CAUTIONARY STATEMENTS

This presentation does not constitute an offer to sell or a solicitation of an offer to purchase any security in any jurisdiction

Cautionary Note Regarding Forward-Looking Information and Statements:

This presentation contains “forward-looking information” within the meaning of applicable Canadian securities laws and “forward-looking statements” within the meaning of the United States Private Securities Litigation Reform Act of 1995, respectively (collectively referred to herein as “forward-looking information”). Forward-looking information may be identified by the use of forward-looking terminology such as “plans”, “targets”, “expects”, “is expected”, “budget”, “scheduled”, “estimates”, “outlook”, “forecasts”, “projection”, “prospects”, “strategy”, “intends”, “anticipates”, “believes”, or variations of such words and phrases or terminology which states that certain actions, events or results “may”, “could”, “would”, “might”, “will”, “will be taken”, “occur” or “be achieved”. Our assessments of and expectations for future periods described in this presentation, including our future financial outlook and anticipated events or results, business, financial position, business strategy, growth plans, strategies, budgets, operations, financial results, taxes, dividend policy, plans and objectives, are considered forward-looking information. In addition, any statements that refer to expectations, intentions, projections or other characterizations of future events or circumstances contain forward-looking information. Statements containing forward-looking information are not historical facts but instead represent management’s expectations, estimates and projections regarding possible future events or circumstances.

The forward-looking information included in this presentation is based on our opinions, estimates and assumptions considering our experience and perception of historical trends, current conditions and expected future developments, as well as other factors that we currently believe are appropriate and reasonable in the circumstances. The forward-looking information contained in this presentation is also based upon a number of assumptions, including the ongoing operation of the properties in which we hold a stream or royalty interest by the owners or operators of such properties in a manner consistent with past practice; the accuracy of public statements and disclosures made by the owners or operators of such underlying properties; and the accuracy of publicly disclosed expectations for the development of underlying properties that are not yet in production. These assumptions include, but are not limited to, the following: assumptions in respect of current and future market conditions and the execution of our business strategies; that operations, or ramp-up where applicable, at properties in which we hold a royalty, stream or other interest continue without further interruption through the period; and the absence of any other factors that could cause actions, events or results to differ from those anticipated, estimated, intended or implied. Despite a careful process to prepare and review the forward-looking information, there can be no assurance that the underlying opinions, estimates and assumptions will prove to be correct. Forward-looking information is also subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements to be materially different from those expressed or implied by such forward-looking information. Such risks, uncertainties and other factors include, but are not limited to, those set forth under the caption “Risk Factors” in our most recently filed annual information form which is available on SEDAR+ at www.sedarplus.ca and on EDGAR at www.sec.gov. For clarity, mineral resources that are not mineral reserves do not have demonstrated economic viability and inferred resources are considered too geologically speculative for the application of economic considerations.

Although we have attempted to identify important risk factors that could cause actual results or future events to differ materially from those contained in the forward-looking information, there may be other risk factors not presently known to us or that we presently believe are not material that could also cause actual results or future events to differ materially from those expressed in such forward-looking information. There can be no assurance that such information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such information. Accordingly, readers should not place undue reliance on forward-looking information, which speaks only as of the date made. The forward-looking information contained in this presentation represents our expectations as of the date of this presentation and is subject to change after such date. We disclaim any intention or obligation or undertaking to update or revise any forward-looking information whether as a result of new information, future events or otherwise, except as required by applicable securities laws. All of the forward-looking information contained in this presentation is expressly qualified by the foregoing cautionary statements.

Cautionary Statement to U.S. Investors

Information contained or referenced in this presentation or in the documents referenced herein concerning the properties, technical information and operations of Triple Flag has been prepared in accordance with requirements and standards under Canadian securities laws, which differ from the requirements of the U.S. Securities and Exchange Commission (“SEC”) under subpart 1300 of Regulation S-K (“S-K 1300”). Because the Company is eligible for the Multijurisdictional Disclosure System adopted by the SEC and Canadian Securities Administrators, Triple Flag is not required to present disclosure regarding its mineral properties in compliance with S-K 1300. Accordingly, certain information contained in this presentation may not be comparable to similar information made public by U.S. companies subject to reporting and disclosure requirements of the SEC.

