BMO GLOBAL METALS & MINING CONFERENCE

KEY VALUE DRIVERS

February 2019

RESPONSIBLE. SAFE. INNOVATIVE.

CAUTIONARY STATEMENTS

Cautionary Statement Regarding Forward Looking Statements.

This presentation contains "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, which are intended to be covered by the safe harbor created by such sections and other applicable laws, including Canadian securities laws. Such forward-looking statements may include, without limitation: (i) estimates of future production and sales; (ii) estimates of future costs and cash cost, after by-product credits per ounce of silver/gold; (iii) estimates for 2019, including the impact of the Lucky Friday strike on silver production; silver equivalent production; cash cost and all in sustaining cost ("AISC"), after by-product credits; capital and pre-development; exploration and research and development expenditures (which assume metal prices of gold at $1,250/oz., silver at $16.00/oz., zinc at $1.25/lb. and lead at $1.00/lb. and U.S. dollar to Canadian (USD/CAD) assumed to be $0.79, and U.S. Dollar to Mexican Peso (USD/MXN) assumed to be $0.06); (iv) expectations regarding the development, growth and exploration potential of the Company's projects; (v) expectations of adding reserves and resources; (vi) the possibility of increasing production due to accessing higher grade material and potentially new surface pits at Casa Berardi; (vii) possible strike extensions of veins, potential for new discoveries, and ability to extend mine life through 2020 at San Sebastian; (viii) expectations of grade increases at depth at Lucky Friday; and (ix) integration of the Nevada operations into Hecla and the ability to improve their operating characteristics. Estimates or expectations of future events or results are based upon certain assumptions, which may prove to be incorrect. Such assumptions, include, but are not limited to: (i) there being no significant change to current geotechnical, metallurgical, hydrological and other physical conditions; (ii) permitting, development, operations and expansion of the Company's projects being consistent with current expectations and mine plans; (iii) political/regulatory developments in any jurisdiction in which the Company operates being consistent with its current expectations; (iv) the exchange rate for the USD/CAD and USD/MXN, being approximately consistent with current levels; (v) certain price assumptions for gold, silver, lead and zinc; (vi) prices for key supplies being approximately consistent with current levels; (vii) the accuracy of our current mineral reserve and mineral resource estimates; and (viii) the Company's plans for development and production will proceed as expected and will not require revision as a result of risks or uncertainties, whether known, unknown or unanticipated. Where the Company expresses or implies an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, such statements are subject to risks, uncertainties and other factors, which could cause actual results to differ materially from future results expressed, projected or implied by the "forward-looking statements." Such risks include, but are not limited to gold, silver and other metals price volatility, operating risks, currency fluctuations, increased production costs and variances in ore grade or recovery rates from those assumed in mining plans, community relations, conflict resolution and outcome of projects or oppositions, litigation, political, regulatory, labor and environmental risks, and exploration risks and results, including that mineral resources are not mineral reserves, they do not have demonstrated economic viability and there is no certainty that they can be upgraded to mineral reserves through continued exploration. For a more detailed discussion of such risks and other factors, see the Company's 2018 Form 10-K, filed on February 22, 2019, with the Securities and Exchange Commission (SEC), as well as the Company's other SEC filings. The Company does not undertake any obligation to release publicly revisions to any "forward-looking statement," including, without limitation, outlook, to reflect events or circumstances after the date of this presentation, or to reflect the occurrence of unanticipated events, except as may be required under applicable securities laws. Investors should not assume that any lack of update to a previously issued "forward-looking statement" constitutes a reaffirmation of that statement. Continued reliance on "forward-looking statements" is at investors' own risk.

Cautionary Note Regarding Estimates of Measured, Indicated and Inferred Resources

The SEC permits mining companies, in their filings with the SEC, to disclose only those mineral deposits that a company can economically and legally extract or produce. We use certain terms in this presentation, such as "resource," "measured resources," "indicated resources," and "inferred resources" that are recognized by Canadian regulations, but that SEC guidelines generally prohibit U.S. registered companies from including in their filings with the SEC, except in certain circumstances. U.S. investors are urged to consider closely the disclosure in our most recent Form 10-K and Form 10-Q. You can review and obtain copies of these filings from the SEC's website at www.sec.gov.

Qualified Person (QP) Pursuant to Canadian National Instrument 43-101

Dean McDonald, PhD. P.Geo., Senior Vice President - Exploration of Hecla Mining Company, who serves as a Qualified Person under National Instrument 43-101("NI 43-101"), supervised the preparation of the scientific and technical information concerning Hecla's mineral projects in this presentation, including with respect to the newly acquired Nevada projects. Information regarding data verification, surveys and investigations, quality assurance program and quality control measures and a summary of analytical or testing procedures for the Greens Creek Mine are contained in a technical report titled "Technical Report for the Greens Creek Mine" effective date March 28, 2013, and for the Lucky Friday Mine are contained in a technical report titled "Technical Report for the Lucky Friday Mine Shoshone County, Idaho, USA" effective date April 2, 2014, for Casa Berardi are contained in a technical report titled "Technical Report on the mineral resource and mineral reserve estimate for Casa Berardi Mine, Northwestern Quebec, Canada" effective date March 31, 2014 (the "Casa Berardi Technical Report"), and for the San Sebastian Mine, Mexico, are contained in a technical report prepared for Hecla titled "Technical Report for the San Sebastian Ag-Au Property, Durango, Mexico" effective date September 8, 2015 . Also included in these four technical reports is a description of the key assumptions, parameters and methods used to estimate mineral reserves and resources and a general discussion of the extent to which the estimates may be affected by any known environmental, permitting, legal, title, taxation, socio-political, marketing or other relevant factors. Information regarding data verification, surveys and investigations, quality assurance program and quality control measures and a summary of sample, analytical or testing procedures for the Fire Creek Mine are contained in a technical report prepared for Klondex Mines, dated March 31, 2018; the Hollister Mine dated May 31, 2017, amended August 9, 2017; and the Midas Mine dated August 31, 2014, amended April 2, 2015. Copies of these technical reports are available under Hecla's and Klondex's profiles on SEDAR at www.sedar.com.

Dr. McDonald reviewed and verified information regarding drill sampling, data verification of all digitally-collected data, drill surveys and specific gravity determinations relating to the Casa Berardi mine. The review encompassed quality assurance programs and quality control measures including analytical or testing practice, chain-of-custody procedures, sample storage procedures and included independent sample collection and analysis. This review found the information and procedures meet industry standards and are adequate for Mineral Resource and Mineral Reserve estimation and mine planning purposes.

Cautionary Note Regarding Non-GAAP measures

Cash cost per ounce of silver and gold, net of by-product credits, EBITDA, adjusted EBITDA, AISC, after by-product credits, and free cash flow represent non-U.S. Generally Accepted Accounting Principles (GAAP) measurements. A reconciliation of these non-GAAP measures to the most comparable GAAP measurements can be found in the Appendix.

