PDAC 2019

Creating Value Through Innovative Mining

March 4, 2019

RESPONSIBLE. SAFE. INNOVATIVE.

CAUTIONARY STATEMENTS

Cautionary Statement Regarding Forward Looking Statements.

This presentation contains "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, which are intended to be covered by the safe harbor created by such sections and other applicable laws, including Canadian securities laws. Such forward-looking statements may include, without limitation: (i) estimates of future production and sales; (ii) estimates of future costs and cash cost, after by-product credits per ounce of silver/gold; (iii) estimates for 2019, including the impact of the Lucky Friday strike on silver production; silver equivalent production; cash cost and all in sustaining cost ("AISC"), after by-product credits; capital and pre-development; exploration and research and development expenditures (which assume metal prices of gold at $1,250/oz., silver at $16.00/oz., zinc at $1.25/lb. and lead at $1.00/lb. and U.S. dollar to Canadian (USD/CAD) assumed to be $0.79, and U.S. Dollar to Mexican Peso (USD/MXN) assumed to be $0.06); (iv) expectations regarding the development, growth and exploration potential of the Company's projects; (v) expectations of adding reserves and resources; (vi) the possibility of increasing production due to accessing higher grade material and potentially new surface pits at Casa Berardi; (vii) possible strike extensions of veins, potential for new discoveries, and ability to extend mine life through 2020 at San Sebastian; (viii) expectations of grade increases at depth at Lucky Friday; and (ix) integration of the Nevada operations into Hecla and the ability to improve their operating characteristics. Estimates or expectations of future events or results are based upon certain assumptions, which may prove to be incorrect. Such assumptions, include, but are not limited to: (i) there being no significant change to current geotechnical, metallurgical, hydrological and other physical conditions; (ii) permitting, development, operations and expansion of the Company's projects being consistent with current expectations and mine plans; (iii) political/regulatory developments in any jurisdiction in which the Company operates being consistent with its current expectations; (iv) the exchange rate for the USD/CAD and USD/MXN, being approximately consistent with current levels; (v) certain price assumptions for gold, silver, lead and zinc; (vi) prices for key supplies being approximately consistent with current levels; (vii) the accuracy of our current mineral reserve and mineral resource estimates; and (viii) the Company's plans for development and production will proceed as expected and will not require revision as a result of risks or uncertainties, whether known, unknown or unanticipated. Where the Company expresses or implies an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, such statements are subject to risks, uncertainties and other factors, which could cause actual results to differ materially from future results expressed, projected or implied by the "forward-looking statements." Such risks include, but are not limited to gold, silver and other metals price volatility, operating risks, currency fluctuations, increased production costs and variances in ore grade or recovery rates from those assumed in mining plans, community relations, conflict resolution and outcome of projects or oppositions, litigation, political, regulatory, labor and environmental risks, and exploration risks and results, including that mineral resources are not mineral reserves, they do not have demonstrated economic viability and there is no certainty that they can be upgraded to mineral reserves through continued exploration. For a more detailed discussion of such risks and other factors, see the Company's 2018 Form 10-K, filed on February 22, 2019, with the Securities and Exchange Commission (SEC), as well as the Company's other SEC filings. The Company does not undertake any obligation to release publicly revisions to any "forward-looking statement," including, without limitation, outlook, to reflect events or circumstances after the date of this presentation, or to reflect the occurrence of unanticipated events, except as may be required under applicable securities laws. Investors should not assume that any lack of update to a previously issued "forward-looking statement" constitutes a reaffirmation of that statement. Continued reliance on "forward-looking statements" is at investors' own risk.

Cautionary Note Regarding Estimates of Measured, Indicated and Inferred Resources

The SEC permits mining companies, in their filings with the SEC, to disclose only those mineral deposits that a company can economically and legally extract or produce. We use certain terms in this presentation, such as "resource," "measured resources," "indicated resources," and "inferred resources" that are recognized by Canadian regulations, but that SEC guidelines generally prohibit U.S. registered companies from including in their filings with the SEC, except in certain circumstances. U.S. investors are urged to consider closely the disclosure in our most recent Form 10-K and Form 10-Q. You can review and obtain copies of these filings from the SEC's website at www.sec.gov.

Qualified Person (QP) Pursuant to Canadian National Instrument 43-101

Dean McDonald, PhD. P.Geo., Senior Vice President - Exploration of Hecla Mining Company, who serves as a Qualified Person under National Instrument 43-101("NI 43-101"), supervised the preparation of the scientific and technical information concerning Hecla's mineral projects in this presentation, including with respect to the newly acquired Nevada projects. Information regarding data verification, surveys and investigations, quality assurance program and quality control measures and a summary of analytical or testing procedures for the Greens Creek Mine are contained in a technical report titled "Technical Report for the Greens Creek Mine" effective date March 28, 2013, and for the Lucky Friday Mine are contained in a technical report titled "Technical Report for the Lucky Friday Mine Shoshone County, Idaho, USA" effective date April 2, 2014, for Casa Berardi are contained in a technical report titled "Technical Report on the mineral resource and mineral reserve estimate for Casa Berardi Mine, Northwestern Quebec, Canada" effective date March 31, 2014 (the "Casa Berardi Technical Report"), and for the San Sebastian Mine, Mexico, are contained in a technical report prepared for Hecla titled "Technical Report for the San Sebastian Ag-Au Property, Durango, Mexico" effective date September 8, 2015 . Also included in these four technical reports is a description of the key assumptions, parameters and methods used to estimate mineral reserves and resources and a general discussion of the extent to which the estimates may be affected by any known environmental, permitting, legal, title, taxation, socio-political, marketing or other relevant factors. Information regarding data verification, surveys and investigations, quality assurance program and quality control measures and a summary of sample, analytical or testing procedures for the Fire Creek Mine are contained in a technical report prepared for Klondex Mines, dated March 31, 2018; the Hollister Mine dated May 31, 2017, amended August 9, 2017; and the Midas Mine dated August 31, 2014, amended April 2, 2015. Copies of these technical reports are available under Hecla's and Klondex's profiles on SEDAR at www.sedar.com.

