

# Tennant Company Launches the T291 Small Walk-Behind Scrubber for Exceptional Cleaning and Ease of Use in Small Spaces

2024-09-24

The small scrubber combines power and maneuverability to provide a versatile cleaning experience, complete with simple maintenance

MINNEAPOLIS--(BUSINESS WIRE)-- **Tennant Company** (NYSE: TNC), a world leader in cleaning equipment and solutions, today announced the launch of its new T291 small walk-behind scrubber into the North America market. Designed for use in both hard-to-reach spaces and open areas, the T291 is a walk-behind scrubber built to simplify and improve facility management by combining cleaning power and maneuverability. The T291's versatility and small size make it an excellent fit for mid-size retail, healthcare, and education environments. Operators will not only see a difference in the quality of their cleaning but also with the machine's ease of use.

"Cleaning common spaces is easier said than done —

especially when time, staff, and resources are limited. At Tennant Company, we are committed to developing technologies that alleviate these exact challenges," said Lionel Descamps, Product Portfolio Director at Tennant Company. "And the T291 small walk-behind scrubber represents that drive. It is a versatile system that packs a lot of value into a little package: intuitive controls, comfortable design, and straightforward operation that delivers an effective clean. And on top of that, it is easy to maintain. In a nutshell, the T291 delivers on efficiency, operability, and power."

The scrub path measures 20 inches in diameter and provides a high level of water pickup to keep floors dry during

use. The machine also features intuitive controls that allow for straightforward operation that aids in keeping users safe and comfortable during use. This ease of operation makes it possible for facility employees to quickly get trained even if they have little or no prior machine experience, which supports reduced training and maintenance time. The scrubber has an extensive suite of features that increase cleaning performance, including a self-leveling scrub head, 2-stage vacuum motor, and optional ec-H2O NanoClean ® with Severe Environment™ technology.

The T291's ECO mode function preserves battery and helps the T291 stay in operation for longer periods of time. Daily maintenance is made easier with the machine's large recovery tank lid opening, a simple spin-on/spin-off no-touch brush/pad replacement, and clearly labeled maintenance touchpoints to help operators quickly identify components that need regular attention.
