

GLOBAL ATOMIC CORPORATION

Advancing the Dasa Uranium Project in the Republic Of Niger

CORPORATE PRESENTATION
NOVEMBER 2026

GLOBALATOMIC

DISCLAIMER

This presentation has been prepared by Global Atomic Corporation ("Global Atomic" or the "Company") and includes information from sources believed by management to be reliable. No representation or warranty, expressed or implied, is made as to the accuracy of the information set forth herein. The information contained herein is as of the date hereof and is subject to change, completion or amendment without notice.

This presentation contains forward-looking statements, estimates and projections with respect to the anticipated future performance of the company that may be deemed to be "forward-looking statements." These statements, estimates and projections reflect various assumptions made by the Company concerning anticipated results, which may or may not prove to be correct.

The scientific and technical disclosures in this presentation have been extracted from the Dasa Project 2024 Feasibility Study, which was reviewed and approved by Dmitry Pertel, M.Sc., MAIG, John Edwards, B.Sc. Hons., FSAIMM, Andrew Pooley, B. Eng (Hons)., FSAIMM who are "qualified persons" under National Instrument 43-101 – Standards of Disclosure for Mineral Properties.

All statements contained in the presentation that address operating performance, future direction, management and control of the Company, events or developments that are expected to occur in the future (including statements related to earnings, expectations, sales of assets, capital expenditures, or statements expressing general optimism about future operating results) are forward-looking statements. Actual results could differ materially from those reflected in the forward-looking statements contained herein as a result of a variety of factors, many of which are beyond the Company's control.

All monetary amounts are in U.S. dollars, unless otherwise stated.

NEAR-TERM URANIUM PRODUCTION & MINERAL RECYCLING

URANIUM

Republic of Niger

Uranium will fuel the global reactor fleet to generate clean baseload power.

