Statement on Alumar Fatality Investigation

PITTSBURGH, Oct. 14, 2026 - On September 16, 2026, an employee was found unconscious at the Alumar smelter and was immediately transported to a nearby hospital for medical treatment but later passed away. The incident was determined to be a work-related fatality.

Alumar has conducted and concluded its internal investigation into the incident involving lighting maintenance at its carbon plant. Alumar is also working with its partners and relevant authorities in their investigations.

The incident underscores the importance of verifying required safety controls before any production or maintenance begins.

We extend our deepest condolences to our colleague's family, friends, and coworkers. The loss of a colleague is deeply felt, and we recognize the lasting impact on everyone affected.
