SS&C does not provide reconciliations of guidance for Adjusted Revenues and Adjusted Net Income to comparable GAAP measures, in reliance on the unreasonable efforts exception provided under Item 10(e)(1)(i)(B) of Regulation S-K. SS&C is unable, without unreasonable efforts, to forecast certain items required to develop meaningful comparable GAAP financial measures. These items include acquisition transactions and integration, foreign exchange rate changes, as well as other non-cash and other adjustments as defined under the Company's Credit agreement, that are difficult to predict in advance in order to include in a GAAP estimate. Reconciliation of revenues to adjusted revenues

Adjusted revenues represents revenues adjusted to include a) amounts that would have been recognized if deferred revenue were not adjusted to fair value at the date of acquisition and b) amounts that would have been recognized if not for adjustments to deferred revenue and retained earnings related to the adoption of ASC 606. Adjusted revenues is presented because we use this measure to evaluate performance of our business against prior periods and believe it is a useful indicator of the underlying performance of our business. Adjusted revenues is not a recognized term under generally accepted accounting principles ("GAAP"). Adjusted revenues does not represent revenues, as that term is defined under GAAP, and should not be considered as an alternative to revenues as an indicator of our operating performance. Adjusted revenues as presented herein is not necessarily comparable to similarly titled measures presented by other companies. Below is a reconciliation of adjusted revenues to revenues, the GAAP measure we believe to be most directly comparable to adjusted revenues.

Reconciliation of operating income to adjusted operating income

Adjusted operating income represents operating income adjusted for amortization of intangible assets, stock-based compensation, purchase accounting adjustments for deferred revenue and related costs, ASC 606 adoption impact and other expenses. Adjusted operating income is presented because we use this measure to evaluate performance of our business and believe it is a useful indicator of our underlying performance. Adjusted operating income is not a recognized term under GAAP. Adjusted operating income does not represent operating income, as that term is defined under GAAP, and should not be considered as an alternative to operating income as an indicator of our operating performance. Adjusted operating income as presented herein is not necessarily comparable to similarly titled measures by other companies. The following is a reconciliation between adjusted operating income and operating income, the GAAP measure we believe to be most directly comparable to adjusted operating income.

As such, we consolidate DomaniRx, LLC as a variable interest entity. Adjusted operating income attributable to noncontrolling interest represents adjusted operating income based on the ownership interest retained by the respective noncontrolling parties.

Reconciliation of net income to EBITDA, consolidated EBITDA and adjusted consolidated EBITDA

EBITDA represents net income before interest expense, income taxes, depreciation and amortization. Consolidated EBITDA, defined under our Credit Agreement entered into in April 2018, as amended, is used in calculating covenant compliance, and is EBITDA adjusted for certain items. Consolidated EBITDA is calculated by subtracting from or adding to EBITDA items of income or expense described below. Adjusted Consolidated EBITDA is calculated by subtracting acquired EBITDA (as defined below) from Consolidated EBITDA. EBITDA, Consolidated EBITDA and Adjusted Consolidated EBITDA are presented because we use these measures to evaluate performance of our business and believe them to be useful indicators of an entity's debt capacity and its ability to service debt. EBITDA, Consolidated EBITDA and Adjusted Consolidated EBITDA are not recognized terms under GAAP and should not be considered in isolation or as alternatives to operating income, net income or cash flows from operating activities as indicators of our operating performance. These measures are not necessarily comparable to similarly titled measures by other companies. The following is a reconciliation of EBITDA, Consolidated EBITDA and Adjusted Consolidated EBITDA to net income.

Reconciliation of net income to adjusted net income attributable to SS&C and diluted earnings per share to adjusted diluted earnings per share attributable to SS&C

Adjusted net income and adjusted diluted earnings per share attributable to SS&C represent net income and earnings per share attributable to SS&C before amortization of intangible assets and deferred financing costs, stock-based compensation, purchase accounting adjustments and other items. We consider adjusted net income and adjusted diluted earnings per share attributable to SS&C to be important to management and investors because they represent our operational performance exclusive of the effects of amortization of intangible assets and deferred financing costs, stock-based compensation, purchase accounting adjustments, loss on extinguishment of debt and other items, that are not operational in nature or comparable to those of our competitors. Adjusted net income and adjusted diluted earnings per share are not recognized terms under GAAP. Adjusted net income and adjusted diluted earnings per share do not represent net income or diluted earnings per share, as those terms are defined under GAAP, and should not be considered as alternatives to net income or diluted earnings per share as indicators of our operating performance. Adjusted net income and adjusted diluted earnings per share attributable to SS&C as presented herein are not necessarily comparable to similarly titled measures presented by other companies.