Technical and Third-Party Information

Triple Flag does not own, develop or mine the underlying properties on which it holds stream or royalty interests. As a royalty or stream holder, Triple Flag has limited, if any, access to properties included in its asset portfolio. As a result, Triple Flag is dependent on the owners or operators of the properties and their qualified persons to provide information to Triple Flag and on publicly available information to prepare disclosure pertaining to properties and operations on the properties on which Triple Flag holds stream, royalty, or other similar interests. Triple Flag generally has limited or no ability to independently verify such information. Although Triple Flag does not believe that such information is inaccurate or incomplete in any material respect, there can be no assurance that such third-party information is complete or accurate.

Qualified Person

James Lill, Director, Mining for Triple Flag, and a qualified person under National Instrument 43-101 – Standards of Disclosure for Mineral Projects, has reviewed and approved the scientific and technical disclosure in this presentation.

Market and Industry Data

Market and industry data presented throughout this presentation were obtained from third-party sources, industry reports and publications, websites and other publicly available information, as well as industry and other data prepared by us or on our behalf, on the basis of our knowledge of the markets in which we operate, including information provided by other industry participants. These third-party sources include Skarn Associates Limited, S&P Global Market Intelligence, SNL Metals & Mining Data and Wood Mackenzie Inc. Although we believe it to be reliable, Triple Flag has not independently verified any of the data from third-party sources referred to in this presentation, analyzed or verified the underlying studies or surveys relied upon or referred to by such sources, or ascertained the underlying market, economic and other assumptions relied upon by such sources. Market and industry data are subject to variations and cannot be verified due to limits on the availability and reliability of data inputs, the voluntary nature of the data gathering process and other limitations and uncertainties inherent in any statistical survey.

Gold Equivalent Ounces (“GEOs”):

GEOs are based on stream and royalty interests and are calculated on a quarterly basis by dividing all revenue from such interests for the quarter by the average gold price during such quarter. The gold price is determined based on the London Bullion Market Association (“LBMA”) PM fix. For periods longer than one quarter, GEOs are summed for each quarter in the period. Triple Flag uses this measure internally to evaluate its underlying operating performance across its stream and royalty portfolios for the reporting periods presented and to assist with the planning and forecasting of future operating results.

Non-IFRS Measures

This presentation makes reference to certain non-IFRS measures. These measures are not recognized measures under International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board and do not have a standardized meaning prescribed by IFRS and are therefore unlikely to be comparable to similar measures presented by other companies. Rather, these measures are provided as additional information to complement IFRS measures by providing further understanding of our results of operations from management’s perspective. Accordingly, these measures should not be considered in isolation or as a substitute for analysis of our financial information reported under IFRS and may be calculated differently by other companies. These non-IFRS measures, including adjusted net earnings, adjusted net earnings per share, free cash flow, adjusted EBITDA, and asset margin, are used to provide investors with supplemental measures of our operating performance and thus highlight trends in our core business that may not otherwise be apparent when relying solely on IFRS measures. We also believe that securities analysts, investors and other interested parties frequently use non-IFRS measures in the evaluation of issuers. Our management also uses non-IFRS measures in order to facilitate operating performance comparisons from period to period, to prepare annual operating budgets and forecasts and to determine components of management compensation. See the Appendix to this presentation for a reconciliation of the foregoing non-IFRS measures to their most directly comparable measures calculated in accordance with IFRS.

