

Varonis Launches Certified Administrator Training and Elite Program to Support Customers Focused on Data-Centric Cybersecurity

4/24/2019

NEW YORK, April 24, 2019 (GLOBE NEWSWIRE) -- **Varonis Systems, Inc.** (NASDAQ: VRNS), a pioneer in data security and analytics, launched two new programs to help its customers appreciate the power of Varonis' solutions and use the platform to its fullest potential: the Varonis Certified Administrator Training Program and the Varonis Elite Program.

- Varonis Certified Administrator Training is an online, real-time, instructor-led training and certification program available at no cost to all existing and new Varonis customers. The program is currently available in English in the Americas and EMEA time zones.
- Varonis Elite is a global, invitation-only program designed to bring together cybersecurity and Varonis enthusiasts and recognize those who contribute their knowledge and time to the Varonis Customer Community. Members meet monthly as a team with product experts on different security topics and are given the opportunity to contribute their knowledge and experience by speaking, guest blogging and more.

"Our customers understand the importance of putting their data first, but shifting priorities, new threats and daily deadlines can distract from a data-centric focus," said Michael Plawner, VP of Professional Services and Customer Success. "We are launching our new Varonis Certified Administrator program to help ensure our customers have what they need to succeed and position them to realize the full value on their Varonis investment – and that starts with training."

Plawner continued, "For our customers and partners who have worked with us for over a year, we've kicked off the

Elite Community program, where we are bringing together security experts who are interested in learning, networking and sharing their knowledge. It's our way of acknowledging Varonis users who are active contributors to our customer community."

Learn more

About Varonis

Varonis is a pioneer in data security and analytics, fighting a different battle than conventional cybersecurity companies. Varonis focuses on protecting enterprise data on premises and in the cloud: sensitive files and emails; confidential customer, patient and employee data; financial records; strategic and product plans; and other intellectual property. The Varonis Data Security Platform detects insider threats and cyberattacks by analyzing data, account activity, perimeter telemetry and user behavior; prevents and limits disaster by discovering, classifying and locking down sensitive, regulated and stale data; and efficiently sustains a secure state with automation. With a focus on data security, Varonis serves a variety of use cases including data protection, threat detection and response, and compliance. Varonis started operations in 2005 and, as of December 31, 2018, had approximately 6,600 customers worldwide — comprised of industry leaders in many sectors including technology, consumer, retail, financial services, healthcare, manufacturing, energy, media, and education.
