

## Global Atomic Forms Dasa Project Financing Syndicate

**Toronto, ON, June 20, 2022:** Global Atomic Corporation (“Global Atomic” or the “Company”) is pleased to announce that the Company has now received Letters of Intent from a banking syndicate to finance the Dasa Uranium Project in Niger. The syndicate is comprised of North American financial institutions and includes the previously announced indication from Export Development Canada. The names of all members of the syndicate will be named following further due diligence and board approvals by the financial institutions, which are expected to occur by the end of 2022.

Global Atomic President and CEO, Stephen G. Roman commented, *“This significant milestone keeps us on schedule to complete our Dasa Project financing by the end of 2022 and to begin plant construction in Q1 2023. By taking this step, the syndicate has indicated its confidence in the quality of the Dasa deposit and in management’s capability and commitment to execute the Phase 1 plan as outlined in our 2021 Feasibility Study. Today’s announcement combined with the acceptance of the Company’s initial off-take sale offer announced on June 15, 2022, and the construction activity ongoing at site, are proof that Global Atomic is well underway towards achieving our goal of delivering yellowcake to utilities in early 2025.”*

### About Global Atomic

Global Atomic Corporation ([www.globalatomiccorp.com](http://www.globalatomiccorp.com)) is a publicly listed company that provides a unique combination of high-grade uranium mine development and cash-flowing zinc concentrate production.

The Company’s Uranium Division includes four deposits with the flagship project being the large, high-grade Dasa Project, discovered in 2010 by Global Atomic geologists through grassroots field exploration. With the issuance of the Dasa Mining Permit and an Environmental Compliance Certificate by the Republic of Niger, the Dasa Project is fully permitted for commercial production. The Phase 1 Feasibility Study for Dasa was filed in December 2021 and estimates Yellowcake production to commence by the end of 2024. Mine excavation began in Q1 2022.

Global Atomic’s Base Metals Division holds a 49% interest in the Befesa Silvermet Turkey, S.L. (“BST”) Joint Venture, which operates a modern zinc production plant, located in Iskenderun, Turkey. The plant recovers zinc from Electric Arc Furnace Dust (“EAFD”) to produce a high-grade zinc oxide concentrate which is sold to zinc smelters around the world. The Company’s joint venture partner, Befesa Zinc S.A.U. (“Befesa”) listed on the Frankfurt exchange under ‘BFSA’, holds a 51% interest in and is the operator of the BST Joint Venture. Befesa is a market leader in EAFD recycling, with approximately 50% of the European EAFD market and facilities located throughout Europe, Asia and the United States of America.

The information in this release may contain forward-looking information under applicable securities laws. Forward-looking information includes, but is not limited to, statements with respect to completion of any financings; Global Atomic's development potential and timetable of its operations, development and exploration assets; Global Atomic's ability to raise additional funds necessary; the future price of uranium; the estimation of mineral reserves and resources; conclusions of economic evaluation; the realization of mineral reserve estimates; the timing and amount of estimated future production, development and exploration; cost of future activities; capital and operating expenditures; success of exploration activities; mining or processing issues; currency exchange rates; government regulation of mining operations; and environmental and permitting risks. Generally, forward-looking statements can be identified by the use of forward-looking terminology such as "plans", "is expected", "estimates", variations of such words and phrases or statements that certain actions, events or results "could", "would", "might", "will be taken", "will begin", "will include", "are expected", "occur" or "be achieved". All information contained in this news release, other than statements of current or historical fact, is forward-looking information. Statements of forward-looking information are subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of Global Atomic to be materially different from those expressed or implied by such forward-looking statements, including but not limited to those risks described in the annual information form of Global Atomic and in its public documents filed on SEDAR from time to time.

Forward-looking statements are based on the opinions and estimates of management at the date such statements are made. Although management of Global Atomic has attempted to identify important factors that could cause actual results to be materially different from those forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance upon forward-looking statements. Global Atomic does not undertake to update any forward-looking statements, except in accordance with applicable securities law. Readers should also review the risks and uncertainties sections of Global Atomic's annual and interim MD&As.