ROBUST GEOs GROWTH

2026-2030E GEOs Growth by Stage

~50% GROWTH Robust 2026-2030E GEOs growth significantly de-risked

Note: 2026E guidance and 2030E outlook on stream and royalty interests is based on publicly available forecasts of the owners or operators of the underlying properties and/or operations on which we have stream and royalty interests. When publicly available forecasts on properties are not available, we obtain internal forecasts from the owners or operators or use our own best estimate. We conduct our own independent analysis of this information to reflect our expectations based on an operator's historical performance and track record of replenishing mineral reserves and their publicly disclosed guidance on future production, the conversion of mineral resources to mineral reserves, timing risk adjustments, drill results, our view on opportunities for mine plan optimization and other factors. We may also make allowances for the risk of uneven stream deliveries, timing differences in the deliveries under our streams or the payment of our royalties, and the attainment of public guidance ranges for our counterparties. Achievement of the GEOs and the other metrics set forth in the guidance above is subject to risks and uncertainties, including changes in commodity prices and the ability of operators to attain the results set out in their forecasts. 2026E guidance assumes an Au/Ag price ratio of 70x in H2 2026. 2030E outlook assumes an Au/Ag price ratio of 85x.

GROWTH CATALYSTS

Multiple assets advancing across ramp-up, construction, permitting and study stages

ASSET	DEVELOPMENT UPDATE	OPERATOR	TIMELINE
Northparkes E48	✓ Production ramp-up of E48 sublevel cave		2026-2030E INCLUDED IN 5-YEAR OUTLOOK OF 150,000-160,000 GEOs 85x Au/Ag PRICE RATIO
Ravenswood	✓ Production ramp-up from higher grade Sarsfield-Nolans pit		
Arcata	✓ Production ramp-up; operation restarted in Q4 2025		
Koné	✓ Production ramp-up, hard-rock circuit commissioning in Q2 2027		
JCM	✓ Commercial production declared (September 2026); ramp-up to annual nameplate 25 Mlbs Cu cathode		
Eskay Creek	✓ Project construction 70% complete (August 2026); initial production targeted in 2027		
Era Dorada	✓ Construction licence received (January 2026); early works commenced		
Goldfield	✓ Construction advancing; initial production targeted in 2028		
South Railroad	✓ Positive Record of Decision received (August 2026); initial production in 2028		
Ana Paula	✓ FS expected in H1 2027; initial production targeted in 2028		
Prieska	✓ Glencore \$250M offtake agreement signed; construction commencing on Upper Zone		+2030 LONG-TERM GEOs GROWTH
Arthur	✓ PFS released (February 2026); Record of Decision expected in H2 2028		
Kemess	✓ PEA released (January 2026); initial production targeted in 2031		
Hope Bay	✓ Construction decision announced (May 2026); initial production targeted in 2030		
Northparkes E22	✓ Initial production targeted end of Evolution's FY2030		
Northparkes E44	✓ Initial production targeted in 2030/31		

GROWTH BEYOND 2030

NORTHPARKES E22

- **E22 block cave approved (February 2026)**
 - Key pillar of Northparkes' long-term operating strategy
- **A\$680M (100%) capital investment over 5 years**
- **Long-life, low-cost bulk underground mining operation**
 - Large E22 resource base supports potential mill expansion to 10-11 Mtpa
- **Development commenced in 2026**
 - E48 to E22 access drive
 - E22 twin decline box cut

MARCH 2026

AUGUST 2026

**E22 initial
production from
end of FY2030**

NORTHPARKES E44

- **Evolution to advance the high-grade E44 gold open pit**
 - Pre-feasibility study in progress
- **Material upside from a deposit previously not included in the LoMp**
- **E44 stream terms**
 - 20% of payable gold and 30% of payable silver
 - 10% ongoing payment
 - No step-downs associated with the E44 Stream ¹
 - \$84M upfront payment to Evolution in Q4 2026
- **Minimum guaranteed deliveries**
 - Minimum quarterly deliveries over 2030-2037 totaling 45 koz Au and 446 koz Ag ²
- **Current E44 gold resource of ~0.5 Moz**
 - 14 Mt at 1.12 g/t Au (100%-basis) ³
- **Significant exploration potential**
 - Drilling supports the continuation of mineralization at depth
 - Development of E44 establishes infrastructure in a highly prospective area for further drilling of surface gold and copper mineralization