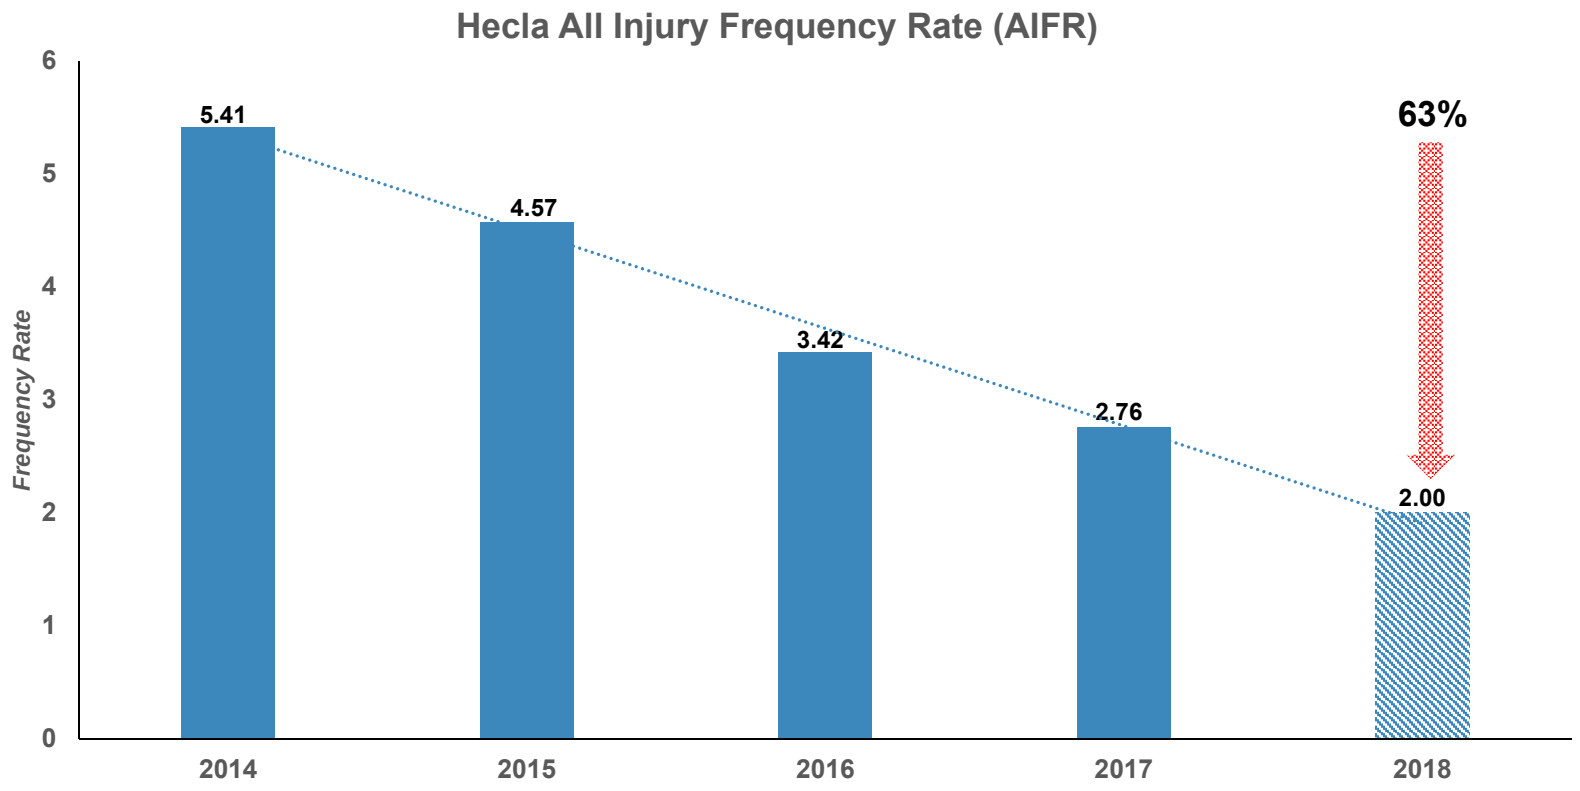

Dr. McDonald reviewed and verified information regarding drill sampling, data verification of all digitally-collected data, drill surveys and specific gravity determinations relating to the Casa Berardi mine. The review encompassed quality assurance programs and quality control measures including analytical or testing practice, chain-of-custody procedures, sample storage procedures and included independent sample collection and analysis. This review found the information and procedures meet industry standards and are adequate for Mineral Resource and Mineral Reserve estimation and mine planning purposes.

Cautionary Note Regarding Non-GAAP measures

Cash cost per ounce of silver and gold, net of by-product credits, EBITDA, adjusted EBITDA, AISC, after by-product credits, and free cash flow represent non-U.S. Generally Accepted Accounting Principles (GAAP) measurements. A reconciliation of these non-GAAP measures to the most comparable GAAP measurements can be found in the Appendix.

2016	$1,200
2017	$1,200
2018	$1,200

2019 OUTLOOK

LOWERING CASH COST AND AISC, AFTER BY-PRODUCT CREDITS, PER SILVER OUNCE

Production Outlook

	Silver Production (Moz)	Gold Production (Koz)	Silver Equivalent (Moz)[1]	Gold Equivalent (Koz)[1]
Greens Creek	7.7	50	24.0	305
Lucky Friday	0.2	n/a	0.2	n/a
San Sebastian	2.0	14	3.0	40
Casa Berardi	n/a	150	11.7	150
Nevada Operations	0.1	78	6.1	77
Total	**10.0**	**290**	**45.0**	**572**

Cost Outlook

	Costs of Sales (million)[2]	Cash cost, after by-product credits, per silver/gold ounce[3]	AISC, after by-product credits, per produced silver/gold ounce[4]
Greens Creek	$202	$0	$5.50
Lucky Friday	n/a	n/a	n/a
San Sebastian	$41	$9.00	$12.00
Total Silver	**$243**	**$1.10**	**$11.00**
Casa Berardi	$210	$850	$1,150
Nevada Operations	$90	$900	$1,325
Total Gold	**$300**	**$875**	**$1,250**

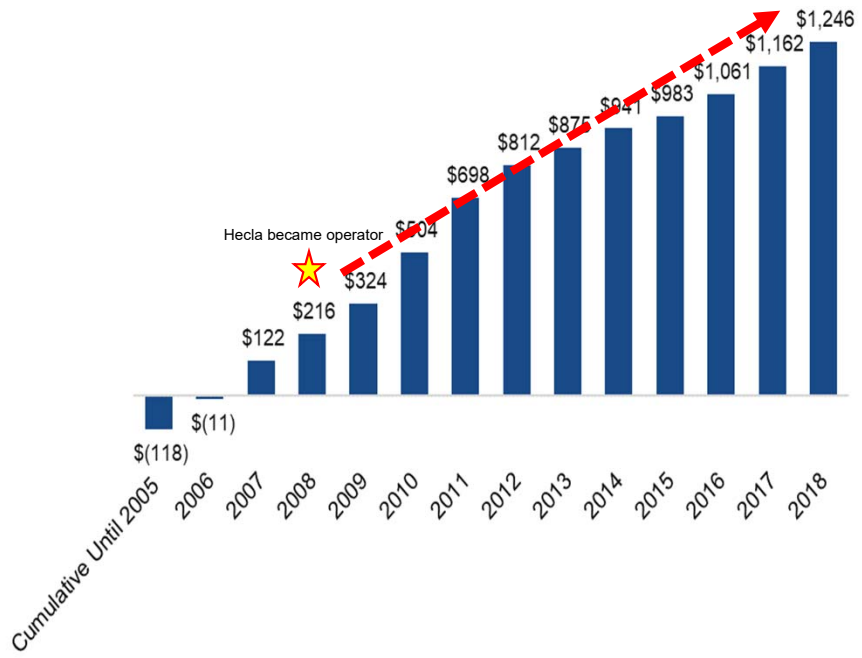

Capital and Exploration Outlook

2019E capital expenditures[5] (excluding capitalized interest)	$150 million
2019E exploration expenditures[5] (includes corporate development)	$25 million
2019E pre-development expenditures[5]	$2.5 million
2019E research and development expenditures[5]	$3.5 million

