NYSE:HL

Corporate Update

Mike Westerlund
Vice President – Investor Relations

Cautionary Statements

NYSE:HL

Cautionary Statement Regarding Forward Looking Statements.

This presentation contains "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, which are intended to be covered by the safe harbor created by such sections and other applicable laws, including Canadian securities laws. Such forward-looking statements may include, without limitation: (i) estimates of future production and sales; (ii) estimates of future costs and cash cost, after by-product credits per ounce of silver/gold; (iii) guidance for 2018, including the impact of the Lucky Friday strike on silver and gold production; silver equivalent production; cash cost and all in sustaining cost ("AISC"), after by-product credits; capital and pre-development; exploration and research and development expenditures (which assume metal prices of gold at $1,225/oz., silver at $17.25/oz., zinc at $1.30/lb. and lead at $1.00/lb. and U.S. dollar to Canadian (USD/CAD) assumed to be $0.79, U.S. Dollar to Mexican Peso (USD/MXN) assumed to be $0.06); (iv) expectations regarding the development, growth and exploration potential of the Company's projects; (v) expectations of adding reserves and resources; (vi) the possibility of increasing production due to accessing higher grade material and potentially new surface pits at Casa Berardi; (vii) possible strike extensions of veins, potential for new discoveries, and ability to extend mine life through 2020 at San Sebastian; (viii) expectations of grade increases at depth at Lucky Friday; and (ix) integration of the Nevada operations into Hecla and the ability to improve their operating characteristics. Estimates or expectations of future events or results are based upon certain assumptions, which may prove to be incorrect. Such assumptions, include, but are not limited to: (i) there being no significant change to current geotechnical, metallurgical, hydrological and other physical conditions; (ii) permitting, development, operations and expansion of the Company's projects being consistent with current expectations and mine plans; (iii) political/regulatory developments in any jurisdiction in which the Company operates being consistent with its current expectations; (iv) the exchange rate for the USD/CAD and USD/MXN, being approximately consistent with current levels; (v) certain price assumptions for gold, silver, lead and zinc; (vi) prices for key supplies being approximately consistent with current levels; (vii) the accuracy of our current mineral reserve and mineral resource estimates; and (viii) the Company's plans for development and production will proceed as expected and will not require revision as a result of risks or uncertainties, whether known, unknown or unanticipated. Where the Company expresses or implies an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, such statements are subject to risks, uncertainties and other factors, which could cause actual results to differ materially from future results expressed, projected or implied by the "forward-looking statements." Such risks include, but are not limited to gold, silver and other metals price volatility, operating risks, currency fluctuations, increased production costs and variances in ore grade or recovery rates from those assumed in mining plans, community relations, conflict resolution and outcome of projects or oppositions, litigation, political, regulatory, labor and environmental risks, and exploration risks and results, including that mineral resources are not mineral reserves, they do not have demonstrated economic viability and there is no certainty that they can be upgraded to mineral reserves through continued exploration. For a more detailed discussion of such risks and other factors, see the Company's 2017 Form 10-K, filed on February 15, 2018, and Quarterly Report on Form 10-Q filed on May 10, 2018, with the Securities and Exchange Commission (SEC), as well as the Company's other SEC filings. The Company does not undertake any obligation to release publicly revisions to any "forward-looking statement," including, without limitation, outlook, to reflect events or circumstances after the date of this presentation, or to reflect the occurrence of unanticipated events, except as may be required under applicable securities laws. Investors should not assume that any lack of update to a previously issued "forward-looking statement" constitutes a reaffirmation of that statement. Continued reliance on "forward-looking statements" is at investors' own risk.

Cautionary Note Regarding Estimates of Measured, Indicated and Inferred Resources

The SEC permits mining companies, in their filings with the SEC, to disclose only those mineral deposits that a company can economically and legally extract or produce. We use certain terms in this presentation, such as "resource," "measured resources," "indicated resources," and "inferred resources" that are recognized by Canadian regulations, but that SEC guidelines generally prohibit U.S. registered companies from including in their filings with the SEC, except in certain circumstances. U.S. investors are urged to consider closely the disclosure in our most recent Form 10-K and Form 10-Q. You can review and obtain copies of these filings from the SEC's website at www.sec.gov.

Qualified Person (QP) Pursuant to Canadian National Instrument 43-101

Dean McDonald, PhD. P.Geo., Senior Vice President - Exploration of Hecla Mining Company, who serves as a Qualified Person under National Instrument 43-101("NI 43-101"), supervised the preparation of the scientific and technical information concerning Hecla's mineral projects in this presentation, including with respect to the newly acquired Nevada projects. Information regarding data verification, surveys and investigations, quality assurance program and quality control measures and a summary of analytical or testing procedures for the Greens Creek Mine are contained in a technical report titled "Technical Report for the Greens Creek Mine" effective date March 28, 2013, and for the Lucky Friday Mine are contained in a technical report titled "Technical Report for the Lucky Friday Mine Shoshone County, Idaho, USA" effective date April 2, 2014, for Casa Berardi are contained in a technical report titled "Technical Report on the mineral resource and mineral reserve estimate for Casa Berardi Mine, Northwestern Quebec, Canada" effective date March 31, 2014 (the "Casa Berardi Technical Report"), and for the San Sebastian Mine, Mexico, are contained in a technical report prepared for Hecla titled "Technical Report for the San Sebastian Ag-Au Property, Durango, Mexico" effective date September 8, 2015 . Also included in these four technical reports is a description of the key assumptions, parameters and methods used to estimate mineral reserves and resources and a general discussion of the extent to which the estimates may be affected by any known environmental, permitting, legal, title, taxation, socio-political, marketing or other relevant factors. Information regarding data verification, surveys and investigations, quality assurance program and quality control measures and a summary of sample, analytical or testing procedures for the Fire Creek Mine are contained in a technical report prepared for Klondex Mines, dated November 30, 2017, amended March 2, 2018; the Hollister Mine dated May 31, 2017, amended August 9, 2017; and the Midas Mine dated August 31, 2014, amended April 2, 2015. Copies of these technical reports are available under Hecla's and Klondex's profiles on SEDAR at www.sedar.com.