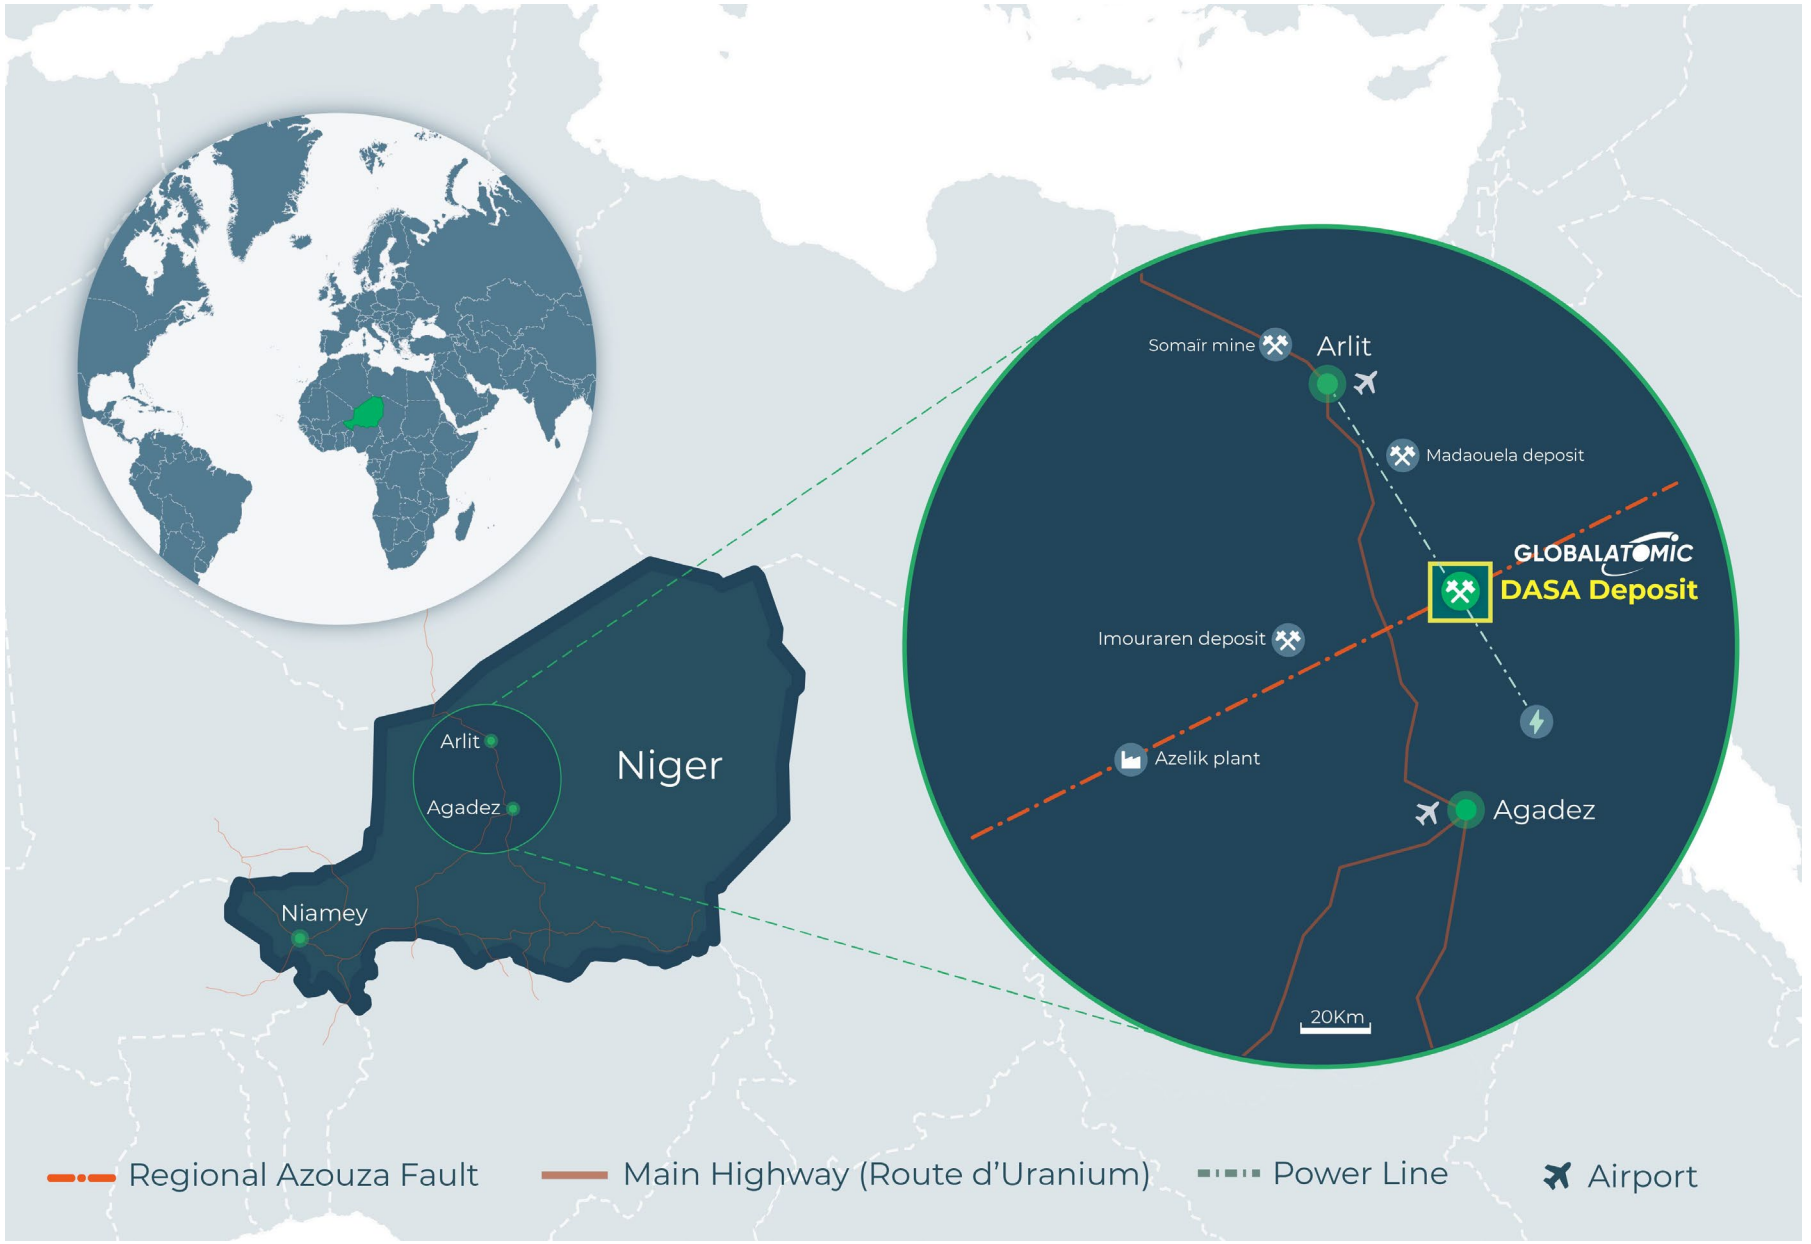

ZINC RECYCLING

Iskenderun, Türkiye

Zinc concentrate produced by recycling Electric Arc Furnace Dust (EAFD), is a key component in this region's circular economy.

Dasa is the highest-grade uranium deposit in Africa, situated in Niger's established uranium district

Mining Team advancing underground development

DASA PROJECT

Building the highest-grade uranium mine in Africa

2024 FEASIBILITY STUDY HIGHLIGHTS

- **Production:** 68.1 Mlb U_3O_8 over 23 years
- **Reserve Grade:** 4,113 ppm; 5,109 ppm in the first 12 years, highest grade outside of the Athabasca Basin
- **Feasibility Study** assumed a base U_3O_8 price of US$75/lb
- **Actual production timelines** will depend on the timing of project financing

Dasa Project Economic sensitivity with varying uranium prices*				
Uranium Price ($/lb)	$60	$75	$90	$105
Before-tax $NPV_{8\%}$	$656 M	$1,122 M	$1,572 M	$2,022 M
After-tax $NPV_{8\%}$	$551 M	$917 M	$1,269 M	$1,621 M
After-tax IRR	38.2%	57.0%	74.8%	92.9%

*Dasa Project Economic sensitivity based on 100% ownership (Global Atomic Corporation ownership = 80%)

DFC LOAN FACILITY & DRAWDOWN

DFC BOARD APPROVAL

Up to

US$414.2M

Debt facility

Conditions precedent prior to closing and drawdown

1	**Confirm uranium export route(s)**	In Progress
2	**Harmonize Mining Permit renewal term with 10-year DFC loan duration**	In Progress
3	**Complete Global Atomic portion of funding requirements**	In Progress

Board of Directors of the U.S. International Development Finance Corporation (“DFC”) has approved a debt facility on September 16, 2026. DFC Facility of $414.2M consists of Term Loan Facility of up to US$397.4M and a Cost Overrun Facility of US$16.8M.

DASA PROJECT FINANCING

All figures in US$ millions

Project cost estimate

Direct project costs	$653.0
Working capital & corporate	$55.2
Financing costs	$69.4
Total project costs	**$777.6**
Capital spent up to June 30, 2026	$(227.5)
Remaining project costs	**$550.1**

Funding to complete

DFC Loan Facility[1]	$397.4
October 2026 gross proceeds[2]	$40.0
Indicative balance to fund[3]	**$112.7**
Remaining project costs	**$550.1**

[1] DFC Loan Facility approved on September 16, 2026, up to $414.2M, consists of Term Loan Facility of US$397.4M and a Cost Overrun Facility of US$16.8M. Loan closing and drawdown remain subject to several conditions.
[2] Gross proceeds of C$56,965,500 at C$1.4243 per US$1.0.
[3] Illustrative balance before offering fees and expenses. Excludes other cash and activity since June 30, 2026.

VALUE OPPORTUNITIES

Infill drilling will target **51.4 Mlbs @ 5,349 ppm (Inferred)** and convert resources into mineable reserves to sustain **~4 Mlbs/year U_3O_8 production**