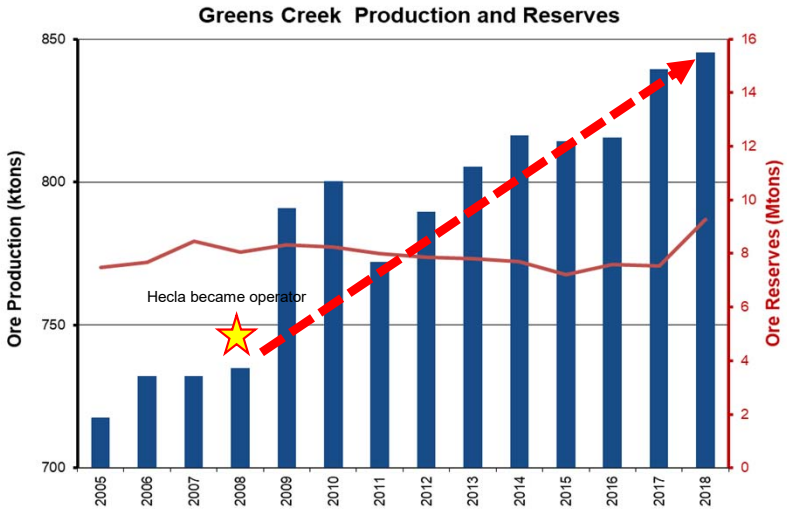

GREENS CREEK HAS GENERATED +$1B OF FREE CASH FLOW

SIGNIFICANT IMPROVEMENT IN PERFORMANCE SINCE HECLA BECAME OPERATOR

Cumulative Net Cash Flow

Greens Creek throughput has grown 15% since purchase in 2008

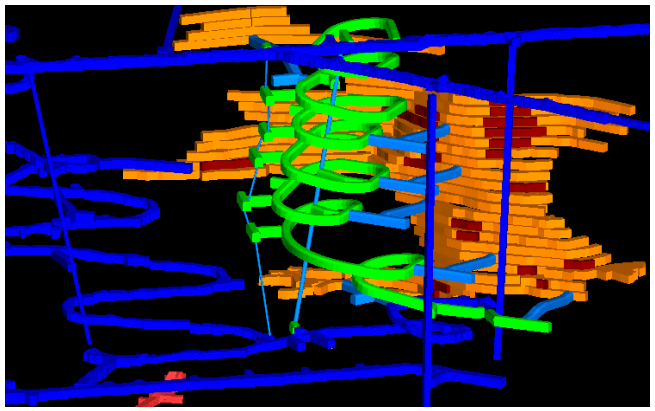

- Automation drive beginning in 2017 leads to further efficiencies
- Exploration success enables reserves to grow

GREENS CREEK: OUR BEST MINE IS GETTING BETTER

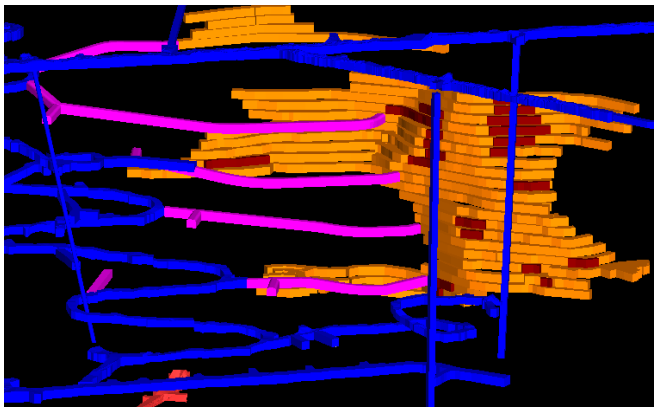

LONGER LIFE, MOVING REVENUE FORWARD, REDUCED DEVELOPMENT EXPECTED

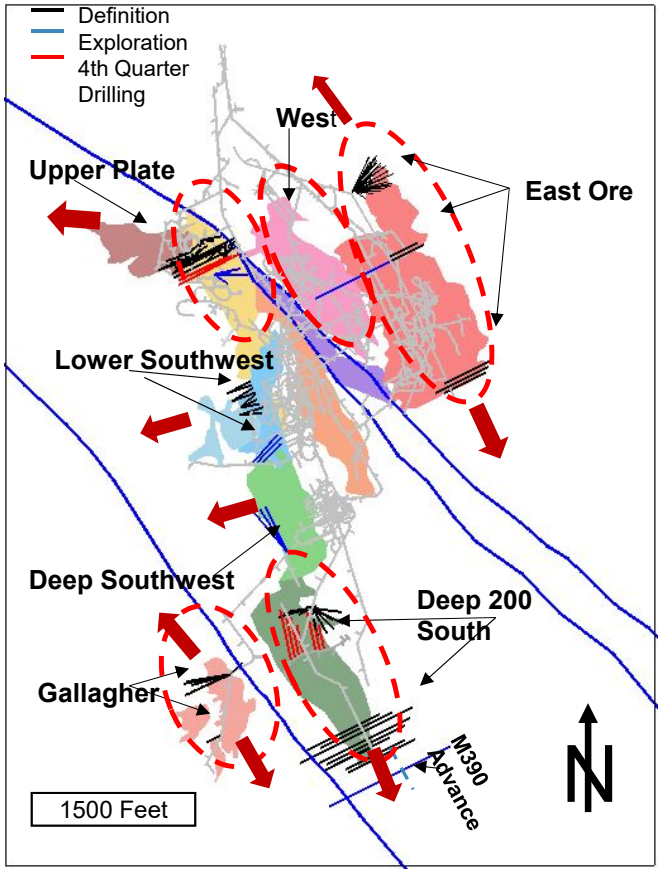

- 15 to 20% increase in silver, gold, lead and zinc reserves from drilling and more data
- Improved plan has 8% higher grades over the next four years, almost $80 million more revenue
- Development plan spends $13m less over the next four years
  - 20% less development or a reduction of 14,000 feet
  - New plan provides a 2.7% reduction in total Greens Creek expenditures in 2019
  - Over the life of mine offsets the added development of the new zones
- $100 million of additional value from the new plan plus extension of the mine life