Source: Evolution Mining

1) Deliveries to Triple Flag made under the E44 Stream are excluded for the purpose of calculating the step-down milestones under the Existing Stream at Northparkes
 2) Should a positive construction decision for the E44 Gold Deposit not be made by December 31, 2029, Evolution may (but is not required to) elect to terminate its cumulative minimum delivery obligations under the E44 Stream for a cash payment of \$102.5 million. If Evolution so elects, Triple Flag will remain entitled to deliveries from E44 based solely on actual gold and silver production from the E44 Gold Deposit
 3) Source Evolution Mining "Current projects and future growth opportunities" as at December 31, 2025, published on September 15, 2026

RAVENSWOOD

CORNERSTONE AUSTRALIAN GOLD STREAM

RAVENSWOOD

5.50% GOLD STREAM
QUEENSLAND, AUSTRALIA

Queensland's Largest Gold Mine

Top 10 Australian gold mine by Ore Reserves (2.8 Moz contained gold ¹)
Continuous production since 1987 with over 4 Moz of gold produced since discovery

Attractive Scale, Long-Life, and Low-Cost

Expansion completed in 2023 supports multi-decade annual production in excess of 200 koz
Over US\$570M (A\$830M) expansion capital invested since 2020 under EMR and GEAR ownership
Low-cost operation positioned in the lower half of the Wood Mackenzie global gold cost curve ²

Extensive Mineral Endowment

2P Reserves: 147 Mt at 0.61 g/t Au containing 2.8 Moz of gold ¹
M&I Resources (inclusive): 205 Mt at 0.55 g/t Au containing 3.6 Moz of gold ³
Inferred Resources: 66 Mt at 0.49 g/t Au containing 1.0 Moz of gold ³

Significant Exploration Upside

Since 2020, ~800 koz of P&P additions outpaced ~600 koz of depletion
Multiple in-pit and near-mine targets adjacent to Buck Reef West and Sarsfield-Nolans pits
Large and prospective +1,800 km² land package

- 1) Represents total proven and probable mineral reserves
- 2) Per Wood Mackenzie Q1-2026 gold mines cost curve for 2026, on a total cash cost plus sustaining capital basis
- 3) Mineral Resources and Ore Reserves as of August 31, 2024

RAVENSWOOD

Large resource base with significant mineralization outside pit designs

Upside potential

Multiple open-pit targets offer strong near-term pathway to materially extend mine life