Dr. McDonald reviewed and verified information regarding drill sampling, data verification of all digitally-collected data, drill surveys and specific gravity determinations relating to the Casa Berardi mine. The review encompassed quality assurance programs and quality control measures including analytical or testing practice, chain-of-custody procedures, sample storage procedures and included independent sample collection and analysis. This review found the information and procedures meet industry standards and are adequate for Mineral Resource and Mineral Reserve estimation and mine planning purposes.

Cautionary Note Regarding Non-GAAP measures

Cash cost per ounce of silver and gold, net of by-product credits, EBITDA, adjusted EBITDA, AISC, after by-product credits, and free cash flow represent non-U.S. Generally Accepted Accounting Principles (GAAP) measurements. A reconciliation of these non-GAAP measures to the most comparable GAAP measurements can be found in the Appendix.

Our Strategy Works In Every Price Environment

Three ways for shareholders to benefit

Hecla MINING COMPANY

NYSE:HL

- **To invest in long-lived, low-cost (both operating and capital) assets where we see the potential to improve the operations, making them safer, lowering the cost or extending the life further**
  - Each mine is expected to have consistent safe operations that are net cashflow positive
  - Low-capital, high-return investments improve throughput & recoveries, automate tasks requiring fewer new employees
  - Invest in jurisdictions where a long-life is feasible
  - Diversify revenue sources and hedge base metals when prices are higher and monetize when prices fall
  - Don't over-leverage

- **Three ways for our shareholders to benefit**
  - Find more ounces so Hecla can produce more for longer
  - Produce higher margin ounces with higher throughput or lower costs
  - Capture a higher price environment

- **The strategy works well in the current price environment**
  - Only company with silver reserves calculated at $14.50/oz, generating $3+ more margin per ounce than peers
  - Greens Creek has generated substantial free cash flow every year for over two decades
  - Casa Berardi and San Sebastian are consistently generating free cash flow
  - Doubling throughput and automation at Casa Berardi is generating returns
  - Nevada acquisition is about Fire Creek and Hatter Graben with low margin Midas mine shut down
  - Debt to Adj. EBITDAX* of 2.13

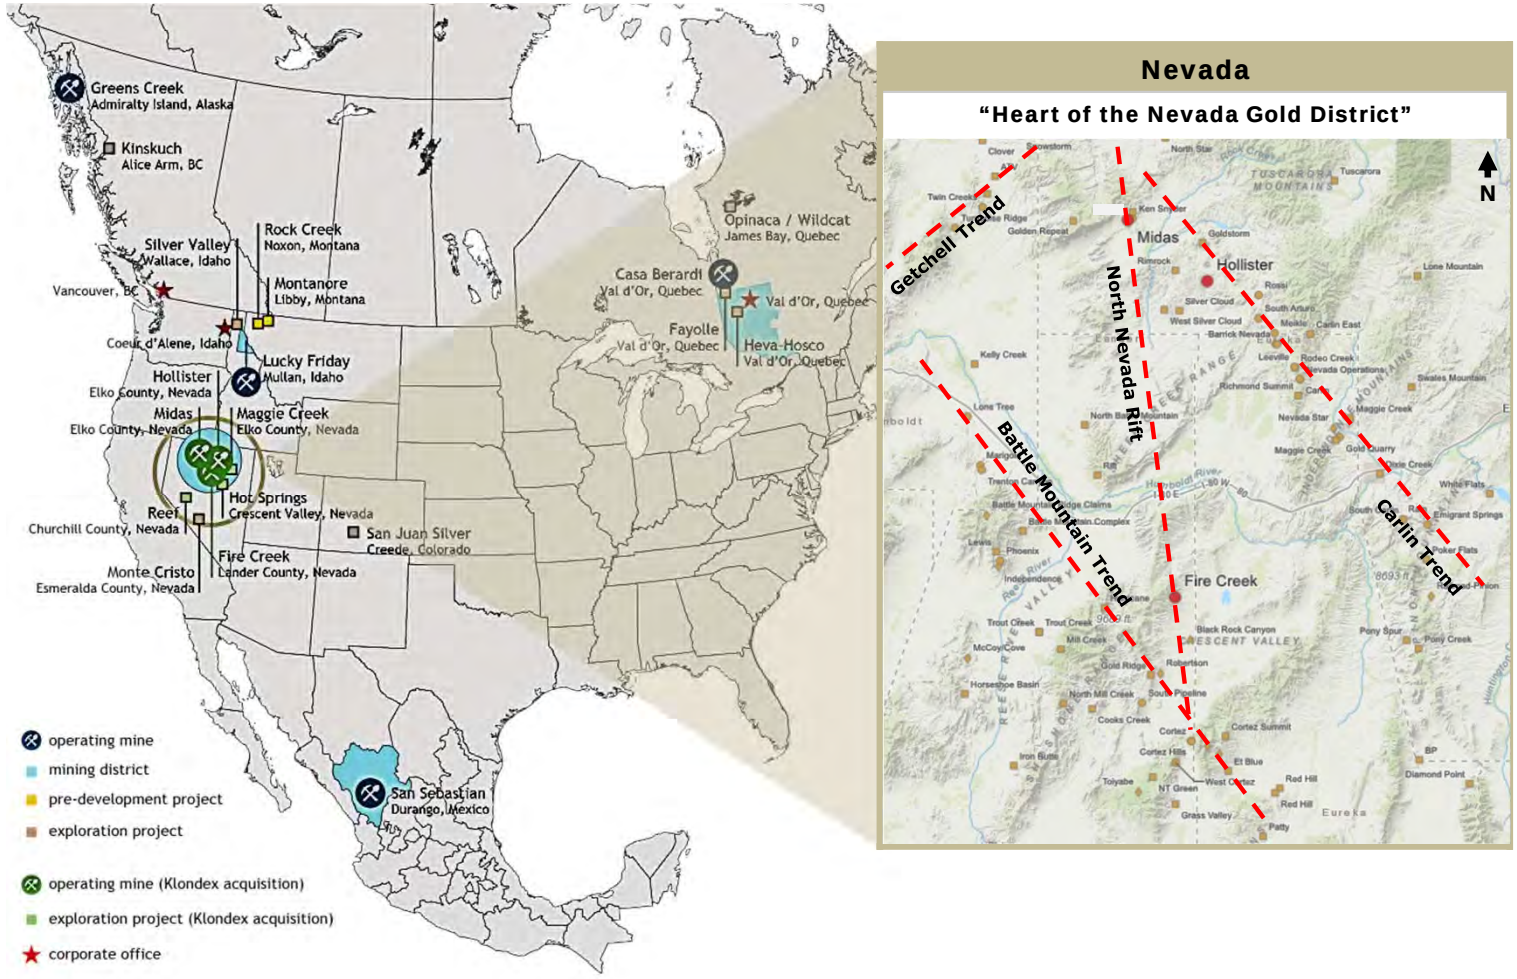

*Adjusted EBITDA is a non-GAAP measure; please refer to appendix for reconciliation to GAAP.