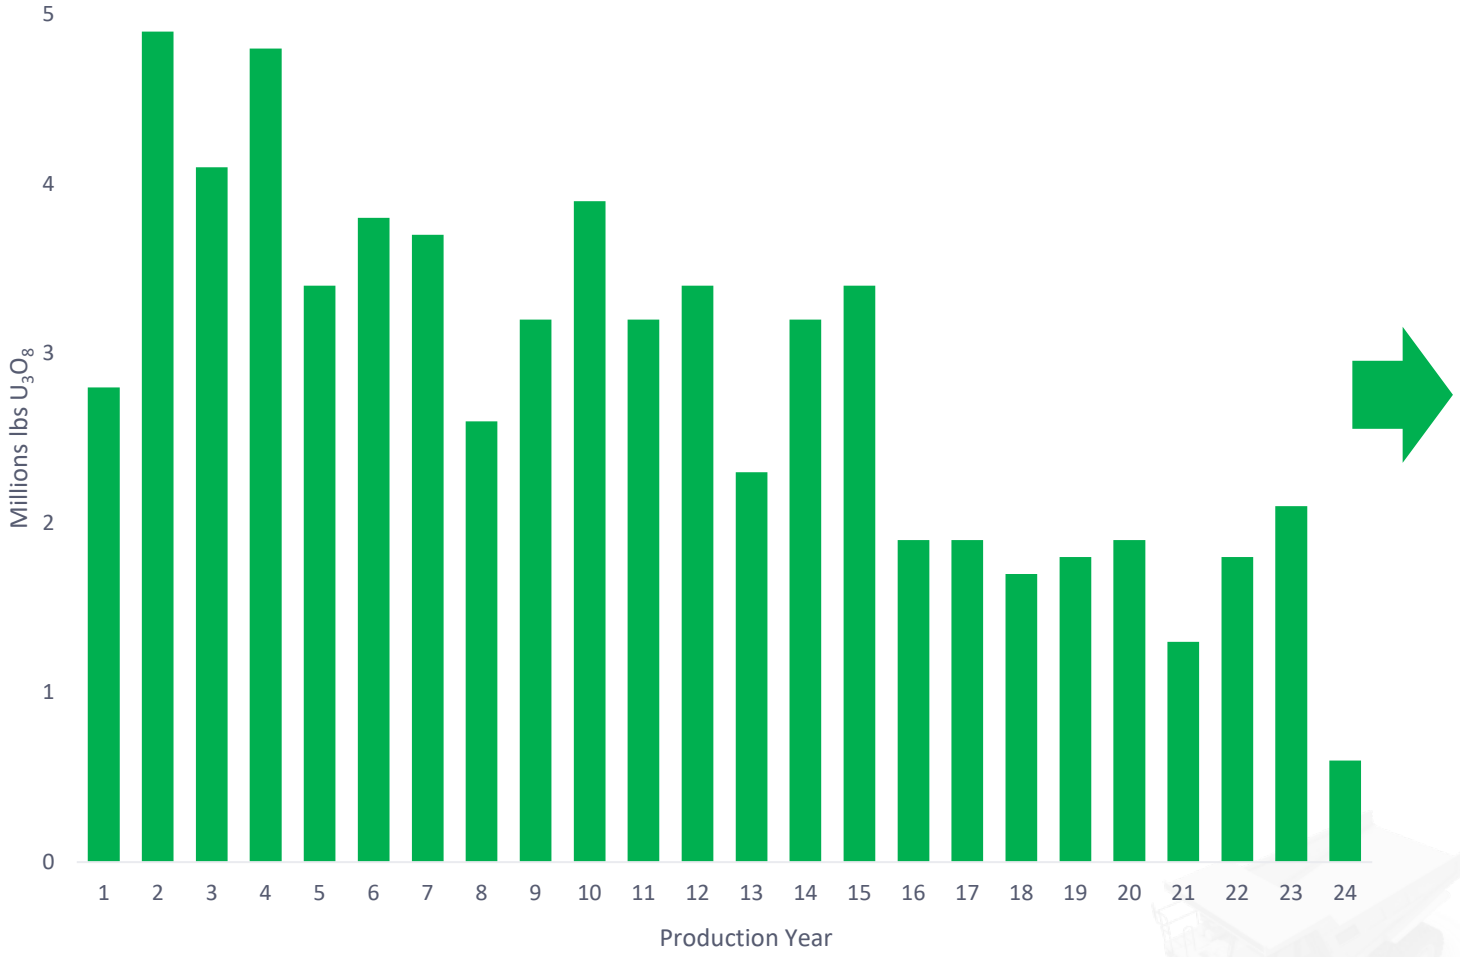

2x mill throughput expansion (1,000 → 2,000 tpd)

Reduce cut-off grade to reflect higher U_3O_8 prices

Once project financing becomes available, construction of the processing plant is expected to take **~20 months**, with commissioning and initial yellowcake shipments occurring within **3 months thereafter**.