GROWTH PIPELINE

HOPE BAY

ARTHUR

ASSET	LOCATION	OVERVIEW
Goldfield 5.0% NSR (Gemfield)	Nevada	Centerra expects first production in late 2028 from its 100%-owned Goldfield heap leach project in Nevada. Triple Flag's royalty coverage at Goldfield applies to the Gemfield deposit, which represents approximately 80% of the project's total life-of-mine production. Centerra anticipates a seven-year mine life, with average annual production of over 100 koz between 2029 and 2032
Eskay Creek 0.5% NSR	B.C.	DFS was released in November 2023, which highlighted annual gold equivalent production of 324 koz over a 12-year life. Project construction is 70% complete as of August 2026. Mining operations are expected to re-start in the second quarter of 2027. Significant infrastructure is already in place at Eskay Creek, including a permitted tailings facility and all-weather access road.
Koné 2.0% NSR	Cote d'Ivoire	Advanced development stage asset currently designed to produce 3.57 Moz Au over a 16-year mine life including +300 koz annually over the first 8 years. First gold pour from the oxide circuit was achieved ahead of schedule in September 2026. The hard rock circuit is expected to be commissioned in Q2 2027
Era Dorada 1.0% NSR	Guatemala	A feasibility study was released in December 2025, which highlighted an underground gold mine with an average annual production profile of 104 koz and a 17 year mine life. A construction licence for the project was received in January 2026 and early works has begun. Aura expects production to begin in the first half of 2028
Queensway 0.2-0.5% NSR	Newfoundland	The 100%-owned Queensway gold project is an open pit and underground project located in Newfoundland, Canada. A PEA released in July 2025 highlighted a phased project design expected to produce 1.5 Moz of gold over a 15-year life
Hope Bay 1.0% NSR	Nunavut	In May 2026, Agnico Eagle announced a positive construction decision for Hope Bay. Operating at 6,000 tpd, the operation is expected to produce 400-435 koz Au annually over an initial 11-year mine life, with Patch 7, Doris and Madrid as mining fronts. There is substantial upside from infill and expansion drilling as well as regional exploration across the highly prospective 80 km greenstone belt
Tamarack 1.71% NSR	Minnesota	High-grade nickel sulphide project with district scale potential and a significant resource base. The US Department of War and the Department of Energy have provided grant funding of \$21M and \$115M, respectively. In January 2026, Talon completed the acquisition of the producing Eagle nickel mine in Michigan from Lundin Mining Corp., which now owns 19.9% of Talon
Fenn-Gib 1.0-2.5% NSR	Ontario	A PFS was released in January 2026, which highlighted average annual gold production of 64 koz over a 14-year life with commercial production expected within five years. Notably, the PFS mine plan only covers ~24% of the total indicated resource at Fenn-Gib, providing longer-term growth optionality
Arthur 1.0% NSR	Nevada	The world-class Arthur oxide gold project is located in Nevada and operated by a top-tier producer in AngloGold Ashanti. Arthur represents the epicenter of AngloGold's Beatty District complex, offering exceptional long-term growth potential, underpinned by a rapidly expanding resource base and significant exploration upside. A PFS was released in Q1 2026 and permitting is expected to commence in 2027
Kemess 100% Silver Stream	B.C.	In January 2026, Centerra released a PEA that focused on an open pit and long-hole stoping operation producing 267 koz AuEq over a 15-year LoM. Kemess represents a potential second cornerstone asset for Centerra in BC after Mount Milligan. Next steps include the completion of a PFS in 2027, and potential production in late 2031. Significant infrastructure is already in place, including a 50,000 tpd mill
Polo Sur 1.0% NSR	Chile	Polo Sur is a porphyry copper deposit that is 100%-owned by Antofagasta with a significant resource base and located 35 km from their Centinela operation. A feasibility study for the project is ongoing

SUSTAINABILITY

To contribute to the social, environmental, and economic well-being of our communities of interest by supporting responsible and sustainable investments across our portfolio

In 2025, our **Sustainalytics** ESG Risk Rating ranked 1st of 102 in the precious metals industry and 39th out of 14,224 companies globally — a **Global Top 50** placement — with a risk score of 7.3 (negligible risk)

In the second quarter of 2025, our near-term target to reduce all Scope 1 and Scope 2 emissions by 50% by 2030 (2018 base year) was validated by the **Science Based Targets initiative (SBTi)**

Triple Flag joined the **World Gold Council** in 2022 and supports the Responsible Gold Mining Principles, collaborating to advance responsible investment and globally recognized best practices in gold mining

In 2025, we participated in the **United Nations Global Compact (UNGC)** Sustainability Report Peer Review Group and remain a member of the UNGC Canada Network, reporting our Communication on Progress annually

Triple Flag holds an **'AA' ESG Rating**, recognizing us as a leader in ESG management. Corporate governance is our strongest area, where MSCI places us in its highest range relative to peers, reflecting governance practices well aligned with investor interests. Community relations is a further area of relative strength

~\$465k

In 2025, Triple Flag invested **~\$465k across community programs linked to our portfolio** – supporting scholarships in South Africa and Australia, clean water infrastructure in Peru, and educational partnerships from Alaska to Ontario

MSCI ESG Rating attribution: The use by Triple Flag Precious Metals Corp. of any MSCI ESG Research LLC or its affiliates ("MSCI") data, and the use of MSCI logos, trademarks, service marks or index names herein, does not constitute a sponsorship, endorsement, recommendation, or promotion of Triple Flag Precious Metals Corp. by MSCI. RIGOROUS TECHNICAL UNDERWRITING PROCESS