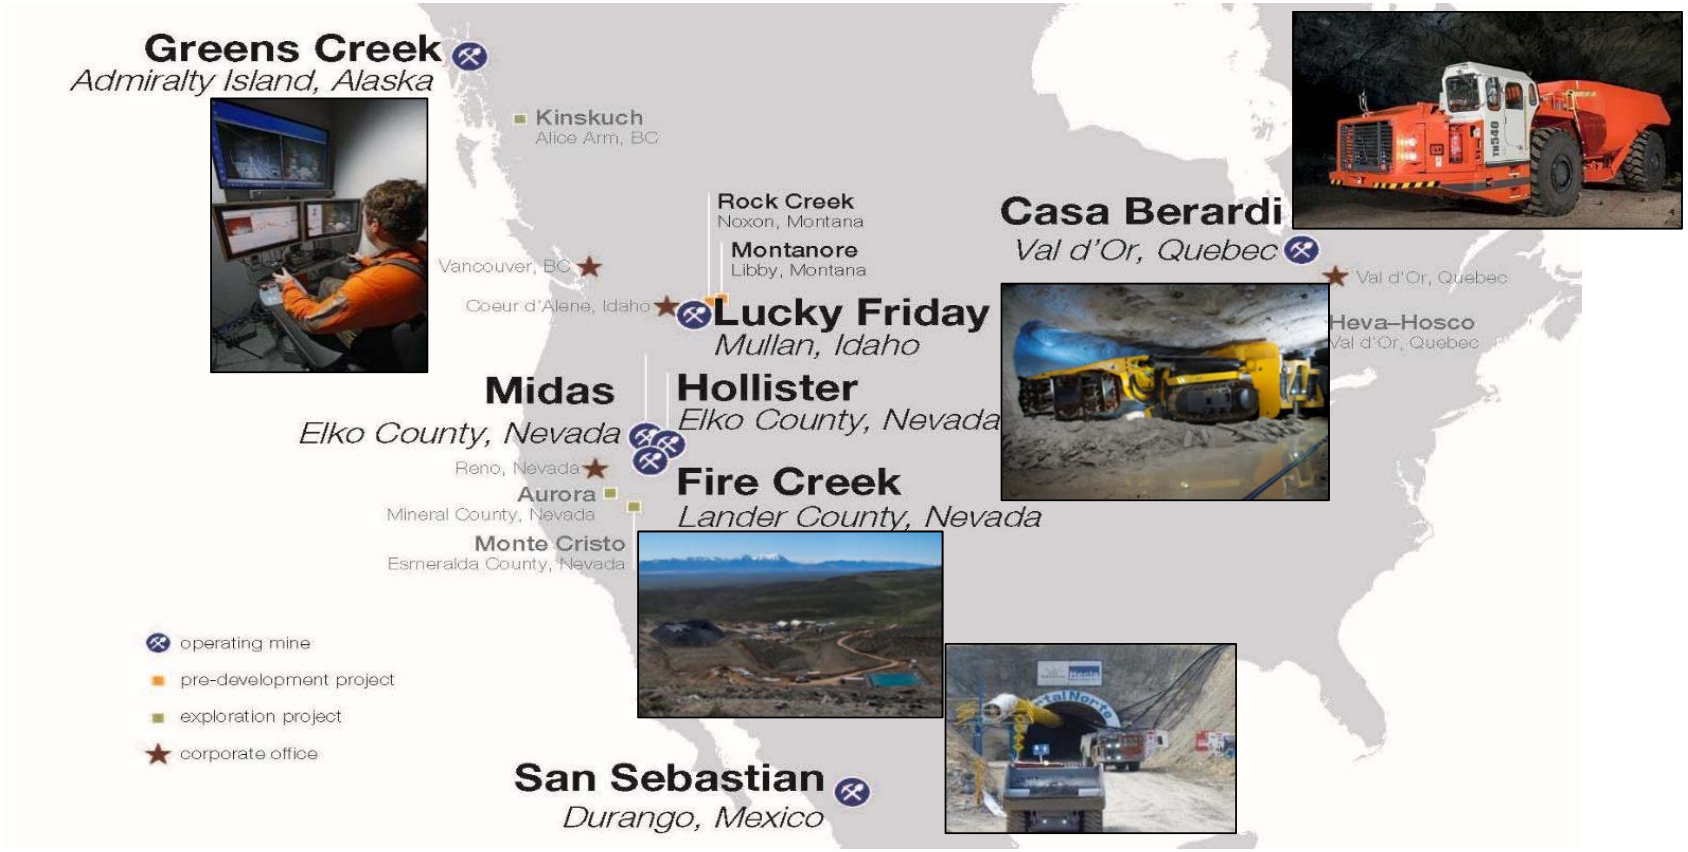

WHY INVEST IN HECLA?

IMPROVING THE FUNDAMENTALS INCREASES VALUE

Key Value Drivers	Improvements In 2018/19
Jurisdiction	Added Nevada
Reserve Quality	Growing reserves at industry low price assumptions
Mine Life	Mine life at our most important mines are long and getting longer
Social License	Injuries are materially lower; frequency rate is half
Access to Capital	Increased undrawn revolving credit to $250 million
Capital & Operating Costs	Throughput higher, driving down unit cost with reducing capital
High IRR Projects	Many technology investments pay back within 12-18 months
Best Mines Getting Better	Increasing cash flows at Greens Creek and Casa

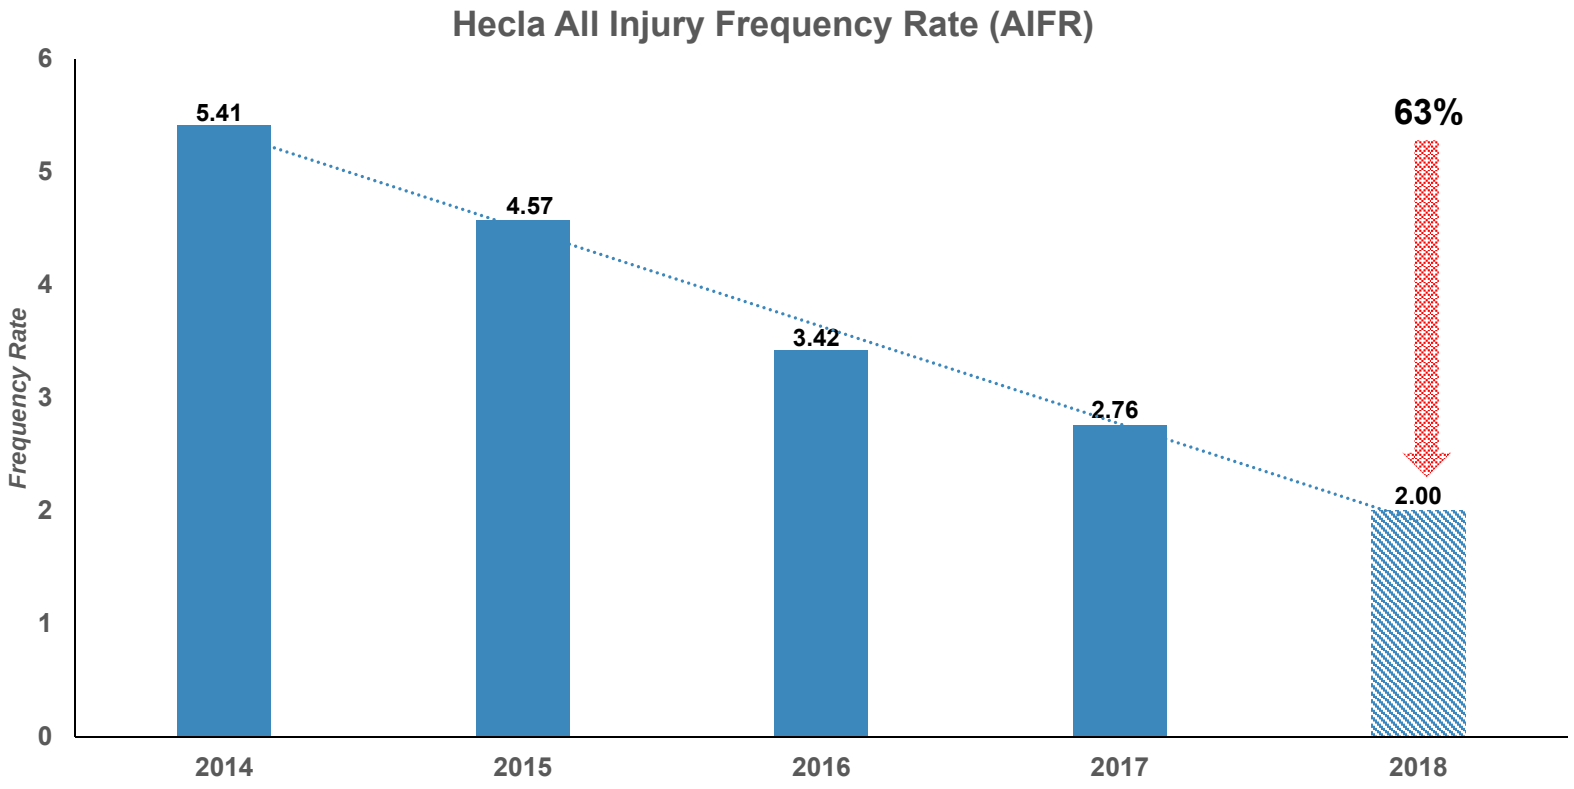

INNOVATING ACROSS NORTH AMERICAN FOCUSED ASSETS

OPERATIONS IN LOW-RISK & MINING-FRIENDLY JURISDICTIONS

SAFETY FIRST

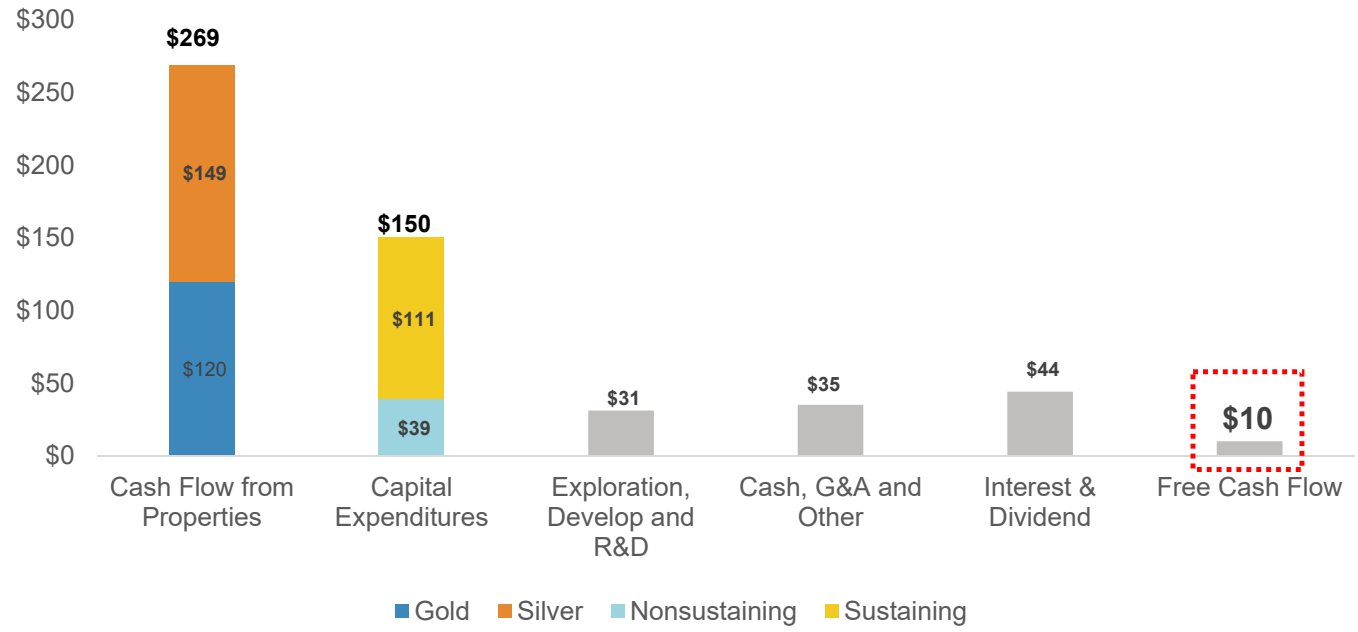

FIRST HARDROCK MINING COMPANY TO COMPLETE NMA CORESAFETY PROGRAM

HECLA HAS FINANCIAL DISCIPLINE

EXPECT TO GENERATE FREE CASH FLOW IN 2019

Estimated Free Cash Flow Generation at $16.00 Ag/$1,350 Au (in millions)

