IRIS Portal: Asset Management at your fingertips. (Photo: Tennant Company)

technology connects users with anytime-anywhere access to critical alerts, usage data and machine location information to enable proactive fleet management.

With years of field-tested performance, the patented IRIS

“As customers face constant pressure to increase cleaning consistency and efficiency, Tennant’s IRIS Asset Manager provides powerful insights to help improve cleaning operations,” said David Huml, Senior Vice President of Global Marketing for Tennant Company. “Tennant has been a leader in the Internet of Things (IoT) within the cleaning

industry. IRIS Asset Manager uses machine-to-machine technology, to provide the comprehensive information customers want. Whether monitoring multiple machines across a large facility, or keeping track of a fleet spread across the country, information collected through IRIS will help our customers more effectively manage their Tennant assets and lower their overall cleaning costs.”

Developed with a focus on providing customers easy access to powerful insights, IRIS Asset Manager is easy to use and efficient. Using a desktop, laptop or tablet to access information, the IRIS dashboard is seamlessly accessible through the My Tennant portal, displaying clear charts and graphs of critical data points helping facility managers and operators stay on top of the day-to-day variables of cleaning operations and fleet management.

Powerful Insights Drive Important Results:

- Usage by machine
- Machine location
- ec-H2O™ Technology usage
- Email Critical Alerts

IRIS Asset Manager is currently available on 19 Tennant commercial and industrial cleaning machines in nine countries around the world.