Old Design

New Design
Utilize existing workings

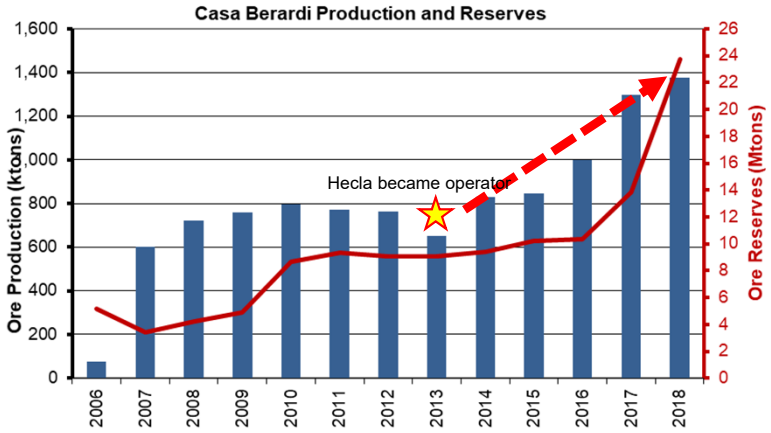

CASA BERARDI: GROWING RESERVES PRODUCTION AND CASH FLOW

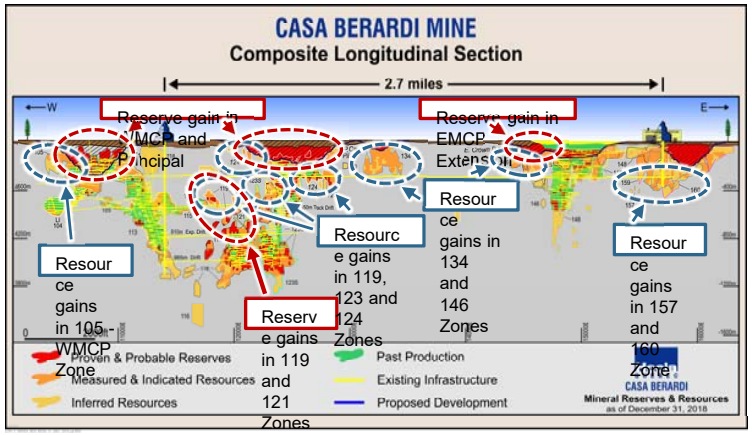

AGGRESSIVE EXPLORATION ADDS TO RESERVE AND RESOURCE BASE

Casa Berardi throughput and reserves have grown 111% and 163% since purchase in 2013

- Successfully stabilized, then increased throughput rates since becoming operator
- Began surface open-pit mining in 2016
- Consistent exploration success enables reserves to increase

