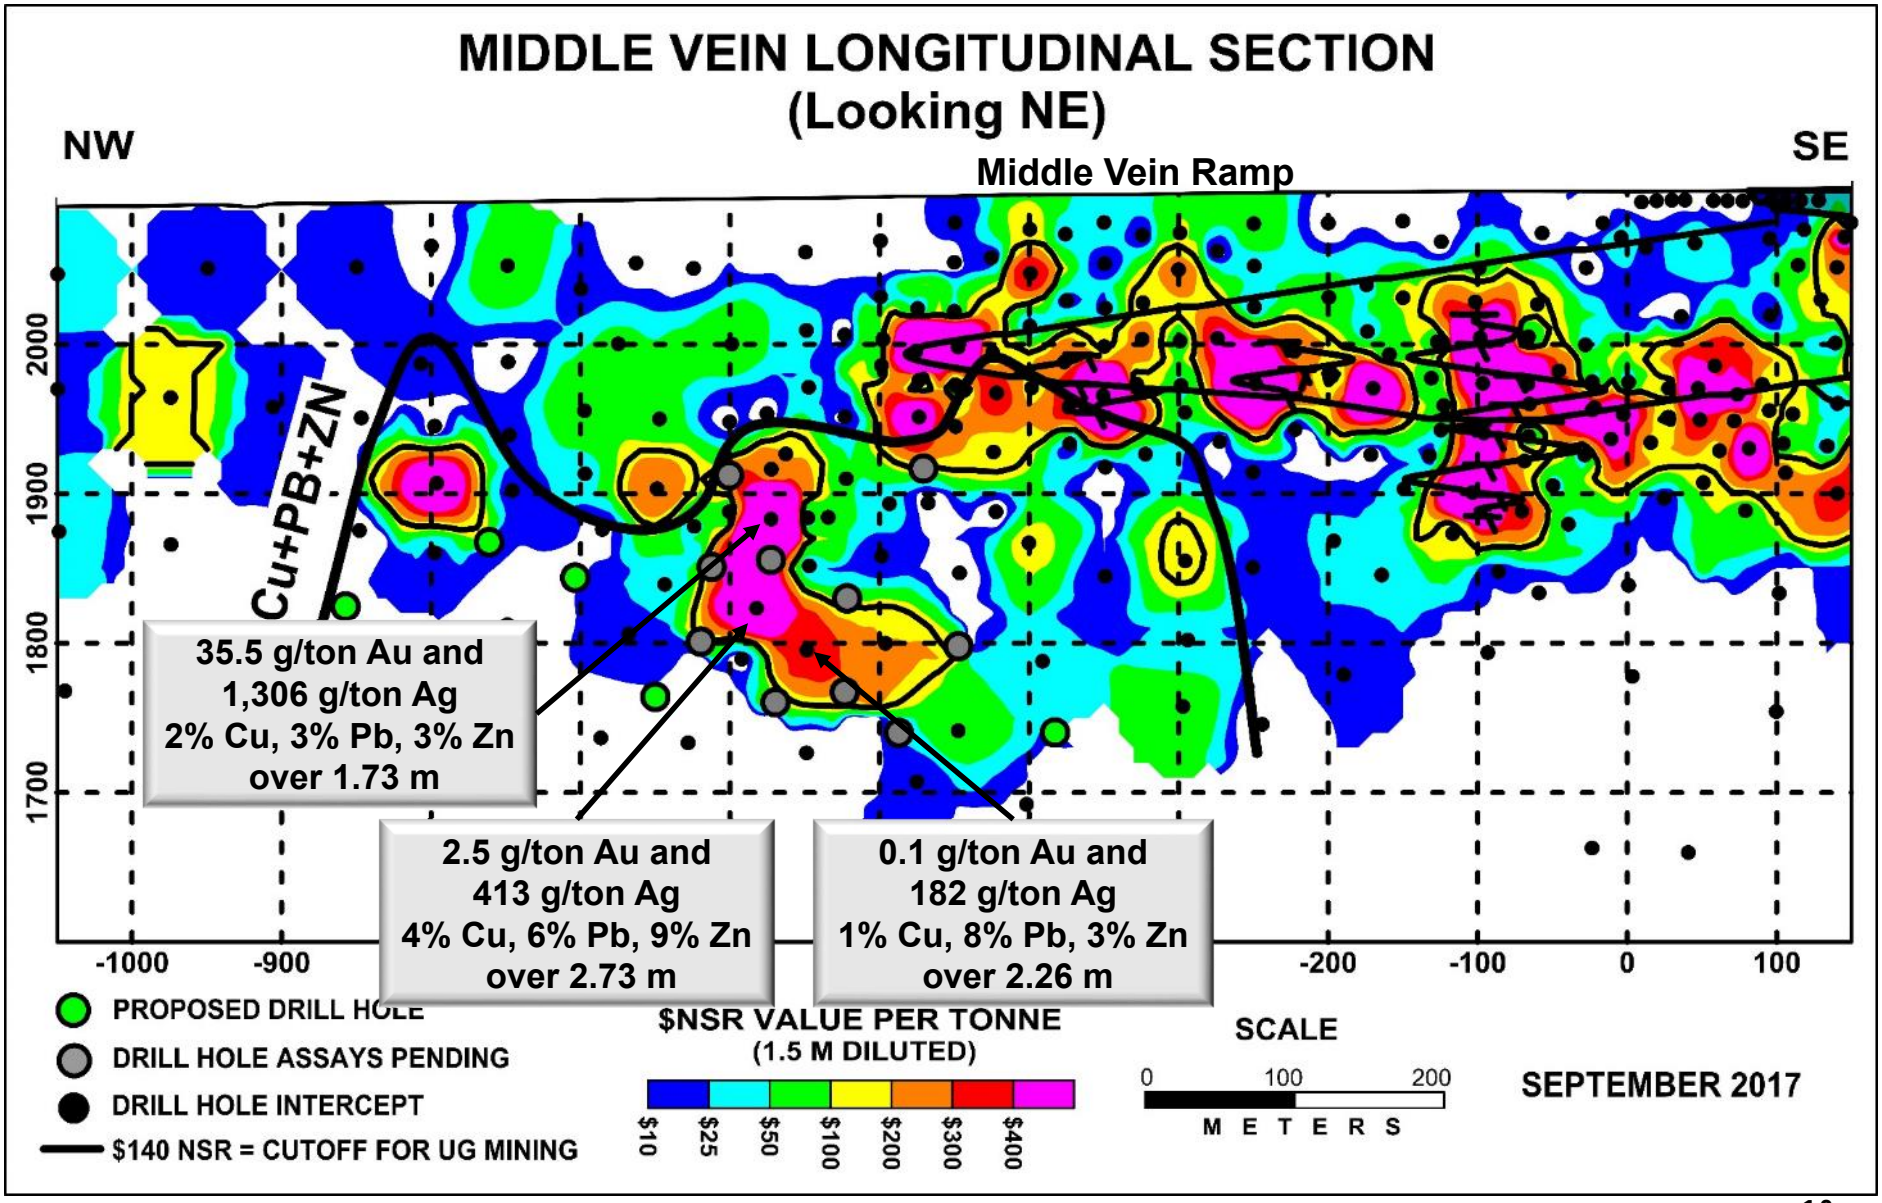

NYSE:HL

Middle Vein Base Metal Zone:

Recent high-grade base and precious metal intercepts near Middle Vein ramp

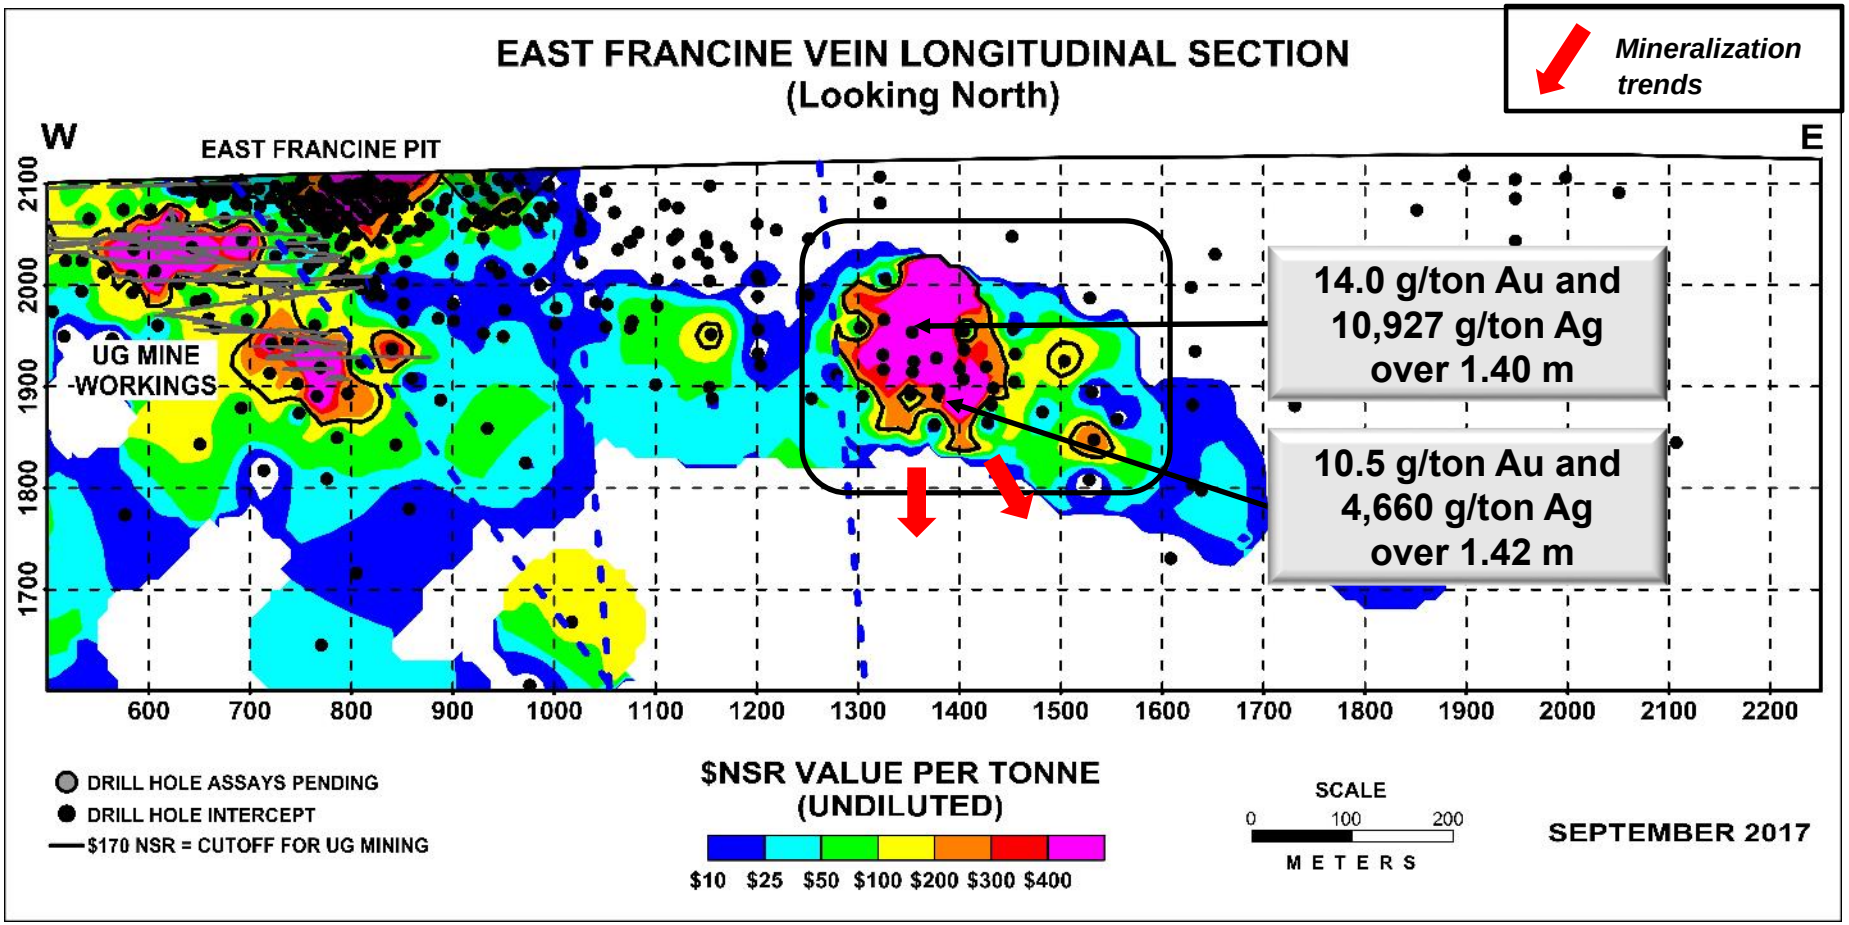

NYSE:HL

East Francine Vein Longitudinal:

Drilling confirming high grade resource; proximal to East Middle Vein resource

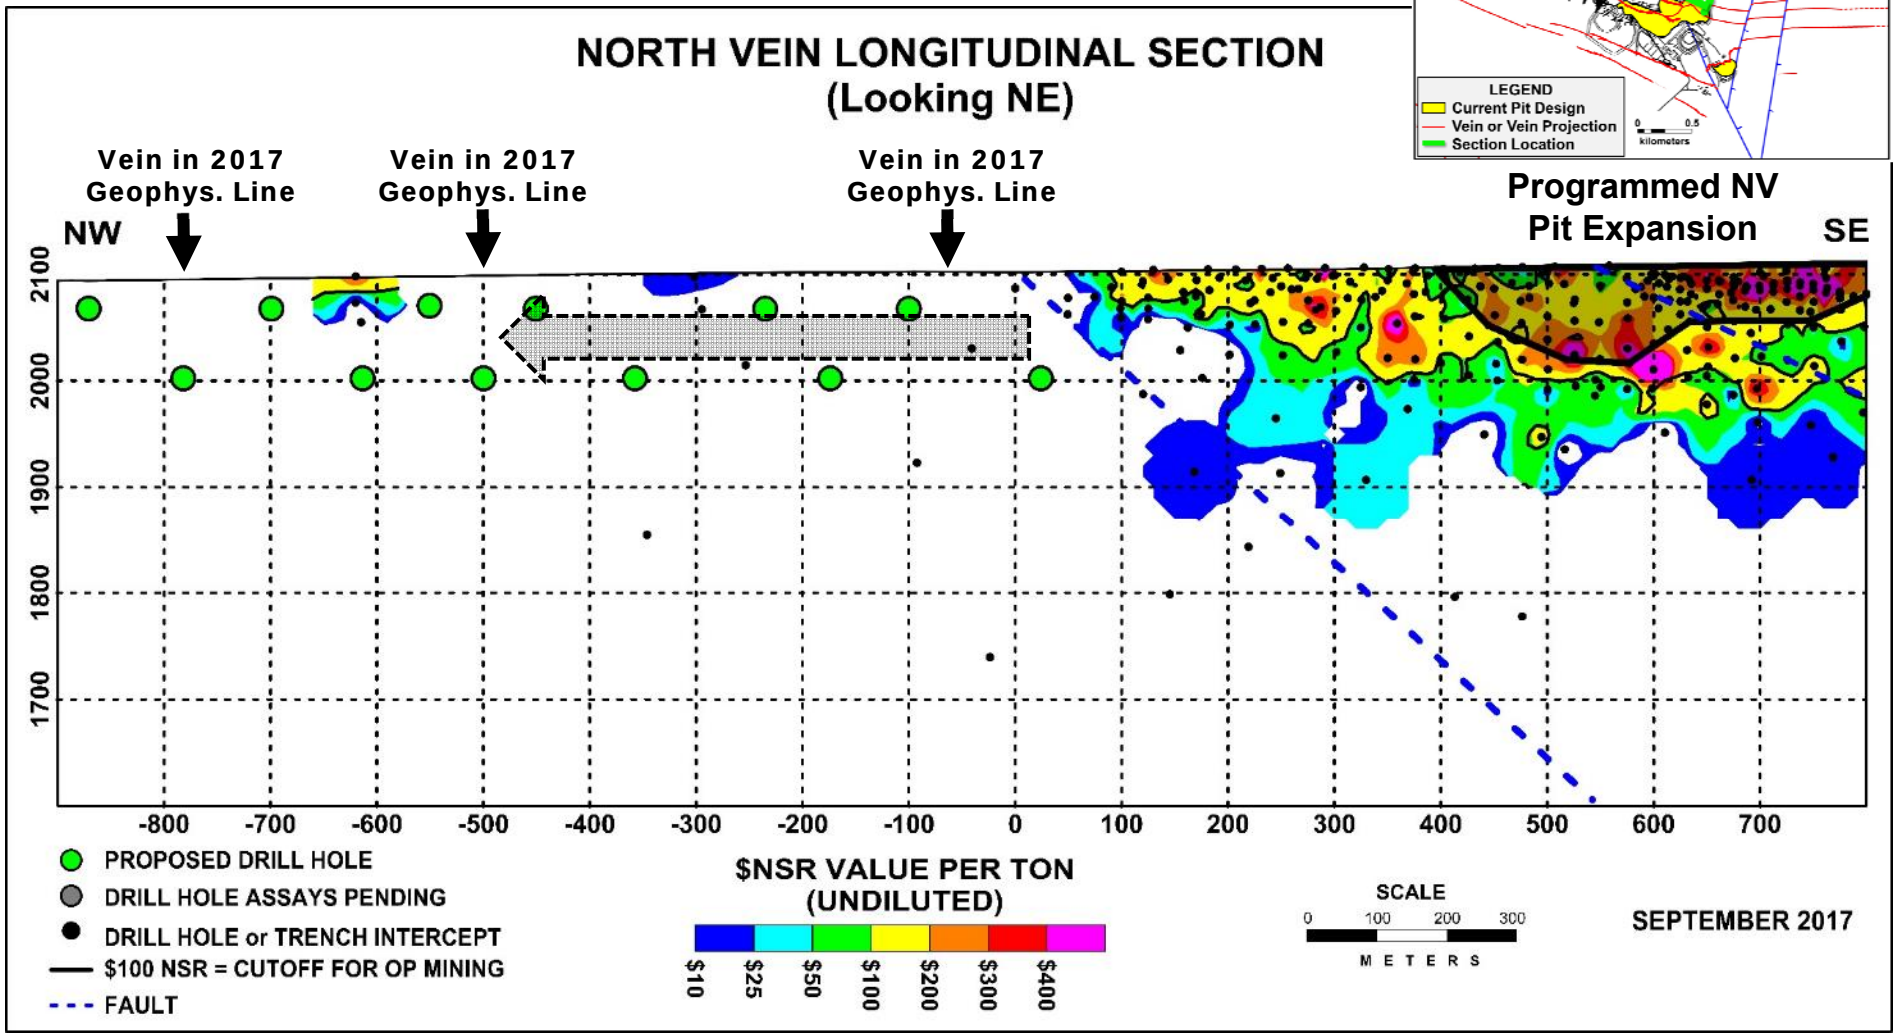

NYSE:HL

North Vein Western Extension:

Geophysical survey and trenching shows vein extensions

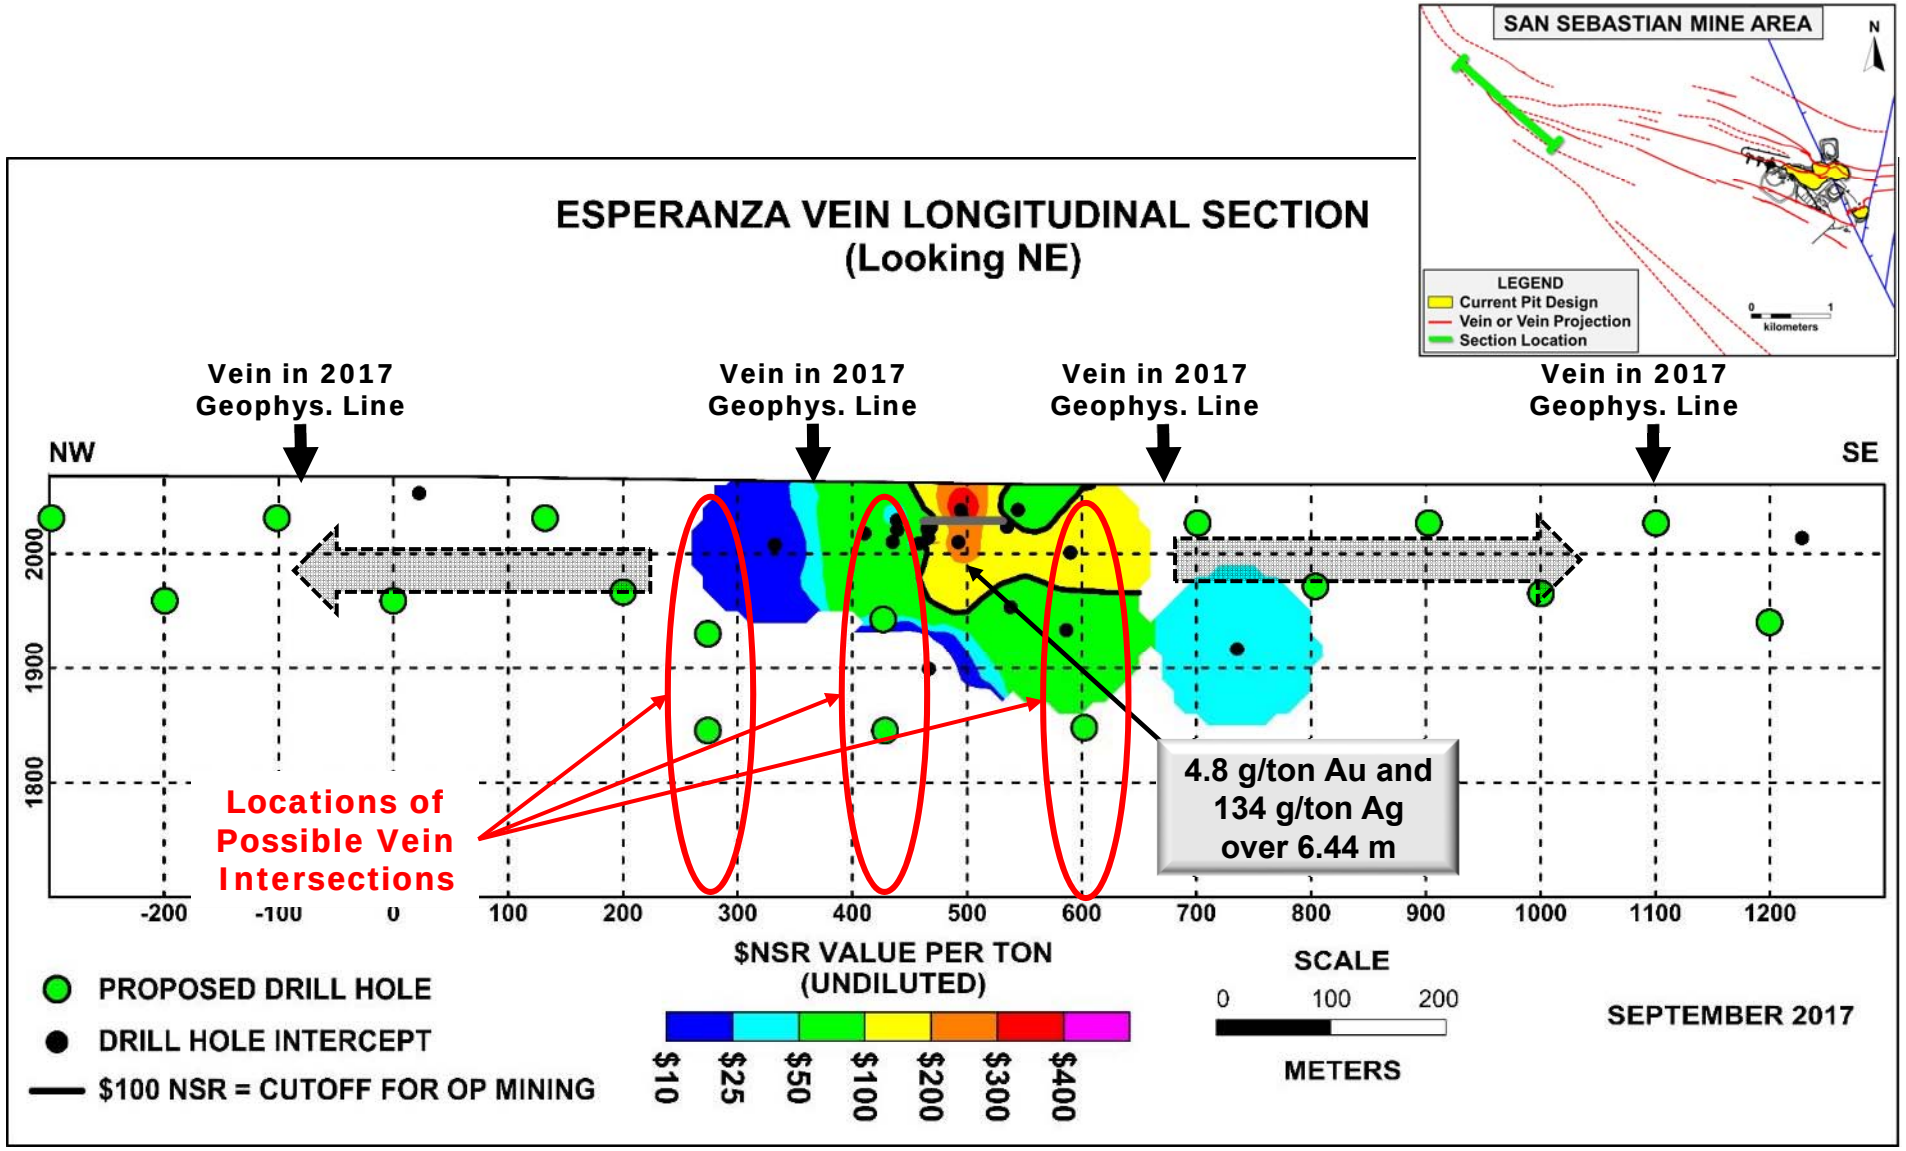

NYSE:HL

Esperanza Vein Exploration Potential:

Targeting intersections of Esperanza Vein with mine veins

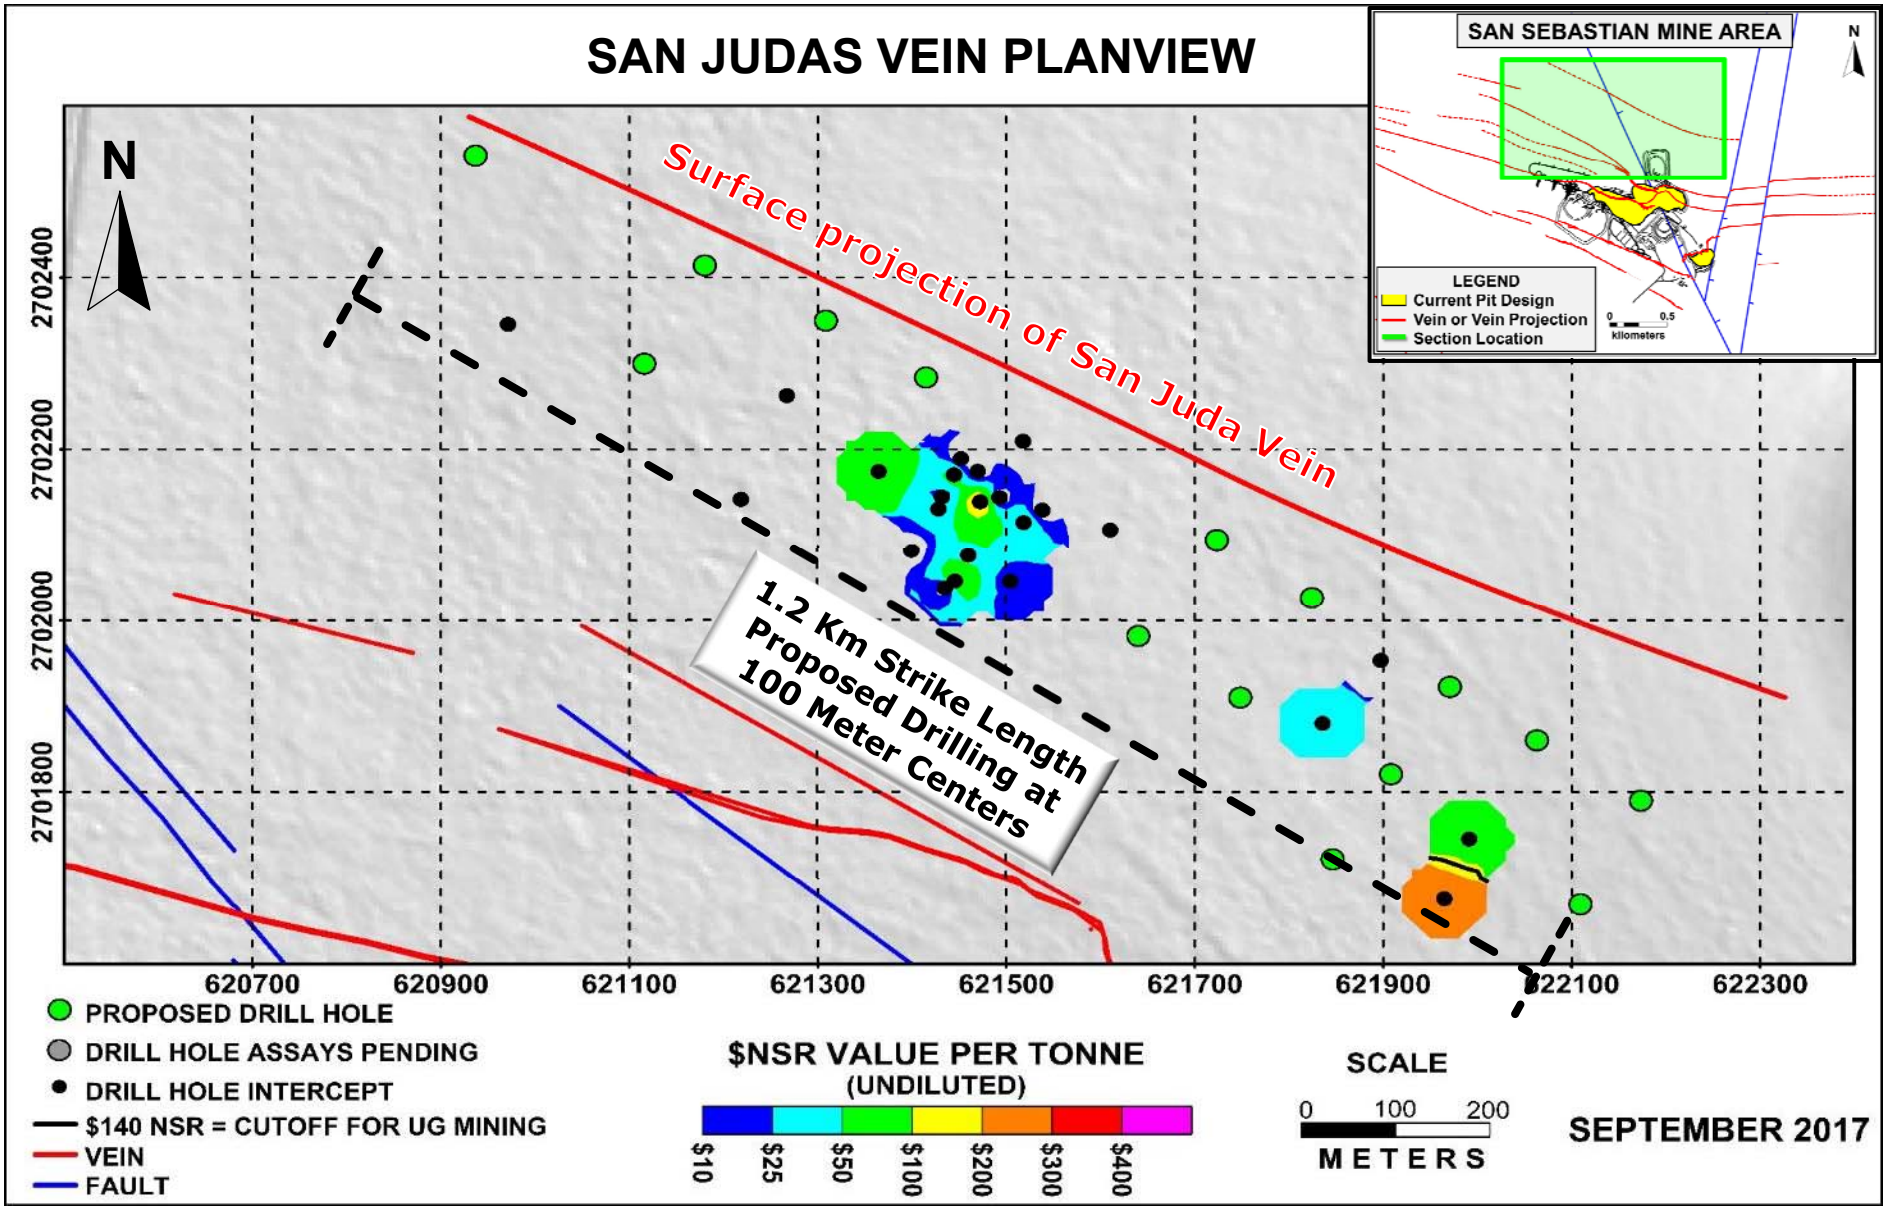

NYSE:HL

San Judas Vein Exploration Potential:

Continued drilling of recently discovered broad vein

NYSE:HL

RAMAN Temperature Thermometry:

Using temperature data to vector to mineralization

Hecla MINING COMPANY

NYSE:HL

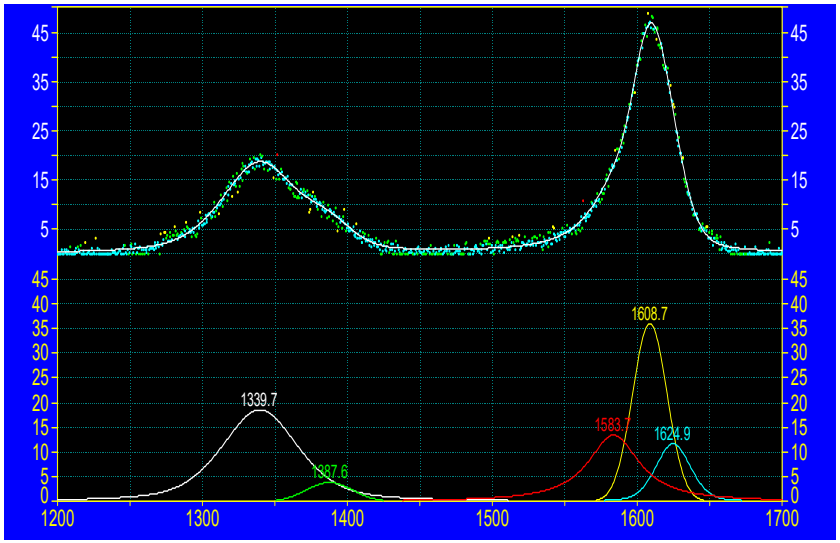

Raman Spectroscopy

- Provides temperature data to map out zones of fluid upwelling in epithermal vein systems hosted in carbonaceous rocks
- Provides a vector for source of mineralization
- Results are obtained faster and cheaper than fluid inclusion analysis