Portfolio of Long-Lived Quality Assets

Growing presence in Nevada

Hecla MINING COMPANY

NYSE:HL

Acquisition of the Nevada Assets: 2018 Plan

Focus on improving operations, investing in the mines

Hecla MINING COMPANY
NYSE:HL

Integrated Nevada operations:

- All operations now report to a single VP and GM, Kevin Shiell
- Creating a unified mine plan for the mines feeding the Midas Mill
- Priority is ramping up production at Fire Creek to target of 550 tpd from 350 tpd (57% increase) and beginning development of Hatter Graben. Midas is ramped down with personnel and machines moving to Hollister and Fire Creek

Midas mill priorities:

- Completion of the CIL circuit to improve recoveries for processing Hollister ore
- Installation of a new sampling equipment to better reconcile mill and mine reporting
- Construction of the new tailings facility

The key focus for Fire Creek:

- Rehabilitate existing mine access, then increase development advance rate from 10 to target of 15,000 feet per year, then ramp-up of tons-per-day of ore produced
- Rehabilitation to include improving road conditions and introducing in-cycle shotcreting
- Improving mine to mill reconciliation

Culture of Innovation Drives Productivity Improvements

Technology and best practices to be leveraged across Klondex' assets

Hecla MINING COMPANY
NYSE:HL

Autonomous Haulage in Operation at Casa Berardi

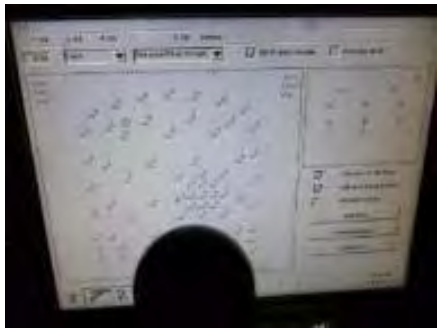

- 24-hour truck operation drives cost savings
- Increases utilization
- Increases safety
- Expect ~$3mm per year in cost savings from 2 trucks

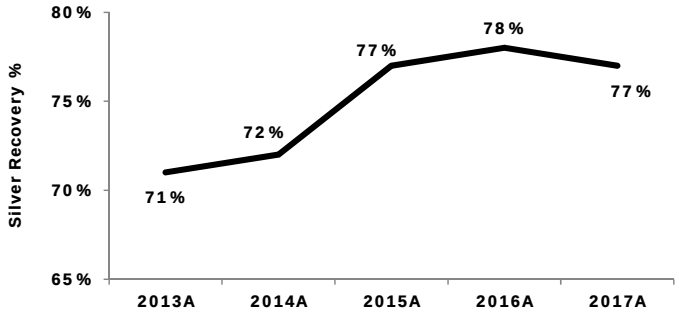

Jumbo/Stope Drill Automation: Drilling During Shift Change

- Adds 15 meters/day
- Increased drift stability
- Increased drilling accuracy
- 2 automated drills in operation
- 1 stope drill

Recovery Improvements at Greens Creek

Improvements driven by:
- CO2 used to control PH in mill
- Lead scalping process

Ventilation on Demand and Teleremote LHD

- Ventilation system drives expected ~$1mm/year in cost savings at Greens Creek
- One operator can run up to 3 machines from the same station

Appendix

Midas

San Sebastian

Lucky Friday

Greens Creek

Fire Creek

Hollister

Casa Berardi

Hecla's Track Record of Adding Value

An extensive history of optimizing assets

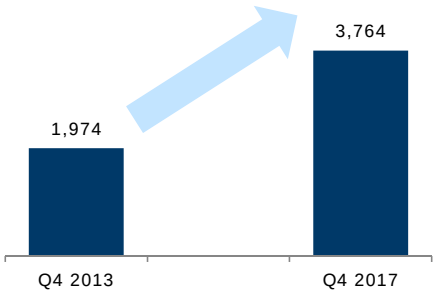

NYSE:HL

Casa Berardi

Operational enhancements and mill optimization

- Throughput has increased by 91% since Q4 2013
- Open pit mining increased operational flexibility providing ability to keep the mill full
- Investing in productivity improvements and automation
- Strong exploration results since Q4 2013, reserves have increased by 7.2% to 1,494 koz Au

+91% throughput (Tons per day)

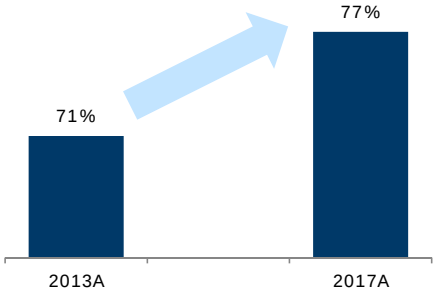

Greens Creek

Increased recoveries / low cost production

- Increased average silver recovery by 6%
- Consistent low-cost production
- Tele-remote mucking has increased productivity
- Adding shallow mineralization to enhance economics
- Maintained reserves over 10 years of ownership