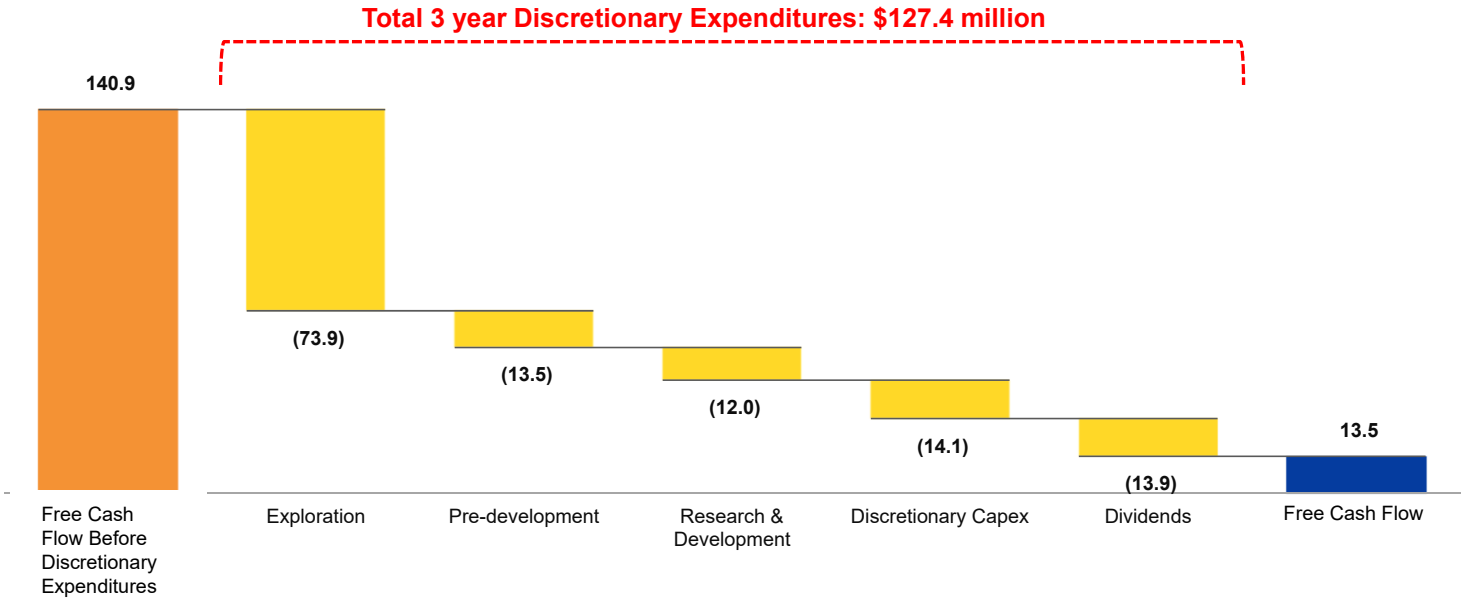

(in millions)

*Based on 2019 Guidance and 2018 Actuals

ROBUST 3 YEAR FREE CASH FLOW GENERATION

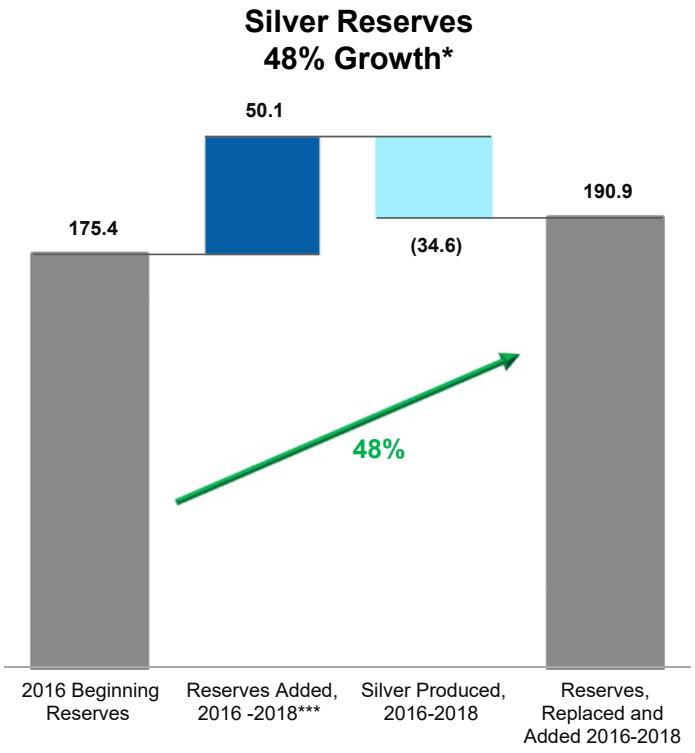

STRONG CASH FLOW FROM OPERATIONS INVESTED IN DISCRETIONARY PROJECTS

Investment in exploration, technology and innovation has generated robust double digit returns: Much higher than dividends, share buybacks, debt repayment

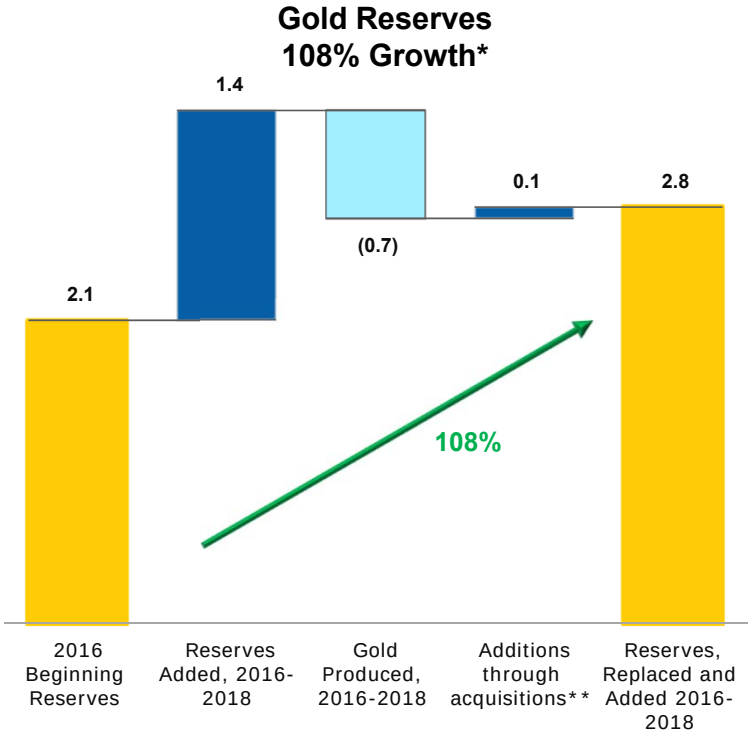

(in millions)

