Forward-Looking Statements, Safe Harbor, and Non-GAAP Financial Measures

Forward-Looking Statements

This release contains forward-looking statements about Verisk's future performance, including those related to our financial guidance. These statements relate to future events or to future financial performance and involve known and unknown risks, uncertainties, and other factors that may cause our actual results, levels of activity, performance, or achievements to be materially different from any future results, levels of activity, performance, or achievements expressed or implied by these forward-looking statements. This includes, but is not limited to, our expectation and ability to pay a cash dividend on our common stock in the future, subject to the determination by our Board of Directors and based on an evaluation of our earnings, financial condition and requirements, business conditions, capital allocation determinations, and other factors, risks, and uncertainties. In some cases, you can identify forward-looking statements by the use of words such as "may," "could," "expect," "intend," "plan," "target," "seek," "anticipate," "believe," "estimate," "predict," "potential," or "continue" or the negative of these terms or other comparable terminology. You should not place undue reliance on forward-looking statements, because they involve known and unknown risks, uncertainties, and other factors that are, in some cases, beyond our control and that could materially affect actual results, levels of activity, performance, or achievements.

Other factors that could materially affect actual results, levels of activity, performance, or achievements can be found in our quarterly reports on Form 10-Q, annual reports on Form 10-K, and current reports on Form 8-K filed with the Securities and Exchange Commission. If any of these risks or uncertainties materialize or if our underlying assumptions prove to be incorrect, actual results may vary significantly from what we projected. Any forward-looking statement in this release reflects our current views with respect to future events and is subject to these and other risks, uncertainties, and assumptions relating to our operations, results of operations, growth strategy, and liquidity. We assume no obligation to publicly update or revise these forward-looking statements, whether as a result of new information, future events, or otherwise except as required by applicable securities laws.

Notes Regarding the Use of Non-GAAP Financial Measures

We have provided certain non-GAAP financial information as supplemental information regarding our operating results. These measures are not in accordance with, or an alternative for, U.S. GAAP and may be different from non-GAAP measures reported by other companies. We believe that our presentation of non-GAAP measures provides useful information to management and investors regarding certain financial and business trends relating to our financial condition and results of operations. In addition, our management uses these measures for reviewing our financial results, for budgeting and planning purposes, and for evaluating the performance of senior management.

Non-GAAP Reconciliations

Specified Metrics

We have provided certain non-GAAP financial information as supplemental information regarding our operating results. These measures are not in accordance with, or an alternative for, U.S. GAAP and may be different from non-GAAP measures reported by other companies. We believe that our presentation of non-GAAP measures provides useful information to management and investors regarding certain financial and business trends relating to our financial condition and results of operations. In addition, our management uses these measures for reviewing our financial results, for budgeting and planning purposes, and for evaluating the performance of senior management.

EBITDA, Adjusted EBITDA, and Adjusted EBITDA Expenses

EBITDA represents GAAP net income adjusted for (i) depreciation and amortization of fixed assets (ii) amortization of intangible assets (iii) interest expense, net and (iv) provision for income taxes. Adjusted EBITDA represents EBITDA adjusted for acquisition-related adjustments (earn-outs), gain/loss from dispositions (which includes businesses held for sale), net adjustments from equity-method investments, and nonrecurring gain/loss. Adjusted EBITDA expenses represent adjusted EBITDA net of revenues. We believe these measures are useful and meaningful because they allow for greater transparency regarding our operating performance and facilitate period-to-period comparison. We are not able to provide a reconciliation of projected Adjusted EBITDA and Adjusted EBITDA margin to the most directly comparable expected GAAP results because of the unreasonable effort and high unpredictability of estimating certain items that are excluded from non-GAAP Adjusted EBITDA and Adjusted EBITDA margin, including, for example, tax consequences, acquisition-related costs, gain/loss from dispositions and other non-recurring expenses, the effect of which may be significant.

Adjusted Net Income and Diluted Adjusted EPS

Adjusted net income represents GAAP net income adjusted for (i) amortization of intangible assets, net of tax (ii) acquisition-related adjustments (earn-outs), net of tax (iii) gain/loss from dispositions (which includes businesses held for sale), net of tax (iv) net adjustments from equity-method investments, net of tax; and (v) nonrecurring gain/loss, net of tax. Diluted adjusted EPS represents adjusted net income divided by weighted-average diluted shares. We believe these measures are useful and meaningful because they allow evaluation of the after-tax profitability of our results excluding the after-tax effect of acquisition-related costs and nonrecurring items. We are not able to provide a reconciliation of projected Adjusted EPS to the most directly comparable expected GAAP results because of the unreasonable effort and high unpredictability of estimating certain items that are excluded from non-GAAP Adjusted EPS, including, for example, tax consequences, acquisition-related costs, gain/loss from dispositions and other non-recurring expenses, the effect of which may be significant.

Free Cash Flow

Free cash flow represents net cash provided by operating activities determined in accordance with GAAP minus payments for capital expenditures. We believe free cash flow is an important measure of the recurring cash generated by our operations that may be available to repay debt obligations, repurchase our stock, invest in future growth through new business development activities, or make acquisitions.

Organic

Organic is defined as operating results excluding the effect of recent acquisitions and dispositions (which include businesses held for sale), and nonrecurring gain/loss associated with cost-based and equity-method investments that have occurred over the past year. An acquisition is included as organic at the beginning of the calendar quarter that occurs subsequent to the one-year anniversary of the acquisition date. Once an acquisition is included in its current-period organic base, its comparable prior-year-period operating results are also included to calculate organic growth. A disposition (which includes a business held for sale) is excluded from organic at the beginning of the calendar quarter in which the disposition occurs (or when a business meets the held-for-sale criteria under U.S. GAAP). Once a disposition is excluded from its current-period organic base, its comparable prior-year-period operating results are also excluded to calculate organic growth. We believe the organic presentation enables investors to assess the growth of the business without the impact of recent acquisitions for which there is no prior-year comparison and the impact of recent dispositions, for which results are removed from all prior periods presented to allow for comparability.

Organic Constant Currency (OCC) Growth Rate

Organic Constant Currency (OCC) Growth Rate: Our operating results, such as, but not limited to, revenue and adjusted EBITDA, reported in U.S. dollars are affected by foreign currency exchange rate fluctuations because the underlying foreign currencies in which we transact changes in value over time compared with the U.S. dollar; accordingly, we present certain constant currency financial information to assess how we performed excluding the impact of foreign currency exchange rate fluctuations. We calculate constant currency by translating comparable prior-year-period results at the currency exchange rates used in the current period. We believe organic constant currency is a useful and meaningful measure to enhance investors' understanding of the continuing operating performance of our business and to facilitate the comparison of period-to-period performance because it excludes the impact of foreign exchange rate movements, acquisitions, and dispositions.