+6% silver recoveries

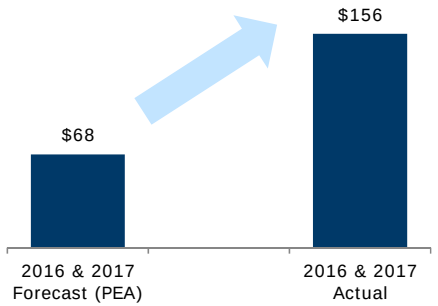

San Sebastian

Prudent, high impact capital differentiated mining model

- Only $4 million in capital required to restart the mine with a forecasted IRR of 1,000%+
- Reduced costs by renting third party mill and using contract mining (secured through 2020)
- ~$156 million in operating cash flow after years 1 & 2 (2016 & 2017) which exceeded PEA expectations of $68 million by +129%
- Increased mine life from 1.5 years to more than 5. Likely to increase another 5 years with sulphide deposit

+129% operating cash flow

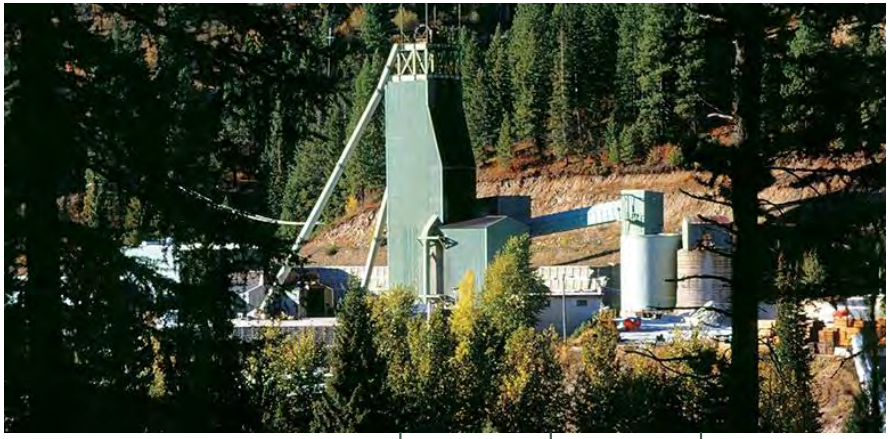

Source: Company disclosure.

Roadmap for Further Growth and Value Creation

Hecla MINING COMPANY

NYSE:HL

Strong Operating Portfolio

Mine Portfolio

- Portfolio of high quality, producing, precious metals mines in mining friendly jurisdictions
- Expected production of 539k – 581k AuEq ounces in 2018
- Operate the Nevada operations as one cohesive unit

Robust Near Term Growth

Fire Creek Ramp UP

- Production to reach 550 tpd from 350 tpd in 2019

New Open Pits at Casa Berardi

- Production continues to increase from the open pits with significant extensions to mine life possible

Polymetallic Zone at San Sebastian

- Middle and Francine veins could extend mine life by 5-10 years
- Third-party mill secured, could allow concurrent oxide and sulphide production, boosting production and cash flow. Bulk sample in late 2018.

Lucky Friday Remote Vein Miner

- Arriving late 2019, commissioning to take place in 2020
- Will improve safety and has the opportunity to increase productivity

Longer Term Development

Fire Creek Mine Plan

- Potential for significant upside and increased production through developing Fire Creek to the north, Zeus and North veins

Rock Creek & Montanore

- Attractive opportunities that should come into focus as they move into feasibility stage

Hollister's Hatter Graben

- Potential to extend mine life and improve costs through the Hatter Graben deposit

Heva-Hosco

- Hosts >3 Moz of M&I Resources along the Cadillac break

Exploration Portfolio

- Existing mines
- Kinskuch, Little Baldy, San Juan, Monte Cristo, Opinaca/Wildcat, Lac Germain, Republic

Hecla has an industry leading platform of operating assets and a robust pipeline of future growth prospects

Gold Production (Koz)	50.8	12.7	**13.7**	50-55
Cost of Sales	$201.8 M	$54.3 M	**$47.7 M**	$198 M
Cash cost, after by-product credits, per silver oz[2]	$0.71/oz	$1.86/oz	**$(3.47)/oz**	$(0.50)/oz
AISC, after by-product Credits, per silver oz[3]	$5.76/oz	$8.71/oz	**$4.43/oz**	$7.00/oz

2018E Sustaining Capital	$51 M
FCF 2017[4]	CF from operating activities of $136.7 M (GAAP) less capital expenditures of $35.3 M resulted in **$101.4 M FCF** (non-GAAP).
FCF To YE 2017	CF from operating activities of $2 billion (GAAP) less capital expenditures of $823 M resulted in **~$1.2 billion FCF** (non-GAAP).