EXPLORATION: DISCRETIONARY BUT A KEY DRIVER OF RETURNS

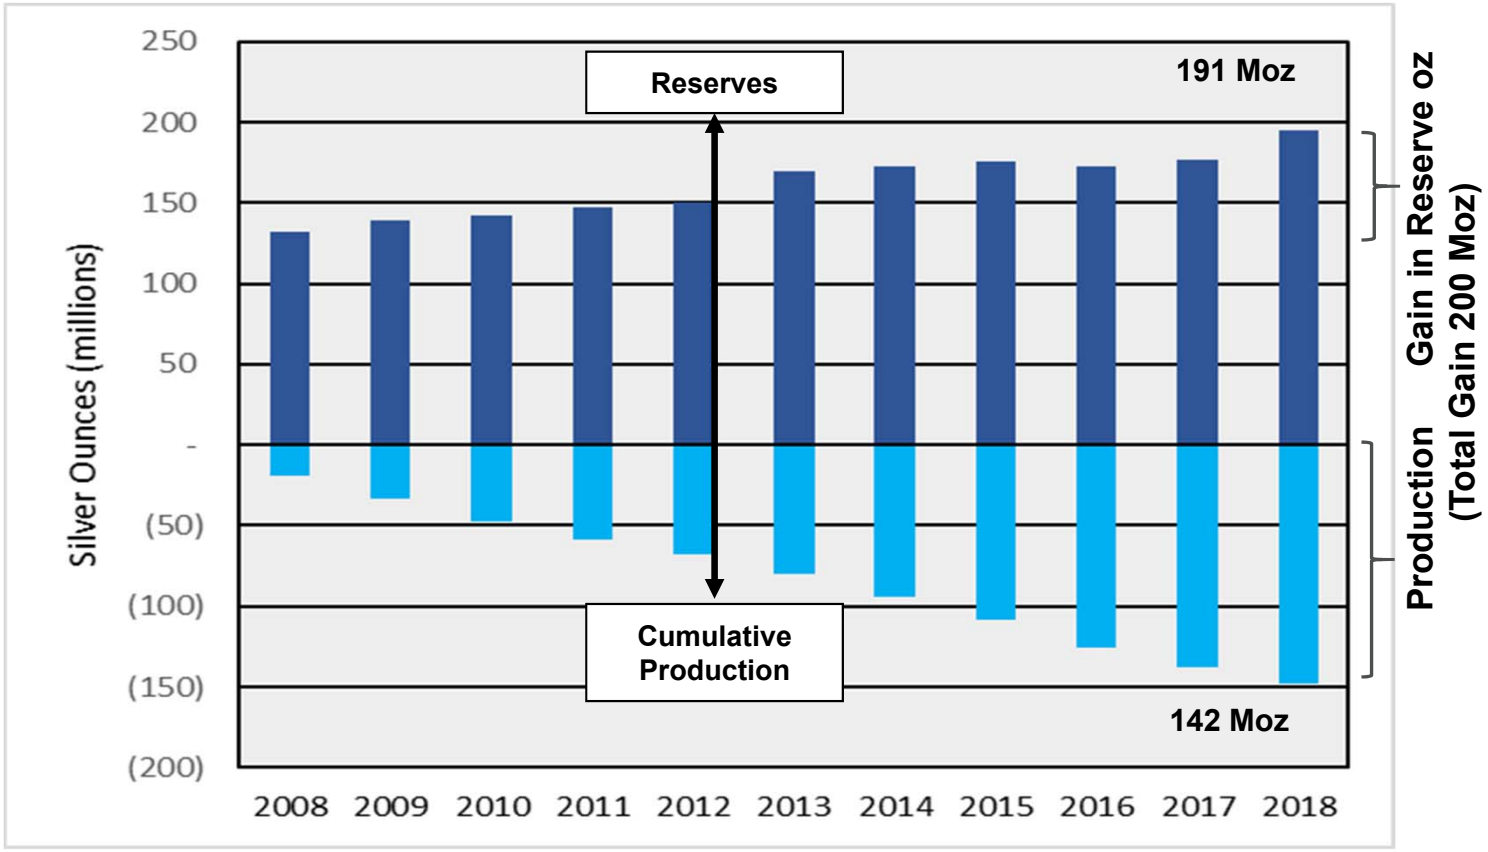

(in millions)

*% growth calculated by adding new reserves plus mining depletion divided by beginning reserves.
**Klondex acquisition in July 2018
*** Silver reserves include the ounces acquired through Nevada acquisition, the ounces were only around 139 koz.

SILVER RESERVES & CUMULATIVE OUNCES MINED

200 MILLION SILVER RESERVE OUNCES ADDED; NO OUNCES FROM ACQUISITIONS

SILVER AND GOLD RESERVE PRICE COMPARISONS

COMPANY COMPARISON - HECLA AT LOW END OF KNOWN PEER RANGE

Year	HL Reserve Prices
2012	$26.50
2013	$20.00
2014	$17.25
2015	$14.50
2016	$14.50
2017	$14.50
2018	$14.50

Year	HL Reserve Prices
2012	$1,400
2013	$1,300
2014	$1,225
2015	$1,100
2016	$1,200
2017	$1,200
2018	$1,200

SOLID RETURNS FROM DISCRETIONARY EXPENSES

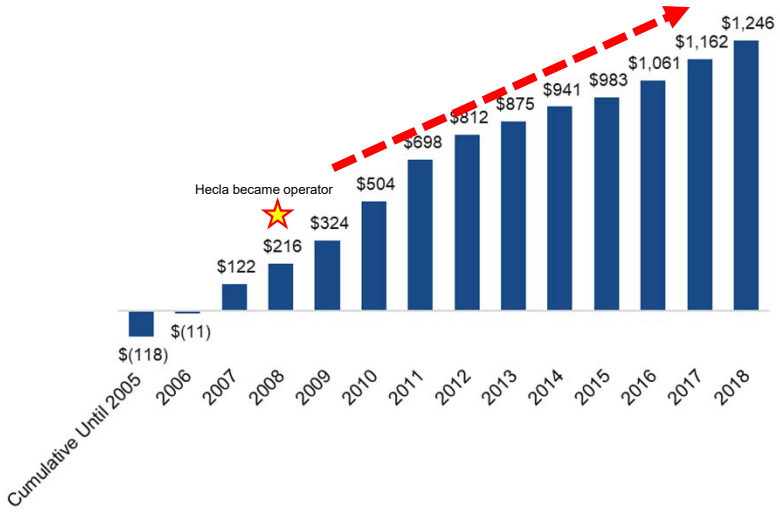

RETURNS QUANTITATIVE/FOUNDATIONS FOR SAFETY AND EFFICIENCY

Discretionary Item	Returns
Recovery Improvements driven by PH control using CO2 & Lead scalping process - GC	Increased Silver recoveries 6% to 7% per year, has returned $50M cash to date and another estimated $200M is expected over the remaining reserve and resource life.
Autonomous UG Haulage – CB (GC H1/18)	30% lower maintenance costs, totaling savings of $3m per year
Ventilation on Demand – GC (CB H2/18, LF H2/19)	Cost savings $23k per fan, expected 1-year payback
Automated Stope Drilling – CB	Adds one hole/shift on average
Automated Drill Jumbo – CB (GC H2/18)	Roughly 3% reduction in overbreak that can translate into similar development advance gain
Tele-remote UG Mucking – GC (CB H1/10)	Proven as concept but limited so far in utilization for various reasons; new higher utilization target set
UG Wi-Fi Communication Network – GC (CB, LF &SS H2/18)	Significant and foundational, enabling step for future communications-based improvement including VOD and other automation
Tablets in Daily UG – GC (CB H2/18, LF & SS H1/19)	Provides convenient access to network data, eliminates written record input
RFID Tracking - GC	Improves safety; required for VOD and all levels of autonomous machine operation

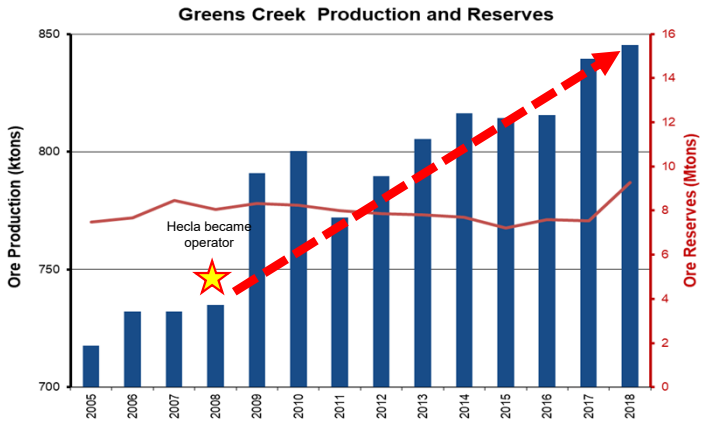

GREENS CREEK HAS GENERATED +$1B OF FREE CASH FLOW

SIGNIFICANT IMPROVEMENT IN PERFORMANCE SINCE HECLA BECAME OPERATOR

Cumulative Net Cash Flow

Greens Creek throughput has grown 15% since purchase in 2008

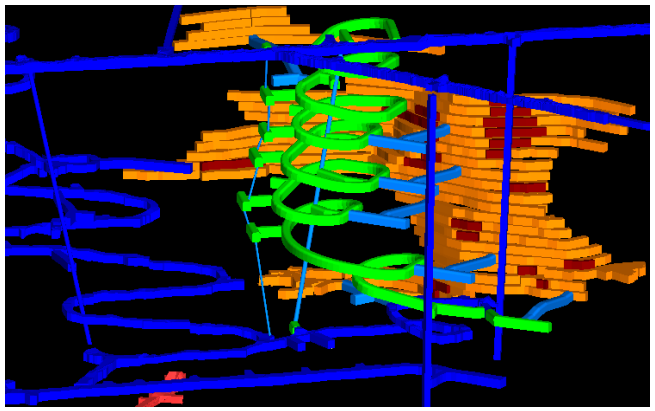

- Automation drive beginning in 2017 leads to further efficiencies
- Exploration success enables reserves to grow