ESTIMATED PRODUCTION PROFILE

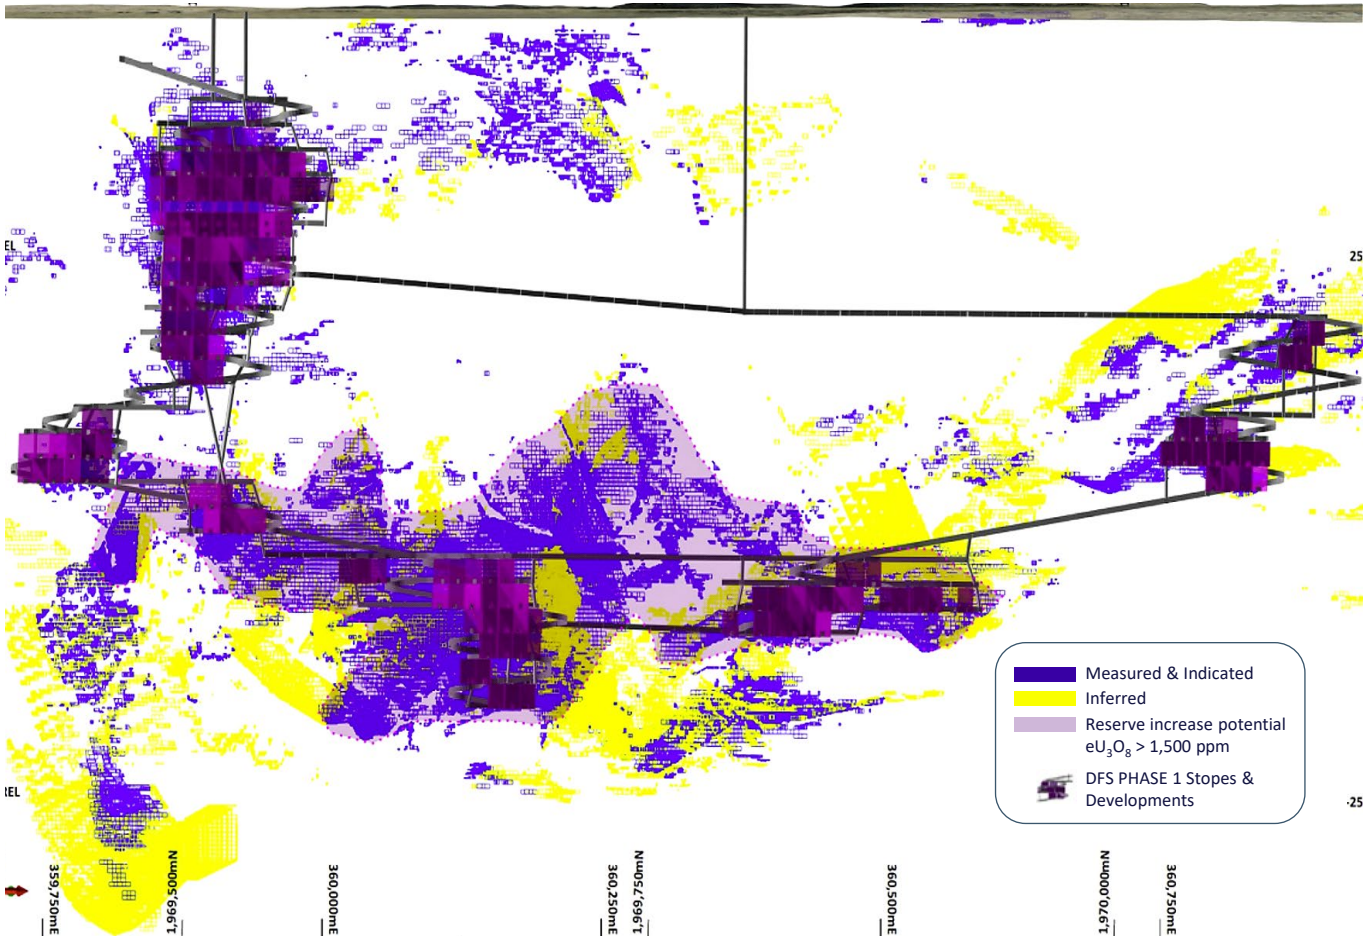

Based on 2024 Feasibility Study

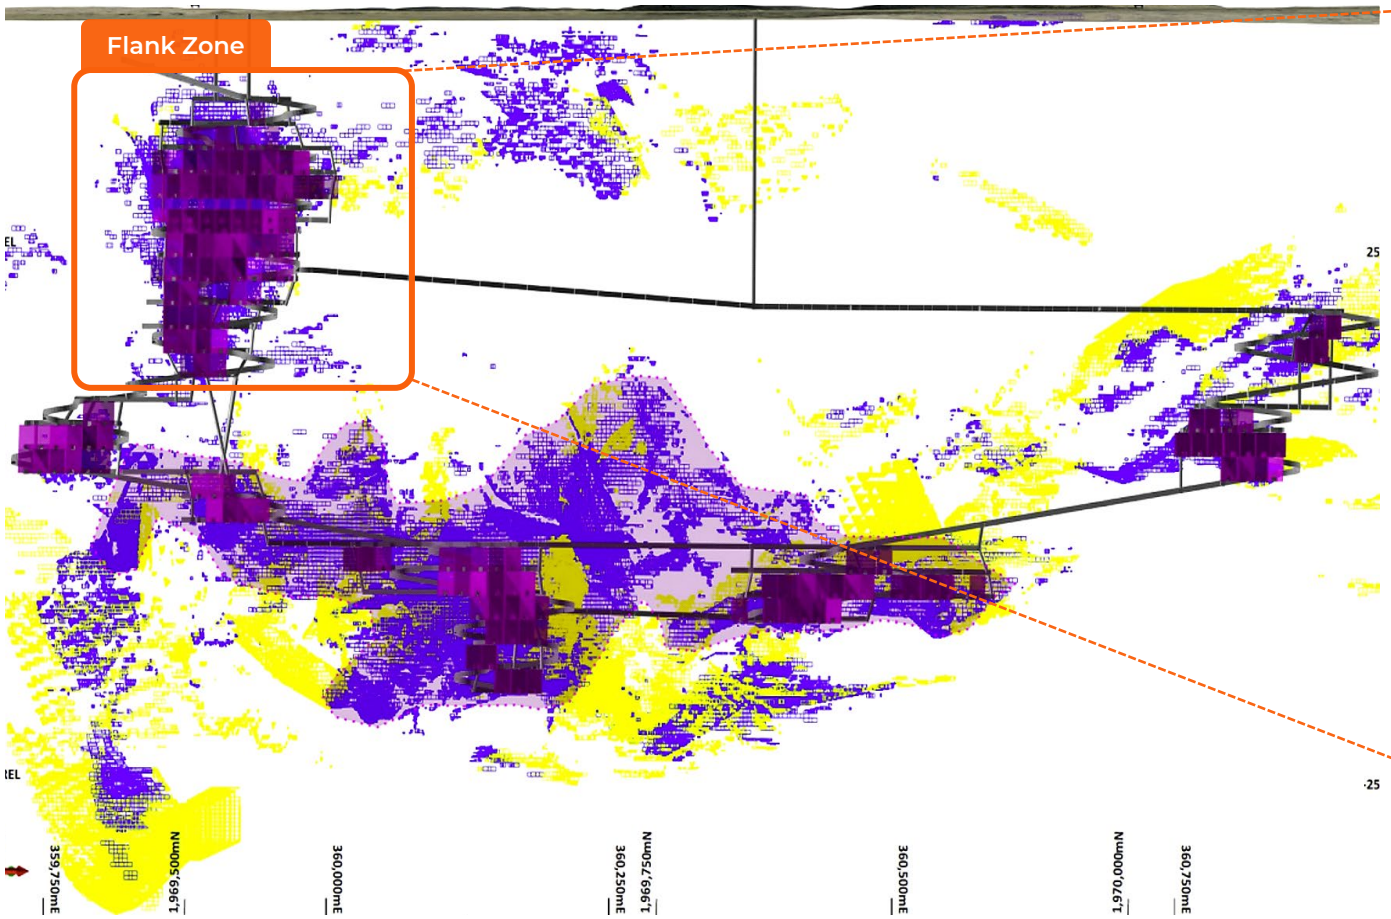

2023 MINERAL RESOURCE ESTIMATE

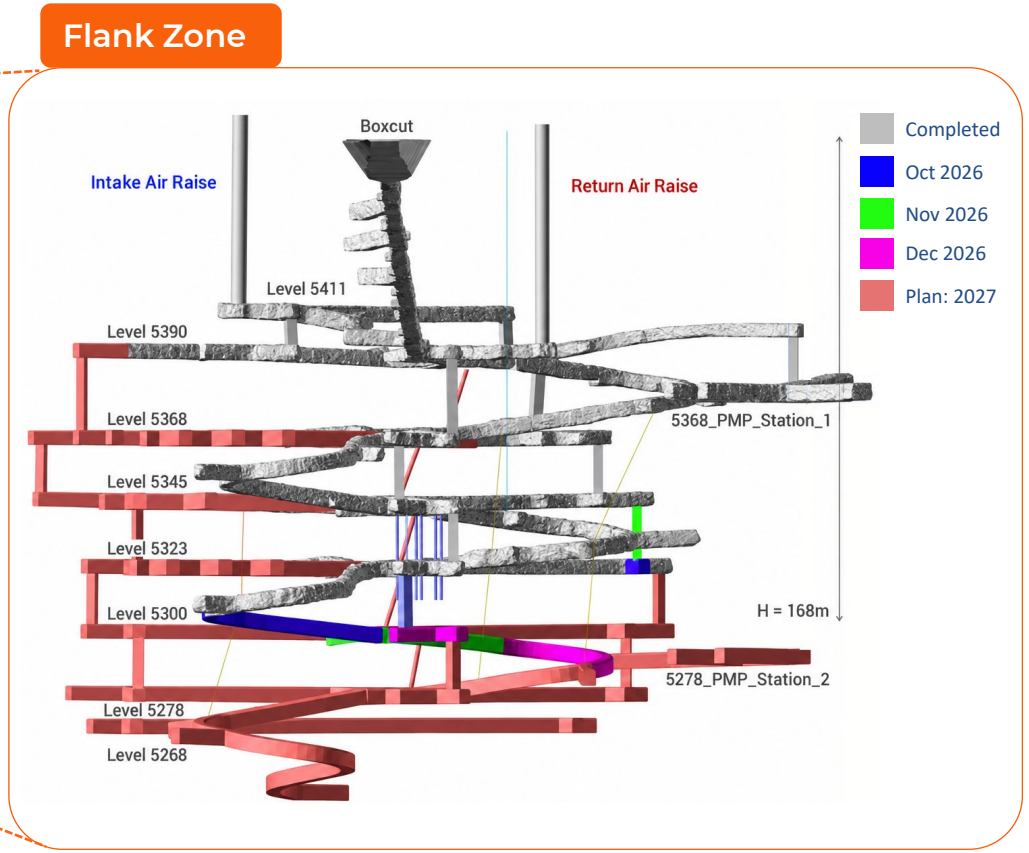

Q1 2024 Feasibility Study defines a 23-year Dasa mine plan, Mineral Reserves of 73.0 Mlbs U_3O_8, and uranium production of 68.1 Mlbs U_3O_8.

Comparative Grade / Tonnage Report at Varying Cut-Off Grades May 2023 Revised Estimate				
Cut-Off Grade (ppm U_3O_8)	Category	Tonnes (Mt)	Uranium Content eU_3O_8 (ppm)	Contained Uranium eU_3O_8 Mlbs
100	Indicated	103.6	803	183.5
	Inferred	71.0	636	99.5
320	Indicated	44.9	1,602	158.5
	Inferred	25.4	1,435	80.4
1,200	Indicated	12.6	4,201	117.1
	Inferred	5.9	4,320	56.1
1,500	**Indicated**	**10.1**	**4,926**	**109.6**
	Inferred	**4.4**	**5,349**	**51.4**
2,500	Indicated	5.7	7,258	91.0
	Inferred	2.4	8,211	43.2
10,000	Indicated	0.9	22,185	43.5
	Inferred	0.6	18,362	25.3

FLANK ZONE MINE PLAN

- **Ramp and level development** advancing to provide stope access on five levels in the Flank Zone.