Greens Creek

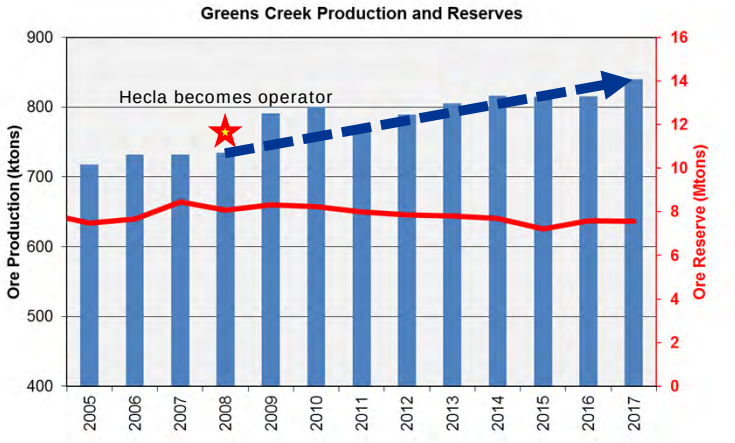

Significant improvement in performance since Hecla became operator

NYSE:HL

Cumulative Net Cash Flow

Greens Creek throughput has grown 14% since purchase in 2008

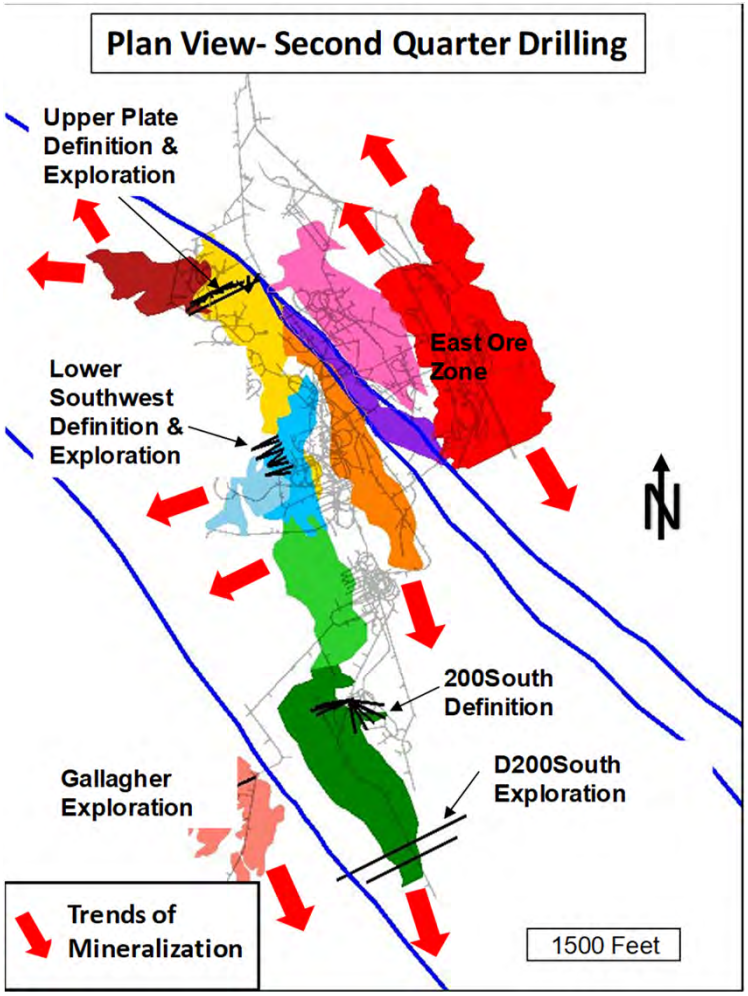

- Automation drive beginning in 2017 leads to further efficiencies
- Consistent exploration success enables reserves to be maintained

Greens Creek - Adding to the Known Trends

Drilling expected to continue to convert resources into reserves

Hecla MINING COMPANY
NYSE:HL

Casa Berardi

Making a good mine great

NYSE:HL

	2017	Q2 2017	Q2 2018	2018E
Gold Production (Koz)	156.7	33.3	**42.7**	157-162
Cost of Sales	$180.2 M	$43.7 M	**$51.7 M**	$185 M
Cash cost, after by-product credits, per gold oz[2]	$820/oz	$972/oz	**$775/oz**	$800/oz
AISC, after by-product credits, per gold oz[3]	$1,174/oz	$1,373/oz	**$1,039/oz**	$1,100/oz

2018E Sustaining Capital	$45 M
FCF 2017[4]	CF from operating activities of $69.8 M (GAAP) less capital expenditures of $50.7 M resulted in **$19.1 M FCF** (non-GAAP).
2P Reserves	1.5 Moz gold @ 0.11 oz/t gold
M+I Resources	1.4 Moz gold @ 0.10 oz/t gold

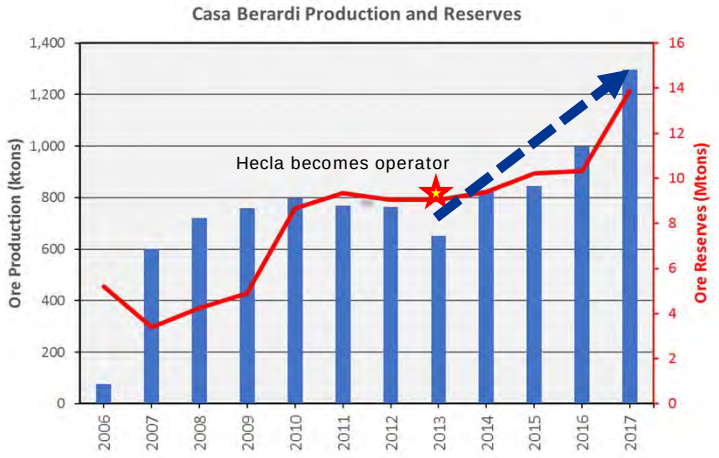

2017	Underground	Open Pit
Tons Milled	805,047	491,177
Gold Grade (oz/t)	0.170	0.089
Gold Production	118,739 oz	37,914 oz

Growing Production and Reserves

Aggressive exploration adds to reserve and resource base

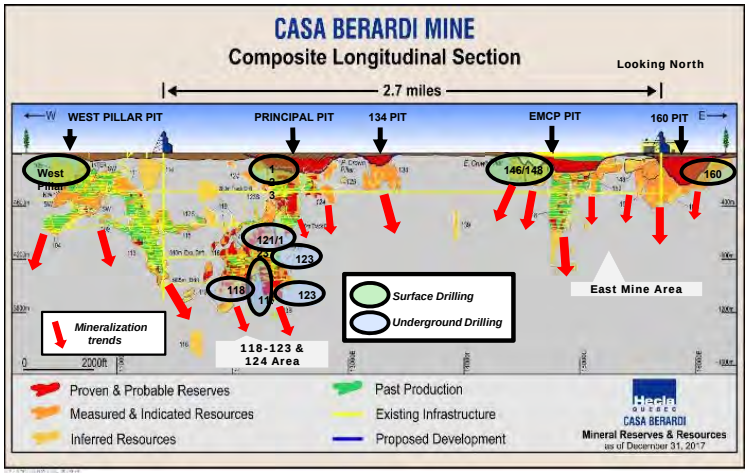

NYSE:HL

Casa Berardi throughput and reserves have grown 69% and 53% since purchase in 2013

- Successfully stabilized, then increased throughput rates since becoming operator
- Began surface open-pit mining in 2016
- Consistent exploration success enables reserves to increase