Laser beam on rock sample

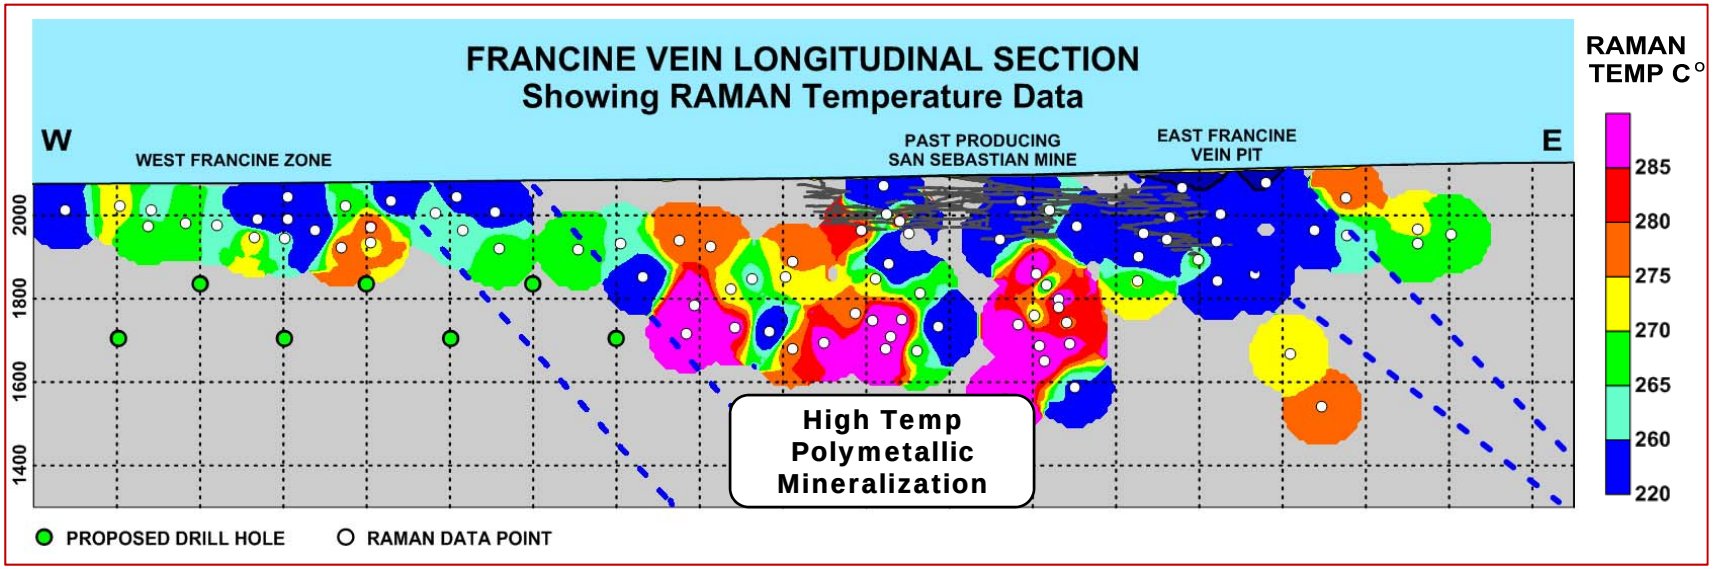

Data Processing

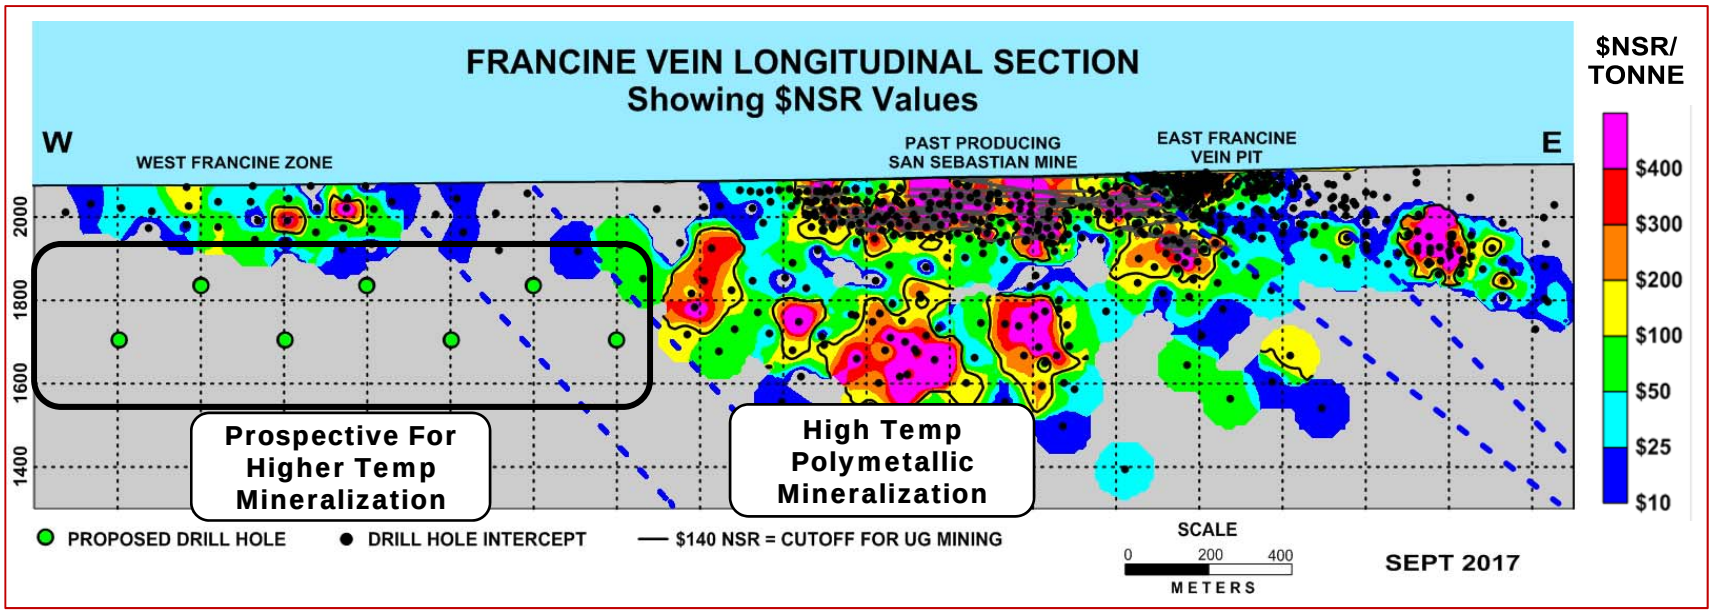

RAMAN Temperature Thermometry:

NYSE:HL

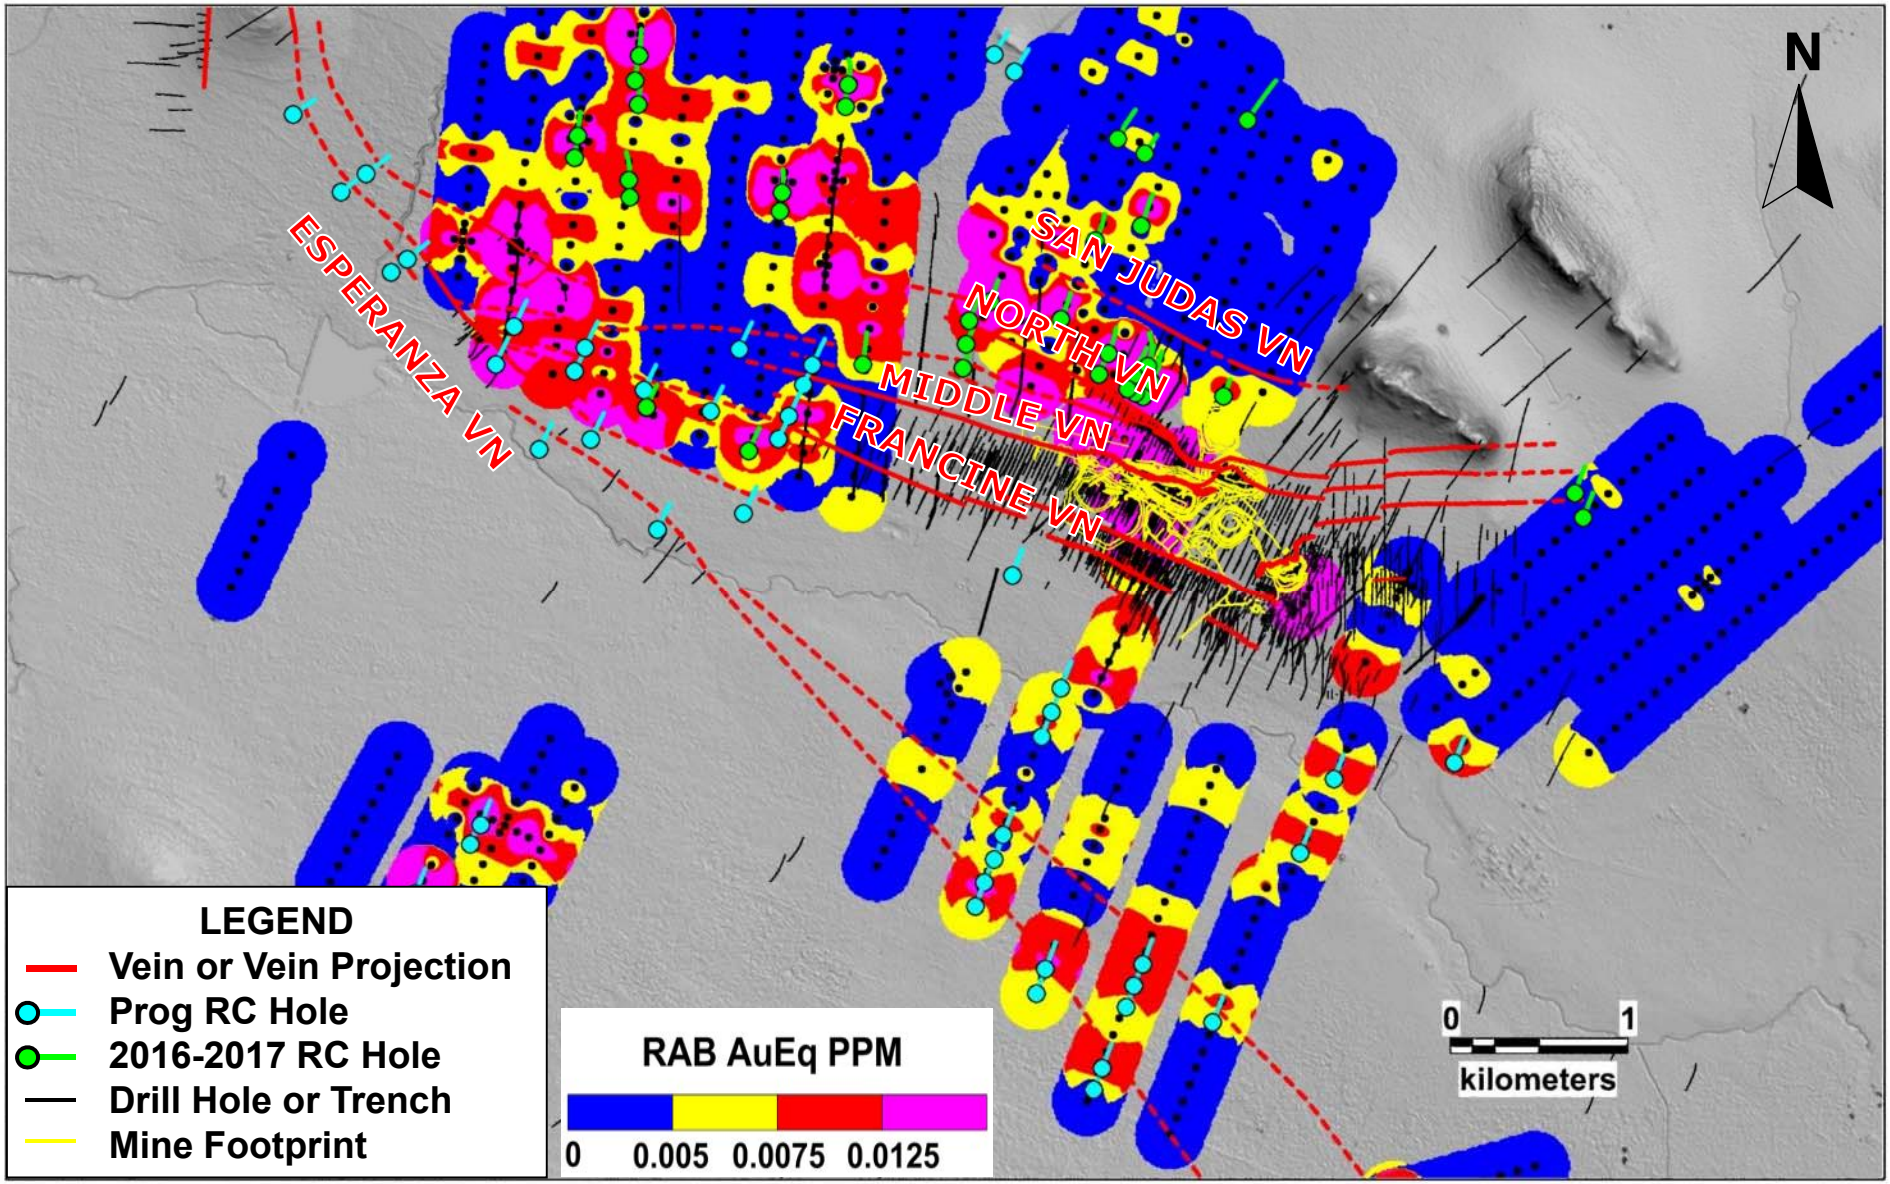

RC Drilling:

Proposed RC drilling of RAB drilling, trenching and geophysical anomalies

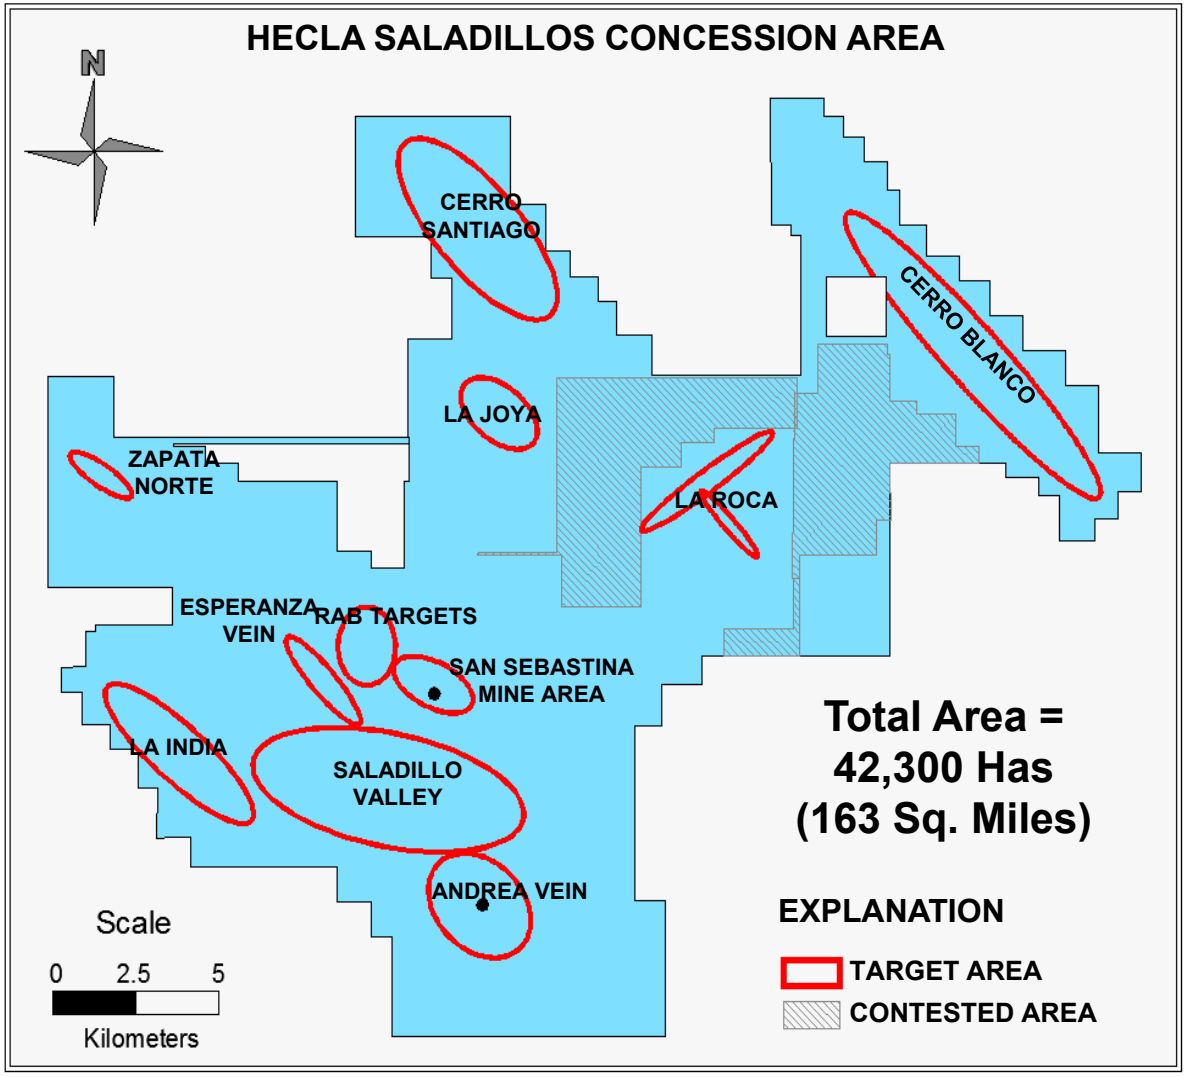

NYSE:HL

Other District Targets:

Large land package with numerous targets along regional trends

NYSE:HL

Priority Targets on land package.

- Hugh Zone west
- Andrea Vein deep (UG)
- La Roca
- RAB Veins
- Saladillo Valley
- Esperanza Vein
- Zapata Norte
- La Joya
- Cerro Santiago
- Cerro Blanco
- La India

San Sebastian – Going Forward

Drilling defining new reserves and advancing exploration on many fronts

NYSE:HL

San Sebastian

- Continued exploration along extensions of Middle, Francine and North veins.
- Drilling to confirm and expand resources at East Francine and East Middle veins to define a possible underground mining area.
- Use RAMAN spectrometry test for higher temperature base metal-bearing mineralization at depth along the Middle and West Francine veins.
- Drill other district veins, San Judas (New) and Esperanza vein.
- Continued use of RC drilling, geophysics and structural studies to identify new veins on the property.

Cautionary Statements

NYSE:HL

Cautionary Statement Regarding Forward Looking Statements,

This presentation contains "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, which are intended to be covered by the safe harbor created by such sections and other applicable laws, including Canadian Securities laws. Such forward-looking statements may include, without limitation: (i) estimates of future production and sales; (ii) estimates of future costs and cash cost, after by-product credits per ounce of silver/gold; (iii) guidance for 2017 including the impact of the Lucky Friday strike on silver and gold production, silver equivalent production, cash cost, after by-product credits, capital expenditures and pre-development and exploration expenditures (which assumes metal prices of gold at $1,225/oz., silver at $17.25/oz., zinc at $1.30/lb. and lead at $1.05/lb. and USD/CAD assumed to be $0.78, USD/MXN assumed to be $0.06); (iv) expectations regarding the development, growth and exploration potential of the Company's projects; (v) expectations of adding reserves and resources; (vi) the possibility of increasing production due to accessing higher grade material and surface pits at Casa Berardi; (vii) possible strike extensions of veins at San Sebastian, potential for new discoveries, ability to begin underground mining by the end of 2017 and ability to extend mine life through 2020; (viii) expectations of grade increases at depth at Lucky Friday and (ix) estimates or expectations of future events or results are based upon certain assumptions, which may prove to be incorrect. Such assumptions, include, but are not limited to: (i) there being no significant change to current geotechnical, metallurgical, hydrological and other physical conditions; (ii) permitting, development, operations and expansion of the Company's projects being consistent with current expectations and mine plans; (iii) political/regulatory developments in any jurisdiction in which the Company operates being consistent with its current expectations; (iv) the exchange rate for the Canadian dollar to the U.S. dollar, being approximately consistent with current levels; (v) certain price assumptions for gold, silver, lead and zinc; (vi) prices for key supplies being approximately consistent with current levels; (vii) the accuracy of our current mineral reserve and mineral resource estimates; and (viii) the Company's plans for development and production will proceed as expected and will not require revision as a result of risks or uncertainties, whether known, unknown or unanticipated. Where the Company expresses or implies an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, such statements are subject to risks, uncertainties and other factors, which could cause actual results to differ materially from future results expressed, projected or implied by the "forward-looking statements." Such risks include, but are not limited to gold, silver and other metals price volatility, operating risks, currency fluctuations, increased production costs and variances in ore grade or recovery rates from those assumed in mining plans, community relations, conflict resolution and outcome of projects or oppositions, litigation, political, regulatory, labor and environmental risks, and exploration risks and results, including that mineral resources are not mineral reserves, they do not have demonstrated economic viability and there is no certainty that they can be upgraded to mineral reserves through continued exploration. For a more detailed discussion of such risks and other factors, see the Company's 2016 Form 10-K, filed on February 23, 2017 with the Securities and Exchange Commission (SEC), as well as the Company's other SEC filings. The Company does not undertake any obligation to release publicly revisions to any "forward-looking statement," including, without limitation, outlook, to reflect events or circumstances after the date of this presentation, or to reflect the occurrence of unanticipated events, except as may be required under applicable securities laws. Investors should not assume that any lack of update to a previously issued "forward-looking statement" constitutes a reaffirmation of that statement. Continued reliance on "forward-loo king statements" is at investors' own risk.