- **The Flank Zone** will be mined over **10 years** prior to entering the main orebody.

Dasa Project keeps moving forward

Crusher, Retaining Wall and ROM Pad foundations

Acid Plant in progress

Acid Plant in progress

Lab & Control Room – civil works in progress

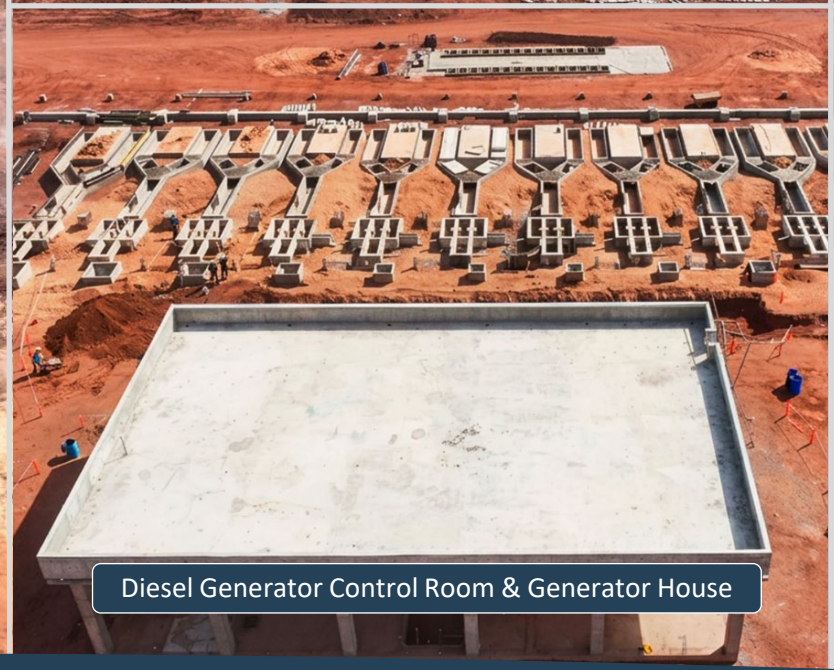

SAG Mill foundation

Belt Filter Building foundation

Fuel Farm expansion

Diesel Generator Control Room & Generator House

Site Warehouse - civil works underway

Stacker & Reclaimer Area in progress

Substation 2 civil works underway

260-person camp completed

1 million hours LTI-free — a shared achievement

ESG INITIATIVES SINCE 2008

Empowering our workforce: First graduates of the Dasa Mine Literacy Program

- Food during droughts
- Medical supplies
- Water wells & infrastructure
- Education & training
- Local, regional and national procurement of goods & services
- ESIAs include significant consultation and baseline studies
- Development Bank due diligence independently validates ESG