GREENS CREEK: OUR BEST MINE IS GETTING BETTER

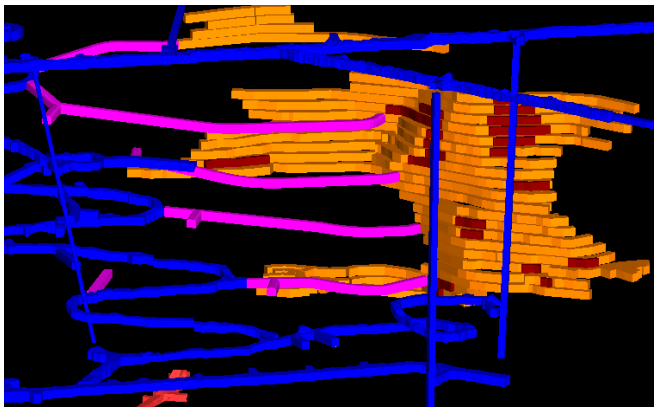

LONGER LIFE, MOVING REVENUE FORWARD, REDUCED DEVELOPMENT EXPECTED

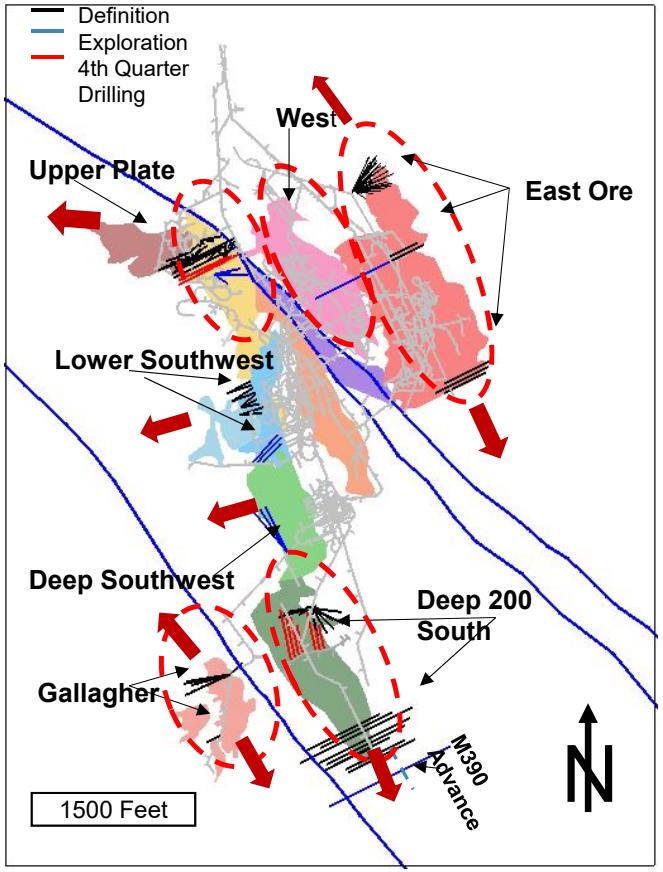

- 15 to 20% increase in silver, gold, lead and zinc reserves from drilling and more data
- Improved plan has 8% higher grades over the next four years, almost $80 million more revenue
- Development plan spends $13m less over the next four years
  - 20% less development or a reduction of 14,000 feet
  - New plan provides a 2.7% reduction in total Greens Creek expenditures in 2019
  - Over the life of mine offsets the added development of the new zones
- $100 million of additional value from the new plan plus extension of the mine life

Old Design

New Design
Utilize existing workings

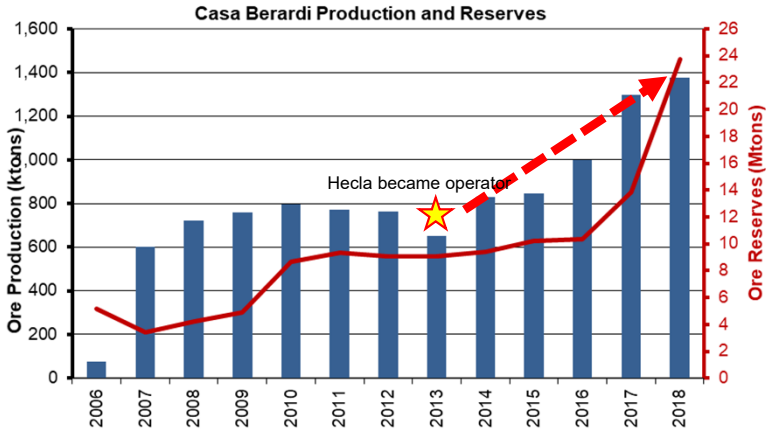

CASA BERARDI: GROWING RESERVES PRODUCTION AND CASH FLOW

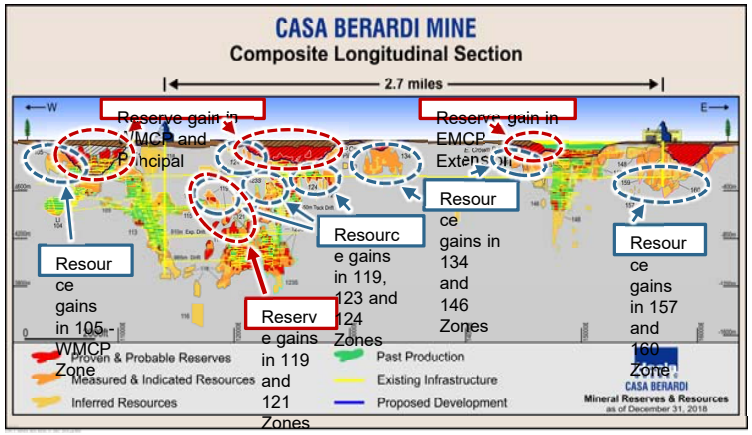

AGGRESSIVE EXPLORATION ADDS TO RESERVE AND RESOURCE BASE

Casa Berardi throughput and reserves have grown 111% and 163% since purchase in 2013

- Successfully stabilized, then increased throughput rates since becoming operator
- Began surface open-pit mining in 2016
- Consistent exploration success enables reserves to increase