Overarching Approach

Small, highly expertized and closely integrated teams working without silos

Geology & Mineral Resources

Verification and validation of underlying data. Exhaustive analysis of geological interpretation and Mineral Resource estimation approach / methodology

Mining & Mineral Reserves

Assessment of all fundamental drivers of life of mine plan, such as, productivities, cut-off grades, optimization, mine design and scheduling, geotechnics and hydrogeology

Metallurgy & Processing

Analysis of testwork, flowsheet, geometallurgy, recoveries and product marketability

Infrastructure & Logistics

Tailings, power, logistics (supplies, product, people, engineering)

Environmental, Social, Sustainability & Permitting

Fully integrated with Technical Diligence – no silos. Permitting status, social licence to operate, climate risks, environmental impacts

Legal & Jurisdictional

Legal, regulatory, tax, title review, engagement with local experts and local legal counsel

Optionality – More Metal For Longer

Maximize land optionality. Systematically quantify exploration potential. Assess potential to increase capacity

ATTRACTIVE CASH FLOW YIELDS

5-year organic GEOs growth outlook of ~50% offers sector-leading cash flow yield at current prices

LEADERSHIP TEAM

Sheldon Vanderkooy
Chief Executive Officer

- Founding member of the Triple Flag management team in 2016, with more than 25 years of experience in the mining sector
- Former Assistant General Counsel at First Quantum
- Former Senior Director, Legal Affairs at Inmet Mining
- Former Partner at Blake, Cassels & Graydon LLP
- Former Chartered Accountant, Ernst & Young LLP

James Dendle
Chief Operating Officer

- Chartered Geologist with over 10 years of broad experience estimating and auditing resources and reserves, multi-disciplinary due diligence and technical studies
- Former Senior Consultant at SRK Consulting

Eban Bari
Chief Financial Officer

- Over 20 years of financial reporting experience across complex multi-national organizations
- Former Senior Director, Financial Reporting at Barrick Gold Corporation
- CPA designation in Canada and in the U.S.

Fraser Cunningham
Managing Director
TF International

- Joined Triple Flag International in 2024 after having advised the company on numerous transactions, including the 2020 acquisition of Northparkes and the 2021 IPO
- Over 15 years of capital markets experience working in investment banking as a Managing Director at Bank of America and Scotiabank with a focus on base and precious metals companies

Warren Beil
VP & General Counsel

- Over 15 years of experience in capital markets, securities law and regulatory compliance and advising companies in the mining and natural resource sectors
- Former General Counsel to Maverix Metals Inc.
- Began career in private practice with Blake, Cassels & Graydon LLP, and a former senior associate with Gowling WLG LLP

John Cash
Senior Advisor,
Mining Engineering

- Technical mining professional with 35+ years of mining experience
- Former Senior Mining Consultant at Hatch
- Former Vice President, LOM Planning & Growth for Barrick Gold Corporation

David Lee
VP, Investor Relations

- Over 10 years of experience in investor relations and finance
- Former Director, Investor Relations at Barrick Gold Corporation
- Began career in equity research with National Bank Financial and Desjardins Capital Markets

NON-IFRS MEASURES

Adjusted Net Earnings and Adjusted Net Earnings per Share

Adjusted net earnings is a non IFRS financial measure, which excludes the following from net earnings: impairment charges, write-downs, and reversals, including expected credit losses; gain/loss on sale or disposition of assets/mineral interests; foreign currency translation gains/losses; increase/decrease in fair value of investments, prepaid gold interests and other; other non-recurring charges; and impact of income taxes on these items. Management uses this measure internally to evaluate our underlying operating performance for the reporting periods presented and to assist with the planning and forecasting of future operating results. Management believes that adjusted net earnings is a useful measure of our performance because impairment charges, write-downs, and reversals, including expected credit losses, gain/loss on sale or disposition of assets/mineral interests, foreign currency translation gains/losses, increase/decrease in fair value of investments, prepaid gold interests and other, and other non-recurring charges do not reflect the underlying operating performance of our core business and are not necessarily indicative of future operating results. The tax effect is also excluded by reconciling the amounts on a post-tax basis, consistent with net earnings. Management's internal budgets and forecasts and public guidance do not reflect the types of items we adjust for. Consequently, the presentation of adjusted net earnings enables users to better understand the underlying operating performance of our core business through the eyes of management. Management periodically evaluates the components of adjusted net earnings based on an internal assessment of performance measures that are useful for evaluating the operating performance of our business and a review of the non-IFRS measures used by industry analysts and other streaming and royalty companies. Adjusted net earnings is intended to provide additional information only and does not have any standardized definition under IFRS Accounting Standards and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS Accounting Standards. The measures are not necessarily indicative of gross profit or operating cash flow as determined under IFRS Accounting Standards. Other companies may calculate these measures differently.