Area village consultation meeting

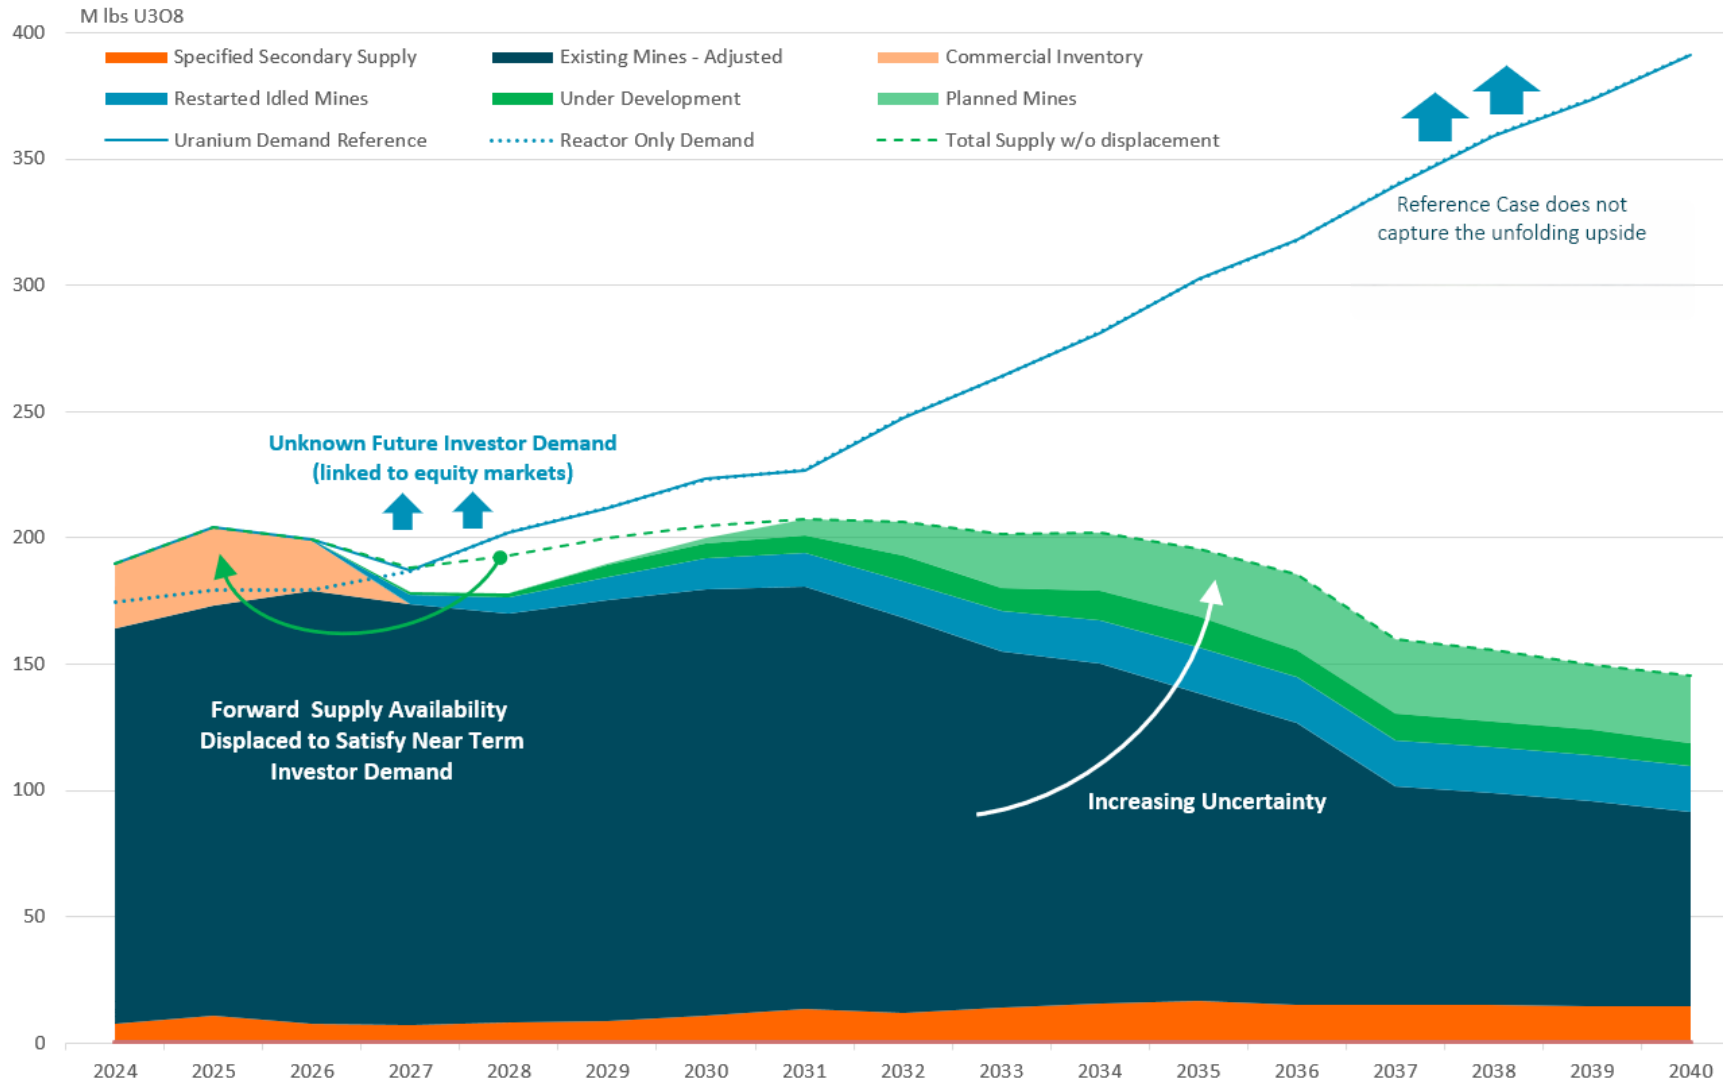

Animal watering trough installation

On-site townhall meetings

GLOBAL URANIUM DEMAND EXCEEDS SUPPLY

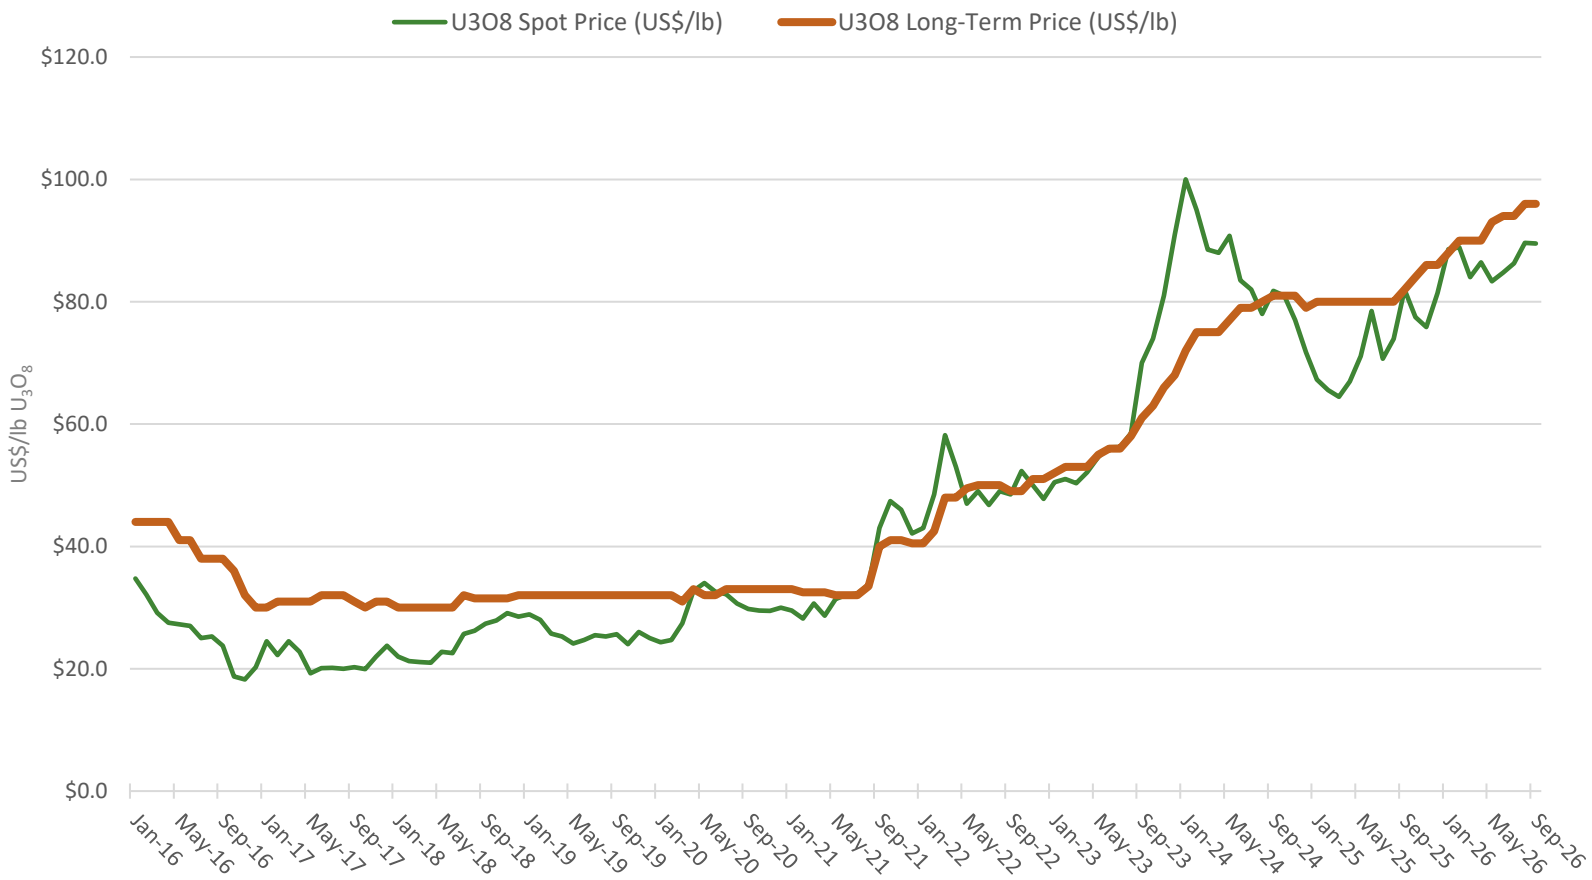

Note: Demand curve does not include: SMRs and US Government military procurement of 4M lbs per year, US origin U_3O_8.

URANIUM PRICE LONG-TERM UPWARD BIAS

Spot price volatility of 2024 – 2025 off-set by stable to higher Term- Price.

