

## Equillium Announces Two Abstracts Accepted for Presentation at the Upcoming Virtual 2021 American Society of Nephrology Annual Meeting

October 18, 2021

LA JOLLA, Calif.--(BUSINESS WIRE)--Oct. 18, 2021-- Equillium, Inc. (Nasdaq: EQ), a clinical-stage biotechnology company developing itolizumab to treat severe autoimmune and inflammatory disorders with high unmet medical need, today announced that two abstracts were accepted for presentation at the virtual 2021 American Society of Nephrology (ASN) Annual Meeting to be held November 4-7, 2021.

**Title:** Itolizumab, a novel anti-CD6 antibody, in systemic lupus patients with proteinuria: An Interim subgroup analysis from EQUALISE a Phase 1b study

**First Author:** Chaim Putterman, M.D., Professor, Rheumatology, Albert Einstein College of Medicine

**ePoster Session:** PO1203-3. Glomerular Diseases: Treatment and Outcomes

**Abstract Publication #:** PO1624

The abstract highlights safety and initial decreases in urine protein/creatinine ratio (UPCR) in patients with systemic lupus erythematosus (SLE) treated with itolizumab.

**Title:** Itolizumab, a novel anti-CD6 therapy, in systemic lupus erythematosus patients: Interim safety results from the Phase 1b EQUALISE dose-escalation study

**First Author:** Chaim Putterman, M.D., Professor, Rheumatology, Albert Einstein College of Medicine

**ePoster Session:** PO1203-3. Glomerular Diseases: Treatment and Outcomes

**Abstract Publication #:** PO1623

The abstract highlights safety, tolerability and pharmacokinetic and pharmacodynamic results demonstrating dose-proportional increases in drug exposure and rapid and dose-dependent decreases in CD4 cell surface expression of CD6 in patients with systemic lupus erythematosus (SLE).

All ePosters will be available for on-demand viewing by registered attendees on the conference platform starting Thursday, November 4, 2021, at 10:00 a.m. PT.

### About the EQUALISE Study

The EQUALISE study is a Phase 1b open-label proof-of-concept multiple ascending-dose clinical study of itolizumab in patients with systemic lupus erythematosus and lupus nephritis. The study is evaluating the safety and tolerability of subcutaneous delivery of itolizumab in patients with systemic lupus erythematosus and lupus nephritis. The treatment period for patients with systemic lupus erythematosus is two weeks in duration, while treatment for patients with active proliferative lupus nephritis is 24 weeks in duration.

### About Itolizumab

Itolizumab is a clinical-stage, first-in-class anti-CD6 monoclonal antibody that selectively targets the CD6-ALCAM pathway. This pathway plays a central role in modulating the activity and trafficking of effector T cells that drive a number of immuno-inflammatory diseases. Equillium acquired rights to itolizumab through an exclusive partnership with Biocron Limited.

### About Equillium

Equillium is a clinical-stage biotechnology company leveraging deep understanding of immunobiology to develop novel products to treat severe autoimmune and inflammatory disorders with high unmet medical need. Equillium is developing itolizumab for multiple severe immuno-inflammatory diseases, including acute graft-versus-host-disease (aGVHD), lupus/lupus nephritis and uncontrolled asthma.

### Forward Looking Statements

*Statements contained in this press release regarding matters that are not historical facts are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements may be identified by the use of words such as "anticipate", "believe", "could", "continue", "expect", "estimate", "may", "plan", "outlook", "future" and "project" and other similar expressions that predict or indicate future events or trends or that are not statements of historical matters. Because such statements are subject to risks and uncertainties, many of which are outside the Company's control, actual results may differ materially from those expressed or implied by such forward-looking statements. Such statements include, but are not limited to statements regarding the potential benefit of treating patients with aGVHD, uncontrolled asthma, or lupus/lupus nephritis with itolizumab, Equillium's plans and expected timing for developing itolizumab including the expected timing of initiating, completing and announcing further results from the EQUATE, EQUIP, and EQUALISE studies, the potential for any of Equillium's ongoing or planned clinical studies to show safety or efficacy, statements regarding the impact of new leadership team members, Equillium's anticipated timing of regulatory review and feedback, Equillium's cash runway, and Equillium's plans and expected timing for developing itolizumab and potential benefits of itolizumab. Risks that contribute to the uncertain nature of the forward-looking statements include: uncertainties related to the abilities of the leadership team to perform as expected; Equillium's ability to execute its plans and strategies; risks related to performing clinical studies; the risk that interim*

*results of a clinical study do not necessarily predict final results and that one or more of the clinical outcomes may materially change as patient enrollment continues, following more comprehensive reviews of the data, and as more patient data become available; potential delays in the commencement, enrollment and completion of clinical studies and the reporting of data therefrom; the risk that studies will not be completed as planned; Equillium's plans and product development, including the initiation and completion of clinical studies and the reporting of data therefrom; whether the results from clinical studies will validate and support the safety and efficacy of itolizumab; changes in the competitive landscape; uncertainties related to Equillium's capital requirements; and having to use cash in ways or on timing other than expected and the impact of market volatility on cash reserves. These and other risks and uncertainties are described more fully under the caption "Risk Factors" and elsewhere in Equillium's filings and reports with the SEC. Investors should take such risks into account and should not rely on forward-looking statements when making investment decisions. All forward-looking statements contained in this press release speak only as of the date on which they were made. Equillium undertakes no obligation to update such statements to reflect events that occur or circumstances that exist after the date on which they were made.*