Cautionary Note Regarding Estimates of Measured, Indicated and Inferred Resources

The United States Securities and Exchange Commission (SEC) permits mining companies, in their filings with the SEC, to disclose only those mineral deposits that a company can economically and legally extract or produce. We use certain terms in this presentation, such as "resource," "measured resources," "indicated resources," and "inferred resources" that are recognized by Canadian regulations, but that SEC guidelines generally prohibit U.S. registered companies from including in their filings with the SEC, except in certain circumstances. U.S. investors are urged to consider closely the disclosure in our most recent Form 10-K and Form 10-Q. You can review and obtain copies of these filings from the SEC's website at www.sec.gov.

Qualified Person (QP) Pursuant to Canadian National Instrument 43-101

Dean McDonald, PhD. P.Geo., Senior Vice President - Exploration of Hecla Mining Company, who serves as a Qualified Person under National Instrument 43-101("NI 43-101"), supervised the preparation of the scientific and technical information concerning Hecla's mineral projects in this presentation. Information regarding data verification, surveys and investigations, quality assurance program and quality control measures and a summary of analytical or testing procedures for the Greens Creek Mine are contained in a technical report titled "Technical Report for the Greens Creek Mine" effective date March 28, 2013, and for the Lucky Friday Mine are contained in a technical report titled "Technical Report for the Lucky Friday Mine Shoshone County, Idaho, USA" effective date April 2, 2014, for Casa Berardi are contained in a technical report titled "Technical Report on the mineral resource and mineral reserve estimate for Casa Berardi Mine, Northwestern Quebec, Canada" effective date March 31, 2014 (the "Casa Berardi Technical Report"), and for the San Sebastian Mine, Mexico, are contained in a technical report prepared for Hecla titled "Technical Report for the San Sebastian Ag-Au Property, Durango, Mexico" effective date September 8k 2015 . Also included in these four technical reports is a description of the key assumptions, parameters and methods used to estimate mineral reserves and resources and a general discussion of the extent to which the estimates may be affected by any known environmental, permitting, legal, title, taxation, socio-political, marketing or other relevant factors. Copies of these technical reports are available under Hecla's and Aurizon's profiles on SEDAR at www.sedar.com. The Casa Berardi Technical Report was reviewed by Dr. McDonald on behalf of Hecla. To the best of Hecla's knowledge, information and belief, there is no new material scientific or technical information that would make the disclosure of the mineral resources and mineral reserves for Casa Berardi in this document inaccurate or misleading.

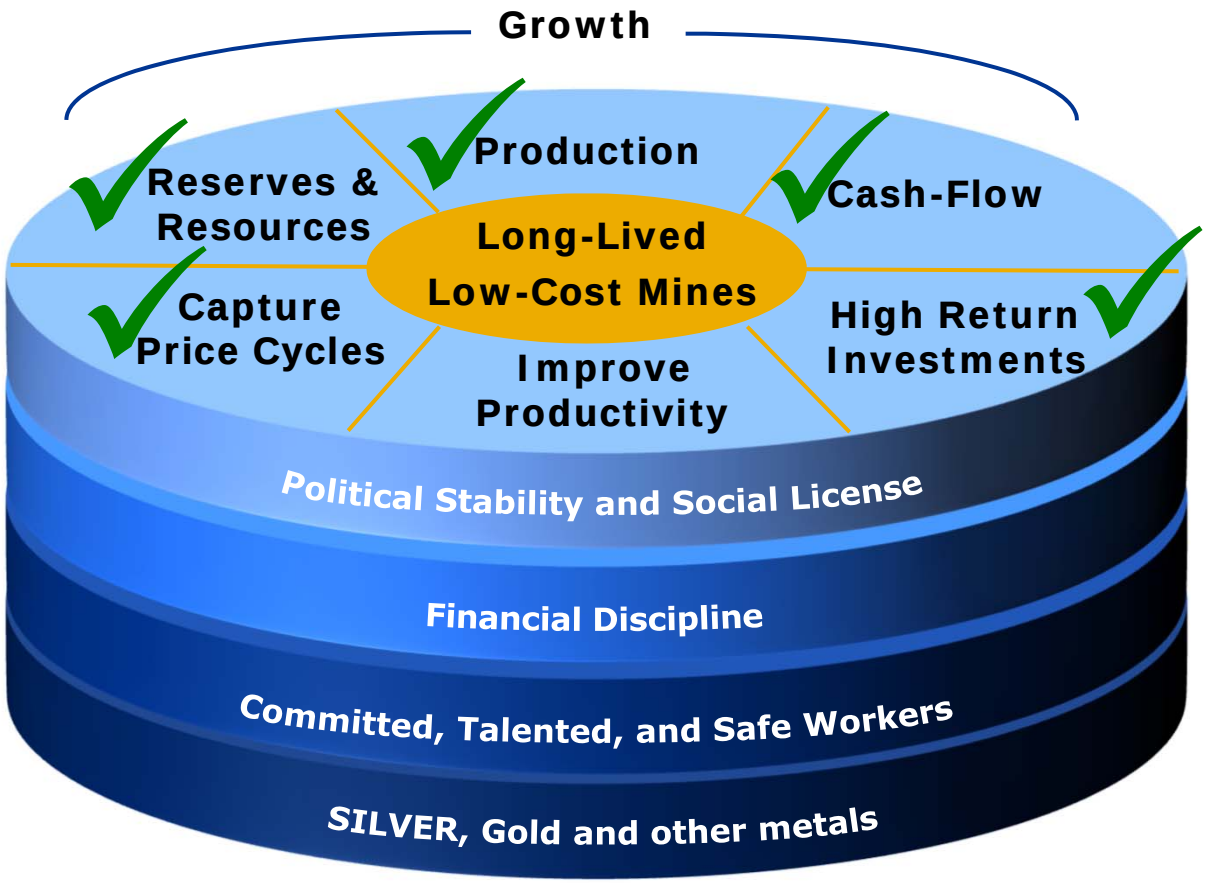

Cautionary Note Regarding Non-GAAP measures

Cash cost per ounce of silver and gold, net of by-product credits, EBITDA, adjusted EBITDA, all in sustaining capital ("AISC"), after by-product credits, and free cash flow represent non-U.S. Generally Accepted Accounting Principles (GAAP) measurements. A reconciliation of these non-GAAP measures to the most comparable GAAP measurements can be found in the Appendix.

Appendix

2017 Expectations

Expectations will be updated once Lucky Friday strike has ended

NYSE:HL

Production Outlook

	Silver Production (Moz)	Gold Production (Koz)	Silver Equivalent (Moz)[6]	Gold Equivalent (koz)[6]
Greens Creek	7.4 – 8.0	54 - 60	22.8 – 23.9	322 - 336
Lucky Friday	TBD	-	TBD	TBD
San Sebastian	3.0 – 3.4	21 -25	4.5 – 5.2	63 - 73
Casa Berardi	-	150 – 165	11.0 – 11.8	155 - 165
Total	**TBD**	**230 - 250**	**TBD**	**TBD**

Cost Outlook

	Costs of Sales (million)	Cash cost, after by-product credits, per silver / gold ounce[1]	AISC, after by-product credits, per produced silver / gold ounce[2]
Greens Creek	$228 (silver)	$2.50 (silver)	$9.50 (silver)
Lucky Friday	TBD	TBD	TBD
San Sebastian	$36 (silver)	$(0.00) (silver)	$2.00 (silver)
Total Silver	**$TBD**	**$TBD**	**$TBD**
Casa Berardi	$170 (gold)	$800.00 (gold)	$1,150 (gold)
Total Gold	**$170 (gold)**	**$800.00 (gold)**	**$1,150 (gold)**

Capital and Exploration Outlook

2017E capital expenditures[7] (excluding capitalized interest)	$TBD
2017E exploration expenditures[7] (includes corporate development)	$20-25 million
2017E pre-development expenditures[7]	$5 Million