Free Cash Flow

Free cash flow is a non-IFRS measure that deducts acquisition of other assets (excluding acquisition of investments and prepaid gold interests or mineral interests) from operating cash flow. Management believes this to be a useful indicator of our ability to operate without reliance on additional borrowing or usage of existing cash. Free cash flow is intended to provide additional information only and does not have any standardized definition under IFRS Accounting Standards and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS Accounting Standards. The measure is not necessarily indicative of operating profit or operating cash flow as determined under IFRS Accounting Standards. Other companies may calculate this measure differently.

Adjusted EBITDA

Adjusted EBITDA is a non IFRS financial measure, which excludes the following from net earnings: income tax expense; finance costs, net; depletion and amortization; impairment charges and write-downs, and reversals, including expected credit losses; gain/loss on sale or disposition of assets/mineral interests; foreign currency translation gains/losses; increase/decrease in fair value of investments and prepaid gold interests and other; non-cash cost of sales related to prepaid gold interests and other, and other non recurring charges. Management believes that adjusted EBITDA is a valuable indicator of our ability to generate liquidity by producing operating cash flow to fund working capital needs, service debt obligations and fund acquisitions. Management uses adjusted EBITDA for this purpose. Adjusted EBITDA is also frequently used by investors and analysts for valuation purposes, whereby adjusted EBITDA is multiplied by a factor or "multiple" that is based on an observed or inferred relationship between adjusted EBITDA and market values to determine the approximate total enterprise value of a company. In addition to excluding income tax expense, finance costs net, and depletion and amortization, adjusted EBITDA also removes the effect of impairment charges, write-downs, and reversals, including expected credit losses, gain/loss on sale or disposition of assets/mineral interests, foreign currency translation gains/losses, increase/decrease in fair value of investments, prepaid gold interests and other, non-cash cost of sales related to prepaid gold interests and other and other non-recurring charges. We believe these items provide a greater level of consistency with the adjusting items included in our adjusted net earnings reconciliation, with the exception that these amounts are adjusted to remove any impact of income tax expense as they do not affect adjusted EBITDA. We believe this additional information will assist analysts, investors and our shareholders to better understand our ability to generate liquidity from operating cash flow, by excluding these amounts from the calculation as they are not indicative of the performance of our core business and not necessarily reflective of the underlying operating results for the periods presented. Adjusted EBITDA is intended to provide additional information to investors and analysts and does not have any standardized definition under IFRS Accounting Standards and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS Accounting Standards. Adjusted EBITDA is not necessarily indicative of operating profit or operating cash flow as determined under IFRS Accounting Standards. Other companies may calculate adjusted EBITDA differently.

Gross Profit Margin and Asset Margin

Gross profit margin is an IFRS Accounting Standards financial measure which we define as gross profit divided by revenue. Asset margin is a non-IFRS financial measure which we define by taking gross profit and adding back depletion and non-cash cost of sales related to prepaid gold interests and other and dividing by revenue. We use gross profit margin to assess the profitability of our metal sales and asset margin to evaluate our performance in increasing revenue and containing costs and to provide a useful comparison to our peers. Asset margin is intended to provide additional information only and does not have any standardized definition under IFRS Accounting Standards and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS Accounting Standards.