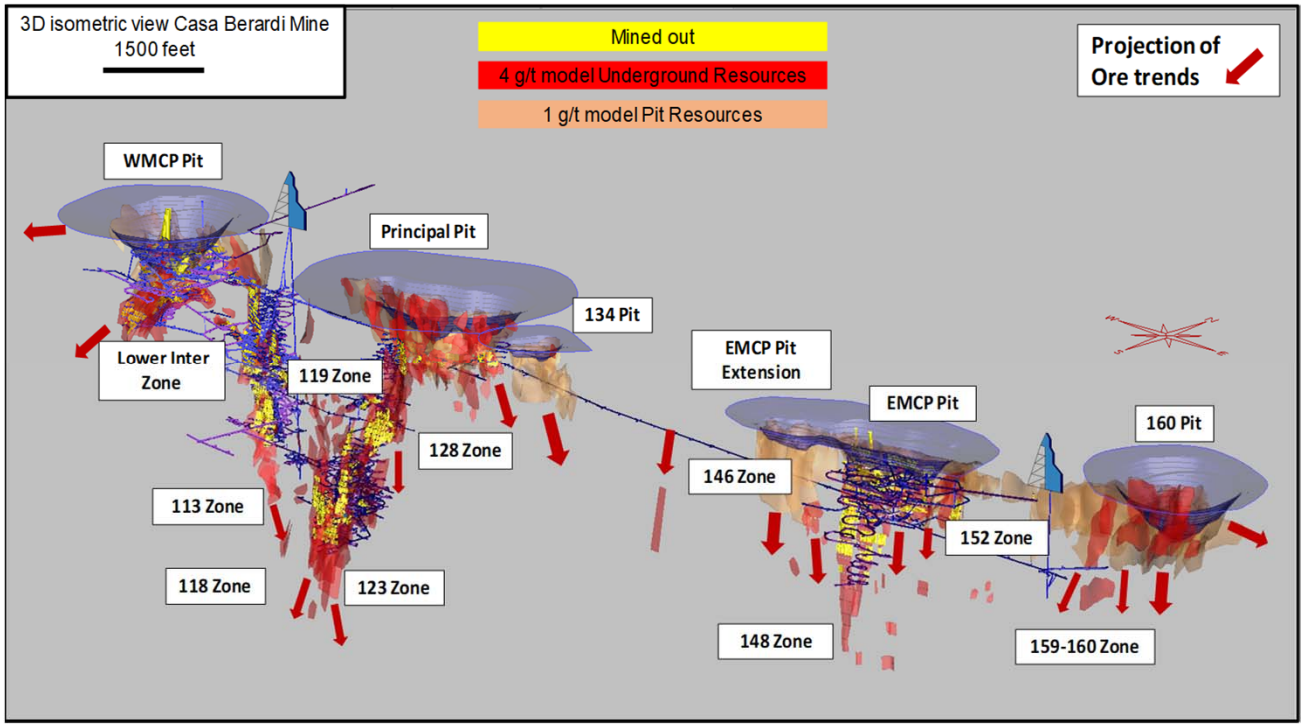

Casa Berardi Longitudinal Section

SERIES OF OPEN PITS AT CASA BERARDI

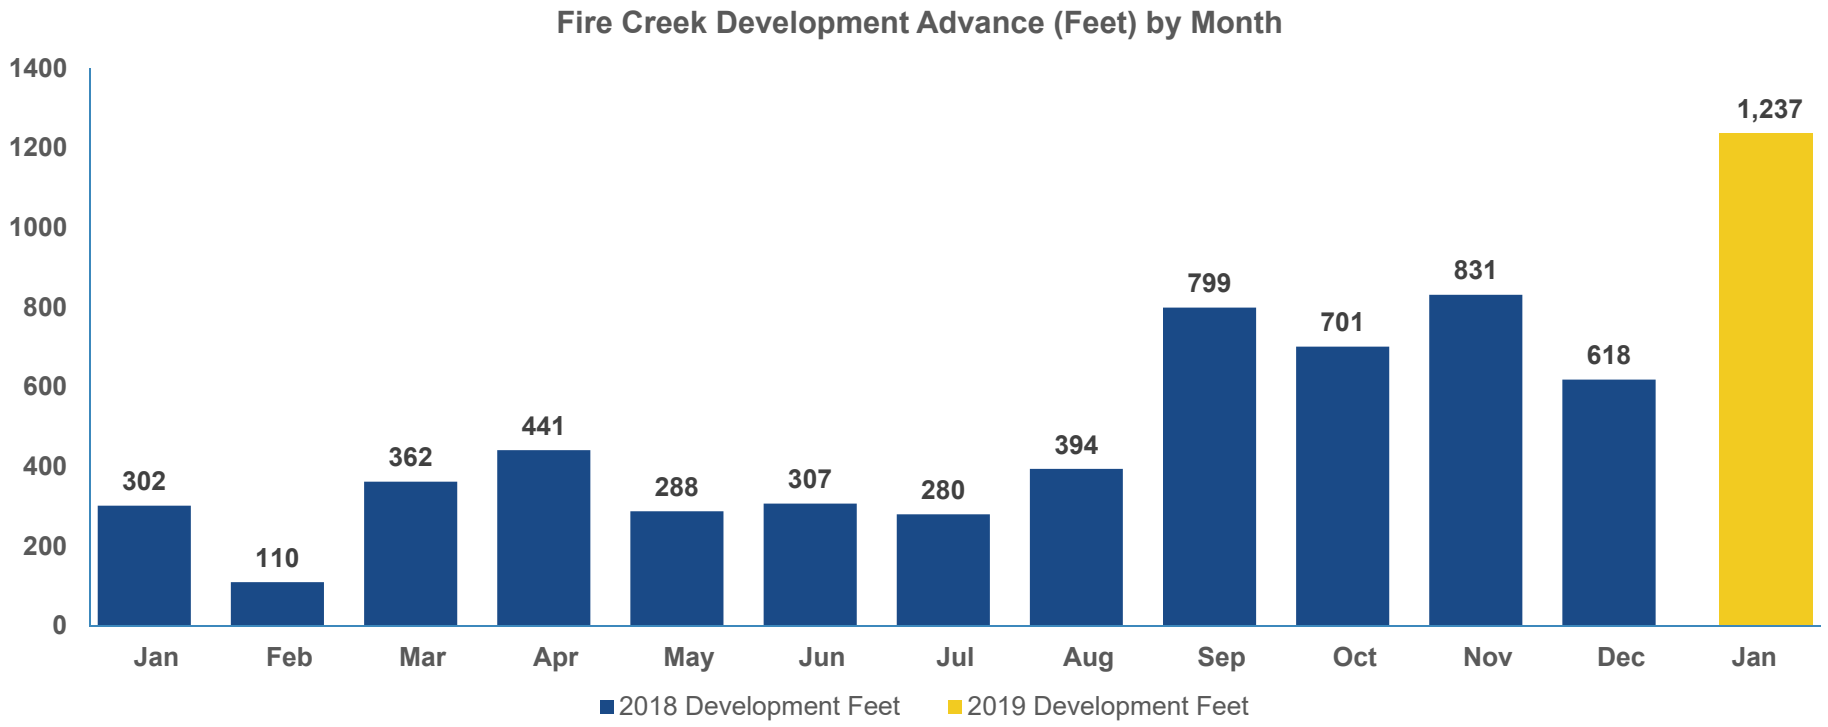

WEST MINE CROWN PILLAR (WMCP) LATEST ADDITION TO THE PITS

- 28% increase in gold reserves
- WMCP pit is the 2nd largest and 2nd highest grade
- Infilling on the WMCP and data to steepen the pit walls
- Advancing underground exploration on the East portion of the mine
- 30 kilometers along the Casa Berardi break