Endnotes

1. Cash cost, after by-product credits, per silver and gold ounce represents a non-GAAP measurement, a reconciliation of which to cost of sales and other direct production costs and depreciation, depletion and amortization (sometimes referred to as "cost of sales" in this release), can be found at the end of the release. It is an important operating statistic that management utilizes to measure each mine's operating performance. It also allows the benchmarking of performance of each mines versus those of our competitors. As a primary silver mining company, management also uses the statistic on an aggregate basis - aggregating the Greens Creek, Lucky Friday and San Sebastian mines - to compare performance with that of other primary silver mining companies. With regard to Casa Berardi, management uses cash cost, after by- product credits, per gold ounce to compare its performance with other gold mines. Similarly, the statistic is useful in identifying acquisition and investment opportunities as it provides a common tool for measuring the financial performance of other mines with varying geologic, metallurgical and operating characteristics. In addition, the Company may use it when formulating performance goals and targets under its incentive program.
2. All in sustaining cost (AISC), after by-product credits, is a non-GAAP measurement, a reconciliation of which to cost of sales and other direct production costs and depreciation, depletion and amortization, the closest GAAP measurement, can be found in the appendix. AISC, after by-product credits, includes cost of sales and other direct production costs, expenses for reclamation and exploration, and sustaining capital costs at the mines sites. AISC, after by-product credits for our consolidated silver properties also includes corporate costs for all general and administrative expenses, exploration and sustaining capital which support the operating properties. AISC, after by-product credits, is calculated net of depreciation, depletion, and amortization and by-product credits. 2017E refers to Hecla's estimates for 2017. Current GAAP measures used in the mining industry, such as cost of goods sold, do not capture all the expenditures incurred to discover, develop and sustain silver and gold production. Management believes that all in sustaining costs is a non-GAAP measure that provides additional information to management, investors and analysts to help in the understanding of the economics of our operations and performance compared to other producers and in the investor's visibility by better defining the total costs associated with production. Similarly, the statistic is useful in identifying acquisition and investment opportunities as it provides a common tool for measuring the financial performance of other mines with varying geologic, metallurgical and operating characteristics. In addition, the Company may use it when formulating performance goals and targets under its incentive program.
3. This presentation refers to a non-GAAP measure of adjusted earnings before interest, taxes, depreciation and amortization ("Adjusted EBITDA"), which is a measure of our operating performance. Adjusted EBITDA is calculated as net income (loss) before the following items: interest expense, income tax provision, depreciation, depletion, and amortization expense, exploration expense, pre-development expense, acquisition costs, interest and other income (expense), foreign exchange gains and losses, gains and losses on derivative contracts, unrealized gains on investments, provisions for environmental matters, stock-based compensation, and provisional price gains and losses. Management believes that, when presented in conjunction with comparable GAAP measures, adjusted EBITDA is useful to investors in evaluating our operating performance.
4. Net debt to adjusted EBITDA is a non-GAAP measurement, a reconciliation of net debt to adjusted EBITDA to the closest GAAP measurements of net income (loss) and debt can be found at the end of the presentation. It is an important measure for management to measure relative indebtedness and the ability to service the debt relative to its peers. It is calculated as total debt outstanding less total cash on hand divided by adjusted EBITDA on a last 12-month basis.
5. Free Cash Flow is a non-GAAP measure calculated as Operating Cash Flow (GAAP) less Capex (GAAP). Cash flow conversion calculated as Free Cash Flow from mines divided by Operating Cash Flow.
6. Silver equivalent is calculated using the average market prices for the time period noted.
7. 2017E refers to Hecla's estimates for 2017.
8. Expectations for 2017 includes silver, gold, lead and zinc production from Lucky Friday, Greens Creek, San Sebastian and Casa Berardi converted using Au $1,225/oz, Ag $17.25/oz, Zn $1.30/lb, Pb $1.05/lb. May be rounded.

Items of Note

NYSE:HL

- Expect to begin depreciating the #4 Shaft in Q2
  - Total depreciation for 2017 estimated to be $143 million

- G&A increased in 2016 due to accrual for the Annual Incentive Plan and Long Term Incentive Plan based on strong performance against long-term goals and against peers

- Have begun reporting AISC on a produced (contained) basis
  - We believe it is closest to our previous disclosure and most meaningful for a concentrate producer such as Hecla

(b) Mineral resources are based on $1350 gold, $21 silver, $0.95 lead, $1.10 zinc and $3.00 copper, unless otherwise stated.

(2) Measured and indicated resources from Gold Hunter and Lucky Friday vein systems are diluted and factored for expected mining recovery.

(3) Measured, indicated and inferred resources are based on $1,350 gold and a US$/CAN$ exchange rate of 1:1.4 Underground resources are reported at a minimum mining width of 6.6 to 9.8 feet (2 m to 3 m)
Open pit mineral resources of the Principal Mine were estimated in February 2011 by BBA Inc. based on $950 gold and a US$/CAN$ exchange rate of 1:1
Technical Report on the Pre-Feasibility Study for the Casa Berardi Principal Zone Open-Pit Project, La Sarre, Quebec, February 2011
Prepared by: Patrice Live, Eng. - BBA Inc.; Amanda Fitch, Jr. Eng. - BBA Inc.; Andre Allaire, Eng., M. Eng., Ph.D. - BBA
Open pit mineral resources of the 160 Zone were estimated by InnovExplo Inc., effective date 24 August, 2011, based on $1,250 gold and a US$/CAN$ exchange rate of 1:1, Resources diluted to 12%
Preliminary Economic Assessment on the Casa Berardi Mine - Zone 160, May 4, 2012
Prepared by: Nathalie Gauthier, Eng., P.Eng., - InnovExplo; Gilles Carrier, Eng., Aurizon Mines Ltd.

(4) Indicated resources reported at a minimum mining width of 6.6 feet (2 m) for Hugh Zone and 4.9 feet (1.5 m) for Andrea Vein, Middle Vein, and North Vein. East Francine resources reported at actual vein width.
San Sebastian lead, zinc and copper grades are for 499,200 tons of indicated resource within the Hugh Zone only.

(5) Measured, indicated and inferred resources were estimated in by Goldminds Geoservices Inc. with effective date 12-July-2013, and are based on $1,300 gold and a US$/CAN$ exchange rate of 1:1.
The resources are in-situ without dilution and material loss.
NI43-101 Technical Report, Mineral Resource Update, Heva-Hosco Gold Projects, Rouyn-Noranda, Quebec, Hecla Quebec, December 2013
Prepared by: Claude Duplessis, Eng. Project Manager - GoldMinds Geoservices Inc.; Maxime Dupéré, P.Geo - SGS Canada Inc. (Geostat)

(6) Indicated resources reported at a minimum mining width of 6.0 feet for Bulldog; resources based on $26.5 Ag, $0.85 Pb, and $0.85 Zn

(7) Indicated resources reported at a minimum mining width of 4.3 feet.

(8) Inferred resources from Gold Hunter and Lucky Friday vein systems are diluted and factored for expected mining recovery.

(9) Inferred resources reported at a minimum mining width of 6.6 feet (2 m) for Hugh Zone and 4.9 feet (1.5 m) for Andrea Vein, Middle Vein, and North Vein. East Francine resources reported at actual vein width.
San Sebastian lead, zinc, and copper grades are for 1,311,300 tons of inferred resource within the Hugh Zone only.

(10) Inferred resources reported at a minimum mining width of 6.0 feet for Bulldog, 5.0 feet for Equity & North Amethyst veins; resources based on $1400 Au, $26.5 Ag, $0.85 Pb, and $0.85 Zn.

(11) Inferred resources reported at a minimum mining width of 4.3 feet.

(12) Inferred resource reported at a minimum mining width of 5.0 feet; resources based on $1400 Au, $26.5 Ag.

(13) Inferred resource reported at a minimum thickness of 15 feet; Rock Creek also contains 655,070 tons of copper at 0.7% within stated inferred resource tonnage.
Inferred resources at Rock Creek adjusted given mining restrictions as defined by U.S. Forest Service - Kootenai National Forest in the June 2003 'Record of Decision, Rock Creek Project'.

(14) Inferred resource reported at a minimum thickness of 15 feet; Montanore also contains 759,420 tons of copper at 0.7% within stated inferred resource tonnage.
Inferred resources at Montanore adjusted given mining restrictions as defined by U.S. Forest Service, Kootenai National Forest, Montana DEQ in the December 2015 'Joint Final EIS, Montanore Project' and the February 2016 U.S Forest Service - Kootenai National Forest 'Record of Decision, Montanore Project'.

Cash Cost Reconciliation to GAAP

Silver Operations

NYSE:HL

Reconciliation of Cost of Sales and Other Direct Production Costs and Depreciation, Depletion and Amortization, the most comparable GAAP measurement, After By-product Credits, per Silver Ounce for Greens Creek, Lucky Friday and San Sebastian

In thousands (except per ounce amounts)	Q2/2017	Q1/2017	Q4/2016	Q3/2016	Q2/2016
Costs of sales and other direct production costs and depreciation, depletion and amortization	$59,392	$ 65,162	$ 71,623	$ 84,413	$ 71,667
Depreciation, depletion and amortization	(14,225)	(16,438)	(18,301)	(16,181)	(16,300)
Treatment costs	11,682	18,173	21,950	20,673	20,527
Change in product inventory	(4,727)	2,736	4,013	(9,523)	2,122
Reclamation and other costs	(699)	(1,158)	(1,439)	(1,571)	(1,369)
Cash costs, before by-product credits	51,423	68,475	77,846	77,811	76,647
By-product credits	(50,698)	(65,626)	(71,322)	(61,942)	(60,578)
Cash cost, after by-product credits	$ 725	$ 2,849	$ 6,524	$ 15,869	$ 16,069
Divided by silver ounces produced	2,799	3,361	3,967	4,309	4,233
Cash cost, before by-product credits, per silver ounce	$ 18.37	$ 20.37	$ 16.62	$ 18.06	$ 18.11
By-product credits per silver ounce	$ (18.11)	$ (19.53)	$ (17.98)	$ (14.38)	$ (14.31)
Cash cost, after by-product credits, per silver ounce	$ 0.26	$ 0.84	$ 1.64	$ 3.68	$ 3.80

1. Includes all direct and indirect operating cash costs related directly to the physical activities of producing metals, including mining, processing and other plant costs, third-party refining and marketing expense, on-site general and administrative costs, royalties and mining production taxes, before by-product revenues earned from all metals other than the primary metal produced at each unit.

1. Includes all direct and indirect operating cash costs related directly to the physical activities of producing metals, including mining, processing and other plant costs, third-party refining and marketing expense, on-site general and administrative costs, royalties and mining production taxes, before by-product revenues earned from all metals other than the primary metal produced at each unit. In addition, on-site exploration, reclamation, and sustaining capital costs are also included.
2. All-in sustaining costs, before by-product credits for our consolidated silver properties includes corporate costs for all general and administrative expenses and exploration and sustaining capital which support the operating properties.