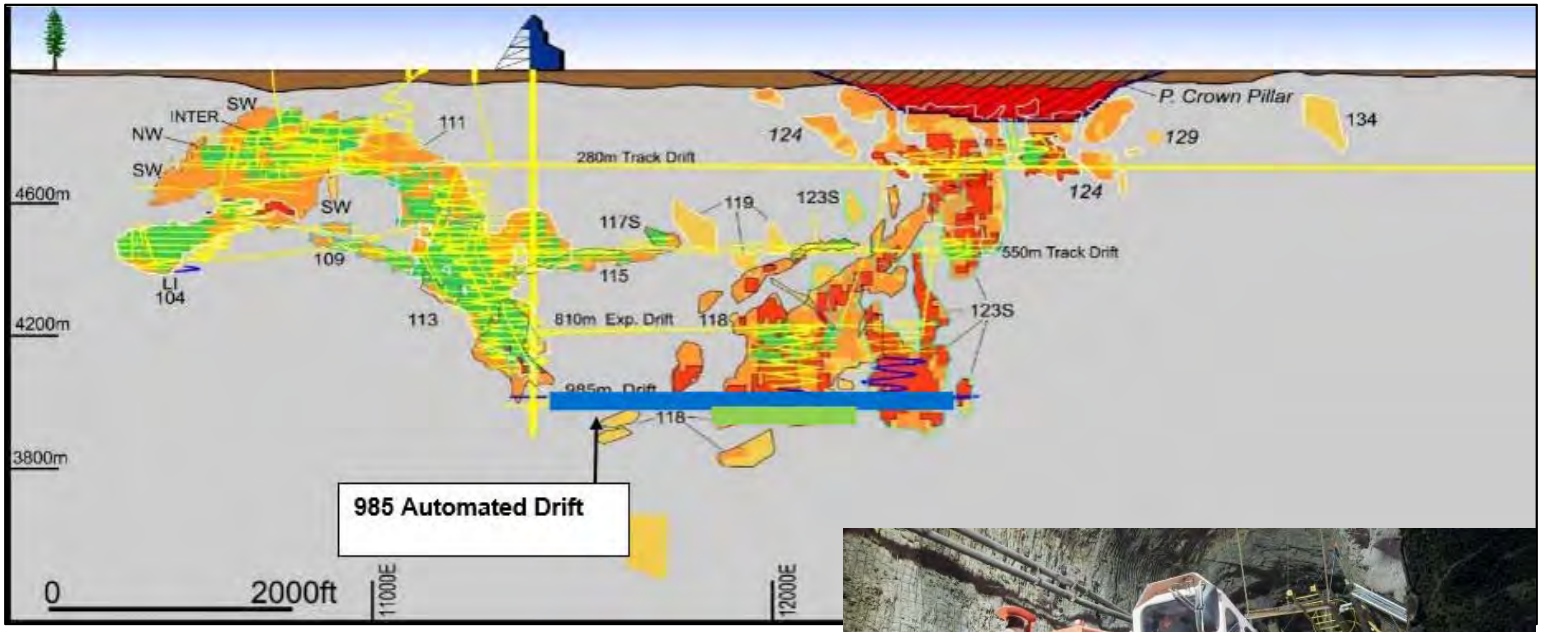

Casa Berardi Longitudinal Section

985 Drift Autonomous Haulage In Operation

Truck runs 24 hours a day; cost savings expected

Loading 40-tonne autonomous Sandvik truck

Casa Berardi – Expansion of Mineralized Trends

High-grade mineralized trends extended with surface and underground drilling

NYSE:HL

Rock Creek & Montanore

Final stages of permitting, expecting to advance in 2018

Hecla MINING COMPANY

NYSE:HL

Mine overview

- Montanore, a silver-copper mine located in Libby, Montana, was acquired from Mines Management in 2016
- Rock Creek, a silver-copper mine located in Noxon, Montana, was acquired from Revett in 2015
- Both projects are in the final stages of permitting, and are expected to advance to exploration upon approval

Impact on Resources

- Although assigned nominal value today, these projects represent meaningful upside for Hecla as they progress through feasibility

Combined, the projects are as large as Hecla's current reserves

Rock Creek Site Overview

Project Overview

Metric	Rock Creek	Montanore
Potential Mine Life	20 – 30 Years each	
Hecla Stock Acquisition Cost	$19 M	$54 M
Advanced Permitting	SEIS	Final EIS, RODs*
Well Located	50 miles from Lucky Friday	
Land Position	Great Exploration Potential	

** Record of Decision

A Further Transformation of Hecla

Consistent with strategy and expertise

Hecla MINING COMPANY
NYSE:HL

- ✓ **Now with seven large land positions located in Alaska, Quebec, Nevada, Mexico and Idaho which are some of the safest and most prolific mining jurisdictions in the world**
- ✓ **Proven operational excellence to be leveraged across expanded portfolio of high-grade mines**
- ✓ **Well capitalized pro-forma company with strong cash flow and solid balance sheet**
- ✓ **Significant production base with significant growth opportunities and cost reduction potential**
- ✓ **Attractive commodity diversification with a focus on precious metals**

Endnotes

1. Cost of sales and other direct production costs and depreciation, depletion and amortization.
2. Cash cost, after by-product credits, per silver and gold ounce represents a non-GAAP measurement, a reconciliation of which to cost of sales and other direct production costs and depreciation, depletion and amortization (sometimes referred to as "cost of sales" in this release), can be found in the Appendix. It is an important operating statistic that management utilizes to measure each mine's operating performance. It also allows the benchmarking of performance of each mines versus those of our competitors. As a primary silver mining company, management also uses the statistic on an aggregate basis - aggregating the Greens Creek, Lucky Friday and San Sebastian mines - to compare performance with that of other primary silver mining companies. With regard to Casa Berardi, management uses cash cost, after by- product credits, per gold ounce to compare its performance with other gold mines. Similarly, the statistic is useful in identifying acquisition and investment opportunities as it provides a common tool for measuring the financial performance of other mines with varying geologic, metallurgical and operating characteristics. In addition, the Company may use it when formulating performance goals and targets under its incentive program.
3. All in sustaining cost (AISC), after byproduct credits, is a non-GAAP measurement, a reconciliation of which to cost of sales and other direct production costs and depreciation, depletion and amortization, the closest GAAP measurement, can be found in the appendix. AISC, after by-product credits, includes cost of sales and other direct production costs, expenses for reclamation and exploration, and sustaining capital costs at the mines sites. AISC, after by-product credits for our consolidated silver properties also includes corporate costs for all general and administrative expenses, exploration and sustaining capital which support the operating properties. AISC, after by-product credits, is calculated net of depreciation, depletion, and amortization and by-product credits. 2018E refers to Hecla's estimates for 2018. Current GAAP measures used in the mining industry, such as cost of goods sold, do not capture all the expenditures incurred to discover, develop and sustain silver and gold production. Management believes that all in sustaining costs is a non-GAAP measure that provides additional information to management, investors and analysts to help in the understanding of the economics of our operations and performance compared to other producers and in the investor's visibility by better defining the total costs associated with production. Similarly, the statistic is useful in identifying acquisition and investment opportunities as it provides a common tool for measuring the financial performance of other mines with varying geologic, metallurgical and operating characteristics. In addition, the Company may use it when formulating performance goals and targets under its incentive program.
4. Free Cash Flow is a non-GAAP measure calculated as Operating Cash Flow (GAAP) less Capex (GAAP). Cash flow conversion calculated as Free Cash Flow from mines divided by Operating Cash Flow.
5. Silver and gold equivalent is calculated using the average market prices for the time period noted.
6. Expectations for 2018 includes silver, gold, lead and zinc production from Lucky Friday, Greens Creek, San Sebastian and Casa Berardi converted using Au $1,225/oz, Ag $17.25/oz, Zn $1.30/lb, Pb $1.00/lb.
7. 2018E refers to Hecla's estimates for 2018.