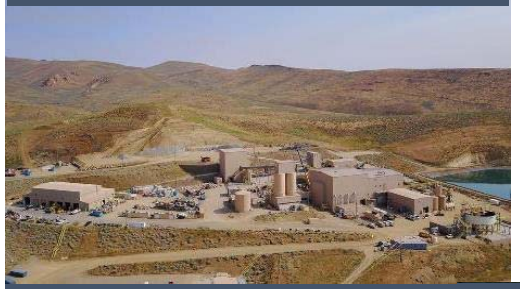

FIRE CREEK DEVELOPMENT INCREASING

SETS THE STAGE FOR RESTORING THE MINE DEVELOPED STATE

APPENDIX

Midas

San Sebastian

Lucky Friday

Greens Creek

Fire Creek

Hollister

Casa Berardi

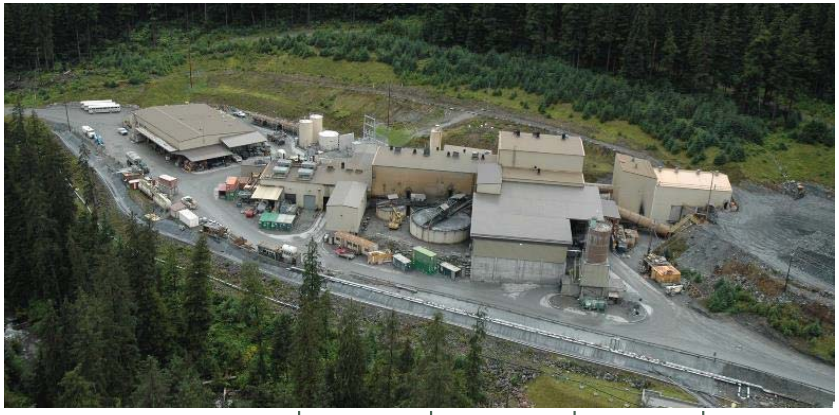

NYSE: HL

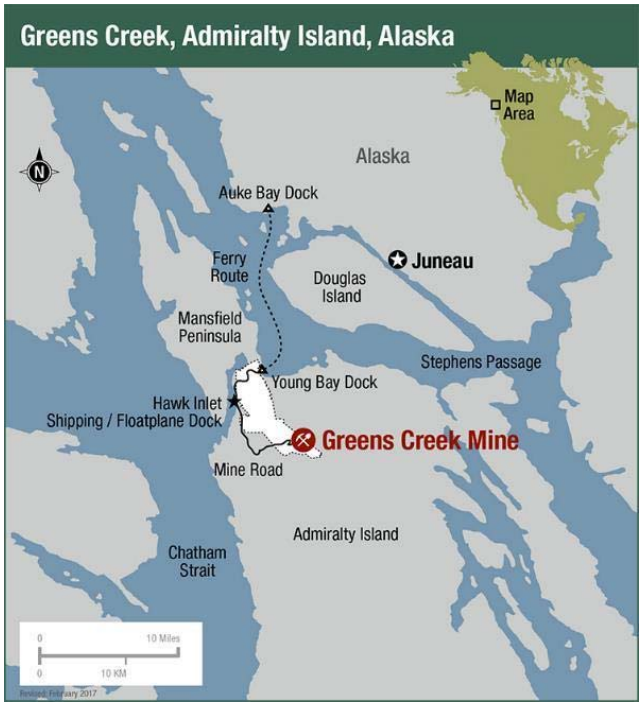

ENDNOTES

1. Silver and gold equivalent is calculated using the average market prices for the time period noted.
2. Cost of sales and other direct production costs and depreciation, depletion and amortization.
3. Cash cost, after by-product credits, per silver and gold ounce represents a non-GAAP measurement, a reconciliation of which to cost of sales and other direct production costs and depreciation, depletion and amortization (sometimes referred to as "cost of sales" in this release), can be found in the Appendix. It is an important operating statistic that management utilizes to measure each mine's operating performance. It also allows the benchmarking of performance of each mines versus those of our competitors. As a primary U.S. silver mining company, management also uses the statistic on an aggregate basis - aggregating the Greens Creek, Lucky Friday and San Sebastian mines - to compare performance with that of other primary silver mining companies. With regard to Casa Berardi and Nevada Operations, management uses cash cost, after by- product credits, per gold ounce to compare its performance with other gold mines. Similarly, the statistic is useful in identifying acquisition and investment opportunities as it provides a common tool for measuring the financial performance of other mines with varying geologic, metallurgical and operating characteristics. In addition, the Company may use it when formulating performance goals and targets under its incentive program. The estimated fair value of the stockpile acquired at Hollister has been removed from the cash cost, after by-product credits calculation.
4. All-in sustaining cost (AISC), after by-product credits, is a non-GAAP measurement, a reconciliation of which to cost of sales and other direct production costs and depreciation, depletion and amortization, the closest GAAP measurement, can be found in the appendix. AISC, after by-product credits, includes cost of sales and other direct production costs, expenses for reclamation and exploration, and sustaining capital costs at the mines sites. AISC, after by-product credits for our consolidated silver properties also includes corporate costs for all general and administrative expenses, exploration and sustaining capital which support the operating properties. AISC, after by-product credits, is calculated net of depreciation, depletion, and amortization and by-product credits. 2019E refers to Hecla's estimates for 2019. Current GAAP measures used in the mining industry, such as cost of goods sold, do not capture all the expenditures incurred to discover, develop and sustain silver and gold production. Management believes that all in sustaining costs is a non-GAAP measure that provides additional information to management, investors and analysts to help in the understanding of the economics of our operations and performance compared to other producers and in the investor's visibility by better defining the total costs associated with production. Similarly, the statistic is useful in identifying acquisition and investment opportunities as it provides a common tool for measuring the financial performance of other mines with varying geologic, metallurgical and operating characteristics. In addition, the Company may use it when formulating performance goals and targets under its incentive program. 2018 AISC, after by-product credits, per gold ounce for the Nevada operations excludes $5 million of capital as it distorts the AISC estimates for the remainder part of the year. The estimated fair value of the stockpile acquired at Hollister has been removed from the AISC, after by-product credits calculation.
5. 2019E refers to Hecla's estimates for 2019.
6. Free Cash Flow is a non-GAAP measure calculated as Operating Cash Flow (GAAP) less Capex (GAAP). Cash flow conversion calculated as Free Cash Flow from mines divided by Operating Cash Flow.
7. Expectations for 2019 includes silver, gold, lead and zinc production from Lucky Friday, Greens Creek, San Sebastian, Casa Berardi and Nevada Operations converted using Au $1,250/oz, Ag $16.00/oz, Zn $1.25/lb, Pb $1.00/lb. (Numbers may be rounded.)

GREENS CREEK

CONSISTENT LOW-COST PRODUCTION IN A WILDERNESS AREA / NATIONAL MONUMENT Monument

RAMP-UP NEVADA EXPLORATION IN 2019

EMPHASIS ON UPGRADING RESOURCE TO RESERES; NEW RESOUCES ANTICIPATED

2018 Activities:

- Reorganized and prioritized exploration assets.
- Limited drilling of Fire Creek, Midas and Hollister due to lack of drill platforms underground.
- Completed small surface exploration drill programs at Fire Creek, Midas and Hollister.

Fire Creek

2019 Plan:

- 5 drills operating at Fire Creek. Over 54,000 feet of definition and exploration drilling.
- 3 exploration drills at Hollister. Over 40,000 ft of combined underground and surface exploration drilling at Hollister/Hatter Graben.
- Conduct internal multi-discipline GeoSummit to improve exploration targeting.
- Geophysical surveys to delineate high priority drill targets.
- Clay distribution and speciation study to provide additional vectoring.

ROCK CREEK & MONTANORE

FINAL STAGES OF PERMITTING, EXPECTING TO ADVANCE IN 2018

Mine overview

- Montanore, a silver-copper mine located in Libby, Montana, was acquired from Mines Management in 2016
- Rock Creek, a silver-copper mine located in Noxon, Montana, was acquired from Revett in 2015
- Both projects are in the final stages of permitting, and are expected to advance to exploration upon approval

Impact on Resources

- Although assigned nominal value today, these projects represent meaningful upside for Hecla as they progress through feasibility

Combined, the projects are as large as Hecla's current reserves

Rock Creek Site Overview

Project Overview

Metric	Rock Creek	Montanore
Potential Mine Life	20 – 30 Years each	
Hecla Stock Acquisition Cost	$19 M	$54 M
Advanced Permitting	SEIS	Final EIS, RODs*
Well Located	50 miles from Lucky Friday	
Land Position	Great Exploration Potential	