10-YEAR SPOT VS. LONG-TERM PRICE

Source: UxC, month-end prices, US$/lb U_3O_8.

BEFESA SILVERMET, TÜRKİYE

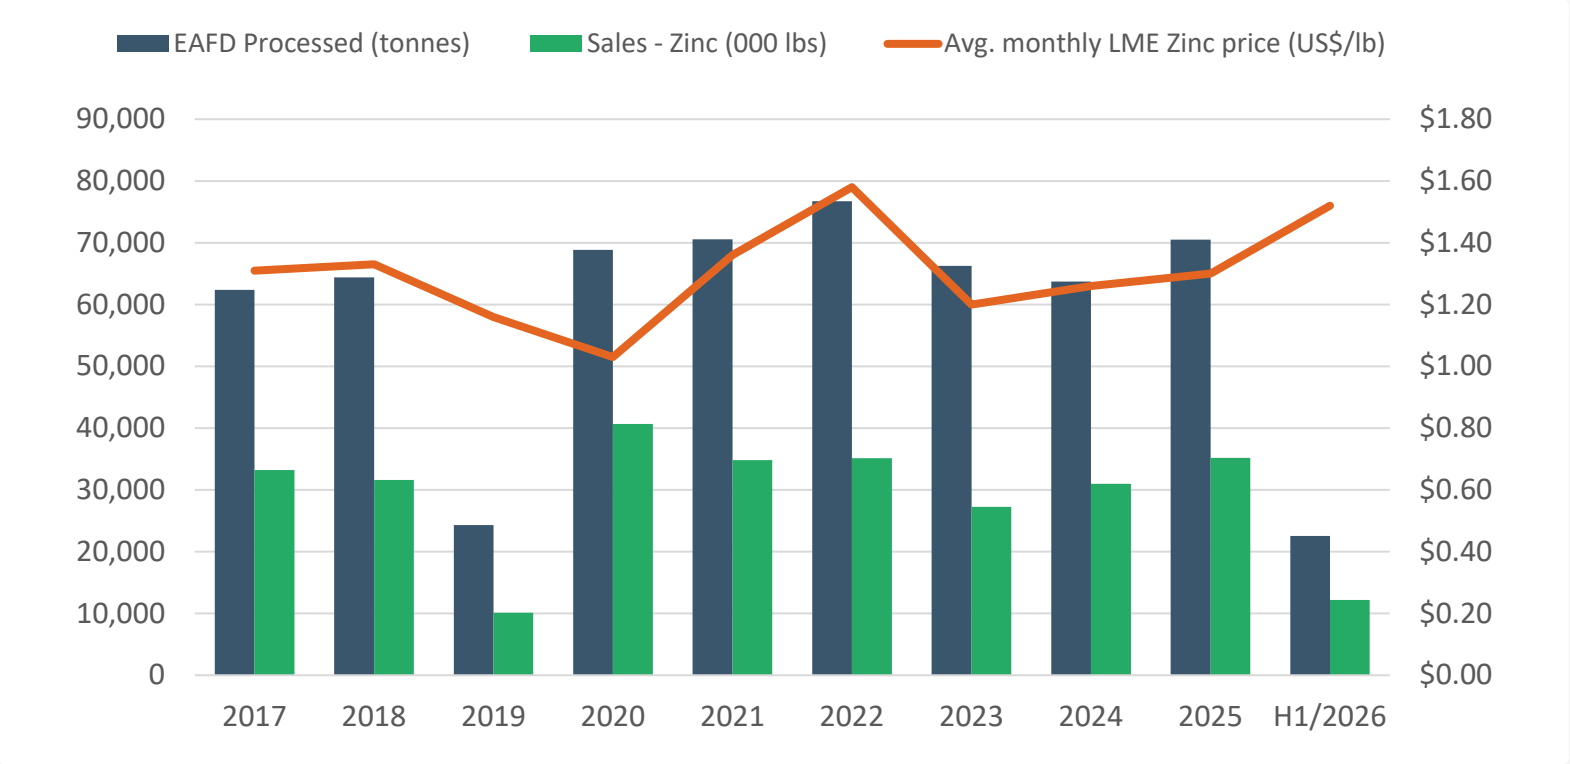

- Joint Venture (49%) with Befesa Zinc, the market leader in zinc recycling
- Processes EAFD containing 20% to 30% zinc sourced from local steel mills
- Produces a 65% to 70% zinc oxide concentrate for sale to smelters
- Recovers high grade zinc & removes toxic elements from the environment