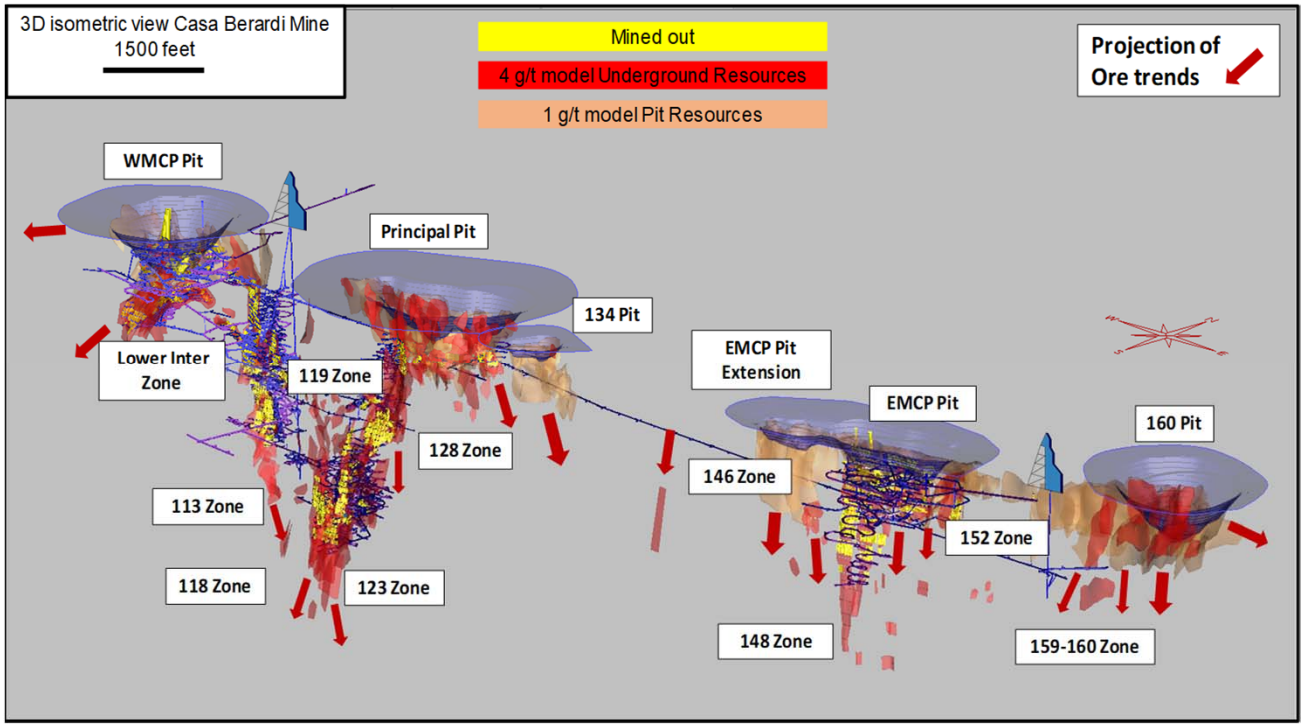

Casa Berardi Longitudinal Section

SERIES OF OPEN PITS AT CASA BERARDI

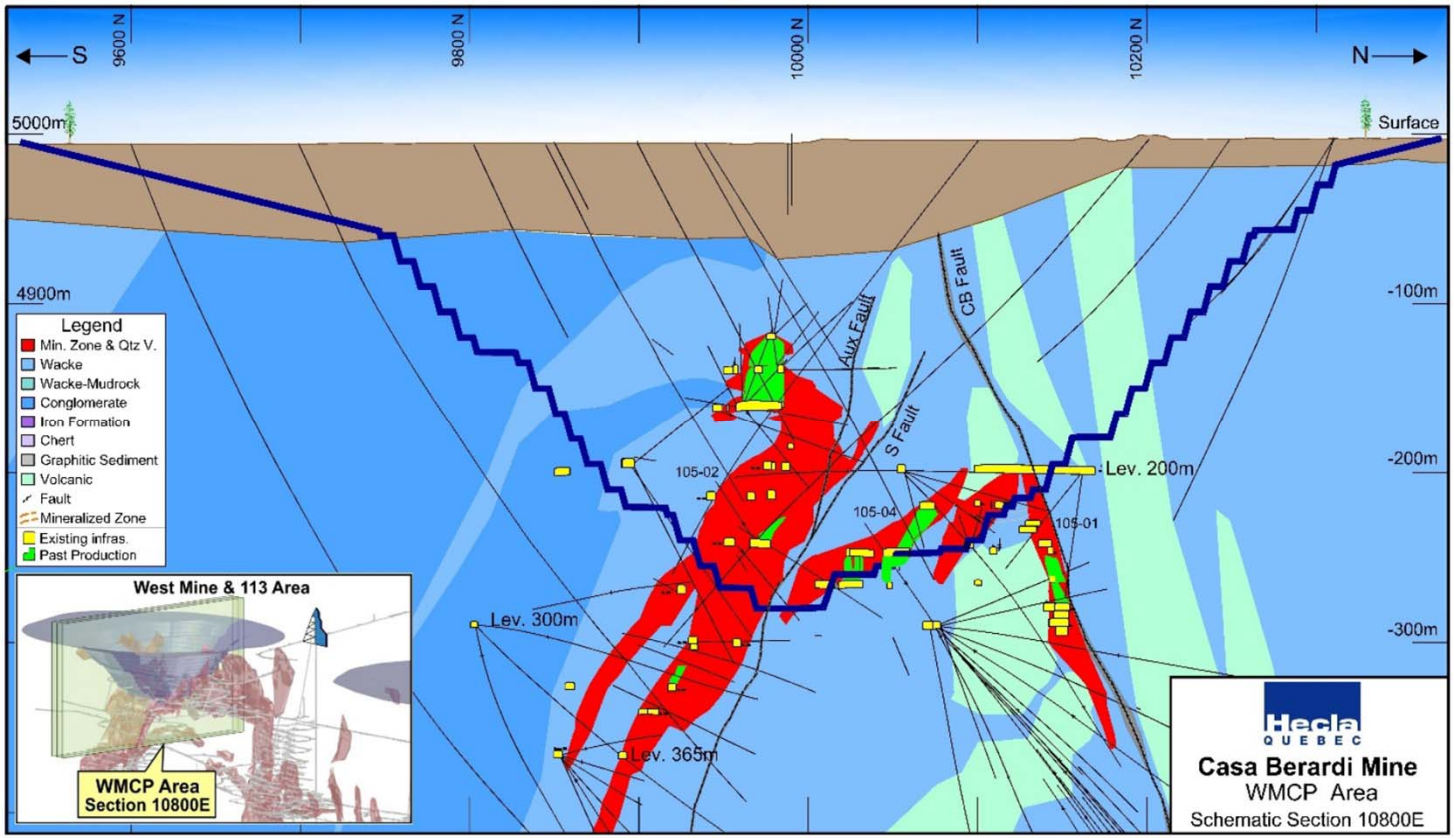

WEST MINE CROWN PILLAR (WMCP) LATEST ADDITION TO THE PITS

- 28% increase in gold reserves
- WMCP pit is the 2nd largest and 2nd highest grade
- Infilling on the WMCP and data to steepen the pit walls
- Advancing underground exploration on the East portion of the mine
- 30 kilometers along the Casa Berardi break

PROPOSED WEST MINE CROWN PILLAR PIT

CONVERGENCE OF LOWER INTER AND 105 ZONES

NEVADA ASSETS: 2018 ACTIVITIES AND 2019 PLAN

FOCUS ON IMPROVING OPERATIONS, INVESTING IN THE MINES

2018 Activities:

- Reorganized assets, put Midas on care and maintenance, relocated employees and equipment to Fire Creek and Hollister.
- Completed installation of the CIL circuit to improve recoveries for processing Hollister ore.
- Installation of new sampling equipment to better reconcile mill and mine reporting.
- Installed Geotech fabric to improve ground conditions in main haulageways.
- Constructed new tailings facility.
- Significantly downsized Reno office.
- Began driving development to Hatter Graben.

2019 Plan:

- Development rate (January) exceeded the 35 fpd goal. Focus is now to maintain and increase development.
- Adding two 6 yard scooptrams, 2 haul trucks, one jumbo and one bolter at Fire Creek through equipment transfers and purchases.
- Drive Spiral 3, Spiral 4 and Spiral 9/Haulage 9 to provide additional drill platforms, to expand reserves and provide more operating zones.
- Roadheaders being tested to evaluate potential to speed up development further.