Cash Cost and AISC Reconciliation to GAAP

Silver Operations

Hecla MINING COMPANY
NYSE:HL

Reconciliation of Cost of Sales and Other Direct Production Costs and Depreciation, Depletion and Amortization (GAAP) to Cash Cost, Before By-product Credits and Cash Cost, After By-product Credits (non-GAAP) and All-In Sustaining Costs, Before By-product Credits, per Ounce and All-In Sustaining Costs, After By-product Credits, per Ounce (non-GAAP)

In thousands (except per ounce amounts)

	Q2 2018	Q2 2017
Cost of sales and other direct production costs and depreciation, depletion and amortization (GAAP)	$ 60,562	$ 59,392
Depreciation, depletion and amortization	(13,102)	(14,225)
Treatment costs	9,652	11,682
Change in product inventory	(70)	(4,727)
Reclamation and other costs	(826)	(669)
Exclusion of Lucky Friday costs	(399)	-
Cash Cost, Before By-product Credits(1)	55,817	51,423
Reclamation and other costs	953	784
Exploration	3,546	3,526
Sustaining capital	16,380	12,522
General and administrative	9,787	10,309
AISC, Before By-product Credits(1,2)	86,483	78,594
Total By-product credits	(57,287)	(50,698)
Cash Cost, After By-product Credits, per Silver Ounce	$ (1,470)	$ 725
AISC, After By-product Credits	$ 29,196	$ 27,896
Divided by ounces produced	2,560	2,799
Cash Cost, Before By-product Credits, per Silver Ounce	$ 21.81	$ 18.37
By-products credits per Silver Ounce	(22.38)	(18.11)
Cash Cost, After By-product Credits, per Silver Ounce	$ (0.57)	$ 0.26
AISC, Before By-product Credits, per Silver Ounce	$ 33.78	$ 28.08
By-products credits per Silver Ounce	(22.38)	(18.11)
AISC, After By-product Credits, per Silver Ounce	$ 11.40	$ 9.97

1. Includes all direct and indirect operating cash costs related directly to the physical activities of producing metals, including mining, processing and other plant costs, third-party refining and marketing expense, on-site general and administrative costs, royalties and mining production taxes, before by-product revenues earned from all metals other than the primary metal produced at each unit.

[a] Mineral reserves are based on $1200 gold, $14.50 silver, $0.90 lead, $1.05 zinc, unless otherwise stated.

[b] Mineral reserves are based on $1200 gold and $17.00 silver.

[1] The term "reserve" means that part of a mineral deposit that can be economically and legally extracted or produced at the time of the reserve determination. The term "economically," as used in the definition of reserve, means that profitable extraction or production has been established or analytically demonstrated to be viable and justifiable under reasonable investment and market assumptions. The term "legally," as used in the definition of reserve, does not imply that all permits needed for mining and processing have been obtained or that other legal issues have been completely resolved. However, for a reserve to exist, Hecla must have a justifiable expectation, based on applicable laws and regulations, that issuance of permits or resolution of legal issues necessary for mining and processing at a particular deposit will be accomplished in the ordinary course and in a timeframe consistent with Hecla's current mine plans.

[2] Mineral reserves are based on $1200 gold and a US$/CAN$ exchange rate of 1:1.4 Reserve diluted to an average of 34.7% to minimum width of 9.8 feet (3 m).

Open pit mineral reserves of the Principal Mine were estimated in February 2011 by BBA Inc. based on $950 gold and a US$/CAN$ exchange rate of 1:1. Reserve diluted to 10%

Technical Report on the Pre-Feasibility Study for the Casa Berardi Principal Zone Open-Pit Project, La Sarre, Quebec, February 2011

Prepared by: Patrice Live, Eng. - BBA Inc.; Amanda Fitch, Jr. Eng. - BBA Inc.; Andre Allaire, Eng., M. Eng., Ph.D. - BBA

Open pit mineral reserves of the 160 and 134 Zones were estimated in January 2018 by Hecla Quebec and Mine Development Associates based on $1225 gold and a US$/CAN$ exchange rate of 1.3. (dilution, mining recovery assumptions)

Hecla Mining, Casa Berardi 160 and 134 Zones, Open Pit Mining Study - 2017

January12, 2018, by Mine Development Associates, Thomas L. Dyer, P.E.

[3] Mineral reserves as of April 1, 2018. Recoveries applied to Fire Creek for gold and silver are 93% and 88% respectively. Cutoff grade of 0.282 Au opt and an incremental cutoff grade of 0.090 Au opt. Unplanned dilution of 10 to 17% (depending on mining method) and 5% mining loss are included.

[4] Mineral reserves as of April 1, 2018. Recoveries applied to Hollister for gold and silver are 92% and 60% respectively. Cutoff grade of 0.394 Au opt and an incremental cutoff grade of 0.065Au opt. Unplanned dilution of 10 to 17% (depending on mining method) and 5% mining loss are included.

