

ENVIRONMENTAL POLICY

UCT is committed to protecting our environment. The foundation of the UCT Environmental Policy is based on reduce, reuse and recycle with a goal of minimizing our environmental footprint. Continual improvement is based on inputs from multiple stakeholders for consideration such as customers, shareholders and other interested parties. UCT has a business process that is continually assessing new requirements and stakeholder inputs for continuous improvement.

UCT is committed to the following:

- Zero environmental impact incidents is the goal
- Comply with all environmental regulatory requirements
- Maintain an open & cooperative relationship with environmental regulatory agencies
- A corporate culture that sets environmental protection as a priority
- Provide personnel appropriate training to understand their impact to the environment
- Utilize innovative process technologies to minimize waste creation
- Reduce quantities of on-site chemicals & natural resources to a practical minimum
- Environmental performance is monitored via reviews & audits