Midas Mill

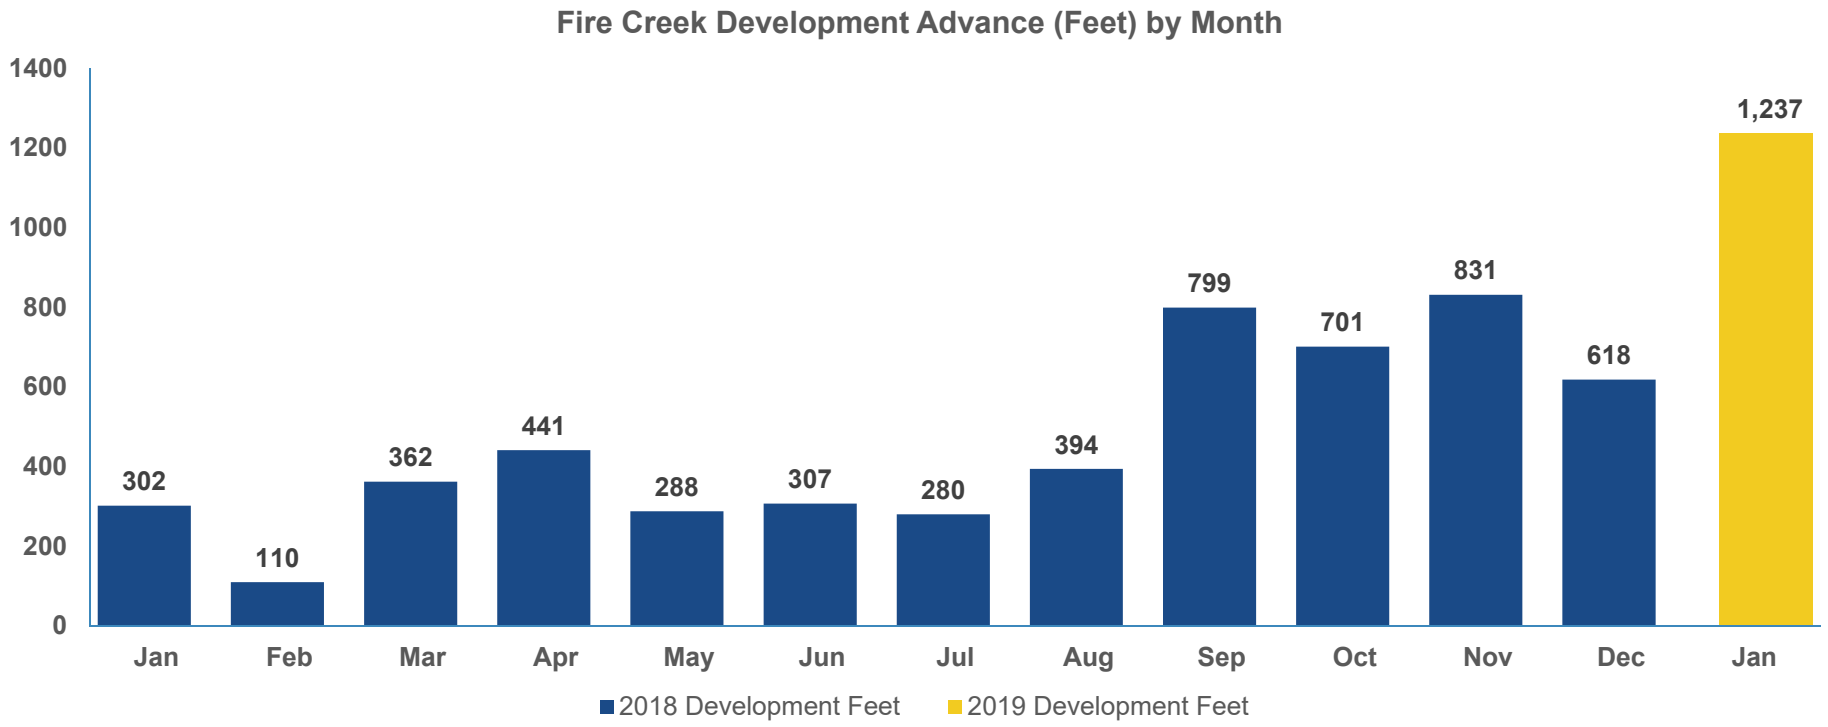

Fire Creek

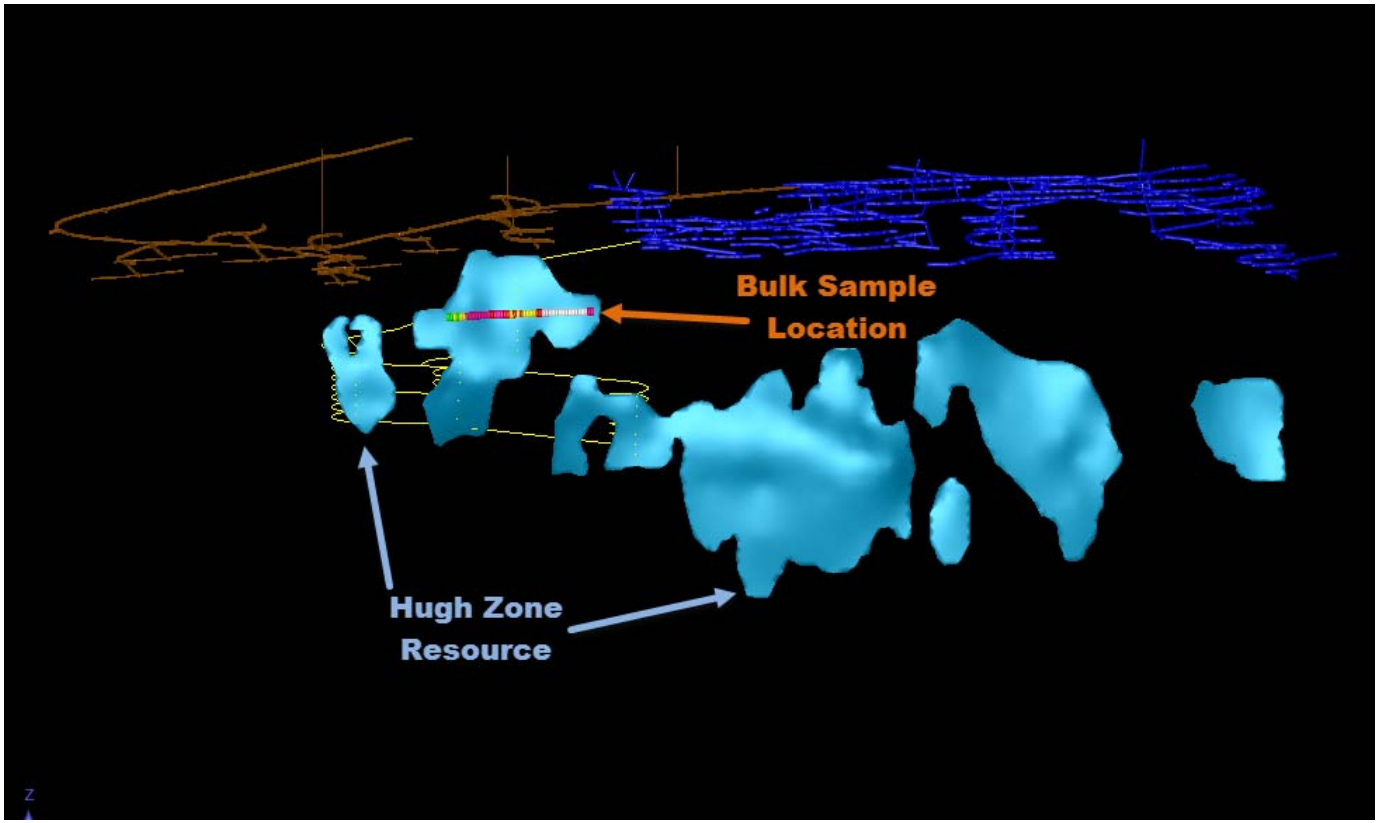

FIRE CREEK DEVELOPMENT INCREASING

SETS THE STAGE FOR RESTORING THE MINE DEVELOPED STATE

SAN SEBASTIAN: TESTING HUGH ZONE

- Mine restarted in 2016 with an 18 month mine life
- Great return on $15 million of capital invested by using leased mill and contract miners
- Oxide production into 2020
- Continuing to explore for oxide mineralization
- Starting the test of the Hugh Zone sulfides with a 35,000 ton bulk sample – results in Q2 & Q3
- 1.2 million ton potential or five more years of mine life

2019 OUTLOOK

LOWERING CASH COST AND AISC, AFTER BY-PRODUCT CREDITS, PER SILVER OUNCE

Production Outlook

	Silver Production (Moz)	Gold Production (Koz)	Silver Equivalent (Moz)[1]	Gold Equivalent (Koz)[1]
Greens Creek	7.7	50	24.0	305
Lucky Friday	0.2	n/a	0.2	n/a
San Sebastian	2.0	14	3.0	40
Casa Berardi	n/a	150	11.7	150
Nevada Operations	0.1	78	6.1	77
Total	**10.0**	**290**	**45.0**	**572**

Cost Outlook

	Costs of Sales (million)[2]	Cash cost, after by-product credits, per silver/gold ounce[3]	AISC, after by-product credits, per produced silver/gold ounce[4]
Greens Creek	$202	$0	$5.50
Lucky Friday	n/a	n/a	n/a
San Sebastian	$41	$9.00	$12.00
Total Silver	**$243**	**$1.10**	**$11.00**
Casa Berardi	$210	$850	$1,150
Nevada Operations	$90	$900	$1,325
Total Gold	**$300**	**$875**	**$1,250**

Capital and Exploration Outlook

2019E capital expenditures[5] (excluding capitalized interest)	$150 million
2019E exploration expenditures[5] (includes corporate development)	$25 million
2019E pre-development expenditures[5]	$2.5 million
2019E research and development expenditures[5]	$3.5 million

CASH COST AND AISC RECONCILIATION TO GAAP

2019 ESTIMATES – SILVER OPERATIONS

Reconciliation of Cost of Sales and Other Direct Production Costs and Depreciation, Depletion and Amortization (GAAP) to Cash Cost, Before By-product Credits and Cash Cost, After By-product Credits (non-GAAP) and All-In Sustaining Costs, Before By-product Credits, per Ounce and All-In Sustaining Costs, After By-product Credits, per Ounce (non-GAAP)

In thousands (except per ounce amounts)	Estimate for Twelve Months Ended December 31, 2019				
	Greens Creek	Lucky Friday[2]	San Sebastian	Corporate[3]	Total Silver
Cost of sales and other direct production costs and depreciation, depletion and amortization	$ 202,000		$ 41,000		$ 243,000
Depreciation, depletion and amortization	(45,000)		(4,000)		(49,000)
Treatment costs	38,000		1,000		39,000
Change in product inventory	(1,000)		—		(1,000)
Reclamation and other costs	(1,000)		(1,000)		(2,000)
Cash Cost, Before By-product Credits [1]	193,000		37,000		230,000
Reclamation and other costs	1,000		1,000		2,000
Exploration	2,000		3,500		5,500
Sustaining capital	42,000		1,500		43,500
General and administrative	—		—	40,000	40,000
AISC, Before By-product Credits [1]	238,000		43,000		321,000
By-product credits:					
Zinc	(109,000)				(109,000)
Gold	(55,000)		(19,000)		(74,000)
Lead	(34,000)				(34,000)
Total By-product credits	(198,000)		(19,000)		(217,000)
Cash Cost, After By-product Credits	$ (5,000)		$ 18,000		$ 13,000
AISC, After By-product Credits	$ 40,000		$ 24,000		$ 104,000
Divided by ounces produced	7,700		2,000		9,700
Cash Cost, Before By-product Credits, per Silver Ounce	$ 25.06		$ 18.50		$ 23.71
By-product credits per ounce	(25.71)		(9.50)		(22.37)
Cash Cost, After By-product Credits, per Silver Ounce	$ (0.65)		$ 9.00		$ 1.34
AISC, Before By-product Credits, per Silver Ounce	$ 30.91		$ 21.50		$ 33.09
By-product credits per ounce	(25.71)		(9.50)		(22.37)
AISC, After By-product Credits, per Silver Ounce	$ 5.20		$ 12.00		$ 10.72

1. Includes all direct and indirect operating cash costs related directly to the physical activities of producing metals, including mining, processing and other plant costs, third-party refining and marketing expense, on-site general and administrative costs, royalties and mining production taxes, before by-product revenues earned from all metals other than the primary metal produced at each unit. AISC, Before By-product Credits also includes on-site exploration, reclamation, and sustaining capital costs.
2. The unionized employees at Lucky Friday have been on strike since March 13, 2017, and production at Lucky Friday has been limited since that time. As a result, 2019 Cash Cost, Before By-product Credits, Cash Cost, After By-product Credits, AISC, Before By-product Credits, and AISC, After By-product Credits are not presented for Lucky Friday, and costs related to the limited production at Lucky Friday are excluded from the calculation of Cash Cost, Before By-product Credits, Cash Cost, After By-product Credits, AISC, Before By-product Credits, and AISC, After By-product Credits for our combined silver operations.
3. AISC, Before By-product Credits for our consolidated silver properties includes corporate costs for general and administrative expense, exploration and sustaining capital.