* Record of Decision

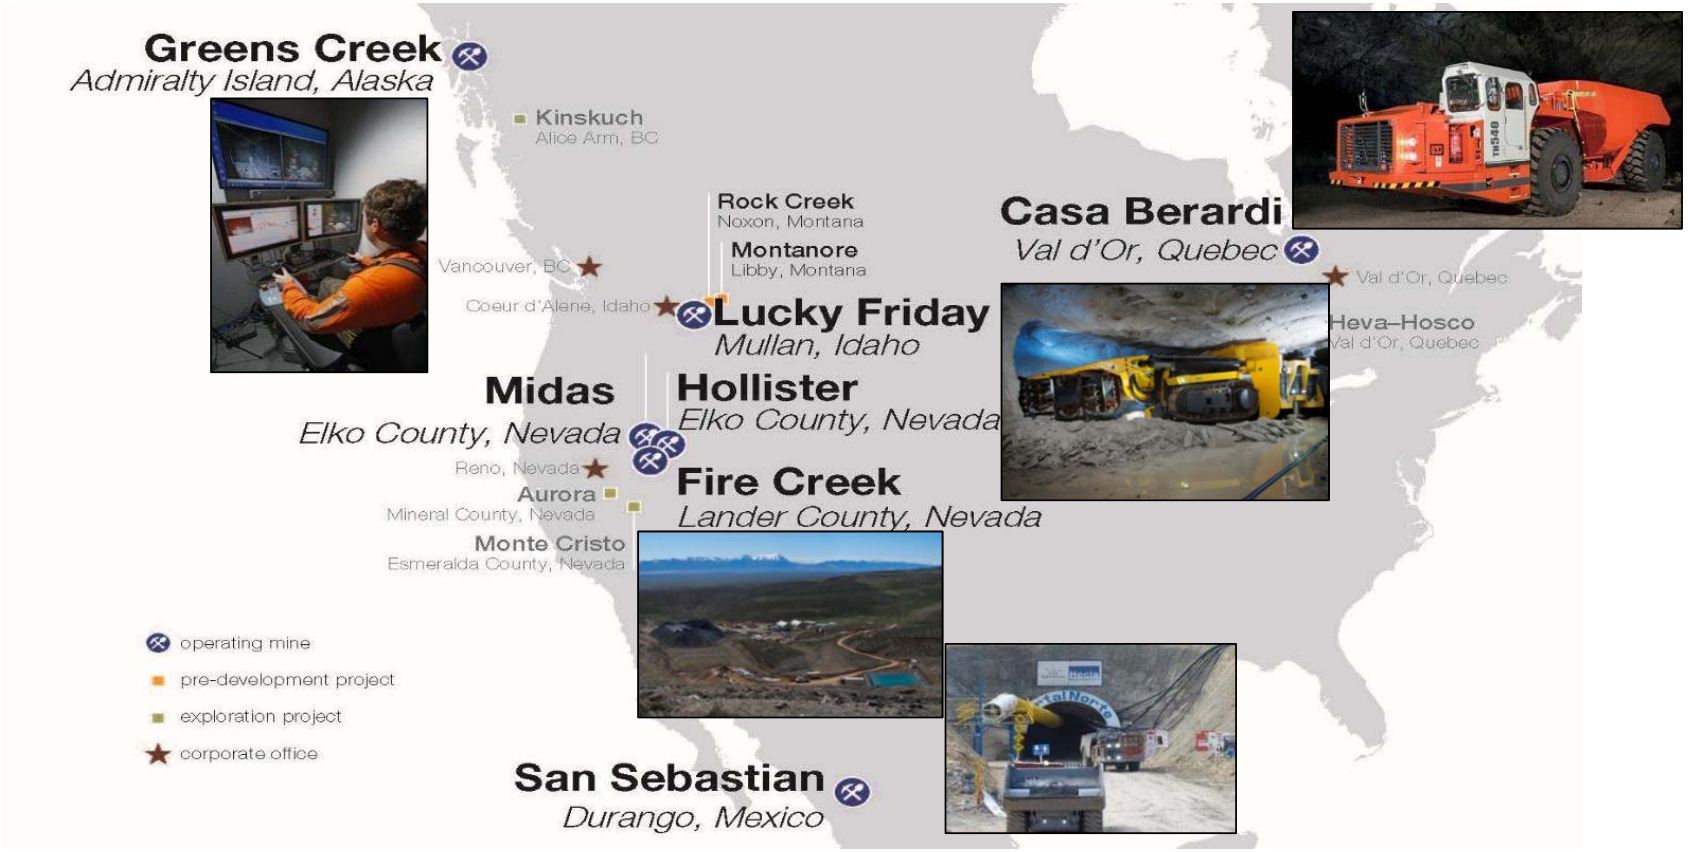

WHY INVEST IN HECLA?

IMPROVING THE FUNDAMENTALS INCREASES VALUE

Key Value Drivers	Improvements In 2018/19
Jurisdiction	Added Nevada
Reserve Quality	Growing reserves at industry low price assumptions
Mine Life	Mine life at our most important mines are long and getting longer
Social License	Injuries are materially lower; frequency rate is half
Access to Capital	Increased undrawn revolving credit to $250 million
Capital & Operating Costs	Throughput higher, driving down unit cost with reducing capital
High IRR Projects	Many technology investments pay back within 12-18 months
Best Mines Getting Better	Increasing cash flows at Greens Creek and Casa

INNOVATING ACROSS NORTH AMERICAN FOCUSED ASSETS

OPERATIONS IN LOW-RISK & MINING-FRIENDLY JURISDICTIONS

CASH COST AND AISC RECONCILIATION TO GAAP

GREENS CREEK

Reconciliation of Cost of Sales and Other Direct Production Costs and Depreciation, Depletion and Amortization (GAAP) to Cash Cost, Before By-product Credits and Cash Cost, After By-product Credits (non-GAAP) and All-In Sustaining Costs, Before By-product Credits, per Ounce and All-In Sustaining Costs, After By-product Credits, per Ounce (non-GAAP)

In thousands (except per ounce amounts)

	Q4 2017	2017	Q4 2018	2018
Cost of sales and other direct production costs and depreciation, depletion and amortization (GAAP)	$ 61,561	$ 201,803	$ 48,302	$ 190,066
Depreciation, depletion and amortization	(16,886)	(56,328)	(11,631)	(46,511)
Treatment costs	10,153	47,774	9,038	38,174
Change in product inventory	(7,645)	(2,247)	2,092	3,087
Reclamation and other costs	(1,241)	(2,716)	(587)	(2,911)
Cash Cost, Before By-product Credits[1]	45,942	188,286	47,214	181,905
Reclamation and other costs	667	2,666	849	3,397
Exploration	926	4,265	242	3,151
Sustaining capital	10,360	35,255	12,170	46,864
AISC, Before By-product Credits[1,2]	57,895	230,472	60,475	235,317
Total By-product credits	(44,518)	(182,361)	(43,342)	(190,924)
Cash Cost, After By-product Credits	$ 1,424	$ 5,925	$ 3,872	$ (9,019)
AISC, After By-product Credits	$ 13,377	$ 48,111	$ 17,133	$ 44,393
Divided by ounces produced	2,146	8,352	2,164	7,953
Cash Cost, Before By-product Credits, per Silver Ounce	$ 21.41	$ 22.54	$ 21.83	$ 22.88
By-products credits per Silver Ounce	(20.75)	(21.83)	(20.04)	(24.01)
Cash Cost, After By-product Credits, per Silver Ounce	$ 0.66	$ 0.71	$ 1.79	$ (1.13)
AISC, Before By-product Credits, per Silver Ounce	$ 26.98	$ 27.59	$ 27.96	$ 29.59
By-products credits per Silver Ounce	(20.75)	(21.83)	(20.04)	(24.01)
AISC, After By-product Credits, per Silver Ounce	$ 6.23	$ 5.76	$ 7.92	$ 5.58

1. Includes all direct and indirect operating cash costs related directly to the physical activities of producing metals, including mining, processing and other plant costs, third-party refining and marketing expense, on-site general and administrative costs, royalties and mining production taxes, before by-product revenues earned from all metals other than the primary metal produced at each unit.
2. All-in sustaining costs, before by-product credits for our consolidated silver properties includes corporate costs for all general and administrative expenses and exploration and sustaining capital which support the operating properties.

CASH COST AND AISC RECONCILIATION TO GAAP

CASA BERARDI

Reconciliation of Cost of Sales and Other Direct Production Costs and Depreciation, Depletion and Amortization (GAAP) to Cash Cost, Before By-product Credits and Cash Cost, After By-product Credits (non-GAAP) and All-In Sustaining Costs, Before By-product Credits, per Ounce and All-In Sustaining Costs, After By-product Credits, per Ounce (non-GAAP)

In thousands (except per ounce amounts)

[1] The term "reserve" means that part of a mineral deposit that can be economically and legally extracted or produced at the time of the reserve determination. The term "economically" as used in the definition of reserve, means that profitable extraction or production has been established or analytically demonstrated to be viable and justifiable under reasonable investment and market assumptions. The term "legally" as used in the definition of reserve, does not imply that all permits needed for mining and processing have been obtained or that other legal issues have been completely resolved. However, for a reserve to exist, Hecla must have a justifiable expectation, based on applicable laws and regulations, that issuance of permits or resolution of legal issues necessary for mining and processing at a particular deposit will be accomplished in the ordinary course and in a timeframe consistent with Hecla's current mine plans.

[2] Mineral reserves are based on $1200 gold, $14.50 silver, $0.90 lead, $1.15 zinc, unless otherwise stated.

[3] Mineral reserves are based on $1200 gold and a US$/CAN$ exchange rate of 1:1.33 Reserve diluted to an average of 34.7% to minimum width of 0.8 feet (3 m).

Reserves at Casa Berardi were determined by Jonathan Archambault-Giroux, P. Geol., Que.; Real Perent, P.Geo. Que.; and Alain Guerneville, P. Eng., Que. unless otherwise stated.

Open pit mineral reserves of the Principal Mine were estimated in September 2018 by Hecla Quebec and Mine Development Associates based on $1225 gold and a US$/CAN$ exchange rate of 1:3.

