

## Global Atomic Announces Date for its Annual Meeting of Shareholders

**Toronto, ON, May 27, 2021:** Global Atomic Corporation (“Global Atomic” or the “Company”), (TSX: GLO, OTCQX: GLATF, FRANKFURT: G12) will webcast its Annual General Meeting of Shareholders (“AGM”) on Thursday, June 24, 2021 at 10:30 a.m. (Toronto time).

Again this year, recognizing the widespread cancellation of public events for the protection of individuals and public safety in the face of the ongoing COVID-19 pandemic, the AGM will be held in a virtual-only format via a live audio webcast at <https://virtual-meetings.tsxtrust.com/1117>.

Registered shareholders and duly appointed proxyholders who participate in the AGM online will be able to listen to the proceedings, ask questions and vote at the AGM in real time. Shareholders will not be able to attend the AGM physically. Please see “Attending, Participating and Voting at the Virtual Meeting” in the Management Information Circular for detailed instructions on how to attend, participate and vote at the AGM.

The Management Information Circular and related meeting materials are available on the Company’s website at [www.globalatomiccorp.com/investors/annual-general-meeting-of-shareholders/](http://www.globalatomiccorp.com/investors/annual-general-meeting-of-shareholders/) and under the Company’s SEDAR profile at [www.sedar.com](http://www.sedar.com).

### About Global Atomic

Global Atomic Corporation ([www.globalatomiccorp.com](http://www.globalatomiccorp.com)) is a publicly listed company that provides a unique combination of high-grade uranium mine development and cash-flowing zinc concentrate production.

The Company’s Uranium Division includes four deposits with the flagship project being the large, highgrade Dasa Project, discovered in 2010 by Global Atomic geologists through grassroots field exploration. With the issuance of the Dasa Mining Permit and an Environmental Compliance Certificate by the Republic of Niger, the Dasa Project is fully permitted for commercial production. Final design in support of the Company’s Feasibility Study is on-going.

Global Atomic’s Base Metals Division holds a 49% interest in the Befesa Silvermet Turkey, S.L. (“BST”) Joint Venture, which operates a new, state of the art zinc production plant, located in Iskenderun, Turkey. The plant recovers zinc from Electric Arc Furnace Dust (“EAFD”) to produce a high-grade zinc oxide concentrate which is sold to zinc smelters around the world. The Company’s joint venture partner, Befesa Zinc S.A.U. (“Befesa”) listed on the Frankfurt exchange under ‘BFSA’, holds a 51% interest in and is the operator of the BST Joint Venture. Befesa is a market leader in EAFD recycling, with approximately 50% of the European EAFD market and facilities located throughout Europe and Asia.

development and exploration; cost of future activities; capital and operating expenditures; success of exploration activities; mining or processing issues; currency exchange rates; government regulation of mining operations; and environmental and permitting risks. Generally, forward-looking statements can be identified by the use of forward-looking terminology such as "plans", "is expected", "estimates", variations of such words and phrases or statements that certain actions, events or results "could", "would", "might", "will be taken", "will begin", "will include", "are expected", "occur" or "be achieved". All information contained in this news release, other than statements of current or historical fact, is forward-looking information. Statements of forward-looking information are subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of Global Atomic to be materially different from those expressed or implied by such forward-looking statements, including but not limited to those risks described in the annual information form of Global Atomic and in its public documents filed on SEDAR from time to time.

Forward-looking statements are based on the opinions and estimates of management at the date such statements are made. Although management of Global Atomic has attempted to identify important factors that could cause actual results to be materially different from those forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance upon forward-looking statements. Global Atomic does not undertake to update any forward-looking statements, except in accordance with applicable securities law. Readers should also review the risks and uncertainties sections of Global Atomic's annual and interim MD&As.