CASH COST AND AISC RECONCILIATION TO GAAP

2019 ESTIMATES – GOLD OPERATIONS

Reconciliation of Cost of Sales and Other Direct Production Costs and Depreciation, Depletion and Amortization (GAAP) to Cash Cost, Before By-product Credits and Cash Cost, After By-product Credits (non-GAAP) and All-In Sustaining Costs, Before By-product Credits, per Ounce and All-In Sustaining Costs, After By-product Credits, per Ounce (non-GAAP)

In thousands (except per ounce amounts)	Estimate for Twelve Months Ended December 31, 2019		
	Casa Berardi	Nevada Operations	Total Gold
Cost of sales and other direct production costs and depreciation, depletion and amortization	$ 210,000	$ 90,000	$ 300,000

[1] The term "reserve" means that part of a mineral deposit that can be economically and legally extracted or produced at the time of the reserve determination. The term "economically," as used in the definition of reserve, means that profitable extraction or production has been established or analytically demonstrated to be viable and justifiable under reasonable investment and market assumptions. The term "legally," as used in the definition of reserve, does not imply that all permits needed for mining and processing have been obtained or that other legal issues have been completely resolved. However, for a reserve to exist, Hecla must have a justifiable expectation, based on applicable laws and regulations, that issuance of permits or resolution of legal issues necessary for mining and processing at a particular deposit will be accomplished in the ordinary course and in a timeframe consistent with Hecla's current mine plans.

[2] Mineral reserves are based on $1200 gold, $14.50 silver, $0.90 lead, $1.15 zinc, unless otherwise stated.

[3] Mineral reserves are based on $1200 gold and a US$/CAN$ exchange rate of 1:1.33 Reserve diluted to an average of 34.7% to minimum width of 9.8 feet (3 m)

Reserves at Casa Berardi were determined by Jonathan Archambault-Giroux, P. Geo., Que., Real Parent, P.Geo. Que., and Alain Quenneville, P. Eng., Que. unless otherwise stated.

Open pit mineral reserves of the Principal Mine were estimated in September 2018 by Hecla Quebec and Mine Development Associates based on $1225 gold and a US$/CAN$ exchange rate of 1:3.

Hecla Mining Company, Principal Deposit Open Pit Mining Study - 2018

September 1, 2018, by Mine Development Associates, Thomas L. Dyer, P.E.

Open pit mineral reserves of the 160 and 134 Zones were estimated in January 2018 by Hecla Quebec and Mine Development Associates based on $1225 gold and a US$/CAN$ exchange rate of 1.3.

Hecla Mining, Casa Berardi 160 and 134 Zones, Open Pit Mining Study - 2017

January 12, 2018, by Mine Development Associates, Thomas L. Dyer, P.E.

Open pit mineral reserves of the West Mine Crown Pillar were estimated in January 2019 by Hecla Quebec and Mine Development Associates based on $1225 gold and a US$/CAN$ exchange rate of 1.3.

Hecla Mining Company, West Mine Crown Pillar Deposit, Open Pit Mining Study - 2018

January 10, 2019, by Mine Development Associates, Thomas L. Dyer, P.E.

Open pit mineral reserves of the East Mine Crown Pillar Expansion were estimated in August 2018 by Hecla Quebec and Mine Development Associates based on $1225 gold and a US$/CAN$ exchange rate of 1.3.

Hecla Mining Company, East Mine Crown Pillar Expansion, Open Pit Mining Study - 2018

August 22, 2018, by Mine Development Associates, Thomas L. Dyer, P.E.

[4] Recoveries at Fire Creek for gold and silver are 94% and 92%. Cutoff grade of 0.339 Au Equivalent oz/ton and incremental cutoff grade of 0.11 Au Equivalent oz/ton. Unplanned dilution of 10% to 17% included depending on mining method.

[5] Recoveries at Hollister for gold and silver are 87% and 80%. Cutoff grade of 0.396 Au Equivalent oz/ton and incremental cutoff grade of 0.07 Au Equivalent oz/ton. Unplanned dilution of 10% to 17% and 5% mining loss included.

Note: All estimates are in-situ except for the proven reserves at Greens Creek and San Sebastian which are in surface stockpiles. Resources are exclusive of reserves.

[6] Mineral resources are based on $1350 gold, $21 silver, $1.10 lead, $1.20 zinc and $3.00 copper, unless otherwise stated.
[7] Measured and indicated resources from Gold Hunter and Lucky Friday vein systems are diluted and factored for expected mining recovery.
[8] Measured, indicated and inferred resources are based on $1,350 gold and a US$/CAN$ exchange rate of 1:1.33 Underground resources are reported at a minimum mining width of 6.6 to 9.8 feet (2 m to 3 m)
Resources at Casa Berardi were determined by Jonathan Archambault-Giroux, P. Geo., Que., Real Parent, P.Geo. Que., and Alain Quenneville, P. Eng., Que. unless otherwise stated.
[9] Indicated resources reported at a minimum mining width of 5.9 feet (1.8 m) for Hugh Zone, Middle Vein, North Vein, and East Francine Vein and 4.9 feet (1.5 m) for Andrea Vein
San Sebastian lead, zinc and copper grades are for 1,224,900 tons of indicated resource within the Middle Vein and the Hugh Zone of the Francine Vein.
[10] Recoveries at Fire Creek for gold and silver are 94% and 92%. Au equivalent cutoff grade of 0.297 oz/ton. The minimum mining width is defined as four feet or the vein true thickness plus two feet, whichever is greater.
[11] Recoveries at Hollister for gold and silver are 87% and 80%. Au equivalent cutoff grade of 0.352 oz/ton. The minimum mining width is defined as four feet or the vein true thickness plus two feet, whichever is greater.
[12] Recoveries at Midas for gold and silver are 93% and 88% Au equivalent cutoff grade of 0.217 oz/ton. The minimum mining width is defined as four feet or the vein true thickness plus two feet, whichever is greater.
[13] Indicated and inferred open-pit resources for Fire Creek were calculated November 30, 2017 using recoveries for gold and silver of 65% and 30% for oxide material and 60% and 25% for mixed oxide-sulfide material.
Open pit resources are calculated at $1400 gold and $19.83 silver and cut-off grade of 0.01 Au Equivalent oz/ton and is inclusive of 10% mining dilution and 5% ore loss. Open pit mineral resources exclusive of underground mineral resources.
NI43-101 Technical Report for the Fire Creek Project, Lander County, Nevada; Effective Date March 31, 2018; prepared by Practical Mining LLC, Mark Odell, P.E. for Hecla Mining Company, June28, 2018
[14] Measured, indicated and inferred resources were estimated in by Goldminds Geoservices Inc. with effective date 12-July-2013, and are based on $1,300 gold and a US$/CAN$ exchange rate of 1:1.
The resources are in-situ without dilution and material loss.
NI43-101 Technical Report, Mineral Resource Update, Heva-Hosco Gold Projects, Rouyn-Noranda, Quebec, Hecla Quebec, December 2013
Prepared by: Claude Duplessis, Eng. Project Manager - GoldMinds Geoservices Inc.; Maxime Dupéré, P.Geo - SGS Canada Inc. (Geostat)
[15] Indicated resources reported at a minimum mining width of 6.0 feet for Bulldog; resources based on $26.5 Ag, $0.85 Pb, and $0.85 Zn
[16] Indicated and Inferred resources reported using $21 silver, $0.95 lead, $1.10 lead minimum mining width of 4.3 feet.
[17] Inferred resources reported at a minimum mining width of 5.9 feet (1.8 m) for Hugh Zone, Middle Vein, North Vein, and East Francine Vein and 4.9 feet (1.5 m) for Andrea Vein
San Sebastian lead, zinc and copper grades are for 702,600 tons of inferred resource within the Middle Vein and the Hugh Zone of the Francine Vein.
[18] Inferred resources for the Hatter Project at the Hollister Mine calculated using recoveries for gold and silver of 82.7% and 71.8% and an Au equivalent cutoff grade of 0.27 oz/ton
[19] Inferred resources reported at a minimum mining width of 6.0 feet for Bulldog, 5.0 feet for Equity & North Amethyst veins; resources based on $1400 Au, $26.5 Ag, $0.85 Pb, and $0.85 Zn.
[20] Inferred resource reported at a minimum mining width of 5.0 feet; resources based on $1400 Au, $26.5 Ag.
[21] Inferred resource at Rock Creek reported at a minimum thickness of 15 feet and adjusted given mining restrictions as defined by U.S. Forest Service, Kootenai National Forest in the June 2003 'Record of Decision, Rock Creek Project'.
[22] Inferred resource at Montanore reported at a minimum thickness of 15 feet and adjusted given mining restrictions defined by U.S. Forest Service, Kootenai National Forest, Montana DEQ in December 2015 'Joint Final EIS, Montanore Project'
and the February 2016 U.S Forest Service - Kootenai National Forest 'Record of Decision, Montanore Project'.