Hecla Mining Company, "Principal Deposit Open Pit Mining Study - 2018"

September 1, 2018, by Mine Development Associates, Thomas L. Dyer, P.E.

Open pit mineral reserves of the 160 and 134 Zones were estimated in January 2018 by Hecla Quebec and Mine Development Associates based on $1225 gold and a US$/CAN$ exchange rate of 1.3.

Hecla Mining, Casa Berardi 160 and 134 Zones, Open Pit Mining Study - 2017"

January 12, 2018, by Mine Development Associates, Thomas L. Dyer, P.E.

Open pit mineral reserves of the West Mine Crown Pillar were estimated in January 2018 by Hecla Quebec and Mine Development Associates based on $1225 gold and a US$/CAN$ exchange rate of 1.3.

Hecla Mining Company, "West Mine Crown Pillar Deposit, Open Pit Mining Study - 2018"

January 10, 2018, by Mine Development Associates, Thomas L. Dyer, P.E.

Open pit mineral reserves of the East Mine Crown Pillar Expansion were estimated in August 2018 by Hecla Quebec and Mine Development Associates based on $1225 gold and a US$/CAN$ exchange rate of 1.3.

Hecla Mining Company, "East Mine Crown Pillar Expansion, Open Pit Mining Study - 2018"

August 22, 2018, by Mine Development Associates, Thomas L. Dyer, P.E.

[3] Recoveries at Fire Creek for gold and silver are 94% and 93%. Cutoff grade of 0.330 Au Equivalent oz/ton and incremental cutoff grade of 0.11 Au Equivalent oz/ton. Unplanned dilution of 10% to 17% included depending on mining method.

[4] Recoveries at Hollister for gold and silver are 81% and 80%. Cutoff grade of 0.306 Au Equivalent oz/ton and incremental cutoff grade of 0.07 Au Equivalent oz/ton. Unplanned dilution of 10% to 17% and 5% mining loss included.

MEASURED AND INDICATED MINERAL RESOURCES

INFERRED MINERAL RESOURCES

(on Dec. 31, 2018 unless otherwise noted)

Note: All estimates are in-situ except for the proven reserves at Greens Creek and San Sebastian which are in surface stockpiles. Resources are exclusive of reserves.

(6) Mineral resources are based on $1350 gold, $21 silver, $1.10 lead, $1.20 zinc and $3.00 copper, unless otherwise stated.

(7) Measured and indicated resources from Gold Hunter and Lucky Friday vein systems are diluted and factored for expected mining recovery.

(8) Measured, indicated and inferred resources are based on $1,350 gold and a US$/CAN$ exchange rate of 1:1.33 Underground resources are reported at a minimum mining width of 6.6 to 9.8 feet (2 m to 3 m)

Resources at Casa Berardi were determined by Jonathan Archambault-Giroux, P. Geo., Que., Real Parent, P.Geo. Que., and Alain Quenneville, P. Eng., Que. unless otherwise stated.

(9) Indicated resources reported at a minimum mining width of 5.9 feet (1.8 m) for Hugh Zone, Middle Vein, North Vein, and East Francine Vein and 4.9 feet (1.5 m) for Andrea Vein

San Sebastian lead, zinc and copper grades are for 1,224,900 tons of indicated resource within the Middle Vein and the Hugh Zone of the Francine Vein.

(10) Recoveries at Fire Creek for gold and silver are 94% and 92%. Au equivalent cutoff grade of 0.297 oz/ton. The minimum mining width is defined as four feet or the vein true thickness plus two feet, whichever is greater.

(11) Recoveries at Hollister for gold and silver are 87% and 80%. Au equivalent cutoff grade of 0.352 oz/ton. The minimum mining width is defined as four feet or the vein true thickness plus two feet, whichever is greater.

(12) Recoveries at Midas for gold and silver are 93% and 88% Au equivalent cutoff grade of 0.217 oz/ton. The minimum mining width is defined as four feet or the vein true thickness plus two feet, whichever is greater.

(13) Indicated and inferred open-pit resources for Fire Creek were calculated November 30, 2017 using recoveries for gold and silver of 65% and 30% for oxide material and 60% and 25% for mixed oxide-sulfide material.

Open pit resources are calculated at $1400 gold and $19.83 silver and cut-off grade of 0.01 Au Equivalent oz/ton and is inclusive of 10% mining dilution and 5% ore loss. Open pit mineral resources exclusive of underground mineral resources.

NI43-101 Technical Report for the Fire Creek Project, Lander County, Nevada; Effective Date March 31, 2018; prepared by Practical Mining LLC, Mark Odell, P.E. for Hecla Mining Company, June28, 2018

(14) Measured, indicated and inferred resources were estimated in by Goldminds Geoservices Inc. with effective date 12-July-2013, and are based on $1,300 gold and a US$/CAN$ exchange rate of 1:1.

The resources are in-situ without dilution and material loss.

NI43-101 Technical Report, Mineral Resource Update, Heva-Hosco Gold Projects, Rouyn-Noranda, Quebec, Hecla Quebec, December 2013

Prepared by: Claude Duplessis, Eng. Project Manager - GoldMinds Geoservices Inc.; Maxime Dupéré, P.Geo - SGS Canada Inc. (Geostat)

(15) Indicated resources reported at a minimum mining width of 6.0 feet for Bulldog; resources based on $26.5 Ag, $0.85 Pb, and $0.85 Zn

(16) Indicated and Inferred resources reported using $21 silver, $0.95 lead, $1.10 lead minimum mining width of 4.3 feet.

(17) Inferred resources reported at a minimum mining width of 5.9 feet (1.8 m) for Hugh Zone, Middle Vein, North Vein, and East Francine Vein and 4.9 feet (1.5 m) for Andrea Vein

San Sebastian lead, zinc and copper grades are for 702,600 tons of inferred resource within the Middle Vein and the Hugh Zone of the Francine Vein.

(18) Inferred resources for the Hatter Project at the Hollister Mine calculated using recoveries for gold and silver of 82.7% and 71.8% and an Au equivalent cutoff grade of 0.27 oz/ton

(19) Inferred resources reported at a minimum mining width of 6.0 feet for Bulldog, 5.0 feet for Equity & North Amethyst veins; resources based on $1400 Au, $26.5 Ag, $0.85 Pb, and $0.85 Zn.

(20) Inferred resource reported at a minimum mining width of 5.0 feet; resources based on $1400 Au, $26.5 Ag.

(21) Inferred resource at Rock Creek reported at a minimum thickness of 15 feet and adjusted given mining restrictions as defined by U.S. Forest Service, Kootenai National Forest in the June 2003 'Record of Decision, Rock Creek Project'.

(22) Inferred resource at Montanore reported at a minimum thickness of 15 feet and adjusted given mining restrictions defined by U.S. Forest Service, Kootenai National Forest, Montana DEQ in December 2015 'Joint Final EIS, Montanore Project'

and the February 2016 U.S Forest Service - Kootenai National Forest 'Record of Decision, Montanore Project'.

2008 – 2018 RESERVE TABLE