Zinc oxide recovery plant, Iskenderun, Türkiye

ZINC RECYCLING

- New Plant loan retired.
- Improved availability of the operation's primary feedstock—electric arc furnace dust (EAFD) from local steel mills—together with higher average zinc prices and lower input costs, is driving profitable operations.
- Local steel mills productivity has stabilized since the earthquakes in early 2023, and the preceding COVID pandemic.

JV PRODUCTION & PROFITABILITY

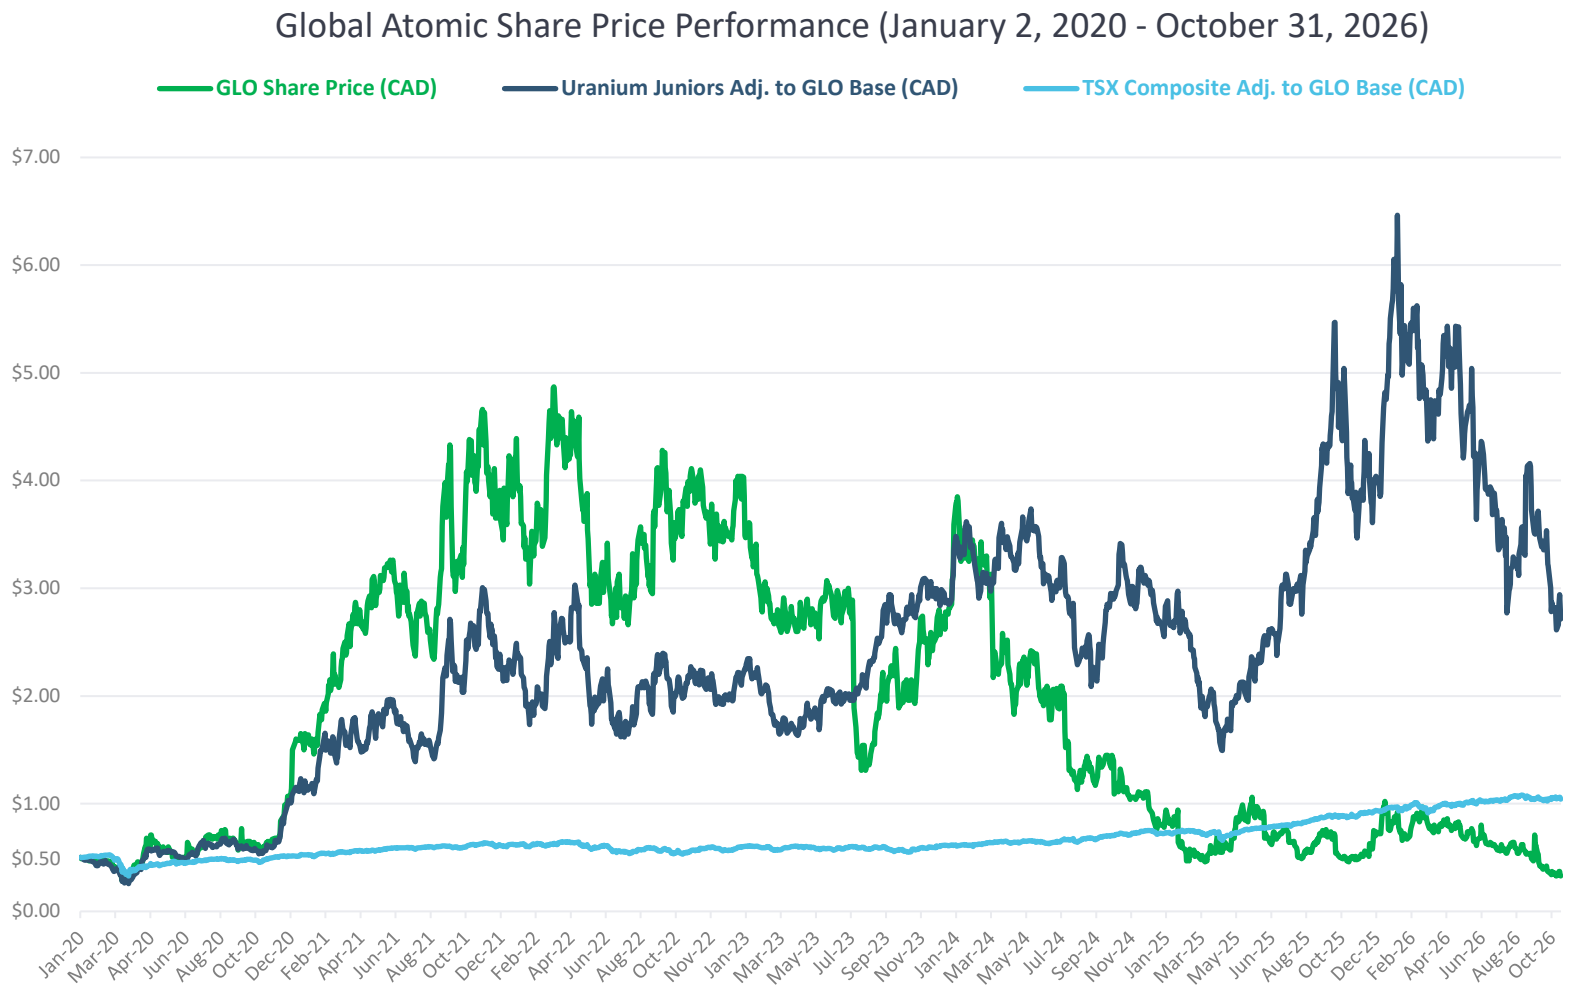

GLOBAL ATOMIC'S SHARE OF JV'S EBITDA (C$M)

2017	2018	2019	2020	2021	2022	2023	2024	2025	H1 2026
$10.7	**$13.5**	**$0.4**	**$5.6**	**$11.3**	**$4.2**	**$(2.4)**	**$6.3**	**$9.5**	**$4.6**

In early 2023, EAFD supply was impacted as local steel mills were affected by major earthquakes.
In 2019, plant was shut down for modernization/expansion.