[5] Mineral reserves as of April 1, 2018. Recoveries applied to Midas for gold and silver are 93% and 88% respectively. Cutoff grade of 0.365 Au opt and an incremental cutoff grade of 0.066Au opt. Unplanned dilution of 10 to 15% (depending on mining method) and 5% mining loss are included.

Note: All estimates are in-situ except for the proven reserves at Greens Creek and San Sebastian which are in surface stockpiles. Resources are exclusive of reserves.

(a) Mineral reserves are based on $1200 gold, $14.50 silver, $0.90 lead, $1.05 zinc, unless otherwise stated.
(b) Mineral reserves are based on $1200 gold and $17.00 silver.
(c) Mineral resources are based on $1350 gold, $21 silver, $0.95 lead, $1.10 zinc and $3.00 copper, unless otherwise stated.
(d) Mineral resources are based on $1400 gold and $19.83 silver unless otherwise stated.
(e) Mineral resources are based on $1400 gold and $18.77 silver unless otherwise stated.
of 10 to 15% (depending on mining method) and 5% mining loss are included.
(6) Measured and indicated resources from Gold Hunter and Lucky Friday vein systems are diluted and factored for expected mining recovery.
(7) Measured, indicated and inferred resources are based on $1,350 gold and a US$/CAN$ exchange rate of 1:1.4. Underground resources are reported at a minimum mining width of 6.6 to 9.8 feet (2 m to 3 m)
Open pit mineral resources of the Principal Mine were estimated in February 2011 by BBA Inc. based on $950 gold and a US$/CAN$ exchange rate of 1:1
Technical Report on the Pre-Feasibility Study for the Casa Berardi Principal Zone Open-Pit Project, La Sarre, Quebec, February 2011
Prepared by: Patrice Live, Eng. - BBA Inc.; Amanda Fitch, Jr. Eng. - BBA Inc.; Andre Allaire, Eng., M. Eng., Ph.D. - BBA
(8) Indicated resources reported at a minimum mining width of 6.6 feet (2 m) for Hugh Zone and 4.9 feet (1.5 m) for Andrea Vein, Middle Vein, and North Vein. East Francine resources reported at actual vein width.
(9) Measured, indicated and inferred resources were estimated in by Goldminds Geoservices Inc. with effective date 12-July-2013, and are based on $1,300 gold and a US$/CAN$ exchange rate of 1:1.
The resources are in-situ without dilution and material loss.
NI43-101 Technical Report, Mineral Resource Update, Hewa-Hosco Gold Projects, Rouyn-Noranda, Quebec, Hecla Quebec, December 2013
Prepared by: Claude Duplessis, Eng. Project Manager - GoldMinds Geoservices Inc.; Maxime Dupéré, P.Geo - SGS Canada Inc. (Geostat)
(10) Measured, indicated and inferred resources as of April 1, 2018 at Fire Creek have been calculated using metallurgical recoveries for gold and silver of 94% and 92% respectively. Cut-off grade of 0.974 Au equivalent opt-feet and a diluted
Au equivalent cut-off grade of 0.228 opt. The minimum mining width is defined as four feet or the vein true thickness plus two feet, whichever is greater. Included 7% unplanned dilution and 5% mining losses.
(11) Measured, indicated and inferred resources as of April 1, 2018 at Hollister have been calculated using metallurgical recoveries for gold and silver of 92% and 60% respectively. Cut-off grade of 1.013 Au equivalent opt-feet and a diluted
Au equivalent cut-off grade of 0.239 opt. The minimum mining width is defined as four feet or the vein true thickness plus two feet, whichever is greater. Included 10% unplanned dilution and 5% mining losses.
(12) Measured, indicated and inferred resources as of April 1, 2018 at Midas have been calculated using metallurgical recoveries for gold and silver of 93% and 88% respectively. Cut-off grade of 0.892 Au equivalent opt-feet and a diluted
Au equivalent cut-off grade of 0.203 opt. The minimum mining width is defined as four feet or the vein true thickness plus two feet, whichever is greater. Included 10% unplanned dilution and 5% mining losses.
(13) Indicated and inferred resources as of April 1, 2018 for Fire Creek (open pit) have been calculated using metallurgical recoveries for gold and silver of 65% and 30%, respectively and for oxide mineralization of 60% and 25% respectively
for mixed mineralization. Open pit resources are calculated at a cut-off grade of 0.01 AuEq opt and inclusive of 10% mining dilution and 5% ore loss. Open pit mineral resources are exclusive of underground mineral resources.
(14) Indicated resources reported at a minimum mining width of 6.0 feet for Bulldog; resources based on $26.5 Ag, $0.85 Pb, and $0.85 Zn
(15) Indicated resources reported at a minimum mining width of 4.3 feet.
(16) Inferred resources from Gold Hunter and Lucky Friday vein systems are diluted and factored for expected mining recovery.
(17) Inferred resources reported at a minimum mining width of 6.6 feet (2 m) for Hugh Zone and 4.9 feet (1.5 m) for Andrea Vein, Middle Vein, and North Vein. East Francine resources reported at actual vein width.
(18) Inferred resources reported at a minimum mining width of 6.0 feet for Bulldog, 5.0 feet for Equity & North Amethyst veins; resources based on $1400 Au, $26.5 Ag, $0.85 Pb, and $0.85 Zn.
(19) Inferred resources reported at a minimum mining width of 4.3 feet.
(20) Inferred resource reported at a minimum mining width of 5.0 feet; resources based on $1400 Au, $26.5 Ag.
(21) Inferred resource reported at a minimum thickness of 15 feet
Inferred resources at Rock Creek adjusted given mining restrictions as defined by U.S. Forest Service - Kootenai National Forest in the June 2003 'Record of Decision, Rock Creek Project'.
(22) Inferred resource reported at a minimum thickness of 15 feet
Inferred resources at Montanore adjusted given mining restrictions as defined by U.S. Forest Service, Kootenai National Forest, Montana DEQ in the December 2015 'Joint Final EIS, Montanore Project' and the February 2016 U.S Forest Service - Kootenai National Forest 'Record of Decision, Montanore Project'.
